Approval of the Annual Financial Statements

for the year ended 31 March 2026

The preparation of the consolidated and separate Annual Financial Statements that fairly represent the results of Crookes Brothers Limited (Crookes Brothers, the Group or the Company) in accordance with the Companies Act, No 71 of 2008 of South Africa (Companies Act), IFRS® Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), SAICA Financial Reporting Guides (as issued by the Accounting Practices Committee), the Financial Reporting Pronouncements (as issued by the Financial Reporting Standards Council) and JSE Listings Requirements, is ultimately the responsibility of the board of directors of Crookes Brothers (Board of Directors).

The Board also ensures an independent audit of the Annual Financial Statements by the external auditors. The Board confirms that the internal accounting control systems have adequate verification and maintenance of accountability for the Group's assets, and assure the integrity of the Annual Financial Statements. There was no major breakdown in controls experienced during 2026 that could undermine the reliability of the Annual Financial Statements. Based on the financial performance of the Group, its cash flow projection to the end of March 2027, secured funding lines, and positive solvency and liquidity tests, the Directors confirm their view that the Group will remain operational for the foreseeable future. The Annual Financial Statements were consequently prepared on a going concern basis.

At the Board meeting held on 25 June 2026, the Board approved the Annual Financial Statements and further authorised Mr Larry Riddle and Mr Kennett Sinclair in their respective capacities as Chairperson and Chief Executive Officer to sign off the Annual Financial Statements. The Annual Financial Statements, which appear on pages 14 to 97, are therefore signed on its behalf by:

Larry Riddle
Chairperson

Kennett Sinclair
Chief Executive Officer

Durban
25 June 2026

CEO and CFO responsibility statement

for the year ended 31 March 2026

Each of the Directors, whose names are stated below, hereby confirm that:

- (a) The Annual Financial Statements set out on pages 14 to 97, fairly present in all material respects the financial position, financial performance and cash flows of the issuer in terms of IFRS Accounting Standards;
- (b) To the best of our knowledge and belief, no facts have been omitted, or untrue statements made that would make the Annual Financial Statements false or misleading;
- (c) Internal financial controls have been put in place to ensure that material information relating to the issuer and its consolidated subsidiaries has been provided to effectively prepare the financial statements of the issuer;
- (d) The internal financial controls are adequate and effective and can be relied upon in compiling the Annual Financial Statements, and we have fulfilled our role and function as Executive Directors with primary responsibility for implementation and execution of controls;
- (e) Where we are not satisfied, we have disclosed to the Audit and Risk committee and the auditors any deficiencies in design and operational effectiveness of the internal financial controls and have taken steps to remedy the deficiencies; and
- (f) We are not aware of any fraud involving Directors.

Signed by the Chief Executive Officer and the Chief Financial Officer:

Kennett Sinclair
Chief Executive Officer

Melani De Castro
Chief Financial Officer

Compliance statement by the Group Company Secretary

for the year ended 31 March 2026

The Group Company Secretary of Crookes Brothers Limited certifies that, in terms of section 88(2) of the Companies Act, No 71 of 2008, as amended, the Company has lodged with the Companies and Intellectual Property Commission of South Africa all such returns and notices as are required of a public company in terms of this Act and that all such returns are true, correct and up to date in respect of the financial year ended 31 March 2026.

Highway Corporate Services (Pty) Ltd

Company Secretary

Durban

25 June 2026

Preparation of the Annual Financial Statements

for the year ended 31 March 2026

The consolidated and separate Annual Financial Statements, which appear on pages 14 to 97 have been prepared under the supervision of Melani De Castro, CA(SA) and were approved by the Board of Directors on 25 June 2026.

Melani De Castro

Chief Financial Officer

Durban

25 June 2026

Report of the Audit and Risk Committee

for the year ended 31 March 2026

The Audit and Risk Committee is a statutory committee in terms of the Companies Act of South Africa and a committee of the Board of Directors. In addition to having specific statutory responsibilities in terms of the Companies Act and JSE Listings Requirements, it assists the Board through advising and making recommendations on financial reporting, oversight of internal financial controls, risk governance, external and internal audit functions and statutory and regulatory compliance of the Company and the Group.

Role of the committee

A formal charter, which details statutory and delegated duties, governs the committee's activities.

The function of the committee is to assist the Directors in discharging their responsibilities relating to the safeguarding of assets, the operation of adequate and effective systems and control processes, the preparation of fairly presented Financial Statements in compliance with all applicable legal and regulatory requirements and accounting standards, and the oversight of the external and internal audit appointments and functions.

Terms of reference

The committee has adopted formal terms of reference that have been approved by the Board of Directors. The committee has executed its duties during the past financial year in accordance with these terms of reference.

Composition and proceedings

The committee consists of three independent Non-executive Directors. Details of committee members are as below. The Chief Executive Officer, Chief Financial Officer, senior financial and IT executives of the Company and representatives from the external and internal auditors attend the committee meetings by invitation. The auditors, both external and internal, have unrestricted access to the committee Chairperson or any other member of the committee as required.

Membership

Director	Qualifications	Designation	Appointed
Farzanah Mall*	BCom, BAcc (Hons), CA(SA)	Independent non-executive	November 2021
Thomas Attree*	MA(Hons), CA (ICAEW)	Independent non-executive	April 2026
Richard Chance	BA LLB, CSEP (Columbia)	Independent non-executive	February 2019
Tim Crookes	M Agric Mgt <i>cum laude</i>	Independent non-executive	June 2024

* Chairperson

Following the death of the Chairperson, Farzanah Mall, on 5 March 2026, Thomas Attree was appointed as Chairperson with effect from 21 April 2026.

Meetings

The committee is required to meet at least twice a year. The committee held three meetings during the period under review, including one special meeting convened to discuss the impairment of Murrmo Macadamias Limitada (MML). The Chairperson was unable to attend two meetings due to ill health; accordingly, Richard Chance and Tim Crookes each chaired a meeting in her stead.

Fees paid to the committee members and proposed fees for 2027 are disclosed in the Directors' report.

Statutory duties

In execution of its statutory duties during the financial year under review, the committee:

- nominated Deloitte & Touche (Deloitte) and Deloitte audit partner Divania Naidoo as external auditor after considering, *inter alia*, Deloitte's independence;
- determined Deloitte's fees;
- considered Deloitte's terms of engagement;
- ensured that the appointment of Deloitte complied with the relevant provisions of the Companies Act of South Africa, the JSE Listings Requirements and King IV;
- pre-approved all non-audit service work with Deloitte;
- confirmed that there were no complaints relating to accounting practices and internal audit of the Company, the content or auditing of its financial statements, the internal financial controls of the Company and any other related matters;
- considered all key audit matters, specifically the valuation assumptions of Group and Company biological assets and the MML and Murrmo Farming Limitada impairments;

- ensured that appropriate financial reporting procedures existed and are operating, which include consideration of all entities included in the Annual Financial Statements, to ensure that the Company has access to all the financial information of the Company to allow it to effectively prepare and report on the Annual Financial Statements of the Company;
- confirmed responsibilities to review information obtained from the auditors in terms of paragraph 5.7(h)(iii) of the JSE Listings Requirements;
- advised the Board on any matters concerning the Group and Company accounting policies, financial controls, records and reporting, where applicable; and
- supported the appropriateness of the going concern premise in the preparation of the Annual Financial Statements.

Internal financial controls and internal audit

In execution of its delegated duties in this area, the committee has:

- reviewed and recommended the internal audit charter for approval;
- evaluated the independence, effectiveness and performance of the internal audit function;
- reviewed the effectiveness of the Company's system of key internal financial controls;
- reviewed the competence, qualifications and experience of the Group Company Secretary;
- reviewed significant issues raised through the external and internal audit process and the adequacy of corrective action in response to such findings;
- reviewed audit reports regarding the adequacy of accounting records; and
- reviewed policies and procedures for preventing and detecting fraud.

The Internal Audit Manager reported to the committee that, in his opinion significant internal financial controls operated effectively during the period under review. The Internal Audit Manager reports directly to the committee and has unrestricted access to the committee Chairperson.

Based on the processes and assurances obtained, the committee believes that significant internal financial controls are effective.

Regulatory compliance

The committee has complied with all applicable legal, regulatory and other responsibilities.

IT Governance

The committee has oversight responsibility for IT governance and manages the Group's adherence through various charters, plans, policies, procedures and practices. Management monitor IT governance and the adherence to various policies and procedures and provides written feedback to the committee at each meeting. The committee is satisfied that the reports of management adequately address IT governance requirements, including the appropriateness of the IT strategy and policies, systems and network architecture, applications, disaster recovery and cyber security management.

Risk Governance

The committee plays a role in overseeing the identification of risks, ensuring the development of policies, procedures and controls, evaluating risk mitigation strategies, promoting effective and efficient risk management practices and providing appropriate advice on risk issues to facilitate decision-making by the Board.

There is an ongoing process for identifying, evaluating and managing the strategic risks faced by the Group. These are subject to review and discussion at both committee and Board level.

In keeping in line with its mandate, the committee reviewed:

- the risk charter;
- the risk register; and
- the risk strategy document.

JSE Reporting

The committee evaluated the submissions made to it by the Company Secretary and management and is satisfied that the Group has met the JSE Listings Requirements and the requirements of the King IV Code. The committee has received and considered:

- The findings in the JSE's report for compliance with IFRS, as contained in the Report back on proactive monitoring of Financial Statements in 2025.
- Amendments and proposed amendments to the JSE Listings Requirements dealing with, *inter alia*, Simplification Project, Corporate Governance and ancillary matters.

Report of the Audit and Risk Committee continued

for the year ended 31 March 2026

JSE reporting requirements 5.9

The committee has considered the approach adopted by management to ensure that the CEO and CFO responsibility statement sign-off on the Financial Statements and internal financial reporting controls in terms of paragraph 5.9 of the JSE Listings Requirement is appropriately supported. In satisfying itself in this regard, the committee has evaluated:

- the risk assessment and scoping framework, including the determination of materiality applied to ensure that significant areas of risk, complexity and judgement are included for the evaluation of internal financial reporting controls;
- the process followed for the evaluation of the design of existing internal financial reporting controls and the need for amending and/or supplementing those controls;
- the ongoing implementation of the aforementioned controls and whether they have operated effectively during the reporting period under review;
- the impact of changes to the Group's control environment during the reporting period, including changes in key personnel (death of previous CFO), processes and governance structures and management's actions to maintain an effective system of internal financial reporting controls and concur the CEO and CFO attestation process; and
- the findings of assurance providers, including management declarations and internal audit findings, following their assessment of the operating effectiveness of internal financial reporting controls.

Finance function

The committee is satisfied that the late Nigel Naidoo CA (SA), who served as Chief Financial Officer during the period under review, possessed the appropriate expertise and experience to meet his responsibilities in that position. The committee is also satisfied that Melani De Castro, who was appointed as Chief Financial Officer with effect from 1 April 2026, possesses the appropriate expertise and experience and is competent to fulfil the role. The committee is further satisfied with the expertise and adequacy of resources within the finance function. In making these assessments the committee has obtained feedback from both the external and internal audit.

Based on the processes and assurances obtained the committee believes that the accounting practices are effective.

External audit

Deloitte served as Crookes Brother's registered external auditors for the 2026 financial year. The committee is satisfied that in discharging its duties in terms of its mandate, Deloitte is independent of the Group. In reaching this conclusion, the committee considered Deloitte's independence processes, and the extent of non-audit services provided. External audit fees approved for the 2026 financial year amounted to R3.8 million (excluding VAT). Following its assessment and review, the committee accepted the Report on Audit Quality submitted by the external auditor as required in terms of the JSE Listings Requirements and confirmed that the external auditor and designated audit partner, Divania Naidoo, met the required standards prescribed by the JSE Listings Requirements.

Annual financial statements

Following the committee's review of the Annual Financial Statements for the year ended 31 March 2026, it is of the opinion that, in all material respects, they comply with the relevant provisions of the Companies Act and IFRS Accounting Standards as issued by the IASB, and the JSE Listings Requirements and fairly present the results of operations, cash flows and the financial position of Crookes Brothers. On this basis, the committee recommended that the Board of Directors approve the Annual Financial Statements of Crookes Brothers for the year ended 31 March 2026.

