Registration number 1998/009608/06
Separate Annual Financial Statements for the year ended
28 February 2026

Index

The reports and statements set out below comprise the annual financial statements presented to the shareholders:

Directors' Responsibilities and Approval

The directors are required in terms of the Companies Act of South Africa, 2008 to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the company as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards and SAICA's financial reporting guides as issued by the Accounting Practices Committee. The external auditors are engaged to express an independent opinion on the annual financial statements.

The separate annual financial statements are prepared in accordance with International Financial Reporting Standards and SAICA's financial reporting guides and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the board sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the company and all employees are required to maintain the highest ethical standards in ensuring the company’s business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the company is on identifying, assessing, managing and monitoring all known forms of risk across the company. While operating risk cannot be fully eliminated, the company endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the company’s cash flow forecast for the year to 28 February 2027 and, in the light of this review and the current financial position, they are satisfied that the company has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the company's annual financial statements. The annual financial statements have been examined by the company's external auditors and their report is presented on pages 4 to 6.

The annual financial statements are set out on pages 7 to 28, which have been prepared on the going concern basis, were approved by the board on 25 May 2026 and signed on its behalf by:

Clifford Katz   Philip Green

Declaration by Company Secretary

In our capacity as company secretary, we certify that, to the best of our knowledge and belief, ISA Holdings Limited has lodged with the Companies and Intellectual Property Commission, for the year ended 28 February 2026, all such returns as are required by a public company, in terms of the Companies Act and that all applicable returns are true, correct and up to date.

Independent Auditor's Report

To the Shareholders of ISA Holdings Limited

Opinion

We have audited the separate financial statements of ISA Holdings Limited ("the company") set out on pages 9 to 27, which comprise the separate statement of financial position as at 28 February 2026, the separate statement of comprehensive income, the separate statement of changes in equity and the separate statement of cash flows for the year then ended, and notes to the separate financial statements, including a summary of significant accounting policies. In our opinion, the separate financial statements present fairly, in all material respects, the separate financial position of the company as at 28 February 2026, and its separate financial performance and separate cash flows for the year then ended in accordance with IFRS® Accounting Standards and the requirements of the Companies Act of South Africa.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Separate Financial Statements section of our report. We are independent of the company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities, in accordance with the IRBA Codes and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.
We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette No. 49309 dated 15 September 2023 (EAR Rule), we report:

Final Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items, disclosures and in evaluating the effect of misstatement, both individually and in aggregate on the financial statements as a whole. Based on our professional judgement, we determined materiality for the company financial statements as a whole as follows:

	Financial statements of the company
Overall materiality	R1.2 million (2025: R1.1 million)
How we determined it	Based on approximately 5% of net profit before tax (2025: Approximately 5% of net profit before tax)
Rationale for benchmark applied	Based on our professional judgement, we have identified that net profit before tax as the most appropriate basis as we believe that it is a fundamental measure of the company's financial performance, providing a stable and consistent benchmark for determining materiality.

Independent Auditor's Report

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the separate financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

Other Information

The directors are responsible for the preparation and fair presentation of the separate financial statements in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error. In preparing the separate financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Crowe

Independent Auditor's Report

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the company to express an opinion on the separate financial statements. We are responsible for the direction, supervision and performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Audit Tenure

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 February 2015, we report that this is the third year that Crowe JHB is the auditor of ISA Holdings Limited.

Directors' Report

The directors submit their report for the year ended 28 February 2026.

1. Review of activities

Main business and operations

The company is the holding company of a group in the information security solution provision services and operates principally in South Africa. The operating results and state of affairs of the company are fully set out in the attached annual financial statements and do not in our opinion require any further comment.

2. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Authorised and issued share capital

There were no changes in the authorised or issued share capital of the company during the year under review.

4. Dividends

Dividends amounting to R 44 524 667 (2025 : R 19 218 085) were declared and paid during the year.

5. Directors

Alan Naidoo
Elia Tsouros
Clifford Katz
Nhlanhla Maphoti
Onica Seku
Philip Green
Priscilla Mogoboya

6. Changes to the board of directors

The board notified shareholders of its appointment of Elia Tsouros as an independent non-executive director effective 28 October 2025, as announced on SENS on the same day.

7. Secretary

Acorim Proprietary Limited

<u>Business Address:</u>	2nd Floor, North Block, Hyde Park Office Tower Corner 6th Road and Jan Smuts Avenue Hyde Park, 2196, South Africa

Directors' Report (continued)

8. Auditors

Crowe JHB continued in office in accordance with section 90 of the Companies Act of South Africa for the period under audit.

At the AGM, the shareholders will be requested to reappoint Crowe JHB as the independent external auditors of the Company and to confirm Mr Craig George as the designated lead audit partner for the 2027 Financial year.

9. Liquidity and solvency

The directors have performed the required liquidity and solvency tests required by the Companies Act 71 of 2008, as amended.

10. Directors interest in contracts

The directors have no interest in contracts.

11. Borrowing powers

The company's borrowing levels are not limited by the Memorandum of Incorporation and the company had an inter-group loan of R10 177 967.

12. Special resolutions

There were no special resolutions during the current year period.

13. Subsequent events

The directors are not aware of any subsequent events after the current year period.

14. Litigation statement

The company is not currently involved in any claims or lawsuits which individually or in the aggregate, are expected to have a material adverse effect on the business or its assets.

Accounting Policies

1. Material accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

Basis of preparation

The annual financial statements of the group have been prepared in accordance with IFRS® Accounting Standards, the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and the Companies Act. The annual financial statements have been prepared on the historical cost basis except for items at fair value as noted below. The policies set out below have been consistently applied to all years presented. The annual financial statements have been prepared on a going-concern basis, and are presented in South African Rand, rounded to the nearest thousand. The accounting policies are consistent with those of the prior reporting period.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements in conformity with IFRS, requires management to make estimates and assumptions that affect the reported amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. These estimates are based on management's best knowledge of current events and actions that the company may undertake in the future. Actual results in the future could ultimately differ from these estimates which may be material to these annual financial statements. The presentation of the results of operations, financial position and cash flows in the financial statements of the company is dependant upon and sensitive to the accounting policies, assumptions and estimates that are used as a basis for the preparation of these annual financial statements. Management has made certain judgements in the process of applying the company's accounting policies. These, together with the key assumptions concerning the future, and other key sources of the estimation uncertainty at the statement of financial position date are discussed below:

Impairment of financial assets

The company assesses on a forward-looking basis the expected credit losses associated with its loans from group companies carried at amortised cost. The measurement of expected credit loss reflects an unbiased and probability-weighted amount that is determined by internal generated credit ratings evaluating a range of possible outcomes; the time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date and past events, current conditions and forecasts of future economic conditions.

Accounting Policies

1.2 Financial instruments

Initial recognition and measurement

The company classifies financial instruments held in accordance with the provisions of IFRS 9 Financial Instruments. Broadly, the classification possibilities, which are adopted by the company. Financial assets which are debt instruments; are recognised at amortised cost. This category applies as the contractual terms of the instruments give rise, whose objective is met by holding the instrument to collect contractual cash flows; or on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows. Financial liabilities are recognised at amortised cost. Financial instruments and risk management presents the financial instruments held by the company based on their specific classifications.

Subsequent measurement

After initial recognition loans and receivables are measured at amortised cost using the effective interest rate method. After initial recognition, financial liabilities are measured at amortised cost using the effective interest rate method.

Measurement of expected credit losses using the general approach

After initial recognition financial assets are measured as follows:

Expected Credit Losses are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the company in accordance with the contract and the cash flows that the company expects to receive);

- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;

Based on the above process, the company groups its loans into Stage 1, Stage 2 and Stage 3, as described below:

Stage 1: When loans are first recognised, the company recognises an allowance based on 12 months expected credit losses. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.