On behalf of the Audit and Risk committee

Thomas Attree

Chairperson

Durban

24 June 2026

Directors' Report

for the year ended 31 March 2026

The Directors have pleasure in presenting the Annual Financial Statements of the Group and the Company for the year ended 31 March 2026.

Nature of business

Crookes Brothers is an agricultural business growing sugar cane, bananas and macadamia nuts in South Africa, Eswatini, Zambia and Mozambique, and has a long-term property development in Scottburgh, KwaZulu-Natal, South Africa.

Share capital

The authorised share capital at 31 March 2026 consisted of 16 000 000 shares of 25 cents each (2025: 16 000 000). The company has no unlisted securities.

The number of issued shares is 15 264 317 at 31 March 2026 (2025: 15 264 317).

The Company holds 135 277 treasury shares on 31 March 2026 (2025: 200 576). Such shares are classified as treasury shares for IFRS purposes only and have been acquired for the benefit of the participants under the Deferred Bonus Scheme ("DBS"). Refer to note 28.4.

The Directors propose that the general authority granted to them to repurchase ordinary shares be renewed at the forthcoming Annual General Meeting.

Financial results

Group loss for the year ended 31 March 2026 amounted to R274.0 million (2025: attributable profit R89.8 million), resulting in a loss per share of 1 869.4 cents (2025: earnings per share 446.4 cents). Headline loss per share amounted to 167.2 cents (2025: headline earnings per share 425.1 cents).

Full details of the financial position and results of the Group and Company are set out in the Annual Financial Statements.

Dividends

No dividends were declared for the year ended 31 March 2026 (2025: 150 cents per share).

Directorate

Brief *curricula vitae* of the current Directors will be disclosed in the integrated report to be distributed on or about 30 July 2026. Details of the Directors' remuneration and the incentive schemes appear in notes 36 and 39 of the Annual Financial Statements.

It is with deep sadness that the Board records the untimely passing of the Chief Financial Officer, Nigel Naidoo, on 7 March 2026, and the Independent Non-executive Director and Chairperson of the Audit and Risk Committee, Farzanah Mall, on 5 March 2026. The Board acknowledges and expresses its sincere appreciation for their significant contribution, dedication and valued service to the Group.

Melani De Castro was appointed as Chief Financial Officer and Executive Director of the Company with effect from 1 April 2026.

Thomas Attree was appointed as an Independent Non-executive Director and Chairperson of the Group's Audit and Risk Committee with effect from 21 April 2026.

In accordance with paragraph 5.6 of the JSE Listings Requirements, the Nomination Committee undertook a formal assessment of the suitability, fitness and propriety of the appointed CFO and Audit Committee Chairperson and is satisfied that both Melani De Castro and Thomas Attree meet the required criteria for their respective roles.

The Company is incorporated in the Republic of South Africa and is listed on the JSE Limited (Main Board – General Segment).

Directors' Report continued

for the year ended 31 March 2026

Interest of Directors in share capital

At 31 March 2026, the Directors of the Company held beneficial interests in 1 073 103 of the Company's issued ordinary shares (2025: 1 115 485). The register of Directors' and managers' interests in the share capital of the Company is available for inspection at the Company's registered office. Refer to note 39.3 for details of the beneficial interests held by individual Directors, prescribed officers and directors of major subsidiaries.

Non-executive Directors Gary Vaughan-Smith and Tim Denton represent the interests of Silverlands (SA) Plantations Sarl, which owns 6 838 444 shares representing 44.8% of the issued share capital of the Company at year end (2025: 6 838 444).

There have been no changes to the Directors' interests between the end of the financial year and date of approval of the Annual Financial Statements.

Directors' remuneration

At the forthcoming Annual General Meeting, shareholders will be requested to pass two separate ordinary resolutions in respect of the Group's remuneration policy and implementation report and a special resolution to approve the fees payable to Non-executive Directors with effect from 1 April 2026.

The proposed Director's fees for 2027 as approved by the Human Capital Committee are as follows:

	Current 2026 Rands per annum	Proposed 2027 Rands per annum
Board		
Chairman	616 463	641 122
Other Non-executive Board members	285 335	296 748
Audit and Risk Committee		
Chairman	147 951	153 869
Other members	63 408	65 944
Human Capital Committee		
Chairman	57 067	60 491
Other members	38 047	39 569
Social and Ethics Committee		
Chairman	57 067	59 350
Other Non-executive Board members	38 047	39 569
Agriculture Committee		
Chairman	57 067	59 350
Other members	38 047	39 569

Group companies

The names and financial information with respect to the Company and its subsidiaries are disclosed in note 22 of the Annual Financial Statements. Information on joint venture and associate companies is disclosed in note 23 of the Annual Financial Statements.

Special resolutions adopted by the Company and its subsidiary companies

Apart from special resolutions approved at the Company's Annual General Meeting held in 2025, no other special resolutions were approved.

Audit and Risk Committee

At the forthcoming Annual General Meeting, pursuant to the requirements of section 94(2) of the Companies Act, shareholders will be requested to pass ordinary resolutions appointing the chair and members of the Audit and Risk Committee.

Major shareholders

Shareholders holding beneficial interests, directly or indirectly, in excess of 5% of the issued share capital of the Company are disclosed in note 39.4 of the Annual Financial Statements.

Auditor

At the forthcoming Annual General Meeting, pursuant to the requirements of section 90(1), read with section 61(8)(c) of the Companies Act of South Africa, shareholders will be requested to pass an ordinary resolution re-appointing Deloitte & Touche as the Group's external auditors for the financial year ending 31 March 2027, with Divania Naidoo acting as the designated audit partner.

Events after the reporting period

Events after the reporting period that have a material or significant effect in the affairs or financial position of the Group and Company are disclosed in note 41 of the Annual Financial Statements.

Going concern

The Directors consider that the Group and Company have adequate resources to continue operating for the foreseeable future and that it is therefore appropriate to adopt the going concern basis of accounting in preparing the Group and Company's Annual Financial Statements. Based on the financial performance of the Group, its cash flow projection to the end of March 2027, secure funding lines, and positive solvency and liquidity tests, the Group will remain operational for the foreseeable future.

Independent auditor's report

To the shareholders of Crookes Brothers Limited

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of Crookes Brothers Limited and its subsidiaries (the group and company) set out on pages 14 to 97, which comprise the consolidated and separate statements of financial position as at 31 March 2026; and the consolidated and separate statements of profit or loss and other comprehensive income; the consolidated and separate statements of changes in equity; and the consolidated and separate statements of cash flows for the year then ended; and notes to the consolidated and separate financial statements, including material accounting policy information.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of Crookes Brothers Limited and its subsidiaries as at 31 March 2026, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies Act of South Africa.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report. We are independent of the group and company in accordance with the Independent Regulatory Board for Auditors' *Code of Professional Conduct for Registered Auditors* (IRBA Code), as applicable to audits of financial statements of public interest entities, and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants* (including *International Independence Standards*). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette No. 49309 dated 15 September 2023 (EAR Rule), we report:

Final Materiality

We define materiality as the magnitude of misstatement in the consolidated and separate financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the nature and extent of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the consolidated and separate financial statements as a whole as follows:

	Financial statements – group	Financial statements – company
Overall materiality	R11.660 million	R5.840 million
How we determined it	Based on 1.5% of total revenue	Based on 1% of total assets
Rationale for benchmark applied	A key judgement in determining materiality is the appropriate benchmark to select, based on our perception of the needs of shareholders. We considered which benchmarks and key performance indicators have the greatest bearing on shareholder decisions. For Group financial statements, we determined that Revenue is the key benchmark given the fluctuations in profit before tax. Revenue provides a more stable benchmark. For Company financial statements, we determined that total assets is the key benchmark given that the entity mainly serves as the investment holding company.	

Scope of our audit

Our Group audit was scoped by obtaining an understanding of the Group and its environment, including the structure and organisation of the Group, and assessing the risks of material misstatement at the Group level.

We selected components at which audit work in support of the group audit opinion needed to be performed in order to provide an appropriate basis for undertaking audit work to address the risks of material misstatement.

Our selection was informed by taking into account the component's contribution to relevant classes of transactions, account balances or disclosures.

Based on our assessment, we performed work at 10 components. The following audit scoping was applied:

- 5 components were audits of the component's financial information; and
- 5 components were an audit of one or more classes of transactions, account balances or disclosures. Residual values were addressed by risk assessment and analytical procedures performed at a group level. These 10 components account for 91% of the Group's net assets and 99% of the Group's revenue.

Net Assets

Revenue

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In terms of the EAR Rule, we are required to report the outcome of audit procedures or key observations with respect to the key audit matters and these are included below.

Key audit matter	How the matter was addressed in the audit
1. Valuation of Biological Assets The biological assets comprise sugar cane, banana and macadamia crops. As disclosed in notes 9 and 24 of the consolidated and separate financial statements, the valuation of these crops included in the biological assets amounted to R323m (2025: R345m). The net fair value adjustment for the year ended 31 March 2026 decreased profit by R29m (2025: R15m). The crops are measured at fair value less estimated costs to sell in accordance with IAS 41: Agriculture and IFRS 13: Fair Value Measurement. The fair value is determined using an appropriate valuation model with relevant inputs for price, tonnage yield, recoverable value percentage, bunch volume percentage, age factor, discount rates and a risk factor adjustment. As a result of the significant audit effort required to assess the judgements made by management with regards to the inputs into the valuation models, the valuation of the biological assets was considered a key audit matter in our audit of the consolidated financial statements.	• Assessed the design and evaluated implementation of the manual controls in respect of the determination of inputs into the biological assets fair value model as well as the application of the relevant IAS 41 and IFRS 13 considerations; • Tested the operating effectiveness of the controls relating to the review of the valuation of the biological assets; • Utilised internal valuation experts to test the appropriateness of the discount rate used in the discounted cash flows; • Performed a retrospective review on prior year's forecasted inputs (noted in the risk description) to the actual results achieved; • Assessed the reasonableness of the inputs contained within the fair value model; • Performed an independent sensitivity analysis on the biological asset model for all key assumptions used in the model; and • Assessed the disclosures in the annual financial statements in relation to the fair value of the biological assets and the estimation uncertainty to determine if they are in compliance with IFRS 13. The valuation of biological assets and the disclosures are considered appropriate.

Independent auditor's report continued

To the shareholders of Crookes Brothers Limited

Key audit matter	How the matter was addressed in the audit
2. Murrimo Macadamia Limitada and Murrimo Farming Limitada Impairment Crookes Brothers Limited (CBL) holds an investment in Murrimo Macadamia Limitada (MML) and Murrimo Farming Limitada (MFL). At year end, MML was in breach of its loan with AgDevCo as noted in note 29. The directors perform an impairment test in line with the requirements of IAS 36: Impairments of Assets (IAS 36) to assess the recoverability of the carrying value of the cash generating units (CGUs). As a result of the significant audit effort required to assess the complexities of the breach and the judgements made by management with regards to the inputs into the valuation models, the valuation of the investment and related property, plant and equipment was considered a key audit matter in our audit of the consolidated and separate financial statements.	• Discussions were held with management and review of the minutes of meetings and loan agreements were performed to obtain an understanding of the consequences of the loan breach; • Utilised internal valuation experts to test the appropriateness of the weighted average cost of capital used in the discounted cash flows; • Performed an independent sensitivity analysis on the key assumptions used in the model; and • Assessed the disclosures in the annual financial statements to determine if they are in compliance with IAS 36 and IAS 1. The valuation of the investment and related property, plant and equipment and the related disclosures are considered appropriate.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Crookes Brothers Limited Consolidated and Separate Annual Financial Statements" for the year ended 31 March 2026", which includes the Directors' Report, the Audit Committee's Report and the Company Secretary's Certificate, as required by the Companies Act of South Africa. The other information does not include the consolidated or the separate financial statements and our auditor's reports thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the group and company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's and/or company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and/or the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report, unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Audit Tenure

In terms of the IRBA Rule published in Government Gazette No. 39475 dated 4 December 2015, we report that Deloitte & Touche has been the auditor of Crookes Brothers Limited for 2 years.