Stage 2: When a loan has shown a significant increase in credit risk since origination, the company records an allowance for the lifetime expected credit losses Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.

Stage 3: Loans considered credit-impaired. The company records an allowance for the lifetime expected credit losses.

Impairment of loans receivable

The company recognises a loss allowance for expected credit losses on all loans receivable measured at amortised cost. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective loans. The company measures the loss allowance at an amount equal to lifetime expected credit losses (lifetime ECL) when there has been a significant increase in credit risk since initial recognition. If the credit risk on a loan has not increased significantly since initial recognition, then the loss allowance for that loan is measured at 12 month expected credit losses (12 month ECL).

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a loan. In contrast, 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a loan that are possible within 12 months after the reporting date. In order to assess whether to apply lifetime ECL or 12 month ECL, in other words, whether or not there has been a significant increase in credit risk since initial recognition, the company considers whether there has been a significant increase in the risk of a default occurring since initial recognition rather than at evidence of a loan being credit impaired at the reporting date or of an actual default occurring.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default, taking the time value of money into consideration. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. The exposure at default is the gross carrying amount of the loan at the reporting date. Lifetime ECL is measured on a collective basis in cases where evidence of significant increases in credit risk are not yet available at the individual instrument level. Loans are then grouped in such a manner that they share similar credit risk characteristics, such as nature of the loan, external credit ratings (if available), industry of counterparty etc. The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

If the company has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the company measures the loss allowance at an amount equal to 12 month ECL at the current reporting date, and visa versa. An impairment gain or loss is recognised for all loans in profit or loss with a corresponding adjustment to their carrying amount through a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance (note 3).

Trade and other payables

Trade payables and other payables are classified as other financial liabilities at amortised cost.

Effective interest rate method

The effective interest rate method is a method of calculating the amortised cost of a financial instrument and of allocating the interest on that instrument over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the instrument.

Derecognition

The derecognition of a financial instrument occurs when the company no longer controls the contractual rights or the obligation has been extinguished, which is normally the case when the instrument is sold, or all the cash flows attributable to the instrument are passed through an independent third party. Any profit or loss on derecognition is recognised in the statement of comprehensive income.

1.3 Share capital and equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from the proceeds and are taken off the share premium account.

1.4 Revenue from contracts with customers

The company recognises revenue from the following major sources:

- Dividends received

Dividend income is recognised in the income statement when the entity's right to receive payment is established.

1.5 Investment in subsidiary

Investments in subsidiary are stated at cost less allowance for impairment losses where appropriate.

1.6 Interest revenue

The company received interest from its loan receivable, which is recognised in the statement of comprehensive income, using the effective interest rate method.

1.7 Tax

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to the other comprehensive income, or;
- a business combination.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income. Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither
accounting profit nor taxable profit (tax loss). A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

1.8 Related party transactions

Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making financial or operating decisions. Key management personnel are those having the responsibility for planning, directing and controlling activities directly or indirectly, including any director of that entity. Only the directors are considered to be key management for the company. Any transactions between key management personnel and the company are disclosed in Note 14.

1.9 Dividends declared

Dividends declared by the company to holders of the company's shares are recognised in the statement of changes in equity. Dividends that have not been declared at the statement of financial position date are not accounted for in the current period. Such dividends are disclosed where the declaration occurred after the statement of financial position date, but before these financial statements are approved for issue.

1.10.1 Standards and Interpretations effective and adopted in the current year

There were no new standards and interpretations that are relevant to the company in the current financial year.

1.10.2 Standards and Interpretations issued and not yet effective relevant to the company

There are several forthcoming new standards and interpretations thereto, or amendments to standards and interpretations, which have been issued by the International Accounting Standards Board (IASB) prior to the publication of these financial statements, but are effective only in future accounting periods. These statements have not yet been applied and the company does not expect them to have an impact on the financials of the company as currently operating.

IFRS18 Presentation and disclosure in financial statements – effective date: 1 January 2027

IFRS 18 will replace IAS 1 Presentation of Financial Statements and introduces new requirements for the presentation and disclosure of information in the financial statements, particularly in relation to the statement of profit or loss, management defined performance measures and enhanced principles relating to aggregation and disaggregation of information.
The standard introduces specified categories and subtotals in the statement of profit or loss and requires additional disclosures for management defined performance measures presented outside the financial statements. The adoption of IFRS 18 will also require comparative information to be restated in line with the new presentation requirements.

The company is currently assessing the impact of IFRS 18 on the presentation and disclosure of its financial statements. While the standard is not expected to have a material impact on the recognition or measurement of transactions, it is expected to affect the presentation and disclosure of information in the financial statements.

Notes to the annual financial statements	**2026**	**2025**

Notes to the annual financial statements	**2026**	**2025**

Application of consoliation exemption

These separate annual financial statements presented have been prepared in accordance with IFRS 10 and are not consolidated financial statements as the entity qualifies for the consolidation exemption in IFRS10 Consolidated Financial Statements.

ISA Holdings Limited produces consolidated financial statements available for public use. These financial statements can be obtained from www.isa.co.za.

7. Tax paid

	2026	2025
Balance at beginning of the year	10,991	10,268
Current tax for the year recognised in profit or loss	-102,922	-93,876
Tax receivable from prior year	-	-
Balance at the end of the year (tax receivable)	-14,198	-10,991
	-106,130	-94,599

8. Share capital

The shareholder spread disclosure is disclosed in the Integrated annual report of the group.

	2026	2025
Authorised		
500 000 000 Ordinary shares at par value of 1 cent each	5,000	5,000
Issued		
170 592 593 Ordinary shares at par value of 1 cent each	1,705,926	1,705,926

The issued shares have been fully paid.

9. Share Premium

	2026	2025
Balance at the beginning of the year	7,075,365	7,075,365
Movement during the year	-	-
Balance at the end of the year	7,075,365	7,075,365
Total Share Capital and Share Premium	8,781,291	8,781,291

Notes to the annual financial statements	**2026**	**2025**

10. Loans to group companies

Subsidiary		
Information Security Architects Proprietary Limited	10,177,967	10,293,518
	10,177,967	10,293,518

The loan to Information Security Architects Proprietary Limited, a subsidiary of ISA Holdings Limited is unsecured, bears interest at 75% of prime lending rate and has no fixed terms of repayment.

Exposure to credit risk

Loans receivable inherently expose the company to credit risk, being the risk that the company will incur financial loss if counterparties fail to make payments as they fall due.

Credit loss allowance

The following tables set out the carrying amount, loss allowance and measurement basis of expected credit losses for group receivable by credit rating grade:

Financial Instrument

2026	**Basis of loss allowance**	**Basis of loss allowance**	**Loss allowance**
Loans to subsidiary			
Information Security Architects Proprietary Limited	12 month ECL (not credit impaired)	10,177,967	-
Total credit loss allowance			
Loans to fellow subsidiaries		10,177,968	-

2025	**Basis of loss allowance**	**Basis of loss allowance**	**Loss allowance**
Loans to subsidiary			
Information Security Architects Proprietary Limited	12 month ECL (not credit impaired)	10,293,518	-
Total credit loss allowance			
Loans to fellow subsidiaries		10,293,518	-

Fair value of group loans receivable

The fair value of group loans receivable approximates their carrying value

Notes to the annual financial statements	2026	2025
11. Trade and other payables		
Other payables (Unclaimed dividends)	845,744	710,764
Fair value of trade payables	845,744	710,764

Total emoluments	4,682,048	3,775,164	1,046,832	9,504,043

* - Allowances include medical aid and travel.