Consolidated segmental analysis

for the year ended 31 March 2026

Products and services from which reportable segments derive their revenues

Information reported to the Chief Executive Officer (chief operating decision maker) for the purposes of resource allocation and assessment of segment performance, focuses on the types of goods or services delivered or provided, and in respect of the “sugar cane”, “bananas”, “macadamias” and “property” operations, the information is further analysed based on the different classes of customers in note 5. The Chief Executive Officer of the company has chosen to organise the Group around differences in products and services across its farming and property operations. Other revenue streams that have no direct bearing on crop or property performance have been combined under “other operations”, which is disaggregated in note 5. “Unallocated” refers to specific income or expense transactions, as well as assets and liabilities that cannot be readily allocated to one or more of the Group's reportable segments above. Unallocated therefore refers to “head office” corporate income and expenses, as well as pure head office related assets or liabilities. Tax expense is an unallocated corporate expense.

Notes to the financial statements

for the year ended 31 March 2026

1. General information

Crookes Brothers Limited ("the Company") is incorporated in the Republic of South Africa. The addresses of its registered office and principal place of business are disclosed in the inside back cover. The principal activities of the Company and its subsidiaries are described in the Directors' Report and note 22.

2. Adoption of new and revised standards

2.1. New and revised accounting standards applied with no material effect on the Financial Statements

The following new and revised accounting standards have been adopted in these Financial Statements. The application of these new and revised accounting standards has not had any material impact, on the amounts reported for the current and prior years and are mandatorily effective.

Lack of exchangeability – Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates (effective 1 January 2025)	IAS 21, prior to the Amendments, did not include explicit requirements for the determination of the exchange rate when a currency is not exchangeable into another currency, which led to diversity in practice. The Amendments introduce requirements to assess when a currency is exchangeable into another currency and when it is not. The Amendments require an entity to estimate the spot exchange rate when it concludes that a currency is not exchangeable into another currency. There was no significant impact on the Group or Company Financial Statements.
---	---

2.2. New and revised accounting standards in issue but not yet effective

IFRS 9 and IFRS 7 Amendments to the Classification and Measurement of Financial Instruments (effective 1 January 2026)	The Amendments modify the following requirements in IFRS 9 and IFRS 7: Derecognition of financial liabilities • Derecognition of financial liabilities settled through electronic transfers. • Classification of financial assets. • Elements of interest in a basic lending arrangement (Solely Payments of Principal and Interest assessment – "SPPI test"). • Contractual terms that change the timing or amount of contractual cash flows. • Financial assets with non-recourse features. • Investments in contractually-linked instruments. Disclosures • Investments in equity instruments designated at fair value through other comprehensive income. • Contractual terms that could change the timing or amount of contractual cash flows. The Directors of the Company do not anticipate that the application of these amendments will have a significant impact on the Group and Company Financial Statements.
IFRS 18 Presentation and Disclosure in Financial Statements (effective 1 January 2027)	IFRS 18 introduces new requirements for the presentation of the Consolidated Income Statement without changing recognition or measurement principles. The standard mainly requires: • all income and expenses to be classified into five defined categories: Operating, Investing, Financing, Income Taxes and Discontinued Operations (where applicable); • mandatory subtotals for Operating Profit and Profit before Financing and Income Taxes; • disclosure requirements for management defined performance measures; and • avoidance of excessive aggregation and disaggregation. The standard is expected to have a significant impact on the presentation of Crookes Brothers's Statement of Profit or Loss and Other Comprehensive Income and will require comparatives to be re-presented. The Group is embarking on a process to analyse the current Statement of Profit or Loss and Other Comprehensive Income line items against the requirements of the new standard to identify items that may move between categories. Crookes Brothers will, as far as possible, aim for consistency of application across its business and ease of understandability for the users of its financial statements.
IFRS 20 Regulatory Assets and Regulatory Liabilities (effective 1 January 2029)	IFRS 20 requires entities subject to regulatory agreements to disclose regulatory assets, regulatory liabilities, regulatory income and regulatory expenses where the agreement creates enforceable present rights or obligations to add to or deduct from future regulated rates. The Group is assessing the effects of IFRS 20 on its regulated sugar-pricing arrangements; this assessment is ongoing and may give rise to material adjustments to the statement of financial position, profit or loss and related disclosures. Potential impacts include recognition of regulatory assets or liabilities for under- or over-recovery, changes in measurement (a cash-flow based technique discounted at the regulatory interest rate), reclassification of certain revenue and cost items, additional note disclosures and, where applicable, restatement of comparatives under the transition provisions.

Notes to the financial statements continued

for the year ended 31 March 2026

3. Material accounting policies

Basis of preparation

The consolidated and separate Annual Financial Statements of Crookes Brothers Limited ("Group" or "the Company") for the year ended 31 March 2026 have been prepared in accordance with the Companies Act, No. 71 of 2008 ("Companies Act"), IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"), SAICA Financial Reporting Guides (as issued by the Accounting Practices Committee), the Financial Reporting Pronouncements (as issued by the Financial Reporting Standards Council) and the JSE Listings Requirements. The historical cost basis is used except for investment property (see note 18), biological assets (see note 24) and certain financial instruments (see note 21) that are reported at fair value.

Foreign currencies

The functional currency of each entity within the Group is based on the currency of the primary economic environment in which that entity operates. The functional currency is determined by assessing the primary economic environment of the revenue, operating and capital expenditure and financing cash flows of the Group entity. For the purposes of the consolidated Financial Statements, the results and financial position of each entity are expressed in South African Rand, which is the functional currency of the Group, and the presentation currency for the consolidated Financial Statements.

Transactions in currencies other than in the entity's functional currency relate to the Group's Mozambique and Zambia operations. The results are recognised at the rates of exchange ruling on the date of the transaction. Monetary assets and liabilities denominated in such currencies are translated at the rates ruling at the date of the statement of financial position. Gains and losses arising on exchange differences are recognised in profit or loss. Foreign exchange gains and losses relating to intercompany loan balances that are not considered part of the Group's net investment in a foreign operation are recognised within finance costs in the statement of profit or loss. The financial statements of entities whose functional currencies are different from the Group's presentation currency which, because of its primary operating activities, is South African Rand, are translated as follows:

- Assets and liabilities at exchange rates prevailing on the statement of financial position date;
- Income and expense items at the average exchange rates for the period; and
- Equity items at the exchange rate prevailing on the date they arose.

Exchange differences on translating foreign operations are recognised in other comprehensive income.

Comparative figures

Comparative figures are restated in the event of a change in accounting policy or a prior period error or when required by the accounting standards or where restatement results in a more meaningful comparison to current year figures.

Basis of consolidation

3.1 Interests in subsidiaries

At each reporting date, the Group re-assesses whether or not it controls its investees if facts and circumstances indicate that there are changes to one or more of the three elements of control listed below:

- the Group has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

At the end of the current reporting period, the Group accounted for 14 investees as controlled subsidiaries (see note 22). All subsidiaries have the same financial reporting period of 31 March.

Of these 14 investees, the Group held the majority share capital and voting rights in 12 of them, thus giving the Group majority voting power to affect the operating and financial returns of these 12 investees.

With regards to the other two subsidiaries, Libcro Farming (Pty) Ltd ("Libcro") and Mawecro Farming (Pty) Ltd ("Mawecro"), the non-controlling interests owned the majority of the issued share capital in these investees.

Even though the Group had less than a majority of the voting rights in these two investees, it was still able to demonstrate power over these investees and direct the relevant activities of these investees unilaterally. Refer to note 4.1 for all relevant facts and circumstances that the Group assessed, in making this judgement.

Upon loss of control of a subsidiary, the Group derecognises the assets and liabilities of the subsidiary and recognises a gain or loss on the disposal.

Investments in subsidiaries in the Company Financial Statements are recognised at cost less impairments.

3.2 Interests in joint venture and associates

See note 23 for a list of associates that the Group has investments in. The Group exerts “significant influence” over these associates, which is the power to participate in the financial and operating policy decisions of these investees, but does not have control or joint control over the policies of these investees.

With respect to Silverlands Mozambique Holdings Limited (“SMHL”) (see note 23), the Group has acquired a joint venture, via a joint arrangement whereby the Group shares joint control of the arrangement and has rights to the net assets of SMHL through this joint arrangement. The Group has a contractually agreed sharing of control over the arrangement of SMHL’s operations with SilverStreet Private Equity Strategies (“SilverStreet”), a subsidiary of the Group’s majority shareholder Silverlands (SA) Plantations Sarl a company incorporated in the United Kingdom. Any decisions regarding the relevant activities of SMHL require the unanimous consent of both the Group and SilverStreet.

The results and assets and liabilities of the Group’s joint venture and associates are incorporated in these consolidated Financial Statements using the equity method of accounting. Under this equity method, the Group’s investment in its joint venture and associates are initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group’s share of the profit or loss and other comprehensive income.

The Group transacts with all the investees’ disclosed in note 23 on an arm’s-length basis.

Investments in joint venture and associates in the Company Financial Statements are recognised at cost less impairments.

Statement of profit or loss transactions and events

3.3 Revenue

The Group recognises revenue on the fulfilment of a performance obligation, which results in the irrevocable transfer of control to its customers, such that the Group is then entitled to the transaction prices associated with these sales.

Refer to note 5 for a summary of revenue by product and geographic region. The Group’s revenue is largely made up of “farming” revenue in the form of sugar cane, bananas and macadamias and property revenue through the development and sale of residential units.

Sugar cane

Revenue is recognised at a point in time when the cane is delivered to the sugar mills.

Bananas

Revenue is recognised at a point in time on delivery of packed banana cartons to customers. The majority of the Group’s bananas are sold to the Group’s associate, Lebombo Growers (Pty) Ltd (“Lebombo”).

Macadamias

Revenue from the sale of macadamias is recognised at a point in time when the Group’s various customers take delivery.

Property

Revenue from the sale of completed residential units is recognised at a point in time on transfer of ownership to buyers through occupation once all suspensive conditions have been met.

Other operations

Other operations revenue comprises revenue from rental income from leased buildings, tourism revenue and utility services related to the property development. The majority of sales proceeds are received over a 30-day period (in the case of rental income) and in cash with regards to the tourism segment. The timing of other operations revenue recognition is at a point in time except for utility services related to property revenue which is over time.

Company revenue

The Company being an investment holding company, derives its revenue in the form of interest income, dividend income, management fees, consulting fees and surety fees from related parties. Company interest income is mainly charged to fellow subsidiaries at prime and Jibar-linked rates, and measurement is in accordance with IFRS 9. Dividend income earned is from fellow subsidiaries. Surety fees are charged at 2% of the average loan balance outstanding at each period end. Management and consulting fees are charged based on actual hours worked with an added arm’s-length mark-up. Performance obligation is satisfied once the management or consulting service has been rendered.

Following a prior year internal Group restructure (see note 22.5), the Company’s revenue streams include “farming” income from sugar cane operations, as well as revenue from other operations, largely comprising tourism revenue.

Notes to the financial statements continued

for the year ended 31 March 2026

3. Material accounting policies continued

3.4 Investment income

Dividend and interest income disclosed in note 11 are earned from the Group's range of financial assets and positive bank balances respectively. Due to the Company being an investment holding company (see note 3.3 above), investment income constitutes revenue in the Company's statement of profit or loss.

3.5 Taxation

Tax expense represents the sum of the current tax payable and deferred tax and is recognised in profit or loss, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Current tax

The tax currently payable is based on taxable profit for the period. Taxable profit differs from "profit before tax" as reported in the statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other periods and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

3.6 Dividends

Dividends declared by the Group and Company to its shareholders and community partners (non-controlling interest) are charged against reserves in the period declared and raised as an outstanding payable until settled. Refer to note 15 for details of dividends declared by the Group and Company.

Statement of financial position line items

3.7 Property, plant and equipment

Property, plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses.

Freehold land and assets under construction are carried at cost, less any impairment loss.

Costs capitalised to bearer assets (sugar cane roots, banana palms and macadamia trees) include all direct costs of land preparation and planting.

The varied nature of property, plant and equipment result in a range of different depreciation rates being applied to assets. Depreciation guidelines are defined for asset classes, however, individual consideration is given to the appropriateness of the useful life applied to each individual asset, which reflects management's estimate of the consumption of economic benefits inherent in the value of the asset.

During the year under review, property, plant and equipment was depreciated on the straight-line basis using the rates set out below:

• Land – owned	not depreciated
• Leased land in Mozambique	100 years
• Leased land in Zambia	100 years
• Buildings and housing	30–50 years
• Capital work-in progress	not depreciated until brought into use
• Plant and other assets	3–25 years
• Sugar cane roots	7–9 years
• Banana palms	9 years
• Macadamia trees	25 years

Depreciation is recognised directly in profit or loss. Management reviews the residual values, useful lives and depreciation methods annually.

On the disposal or scrapping of property, plant, equipment, the gain or loss arising thereon is recognised in profit or loss.

3.8 Borrowing costs

In accordance with IAS 23, finance costs incurred as a consequence of raising finance for a particular project, is capitalised to the associated “qualifying assets”, as borrowing costs.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

3.9 Investment property

Residential units occupied by customers under Reversionary sale and Transfer Obligation (“RTO”) arrangements are recognised by the Group as investment property. The customers in these cases are lessees, while the Group is a lessor, who holds these properties for capital appreciation over the RTO term. RTO units are initially measured at cost, and subsequently at fair value, with gains and losses arising from changes in fair value being recorded in profit or loss in the period in which they arise. Refer to note 18 for disclosure relating to investment property.

3.10 Impairment of non-financial assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that the assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). The recoverable amount of assets is the higher of fair value less costs of disposal and value-in-use.

Sugar cane roots that do not provide acceptable yields, are routinely grubbed out, and in some cases prior to the end of their expected useful lives. Refer to note 7 for details of impairment, to these bearer assets.

3.11 Financial instruments

On initial recognition, the Group measures its financial assets and financial liabilities at fair value.

Financial assets

At the end of the current reporting period, the group held an interest in a number of financial assets in the form of equity investments in various co-ops and agribusinesses as well as loans receivable, trade receivables and cash in the bank. Refer to notes 21.1 and 21.2. These financial assets are classified as either fair value through other comprehensive income (“FVTOCI”) or amortised cost.

Subsequent measurement

The investment in Elgin is held at fair value, with changes in fair value being recognised in other comprehensive income (FVTOCI) and accumulated in the investment revaluation reserve.

With respect to the investments in Villiersdorp and other farming co-ops and agribusinesses, the fair values of these investments are not readily determinable. The investment in these companies is based on signed agreements, whereby the value of the shares to the Group in these companies, is limited to their cost. Therefore, the Directors have measured these investments at cost, which they assess to be the closest approximation of fair value. Refer to note 21.4 for the judgements applied by the Directors in making this assessment.

Based on the contractual cash flows associated with trade and loan receivables, the Group measures these at amortised cost using the effective interest method.

Cash and other short-term investments, which include cash on hand and in banks, are measured at amortised cost using the effective interest method.

Financial liabilities

The Group has financial liabilities, in the form of a bank overdraft, interest-bearing borrowings, RTO financial liability and trade and other payables. These financial liabilities are classified as financial liabilities at amortised cost.

The receipt of cash proceeds (excl. VAT) associated with RTO sales, results in an RTO financial liability and prepaid lease income.

The RTO financial liability is initially measured by discounting these proceeds at the South African prime lending rate and the South African Revenue Service (“SARS”) prescribed mortality rate of the purchaser or his/her spouse.

The prepaid lease income portion of the RTO obligation is initially measured at fair value, being the difference between the cash proceeds (excl. VAT) received and the RTO financial liability raised. This prepaid lease income is then amortised over the mortality period of the purchaser or his/her spouse, with the current year portion of lease income recognised in profit or loss, and the carrying amount of prepaid lease income subsequently measured at amortised cost. The prepaid lease liability portion is classified as current and non-current based on its expected maturity.

Refer to notes 18, 22, 29, 31, 34 and 37 for disclosures related to financial liabilities.

Subsequent measurement

The financial liabilities are measured at amortised cost using the effective interest rate method.

Notes to the financial statements continued

for the year ended 31 March 2026

3. Material accounting policies continued

3.11 Financial instruments continued

Derecognition of financial liabilities

Financial liabilities are derecognised only when the obligation specified in the contract is discharged or cancelled or expires.

Impairment of financial assets

Regarding its financial assets the Group assess the expected credit losses ("ECLs") associated with its debt instruments carried at amortised cost on a forward-looking basis. The amount of ECLs is updated at each reporting date to reflect changes in credit risk since initial recognition of the financial instrument. The Group assesses loans at amortised cost, trade receivables, other receivables and cash and cash equivalents for impairment.

Regarding its financial assets held at amortised cost, the Group recognises lifetime ECLs.

The Group applies the IFRS 9 simplified approach to measure ECLs, which uses a lifetime ECL allowance for all trade receivables.

Refer to notes 8,10 and 37.3 for a detailed analysis.

3.12 Biological assets

The Group's biological assets comprise growing crops in the form of sugar cane, bananas and macadamias.

Biological assets are measured on initial recognition and at the end of each reporting date at fair value. Fair value is based on current estimated market prices for the following season, less the estimated costs of harvesting, transport, packing and point-of-sale costs.

3.13 Inventories

Inventories, which include consumable stores (fertiliser, chemicals, fuel, spare parts etc), merchandise, livestock, property (development and sale) and grown nursery plants are valued at the lower of cost and net realisable value. Cost (excluding property) is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs of completion or selling and distribution.

Property for development and sale relates to the Renishaw Hills development and includes the cost of land and development.

The specific identification method is used to allocate costs to the individual units.

Redundant and slow-moving inventories are identified and written down to their net realisable values where necessary.

3.14 Employee benefits

Retirement funds

In South Africa, the Company provides retirement benefits for its employees through the Crookes Brothers Retirement, Pension and Provident Funds. These funds are all defined contribution plans. The assets of the defined contribution schemes are held separately from those of the Company and are administered and controlled by trustees. Contributions to these defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Retirement benefit surplus

The Crookes Brothers Pension Fund also operates an Employer Surplus Reserve Account. There are assets allocated to the employer in the employer surplus reserve accounts in the Crookes Brothers Pension and Retirement Funds.

The Company has elected to utilise this surplus to extinguish a portion of the post-retirement medical aid subsidy below. To this end, an additional liability for medical benefits in the funds' rules has been created, and this surplus has been utilised to cover these costs as disclosed in note 33.2.

In other geographical locations in which the Group operates – Eswatini, Zambia and Mozambique, contributions are made to state-managed retirement benefit schemes. These schemes are dealt with as payments to defined contribution plans where the Group's obligations under the plans are equivalent to those arising in a defined contribution retirement benefit plan. Additional severance liabilities in terms of legislative regulations are assessed annually and recognised as a provision. See note 35 for disclosure pertaining to severance allowance.

Post-employment medical aid obligation

Historically, qualifying employees have been granted certain post-retirement medical benefits. The post-retirement medical benefit option is now closed and the Company's obligation in respect of post-employment medical aid relate solely to past employees of the Company referred to as Continuation and Widow(er) Members ("CAWMs"). See note 33.1 for the actuarial valuation of the liability.

3.15 Non-current assets held for sale and Discontinued operations ("NCAHFS")

The Group presents the results of a separate major line of business, separately, in the statement of profit or loss when it is classified as a discontinued operation. In addition, assets, and liabilities, are classified as NCAHFS in the statement of financial position. NCAHFS are measured at the lower of carrying amount and fair value less costs to sell.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition.

3.16 Investment revaluation reserve

The investment revaluation reserve represents the cumulative gains and losses arising on the revaluation of financial assets referred to in note 21.1 that have been recognised in other comprehensive income. For equity instruments designated at FVTOCI the reserve is transferred to retained earnings when sold. This transfer is made within the statement of changes in equity.

3.17 Foreign currency translation reserve

Exchange differences relating to the translation of the results and net assets of the Group's Mozambican and Zambian subsidiaries from its functional currency of Mozambican Metical ("MZN") and Zambian Kwacha ("ZMW") to the Group's presentation currency of Rands ("ZAR") which are recognised directly in other comprehensive income and accumulated in the foreign currency translation reserve.

3.18 Treasury shares

The Group purchased its own shares for the direct benefit of participants under the Deferred Bonus Scheme ("DBS"). These are deemed treasury shares as they are conditionally returnable. Refer to the share based payment reserve accounting policy for an explanation of the DBS. The costs relating to the acquisition of treasury shares as well as gains or losses on disposal or cancellation of treasury shares are recognised directly in equity.

Refer to note 28.4 for details on the treasury shares purchased.

3.19 Share-based payments

The Company issues equity-settled share-based payments to certain executives and senior employees of the Company and its subsidiaries.

Equity-settled share-based payments are measured at fair value at the grant date. The fair value at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of the shares that will eventually vest, with a corresponding increase in equity.

At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled reserve. Refer to note 36 for disclosure relating to the employee share incentive scheme.

Share option scheme

Each employee share option converts into one ordinary share of the company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

Options vest over a period of five years and all shares must be taken up by way of purchase and delivery by no later than 10 years after the date of grant, subject to Remuneration Committee approval. The exercise price of the option is not less than the market value of the ordinary shares on the day preceding the date of grant. IFRS 2 requires the fair value of equity instruments granted to be based on market prices, if available, and to take into account the terms and conditions upon which those equity instruments were granted. In the absence of market prices, fair value is estimated, using a valuation technique to estimate what the price of those equity instruments would have been on the measurement date in an arm's-length transaction between knowledgeable, willing parties. As employee share options are not traded, there is no market price available. Employees have been granted a call option in terms of the Scheme where the payoff on exercise is the difference between the market value of the Company's shares at that time less the strike price. Fair value of the share options is therefore determined using an option pricing model. The share options have been valued using the widely accepted Black-Scholes-Merton model. This model is used to value options traded openly in the market.

Notes to the financial statements continued

for the year ended 31 March 2026

3. Material accounting policies continued

3.19 Share-based payments continued

Deferred bonus scheme

A portion of an employee's bonus is settled in forfeitable shares in the Company under the deferred bonus scheme ("DBS"). The DBS runs parallel to the Group's existing share option scheme. Under the DBS, qualifying management are granted shares, which enjoy all shareholder rights, including dividends and voting rights.

No more than 5% of the Company's total shares can be awarded, and no single employee will be permitted to hold more than 1% of the Company's shares. The shares purchased by the Group under the DBS are held as treasury shares by the Group until vesting date.

The shares will vest over five years, contingent upon continued employment. One-third of the shares will vest after three years, another third after four years, and the final third after five years. If the employee leaves before the end of this period, they will forfeit any unvested shares.

IFRS 2 requires the fair value of equity instruments granted to be based on market prices, if available, and to take into account the terms and conditions upon which those equity instruments were granted. The transaction is measured at the fair value of the equity instrument at the grant date.

After March 2025, the Group and Company replaced the equity-settled DBS with a cash-settled Deferred Bonus Unit Scheme ("DBUS") for all new awards granted. Existing awards granted under the equity-settled DBS will continue in accordance with the terms of the DBS scheme until settlement.

Refer to notes 28.5 and 36 for disclosure relating to the DBS.

Deferred bonus unit scheme

Under the deferred bonus unit scheme ("DBUS"), a portion of a qualifying employee's bonus is settled in forfeitable deferred bonus units. The units carry dividend equivalent rights.

The units vest over a five-year period, subject to continued employment. One-third of the units vest after three years, a further third after four years, and the final third after five years. Should an employee leave the Group before the end of the vesting period, all unvested units will be forfeited.

Deferred bonus units granted to employees for services rendered or to be rendered are recognised as a liability, with the related expense recognised in profit or loss over the vesting period in accordance with IFRS 2.

The liability is remeasured annually until settlement, with any changes in fair value recognised in profit or loss. The fair value (based on the Company's equity valuation) is determined as the higher of the smoothed equity value and 40% of the net asset value reflected in the most recent Group financial statements.

Refer to notes 35 and 36 for disclosure relating to the DBUS.