17. Risk management

Financial risk management

The company’s activities expose it to a variety of risks: capital risk, liquidity risk, market risk (interest rate risk) and credit risk. The company’s risk management policies are established to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly by the board of directors to reflect changes in market conditions and the company's financial activities. The company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects of the company’s financial performance. Risk management is carried out by the financial department under policies approved by the board of directors. The financial department identifies, evaluates and manages financial risk. There have been no major changes in the company’s risk to which the group has been exposed from the prior year, or in management’s strategies in managing these risks. Management do not consider there to be any significant concentration of any of the above risks in the business.

17. Risk management (continued)

Capital risk

The board’s policy is to retain sufficient capital to provide for the future development of the business and to maintain investor, creditor and market confidence. The board monitors both the demographic spread of shareholders as well as the return on capital, which the company defines as shareholders equity and the level of distributions to shareholders by way of dividends. The levels of distribution takes into account the prevailing market conditions and future cash requirements of the business.

There were no changes to the company’s approach to capital management during the year.

	2026	2025
Total equity	9,347,422	9,594,745
Capital	9,347,422	9,594,745
Capital	9,347,422	9,594,745
Borrowings	-	-
Overall financing	9,347,422	9,594,745
Capital-to-overall financing ratio	1	1

Market risk

Market risk is the risk that changes in market prices, which include risks associated with currency risk as well as interest rate risks, detailed below. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Liquidity risk

The company's' liquidity risk relates to ensuring that there is sufficient funds available to cover future commitments. The company manages liquidity risk through an ongoing review of such commitments and credit facilities. The company manages liquidity risk by maintaining adequate reserves and borrowing facilities.

The table below analyses the company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due withing 12 months equal their carrying balances as the impact of discounting is not significant.

As at 28 February 2026	Less than 1 year	1 - 5 years	5+ years	Total
Trade and other payables	845,744	-	-	845,744
	845,744	-	-	845,744

As at 28 February 2025	Less than 1 year	1 - 5 years	5+ years	Total
Trade and other payables	710,764	-	-	710,764
	710,764	-	-	710,764

17. Risk management (continued)

Interest rate risk

The sensitivity analysis below presents the interest rate risk in accordance with IFRS 7. It has been determined that based on the exposure to interest rates for financial instruments at the statement of financial position date and shows the effects of changes in market interest rates on interest payments, interest income and expenses and if appropriate, shareholders' equity. For variable liabilities, the analysis is prepared assuming the average liability was outstanding for the whole year. A 200 basis point increase or decrease represents management's assessment of the reasonable possible change in interest rates.

During the year ended 28 February 2026, if interest rates on Rand-denominated balances had increased by 200 basis points with all other variables held constant, the interest income for the year would have been affected by R224 636 (2025: R218 800) on the company interest higher/lower, mainly as a result of higher/lower interest income on floating rate balances.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The company is exposed to credit risk on loans receivable. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored.

In order to calculate credit loss allowances, management determine whether the loss allowances should be calculated on a 12 month or on a lifetime expected credit loss basis. This determination depends on whether there has been a significant increase in the credit risk since initial recognition. If there has been a significant increase in credit risk, then the loss allowance is calculated based on lifetime expected credit losses. If not, then the loss allowance is based on 12 month expected credit losses. This determination is made at the end of each financial period. Thus the basis of the loss allowance for a specific financial asset could change year on year.

At year end there were no significant concentrations of credit risk. The maximum exposure of credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

Financial assets exposed to credit risk were as follows:

Financial assets measured at amortised cost	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
2026			
Loans to group companies	10,177,967	-	10,177,967
2025			
Loans to group companies	10,293,518	-	10,293,518

Notes to the annual financial statements

18. Subsequent events

The directors are not aware of any material changes or events after year end and up to the date of this report requiring adjustment to or disclosure in the financial statements.

19. Going Concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business. The directors have no reason to believe that the company will not continue as a going concern for the foreeable future.

Registration number 1998/009608/06