3.20 Obligations to return leased farmland

This relates to the valuations attributable to the carrying amount of bearer assets on farms in the Mpumalanga region, which are owned by communities and leased to the Group as part of long-term 20- and 30-year leases. At the end of the current reporting period, the amortised cost of these liabilities was opposite but equal to the carrying amount of the associated bearer asset sugar cane roots and banana palms. Refer to note 30.

These liabilities are unsecured, interest-free and will be extinguished on handover of the bearer assets to the respective community landowners, on termination of the leases.

3.21 Leases

The Group – as lessee

The Group recognises right-of-use assets and lease liabilities in its statement of financial position.

For leases of a short-term (12 months or less) or low value assets of R100 000 or less (printers and copiers), the Group recognises the lease payments on a straight-line basis over the term of the lease.

Lease liabilities

The Group's lease liabilities are disclosed in note 31.

Lease payments included in the measurement of the lease liabilities comprise lease payments that depend on year-on-year CPI rates.

Lease payments are initially measured using the index rates at lease inception and subsequently measured by increasing the carrying amount to reflect interest on the lease liabilities (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

3.21 Leases continued

Lease liabilities continued

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease payments change due to changes in the CPI rate or a change in expected payment, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate.
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

Right-of-use assets

The Group's right-of-use assets are disclosed in note 17.

The right-of-use assets comprise the initial measurement of the corresponding lease liabilities, and any lease payments made. They are subsequently measured at cost less accumulated depreciation and impairment losses.

The Group's right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. In the case of the Mawecro and Libcro leases, these are depreciated over the lease terms of 20 and 30 years respectively. The Company lease is depreciated over five years.

Long-term leases with lease terms of 100 years have been classified in note 16 as leasehold land/land rights as these leases were purchased.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the "Property, Plant and Equipment" and "Impairment" policy per 3.7 and 3.10.

Other lease arrangements

Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in profit or loss. The Group has applied the practical expedient for short-term leases with a term of 12 months or less and low-value leases with assets with a cost of R100 000 or less, which mainly comprise of office equipment. Refer to note 32 for a disclosure of the Group's lease payments recognised as an expense in profit or loss.

The Group – as lessor

Leases for which the Group is a lessor are classified as operating leases. Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

3.22 Employee provisions

The Group has legal obligations to its employees in the form of leave pay, bonus and severance pay provisions at the end of the current reporting period.

The provision for leave pay represents annual leave entitlements accrued by employees based on leave days not taken at financial year end multiplied by the applicable daily pay-rate. Leave is forfeited if not used in the following leave cycle or when it reaches the leave cap.

The provision for bonuses is payable to qualifying employees in terms of a "balanced scorecard", which refers to a weighting of Group and individual performance. The Board has the discretion to reduce or cancel the payment if one or more of the aforementioned criteria has not been achieved.

The provision for severance allowances is based on terms included in the collective agreements between the labour unions and the Group's Eswatini and Zambia subsidiaries. The severance allowance is calculated based on number of years' service, age of employee and the applicable daily pay-rate.

Refer to accounting policy 3.19 for liability for deferred bonus unit scheme.

3.23 Business combinations

The Group and Company account for acquisitions of businesses using the acquisition method. Under this method the Group measures the fair value of the tangible and intangible assets and liabilities of the acquiree, non-controlling interest in the acquiree and the fair value of the consideration paid at acquisition date. Where the consideration is cash, the fair value is the actual amount paid. Either goodwill or a gain on bargain purchase (or negative goodwill) will arise. The Group accounts for a gain on bargain purchase in the income statement on the date of acquisition. Acquisition related costs are recognised in profit or loss as incurred. See note 22.5 for prior year acquisition of subsidiary net assets by the Company.

Notes to the financial statements continued

for the year ended 31 March 2026

4. Judgements made by management and key sources of estimation uncertainty

Preparing Financial Statements in compliance with the accounting standards requires estimates and assumptions that affect reported amounts and related disclosures. Actual results could differ from these estimates. Key assumptions concerning the future, and other key sources of estimation uncertainty have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year. Certain accounting policies and key sources of estimation uncertainty have been identified as involving particularly complex or subjective judgements or assessments, as follows:

4.1 Control over subsidiaries

Libcro and Mawecro are classified as subsidiaries of the Group, although the Group's ownership interest is less than 50%. The Group is able to exercise control over these entities through its ability to influence and direct key financial and operational decisions that significantly affect returns.

This is achieved through the Group's provision of working capital finance, its standing as surety for the subsidiaries' revolving credit facilities and term loan, which Libcro and Mawecro are unable to secure independently, and its provision of critical expertise and knowhow essential to the ongoing operations of these companies. The Group has existing rights that give it the ability to direct the relevant activities through management agreements, which gives the Group rights to control, conduct and manage the day-to-day operations of the entities, the ability to select and determine the remuneration of key management personnel including that of the general manager, and the establishment and determination of key policies and procedures.

As a result, the Group is able to direct activities that most significantly impact the subsidiaries' financial performance and returns, notwithstanding its minority ownership. Based on this assessment, the Directors concluded that the Group has control over Libcro and Mawecro and, accordingly, these entities have been recognised as subsidiaries in the consolidated Financial Statements.

4.2 Joint control over Silverlands Mozambique Holdings Limited

Silverlands Mozambique Holdings Limited ("SMHL") is classified as a joint venture of the Group when the Group only has a 49.5% ownership interest. The Group has joint control over SMHL by virtue of a signed shareholder agreement with the other shareholder, SilverStreet, which documents that the Group has joint control over the financial and operating affairs of SMHL.

4.3 Property, plant and equipment residual values and useful lives

Property, plant and equipment are depreciated over their useful lives taking into account residual values. The actual lives of the assets and residual values are assessed annually and are influenced by factors such as technological innovation, expected usage and maintenance programmes. Residual value assessments consider issues such as market conditions, the remaining life of the asset and projected disposal values.

4.4 Post-retirement medical obligations

Post-retirement medical obligations are provided for certain existing and former employees. See note 33.1. Actuarial valuations are based on assumptions, which include employee turnover, mortality rates, the discount rate, the expected long-term rate of return of plan assets, healthcare costs, inflation rates and salary increments.

4.5 Fair value measurements and the valuation process over biological assets

The Group's biological assets are held at fair value. Under the supervision and review of the Chief Financial Officer, an experienced and qualified team of management accountants determine the appropriate valuation techniques and inputs used to arrive at the fair value of biological assets.

In estimating the fair value of the biological assets, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages suitable leaders in the agricultural industry, which include the South African Cane Growers Association, Lebombo Growers (Pty) Ltd and macadamia customers, to establish the appropriate valuation techniques and prices.

Refer to note 24.2 for the valuation inputs applied in determining the fair value of biological assets at the end of the reporting period and note 38 for the fair value hierarchy of the Group's biological assets.

4.6 Non-producing macadamia trees

The Group's macadamia orchards are accounted for under IAS 16. The Group capitalises a proportionate share of costs to the non-producing orchards. Management considered these costs to be directly attributable and necessarily incurred to build up the bearer asset to get it from a non-producing state to producing state.

4.7 Deferred tax assets

Deferred tax assets are raised to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Those entities, where unused tax losses and unused tax credits exist, are viable trading companies for which the going concern basis of preparation remains appropriate as assessed by management. Tax losses in Mozambique may be carried forward subject to an expiry after five years. A reconciliation of the deferred tax balance is included in note 19.

4.8 Recoverability of investments in subsidiaries

In assessing the recoverability of the Company's investments in its subsidiaries, the Directors consider all forward-looking information in the form of discounted cash-flows ("DCF"), project internal rates of return ("IRR"), as well as feasibility studies. The Company employs the use of independent external valuers to perform valuations of all its land (owned or leased), including all related immovable properties, dams, irrigation equipment and water-installations situated thereon.

10. Non-trading items				
Non-trading items is a non-IFRS Accounting Standard measure and consists of items that are usually capital in nature or not of an operational nature.				
In most cases non-trading items are those items excluded from headline earnings per share (“HEPS”) in accordance with the South African Institute of Chartered Accountants (“SAICA”) Circular 1/2023 and generally include re-measurements due to:				
– impairments of non-current assets;				
– gains and losses on the disposal of property, plant and equipment; and				
– gains and losses on the disposal of investments.				
Gains on disposals of property, plant and equipment	146	3 409	77	3 629
Gain on disposal – Renishaw Property Developments ⁽¹⁾	–	–	–	3 631
Net gains/(losses) on disposal – general items	146	3 409	77	(2)
	146	3 409	77	3 629

⁽¹⁾ Portions of the Renishaw farm associated with the precinct development were disposed of by the Company to its subsidiary, Renishaw Property Developments, for R3.6 million.

These portions, which include sites designated for a shopping centre and petrol station, were sold to two separate buyers for a combined total of R28.5 million.

The proceeds from these two sales was recognised as property revenue in the prior financial year as all conditions of sale had been fulfilled. Full proceeds were received during the 2026 financial year.

Notes to the financial statements continued

14. (Loss)/earnings per share		
14.1 Basic (loss)/earnings per share		
Total basic (loss)/earnings per share	(1 869.4)	446.4
14.2 Diluted (loss)/earnings per share		
Total diluted (loss)/earnings per share	(1 869.4)	445.6

Diluted earnings per share is capped at the basic earnings per share, as the current share-based payment rewards are anti-dilutive.

	2026 R'000	2025 R'000
The earnings used in the calculation of basic and diluted (loss)/earnings per share are as follows:		
(Loss)/profit for the year	(274 023)	89 823
Adjusted for non-controlling interest	(11 323)	(21 685)
(Loss)/earnings used in the calculation of basic and diluted (loss)/earnings per share	(285 346)	68 138

	Number of shares	Number of shares
The weighted average number of shares for the purposes of earnings and diluted earnings per share are as follows:		
Number of shares in issue at the beginning of the year	15 264 317	15 264 317
Weighted average number of shares for the purposes of basic earnings per share	15 264 317	15 264 317
Shares deemed to be issued for no consideration in respect of employee share options	104 172	157 877
Adjusted weighting based on average market price of options and average company share price for the year	(222 659)	(131 247)
Weighted average shares used in the calculation of diluted earnings per share	15 145 830	15 290 947

The current year diluted number of shares is less than the shares in issue, as the share-based payment rewards are anti-dilutive. Therefore the current year earnings per per share is not diluted.

⁽¹⁾ Included in this category are intangible assets with a cost and accumulated depreciation of R2.4 million (2025: R2.6 million), which relate to EIA approvals, water rights and ERP software.

⁽²⁾ Capital work in progress is made up of R6.5 million bearer assets (2025: R1.2 million), R0.6 million buildings, R0.7 million property development infrastructure (2025: R1.9 million) and R7.2 million plant and other assets (2025: R16.5 million). Capital of R17.8 million related to plant and other assets was transferred from work in progress to additions during the current year.

Notes to the financial statements continued

for the year ended 31 March 2026

16. Property, plant and equipment continued

The Group applies the depreciated historic cost model, in that property, plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses. Freehold land is not depreciated, however, leasehold land and land rights are depreciated over the remaining period of the Group's leases in the jurisdictions they operate in. The leasehold land/land rights disclosed above relate to the purchase of 100-year leases in Mozambique and Zambia. The remaining lease terms are 86 years and 51 years, respectively.

Refer to note 17 for other leased farmland disclosed as right-of-use assets.

The net book value/depreciated historic cost of the Group's freehold and land rights during the current reporting period totalled R20.5 million (2025: R28.2 million). A valuation conducted over the Group's land during the prior financial year determined the market value of the Group's land (including buildings and bearer assets) to be R1.608 billion.

The market value has been determined by a suitably qualified independent third party in accordance with the RICS Valuation – Global Standards, which incorporate the International Valuation Standards (the "Red Book").

Market value is defined within RICS Valuation – Global as: "The estimated amount for which an asset or liability should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had acted knowledgeably, prudently and without compulsion." The independent third party valuation was performed in line with the market approach, which is based on comparing the subject properties with appropriate comparable transactions, together with evidence of demand within the vicinity of the subject properties, taking into account the size, location, aspect and other material factors.

Refer to note 38 for details of the fair value hierarchy.

16.1 Impairments

In testing for impairment, the Group tests assets on an individual basis, unless they cannot generate cash inflows independently of other assets. Therefore the Group has identified cash generating units ("CGUs") across its segments to which it has allocated its assets for impairment testing. The Group recognised the following impairments, which were determined based on business operations:

operations:

		Group		Company	
Cash-generating unit	Segment	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Mozambique macadamia operation ⁽¹⁾	Macadamias	242 862	–	–	
Impairment of individual assets ⁽²⁾		1 258	2 186	–	46
Total net impairment loss		244 120	2 186	–	46
⁽¹⁾ In the current year, an impairment loss was recognised for the macadamia operation as the anticipated recovery in macadamia prices has not materialised at the pace previously expected. Continued pricing uncertainty, failure to achieve anticipated yields and lower forecast cash flows resulted in a reduction in the recoverable amount of the CGU, based on revised pricing assumptions incorporated into the valuation model. The recoverable amount was determined based on the macadamia segment's value-in-use ("VIU"). The calculation used cash flow projections for a 11-year period, based on approved financial budgets, taking into account management's price projections. Management used 11 years' as the trees reach peak producing capacity in March 2037.					
Basis of determining recoverable value				VIU	
Recoverable value per DCF – VIU				–	
Group's share of macadamia property, plant and equipment				253 627	
Impairment allocated to property, plant and equipment				242 862	
Bearer assets				171 349	
Leasehold land rights				9 915

Impact on calculation of recoverable amount:		
Decrease in macadamia price by USD0.25 (decrease in value)	(32 499)	
Increase in macadamia price by USD0.25 (increase in value)	31 090	
Decrease in discount rate by 1% (increase in value)	9 458	
Increase in discount rate by 1% (decrease in value)	(8 147)	
Decrease in terminal growth rate by 0.5% (decrease in value)	(1 264)	
Increase in terminal growth rate by 0.5% (increase in value)	1 355	

⁽²⁾ Impairments of R1.3 million (2025: R2.2 million) were recognised in relation to the "grubbing" or removal of underperforming or damaged trees or roots before the bearer assets have reached their useful life. A bearer asset is considered underperforming when yields fall below expected standards. The majority of the current year's impairment relates to banana palms that were grubbed early due to the relocation of the bananas and conversion to sugar cane at the Mawecro farm in Mpumalanga.

Refer to note 7 for details by asset category.

16.2 Details of encumbrances and assets pledged as security

Refer to note 29.7 for details of assets encumbered.

Refer to note 3.21 of the accounting policies for details of the Group's right-of-use assets in its capacity as a lessee.				
At the end of the current reporting period, the remaining lease terms were as follows:				
– Mawecro farmland lease: 10 years				
– Libcro farmland lease: 13 years				
– Head office lease: 1.2 years				
All right-of-use assets are situated in South Africa.				
The Group does not have any options to purchase any of the above assets at the end of their associated lease terms. The Group's obligations are secured by the respective lessors' title to these leased assets.				
Refer to lease liabilities in note 31.				
17.2 Amounts recognised in profit or loss				
Depreciation expense on right-of-use assets (see note 7)	8 193	15 423	1 128	1 128
Interest on lease liabilities (see note 12)	13 224	13 469	177	269
Expenses relating to short-term leases (see note 32.1)	–	–	–	–
Expenses relating to leases of low value assets (see note 32.1)	486	511	169	163
Expenses relating to variable lease payments not included in the measurement of the lease liability (see note 32.1)	4 425	5 275	402	289
	26 328	34 678	1 876	1 849

The Group has no short-term lease commitments at year end.

The variable lease payments above include variable lease terms that are linked to tonnages generated by farms upon which the Group's subsidiaries farm. The calculated lease rental is based on the actual tonnes achieved, which is inherently variable.

The remaining variable lease payments relate to the Group's archiving and storage costs and other immaterial rentals. Variable lease payments constitute up to 4% (2025: 5%) of the Group's entire lease payments.

During the year, the total cash outflow for leases amounted to R29.1 million (2025: R27.5 million).

18. Residential units held under reversionary sale and transfer obligations ("RTO")																																																					
Investment property ⁽¹⁾	124 199	124 549																																																			
RTO obligation ⁽²⁾	(77 563)	(76 311)																																																			
Net current value of RTO right	46 636	48 238																																																			
The Group's property division primarily develops residential units, accounted for as inventory (see note 25), for normal sale. As a separate arrangement to a normal sale, customers are also offered an alternative to use the property under a "life right" style arrangement, referred to as an RTO. Revenue from a normal sale is recognised upon control passing to the customer. In this instance, the unit's selling price is recognised as revenue upon transfer of ownership through occupation by the customer. In the case of a RTO, the transaction is treated similar to a "lease arrangement", whereby the buyer is in substance a "lessee" for the duration of his or her natural life. The essence of a RTO contract is that the buyer ("lessee") acquires the unit at a discount of between 25% and 30% of the cash selling price of other similar units offered under normal sale, on the basis that the Group has an option to repurchase the unit at the original discounted price paid by the lessee. ⁽¹⁾ The property division under this RTO arrangement is therefore in substance a "lessor". The property is held for the purpose of capital appreciation over the duration of the RTO term. The unit is therefore recognised as Investment Property, with fair value gains or losses in the unit's value recognised in profit or loss annually ("FVTPL") as follows: Reconciliation of investment property fair value: <table> <tr> <td>Fair value at beginning of year</td><td>124 549</td><td>121 701</td></tr> <tr> <td>Current year additions</td><td>3 980</td><td>339</td></tr> <tr> <td>Current year additions – transfer from inventory</td><td>596</td><td>3 543</td></tr> <tr> <td>Current year disposals</td><td>(6 435)</td><td>(2 700)</td></tr> <tr> <td>Fair value adjustment through profit or loss</td><td>1 509</td><td>1 666</td></tr> </table> Investment property <table> <tr> <td></td><td>124 199</td><td>124 549</td></tr> </table> Refer to note 38 for details of the fair value hierarchy of investment property, all of which is located in KwaZulu-Natal, South Africa. ⁽²⁾ The "repurchase price" under a RTO arrangement payable by the property division is disclosed in the financial statements as RTO obligation, and comprises the following two components: <table> <tr> <td>RTO financial liability</td><td>42 440</td><td>39 540</td></tr> <tr> <td>Prepaid lease income</td><td>35 123</td><td>36 771</td></tr> </table> RTO obligation <table> <tr> <td></td><td>77 563</td><td>76 311</td></tr> </table> Included in the financial statements as: <table> <tr> <td>Non-current[^]</td><td>72 861</td><td>71 567</td></tr> <tr> <td>Current</td><td>4 702</td><td>4 744</td></tr> </table> <table> <tr> <td></td><td>77 563</td><td>76 311</td></tr> </table> [^] The RTO obligation is non-current as the Group has the ability to decide on whether to exercise the purchase option. There were two (2025: two) RTO units sold during the current year for proceeds of R5.0 million (2025: R3.8 million). Included in lease income is an amount of R4.6 million (2025: R4.7 million) relating to the prepaid lease income liability. Refer to note 5. Reconciliation of RTO financial liability: <table> <tr> <td>Opening balance</td><td>39 540</td><td>36 802</td></tr> <tr> <td>Current year additions</td><td>2 055</td><td>2 713</td></tr> <tr> <td>Interest</td><td>4 027</td><td>3 722</td></tr> <tr> <td>Settlement of liability</td><td>(3 182)</td><td>(3 697)</td></tr> </table> <table> <tr> <td></td><td>42 440</td><td>39 540</td></tr> </table>			Fair value at beginning of year	124 549	121 701	Current year additions	3 980	339	Current year additions – transfer from inventory	596	3 543	Current year disposals	(6 435)	(2 700)	Fair value adjustment through profit or loss	1 509	1 666		124 199	124 549	RTO financial liability	42 440	39 540	Prepaid lease income	35 123	36 771		77 563	76 311	Non-current [^]	72 861	71 567	Current	4 702	4 744		77 563	76 311	Opening balance	39 540	36 802	Current year additions	2 055	2 713	Interest	4 027	3 722	Settlement of liability	(3 182)	(3 697)		42 440	39 540

* Other timing differences mainly relate to share-based payments and post-retirement medical aid benefit.

During the current year, the Mozambique corporate income tax rate applicable to farming operations increased from 10% to 32%.

Accordingly, deferred tax balances relating to the Group's Mozambique farming operations were remeasured using the revised enacted tax rate, with the resultant impact recognised in profit or loss.

Deferred taxation assets have been recognised on assessed losses and timing differences in the relevant entities which the Group believes it is probable that they will generate a taxable profit in the foreseeable future. The assessments are performed on a continuous basis.

The Group has assessed losses of R158.5 million (2025: R1.3 million) that have not been recognised as a deferred tax asset. These losses, which relate to the Group's subsidiary MFL and MML have not been raised, as it is not envisaged that there will be future taxable profits in the foreseeable future against which the deferred tax asset can be utilised.

Additionally, in Mozambique tax losses expire after five years with R0.5 million (2025: R0.3 million) due to expire at the end of 31 March 2027.

Notes to the financial statements continued

for the year ended 31 March 2026

21. Financial assets continued

21.4 Management judgements

21.4.1 The Directors have assessed the fair value of this investment against the net asset value and share price extracted from the latest available audited financial information for this company. Refer to note 38 for details of the fair value hierarchy of this investment.

21.4.2 These investments are required to be sold back to the co-operatives at cost should the Group exit its shareholding. Given that the exit price of the shares in the co-operative is at cost, the Directors assessment of fair value is R687 142 (2025: R687 142).

21.4.3 In 2017, a loan of R4.3 million was advanced to the Libuyile Community Trust ("LCT"), an indirect non-controlling shareholder of the Group's subsidiary Libcro Farming (Pty) Ltd ("Libcro Farming"). As per the terms of the loan agreement, interest is charged in advance at 3.00% below the prevailing South African prime lending rate on the outstanding capital balance at the end of each month.

The loan is unsecured, however, a condition precedent to the advancement of the loan, was a granting to the Group of an extension to its lease agreement over the Libcro farms for a further 15 years from the original expiry date. The term of the lease agreement was therefore extended to the end of September 2038.

The LCT board agreed to quarterly re-payments of R0.2 million, allowing Libcro Farming to deduct this amount from its quarterly rental payment, to be remitted to CBL. During the current year, R0.8 million (2025: R0.8 million) was repaid.

At year end, the Directors conducted an assessment of the loan's recoverability and noted no change in credit risk. The ECL provision has been assessed to be immaterial. This loan is held at amortised cost in accordance with IFRS 9. Refer to note 30 for further details on the lease.

21.4.4 The Group provided financial assistance to Bellcro Farming (Pty) Ltd ("Bellcro") to fund its working capital requirements while it was a subsidiary. The loan is unsecured and accrues interest at the prevailing South African prime lending rate plus 3%. This loan is held at amortised cost in accordance with IFRS 9. At year end the Directors assessed the recoverability of the loan and recognised an ECL provision of R4.95 million (2025: R4.3 million).

21.4.5 Based on the contractual cash flows and business model associated with these receivables, of which repayments are annual, the Directors are satisfied that these are measured at amortised cost, and that any further ECL is immaterial.

21.4.6 The Group advanced an amount of R1.9 million to the Renishaw Hills Homeowners Association ("RHOA") to finance security costs at the Renishaw Hills estate. The loan is unsecured, interest free and repayable at the later of the date of completion of the development, cancellation of developer rights or 1 January 2027.

In terms of the judgement applied, the Directors have assessed that any ECL is immaterial, due to the fact that the loan is fully recoverable based on the strength of the RHOA balance sheet.

21.4.7 The Group advanced an amount of R2.56 million (2025: R1.14 million) to Renishaw Estate Management Association ("REMA") to finance security costs and bridge repairs. The loan is unsecured, interest free and repayable on completion of the development.

In terms of the judgement applied, the Directors have assessed that any ECL is immaterial, due to the fact that the loan is fully recoverable based on the strength of the REMA balance sheet.

21.5 Assessment of significant changes in credit risk

The Group regards "significant changes in credit risk" as factors (default, change in collateral, acts of insolvency and changes in business and economic conditions) arising that materially impact the likelihood of a counter-party defaulting on its payment obligations to the Group. Refer to note 37.3 for the Group's credit risk policy.

There has been no significant increase in the risk of default on the underlying balances since the prior year.

Accordingly, in terms of IFRS 9, the Group recognises 12-month ECLs for the remaining contracts, which were assessed as immaterial during the year, and a lifetime ECL on the Bellcro loan.

22. Investments in subsidiaries

Details of the Group's subsidiaries at the end of the reporting period are as follows:

Name of subsidiary	Principal activity	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group		Investment cost		Amounts owing by/(to) subsidiaries	
			2026 %	2025 %	2026 R'000	2025 R'000	2026 R'000	2025 R'000

	129 744	472 912

⁽¹⁾ These capital contributions relate to MML and MFL, and are equity in nature.

⁽²⁾ In the current year, impairments totalling R328.1 million (2025: R44.5 million) were recognised on investments held in MML and MFL, based on the recoverable amount calculated in accordance with IAS 36 Impairment of assets. The recoverable amount was determined using the VIU, which was calculated using a discounted cash flow. The calculation used cash flow projections for a 11-year period, based on approved financial budgets, taking into account management's price projections. Management used 11 years' as the trees reach peak producing capacity in March 2037.

Increase in discount rate by 1% (decrease in value)	(8 147)	(23 594)
Decrease in terminal growth rate by 0.5% (decrease in value)	(1 264)	(3 457)
Increase in terminal growth rate by 0.5% (increase in value)	1 355	3 714

⁽³⁾ These loans include unsecured working capital loans to ZAM, REN and RPD, bear interest at prime and Jibar-linked rates, and are repayable by mutual arrangement at the discretion of the Directors, subject to the affordability of the borrowing company. The RPD loan has been disclosed as non-current, as the Company does not expect to realise the loan within 12 months after the reporting period.

The South African Reserve Bank ("SARB") has declared that JIBAR as a reference rate for South Africa will permanently cease to exist after 31 December 2026. The SARB designated the South African Rand Overnight Index Average ("ZARONIA") as the successor rate replacing JIBAR and has indicated that the market may use the published ZARONIA as a reference rate in pricing financial contracts going forward.

⁽⁴⁾ The ECL has been re-assessed by an ECL measurement expert using Moody's analytics RiskCalc. The loans were valued based on the risk of the subsidiary under the general approach. If a loan is in stage 1, a one-year ECL is applied.

Where credit risk increased significantly, a loan is regarded as being in stage 2 and a lifetime ECL is applied. If a loan is credit impaired, it is regarded as being stage 3 and a lifetime ECL is applied. The current year ECL provision has been assessed to be immaterial.

⁽⁵⁾ These are unsecured loans from CPL, Bar J and ZAM, repayable by mutual arrangement at the discretion of the Directors, subject to the affordability of the borrowing company. The CPL and ZAM loans are interest-bearing, while the BAR J loan remains interest free. The increase in these loans stems from surplus cash transferred from these subsidiaries to the holding company for investment within the Group.

Mawewe Communal Property Association	–	–	20 400	15 300

22.2 Control over subsidiaries

Refer to note 3.1 for the control assessment criteria and to note 4.1 for the significant judgements made by management in assessing control over the subsidiaries listed in 22.1.

During the current year, MML breached certain covenants contained in the Agdevco loan agreement. As a result of the covenant breaches, the lender has the contractual right to enforce the security of the MML and MFL quotas. At year end, the lender has not exercised its rights to enforce its security or otherwise take control of the subsidiaries. CBL requires the lenders consent to exercise the share voting rights it currently owns. Refer to note 29.8.

22.3 Significant restrictions

During the current reporting period, there were no restrictions on the Group or its subsidiaries ability to access or use the assets and settle the liabilities of the Group.

22.4 Financial support

During the current reporting period, the Group provided letters of continued financial support to subsidiary companies whose liabilities, exceeded its assets, fairly valued. These subsidiaries included Renishaw Property Developments (Pty) Ltd, Renserv (Pty) Ltd, Renishaw Hills Developments (Pty) Ltd, QBV South Africa (Pty) Ltd and Mozambique Farms (Pty) Ltd.

22.5 Group restructure

Effective 1 April 2024, as part of an internal restructure, the remaining trading operations (tourism and sugar cane) and investments of the Group's wholly-owned subsidiary, CBSA, were transferred to the Company in terms of a section 47 "liquidation distribution" (Income Tax Act, No. 58 of 1962). With the disposal of the deciduous farms the Directors decided that there was no commercial rationale for the operation of the separate companies. The transfer is tax-neutral, and will remain so provided the company is legally liquidated/wound up within 36 months.

The risks and benefits of all the underlying liabilities and assets were assumed by the Company effective 1 April 2024.

	Company
	2025
	R'000
Net assets acquired in the current year via liquidation distribution	
Non-current assets	
Property, plant and equipment	11 291
Financial assets	14 176
Investments in subsidiaries	30 365
Investment in associate	5 228
Current assets	
Biological assets	11 519
Inventories	1 756
Trade and other receivables	14 830
Cash and bank balances	6 035
Loans to Group companies	190 003
Non-current liabilities	
Deferred tax liabilities	(5 227)
Current liabilities	
Trade and other payables	(4 865)
Employee provisions	(759)
Net assets	274 352
Less: Return of capital	(253 160)
Liquidation distribution	21 192

The Company's acquisition of the trading operations of CBSA through the liquidation dividend constituted a business combination under common control.

The difference between the carrying amount of the investment in the subsidiary that was derecognised and the carrying value of the assets and liabilities assumed were therefore recognised directly in equity as the "Group restructure liquidation dividend".

Notes to the financial statements continued

for the year ended 31 March 2026

23. Investment in joint venture and associate

Included in the Group's portfolio of investments, is a joint venture and an associate, accounted for using the equity method.

There is no quoted market value for the investments in the joint venture and associate. Refer to note 4.2 for the judgements made by management in determining joint control over SMHL.

There are no restrictions on the ability of the investees to transfer funds to the Group in the form of cash dividends or to repay loans or advances made by the Group, should the need arise.

Details of the Group and Company's joint venture and associate at the end of the reporting period are as follows:

Name of investee	Type	Principal activity	Place of incorporation and principal place of business	Other relationship to Group	Proportion of ownership interest and voting power held by the Group		Proportion of ownership interest and voting power held by the Company	
					2026	2025	2026	2025
Silverlands Mozambique Holdings Limited	Joint venture	Banana farming	Mozambique	Fellow subsidiary of Group's majority shareholder SilverStreet	49.5%	49.5%	49.5%	49.5%
Lebombo Growers (Pty) Ltd	Associate	Banana marketing and distribution	South Africa	Co-operative partner and main banana customer	32.16%	32.16%	32.16%	32.16%

The Group's interest in the above investees is as per the below summarised information, all of which are extracts of the investees financial statements prepared in accordance with IFRSs (adjusted by the Group for equity accounting purposes). In the case of the financial information for Silverlands Mozambique Holdings Limited ('SMHL'), this is based on unaudited financial statements. The SMHL financial year end is 31 December.

In the case of the financial information for Lebombo Growers (Pty) Ltd, this is based on the latest available unaudited financial information as at the date of reporting.

Details of the Group's equity accounted income earned from the joint venture and associate during the reporting period is as follows:

Statement of profit or loss and other comprehensive income at effective share	Silverlands Mozambique Holdings Limited		Lebombo Growers (Pty) Ltd*		Total equity accounted income from joint venture and associate	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000	2026 R'000	2025 R'000

Fair value at end of year	323 405	345 162	9 372	11 170

In terms of IAS 41: Agriculture, growing crops, comprising sugar cane, bananas and macadamias are accounted for as biological assets and are measured and recognised at fair value. Changes in the fair value are included in profit or loss.

The fair value of growing crops is determined based on current market prices less estimated selling costs. Refer to note 38 for details of the fair value hierarchy of biological assets.

Refer to note 37 for financial risk management strategies.

24.2 Biological asset valuations

The following key assumptions have been used in determining the fair value of biological assets:

		Group		Company	
		2026 R'000	2025 R'000	2026 R'000	2025 R'000
Sugar cane					
Expected area to harvest after 31 March:					
– South Africa	(ha)	3 416	3 453	473	548
– Eswatini	(ha)	2 145	2 230	–	–
– Zambia	(ha)	405	429	–	–
Total area	(ha)	5 966	6 112	473	548
Estimated yields:					
– South Africa	(tonnes/ha)	94.7	93.2	56.0	58.3
– Eswatini	(tonnes/ha)	94.6	93.4	–	–
– Zambia	(tonnes/ha)	131.4	133.5	–	–
Weighted average		97.2	96.1	56.0	58.3
Average maturity of crop at 31 March ⁽¹⁾ :					
– South Africa	(%)	64	64	61	61
– Eswatini	(%)	64	64	–	–
– Zambia	(%)	64	64	–	–
Estimated RV price/tonne – South Africa ⁽²⁾	(Rands)	7 005	7 580	7 005	7 580
Estimated sucrose price/tonne – Eswatini	(Rands)	5 786	6 417	–	–
Estimated ERC price/tonne – Zambia ⁽³⁾	(Rands)	10 631	7 792	–	–
Bananas					
Expected area to harvest after 31 March:					
– South Africa	(ha)	410	415	–	–
– Eswatini	(ha)	149	96	–	–
Estimated yields:					
– South Africa	(tonnes/ha)	59.2	59.6	–	–
– Eswatini	(tonnes/ha)	59.8	58.6	–	–
Average maturity of crop at 31 March ⁽¹⁾ :					
– South Africa	(%)	50.0	50.0	–	–
– Eswatini	(%)	50.0	50.0	–	–
Estimated net price per carton:					
– South Africa	(Rands)	111.58	109.52	–	–
– Eswatini	(Rands)	113.51	109.82	–	–
Macadamias					
Expected area to harvest after 31 March	(ha)	585.3	585.3	–	–
Estimated yields	(tonnes/ha)	1.73	1.76	–	–
Average maturity of crop at 31 March ⁽¹⁾	(%)	95	95	–	–
Estimated net price per tonne	(Rands)	46 188	50 999	–	–

⁽¹⁾ Fixed and not subject to change, based on the Group's biological assets accounting policy and harvest programme which are not expected to vary from year to year.

⁽²⁾ RV – Recoverable value

⁽³⁾ ERC – Estimated recoverable crystals

Total trade and other receivables	97 605	131 465	9 416	9 749
Non-current portion of other receivables [^]	6 083	16 443	–	–
Current portion of trade and other receivables	91 522	115 022	9 416	9 749
Total trade and other receivables	97 605	131 465	9 416	9 749
[^] Long outstanding VAT refunds due from Mozambique tax authorities. VAT receivables impairment of R15.7 million raised during the current year.				
Reconciliation of ECL on trade receivables:				
Balance at beginning of the year	(3 042)	(2 914)	(552)	–
ECL acquired via Group restructure (see note 22.5)	–	–	–	(554)
ECL raised on trade receivables	(134)	(137)	(59)	–
ECL reversed on trade receivables	5	9	–	2
Expected credit loss (ECL)	(3 171)	(3 042)	(611)	(552)

The Directors consider the amortised costs of trade and other receivables to approximate their fair value. In terms of IFRS 9, the Group applies the simplified approach and recognises lifetime ECL for trade receivables. Other receivables have been assessed for ECL using the general approach in accordance with IFRS 9.

Disclosures concerning the management of credit risk relating to all of the above categories of gross trade receivables have been provided in note 37.3.

Treasury shares arise from the Deferred Bonus Scheme ("DBS"), whereby a portion of an employee's bonus is settled in deferred bonus shares.

Under the DBS, qualifying management receive actual shares, which enjoy all shareholder rights, including dividends and voting rights. The DBS granted are held in escrow by the Escrow agent on behalf of the employees until the end of the vesting period.

During the current year, no shares (2025: 68 262 shares) were acquired at face value for the benefit of the participants under the DBS. The weighted average price of the shares purchased during 2025 was 3 321 cents. Refer to note 36 for further details.

29. Borrowings – interest-bearing continued

29.7 Summary of borrowing arrangements

- A. At 31 March 2026, the Group had a committed general banking facility ("facility") with Rand Merchant Bank ("RMB") to the value of R80 million.

The facility includes a R50 million demand portion available all year round, and a R30 million seasonal portion available between the months of January and June.

The terms of the seasonal portion notwithstanding, the entire facility is repayable on demand and bears interest at prime less 0.65% per annum.

In addition to the general banking facility, the following RMB short-term direct facilities are also available to the Group and Company:

Type	Term	Utilisation	2026 R'000	2025 R'000
Short-term direct	Demand facility	Corporate card	600	600
Short-term contingent	Demand facility	Guarantees	30	30
Settlement	Demand facility	Settlement	230	230
			860	860

The above facilities are secured by way of:

- An unlimited cession of debtors executed in favour of RMB by the group's wholly owned subsidiary Crookes Brothers South Africa (Pty) Ltd.
- An unlimited cession of credit balances (including bank accounts held) in favour of RMB by Crookes Brothers South Africa (Pty) Ltd.
- A suretyship for the amount of R200 million by Crookes Brothers South Africa (Pty) Ltd in favour of RMB for the obligations of the Group.
- A deed of pledge in respect of shares held in the group's wholly owned subsidiary Crookes Plantations Limited ("CPL").
- A general corporate guarantee from the group's wholly owned subsidiary CBL Agri Zambia Ltd.

- B. The Group's Mawecro and Libcro estates are the recipients of working capital loans from Akwandze Agricultural Finance ("Akwandze").

These loans are secured by way of a cession over the sugar cane proceeds paid by the mill and are refinanced annually at the discretion of the Directors.

- The Mawecro loan of R15 million accrues interest at prime plus 1% per annum and is fully repayable/refinanceable by September 2026.
- The Libcro loan of R15 million accrues interest at prime plus 1% per annum and is fully repayable/refinanceable by February 2027.

- C. In addition to the revolving credit loans with Akwandze, the Group's Libcro Estate is the recipient of a five-year term-loan from Akwandze for an amount of R10 million.

The loan bears interest at prime per annum and is secured by way of a cession over the sugar cane proceeds paid by the mill, payable over five equal capital repayments of R2 million each, commencing on 31 July 2023 and concluding on 31 July 2027.

- D. The African Bank term loan provided to the Group's subsidiary Renishaw Hills Developments (Pty) Ltd, is secured by way of a guarantee from CBL to the value of R80 million and a deed of pledge of CBL's 85% shareholding in Renishaw Property Developments (Pty) Ltd ("RPD").

In addition, CBL has subordinated its shareholder loan in RPD up to a value of R80m in favour of African Bank. The loan bears interest at the prevailing South African prime rate and is fully repayable on 31 December 2029.

- E.** On 25 November 2020, the Group secured a US\$8 million (eight million US Dollars) 10-year term loan from AgDevCo Limited a UK-based Development Finance Institution, to fund the expansion of its macadamia operation in Mozambique.

The Group enjoys a “capital holiday” for the first five years of the loan, with interest accruing at USD 8% per annum, payable semi-annually in arrears.

Capital repayments are then due over five equal portions of US\$1.6 million each, commencing on 31 December 2026 and concluding on 31 December 2030.

As at the end of the current reporting period, a total of US\$5 million (2025: US\$5 million) of the available facility had been drawn down.

The loan from AgDevCo is secured by:

- Quota pledges granted by CBL and fellow subsidiary Mozambique Farms (Pty) Ltd in favour of AgDevCo over the entire quota holdings in MML and MFL.
- An assignment by CBL over all loans advanced to MML and MFL.

Refer to note 29.8 for details relating to financial covenants applicable to this loan.

- F.** In May 2022, the Group secured a R40 million five-year term loan from FNB Eswatini (“FNB”), to fund a banana expansion at its Eswatini operation.

The loan accrues interest at the quoted Eswatini prime rate plus 1.5%, and is payable quarterly.

Capital is repayable in 16 equal quarterly instalments, commencing on 30 June 2023 and concluding on 31 March 2027.

The loan is secured by way of:

- An unlimited general deed of suretyship by the group’s wholly owned Eswatini subsidiary Bar J Ltd, in favour of FNB for the obligations of Crookes Plantations Limited (“CPL”).
- A continuing mortgage bond over the CPL properties, for an amount of R65 million.
- A cession of credit balances held with FNB.
- A cession of short-term insurance cover on the CPL properties.

As at the end of the current reporting period, the full R40 million available facility had been drawn down (2025: R20 million).

Refer to note 29.8 for details relating to financial covenants applicable to this loan.

- G.** In February 2026, Renishaw Hills Developments (Pty) Ltd secured a R48.1 million 24-month revolving facility with Investec to fund Phase 7A, comprising of 18 residential units.

The facility accrues interest at the prevailing prime rate less 0.5%, and is secured by a first covering mortgage bond over the 18 units, cession of VAT refunds and insurance, and a parent guarantee from CBL. Drawdown is subject to achieving Investec-approved pre-sales of R29 million. The facility remained undrawn at year end.

- H.** In July 2025, the Group’s Mawecro estate obtained funding of R9.5 million from Land Bank (“The Land and Agricultural Development Bank of South Africa”) to finance the purchase and installation of a solar system. The facility bears interest at prime plus 1.75% per annum, is repayable over a five-year period with capital repayments commencing 12 months after the disbursement date, and is secured by a cession of sugar cane proceeds receivable from the mill together with a general notarial bond over the solar equipment.

Refer to note 29.8 for details relating to financial covenants applicable to this loan.

- I.** The Group and Company entered into instalment sale agreements with WesBank, secured by vehicles with a net book value of R2.0 million for the Group and R0.7 million for the Company.

The agreements bear interest at rates between prime and prime less 0.25%, with monthly repayment terms.

Additions to leased bearer assets	19 329	18 993
Depreciation on leased bearer assets	(11 370)	(10 718)
	64 799	56 840
Included in the financial statements as:		
Non-current	64 799	56 840
	64 799	56 840

⁽¹⁾ This liability relates to a constructive obligation to return the leased Komatipoort farms in Mpumalanga to their original condition, on termination of the lease agreement with the Mawewe Communal Property Association ("MCPA"). The original lease term is for a period of 20 years. At the end of the current reporting period, 10 years of the lease term was left remaining.

In 2021, the Nicoskamp farm operation was transferred to the Mawecro estate, and so too was the constructive obligation to return this portion of leased farmland. A separate lease agreement totalling 10 years was signed for this Nicoskamp portion of land. At the end of the current reporting period, four years of the lease term was remaining on the Nicoskamp lease.

⁽²⁾ This liability relates to a contractual obligation to return the leased Libcro Malelane farms in Mpumalanga to their original condition, on termination of the lease agreement with Mthayiza Holdings (Pty) Ltd ("MHO"). The lease term runs up to September 2038. At the end of the current reporting period, 13 years of the lease term was left remaining.

The crop will remain in its current state until the farm is given back to the lessor and therefore the current year end value of the bearer is the best representation of the obligation to return the leased farmland. The value of this obligation is equal to, but opposite in sign of the leased portion of the bearer asset disclosed in note 16.

31. Lease liabilities

	166 299	170 844	1 581	2 856

⁽¹⁾ The Group through its subsidiary Mawecro Farming, signed a 20-year lease agreement with the Mawewe Communal Property Association, who are the owners of approximately 2 459 hectares of the Komati estate, upon which the Group farms sugar cane and bananas. Lease rentals are payable annually in advance and is based on a fixed Rand rate per hectare under crop, escalated annually by the consumer price index. As at the end of the current reporting period, 10 years remain on the Mawecro lease.

⁽²⁾ The Group, through its subsidiary Libcro Farming, leases the Libcro Estate (sugar operation) from the Libuyile Community Trust (a joint venture partnership with the Libuyile community), based on a fixed Rand rate per hectare under crop, escalated annually by the consumer price index. Lease rentals are payable quarterly in arrears. As at the end of the current reporting period, 13 years remain on the Libcro lease.

⁽³⁾ The Company entered into an office floor lease agreement for its head office in Umhlanga for a total term of 5 years from May 2022. Rent escalates on an annual basis by 5% and is payable monthly.

The Group does not face significant liquidity risk with regards to its lease liabilities. Lease liabilities are monitored within the Group's treasury function. All lease obligations are denominated in Rands. The discount rate applied by the Group for the current reporting period was 8.33% (2025: 8.33%) and 7.75% (2025: 7.75%) on the headoffice lease.

Refer to note 3.21 of the accounting policies for details of the Group's lease liabilities in its capacity as a lessee. Refer to note 17 for details of the right-of-use asset.

32.1 The Group as a lessee				
Nicoskamp and Umkomaas farms ⁽¹⁾	3 650	4 467	–	–
Chamotte farm ⁽²⁾	374	264	374	264
Leases of low value assets and other ⁽³⁾	887	1 054	197	188
Lease payments recognised as an expense in the year	4 911	5 785	571	452

⁽¹⁾ The Mawecro estate leases the Nicoskamp and Umkomaas farms in Mpumalanga from the MCPA under a 10-year lease arrangement. The annual lease rentals are contingent on revenue. As the lease payments are variable, the lease has been scoped out of IFRS 16.

⁽²⁾ The Group and Company lease a small sugar cane farm in Malelane called Chamotte. This is an annual lease renewable at the discretion of the lessor. It consists exclusively of variable lease payments, as the annual lease rental is linked to the actual tonnage yielded, which varies from year to year.

⁽³⁾ These remaining lease payments relate to rentals paid on behalf of employees, archiving and storage costs and equipment rental of the Group's copiers and printers. These rentals are over low-value assets and are considered immaterial in relation to the Group's total other lease arrangements.

Refer to note 17.2 for further disclosure regarding amounts recognised in profit or loss relating to leases of low-value assets and variable lease payments.

See accounting policy note 3.19.

36.1.1 Share options granted and unexpired

	Opening balance 1 April 2025	Options granted during the year	Weighted average option price (cents)	Options forfeited during the year	Options exercised during the year	Exercise price (cents)	Options as at 31 March 2026
Executive Directors							
KA Sinclair	35 000	–	4 471	–	–	–	35 000
Management	73 000	–	5 395	(28 000)	–	–	45 000
Total	108 000	–	4 991	(28 000)	–	–	80 000

	Opening balance 1 April 2024	Options granted during the year	Weighted average option price (cents)	Options forfeited during the year	Options exercised during the year	Exercise price (cents)	Options as at 31 March 2025
Executive Directors							
KA Sinclair	35 000	–	4 471	–	–	–	35 000
Management	128 000	–	5 348	(55 000)	–	–	73 000
Total	163 000	–	5 064	(55 000)	–	–	108 000

The share options outstanding at the end of the year had a weighted average remaining contractual life of nil days (2025: nil days). The existing share options scheme has been replaced by the deferred bonus scheme and no further share options will be awarded to Directors or management.

36.1.2 Deferred bonus shares granted and unforfeited

The following table summarises the movements in the forfeitable deferred bonus scheme during the year.

Award date	Date award granted	Vesting date	Number of options granted	Price (cents)*	Number of forfeitable shares vested	Number of forfeitable shares forfeited	Total forfeitable shares**
19 October 2020	2020	Oct-23	74 910	4 360	(68 549)	(6 361)	–
15 July 2021	2021	Jul-24	100 269	4 420	(60 657)	(17 326)	22 286
17 August 2022	2022	Aug-25	20 000	4 034	(6 667)	–	13 333
21 June 2023	2023	Jun-26	20 000	3 188	–	–	20 000
26 June 2024	2024	Jun-27	79 799	2 898	(6 538)	(10 339)	62 922
			294 978		(142 411)	(34 026)	118 541

* The price reflects the market price on the date of the awards.

** At 31 March 2026, the fair value of these shares based on a closing share price of R17.75 (2025: R31.19) was R2.1 million (2025: R5.9 million).

Shares acquired for the benefit of the participants under the DBS are held as treasury shares for IFRS purposes only.

Notes to the financial statements continued

Management	90 358	–	–	(30 017)	(4 971)	55 370
Total	190 571	–		(61 267)	(10 763)	118 541

⁽¹⁾ Passed away on 7 March 2026.

	Opening balance 1 April 2024	Shares granted during the year	Weighted average grant price (cents)	Shares vested during the year	Shares forfeited during the year	Shares as at 31 March 2025
Executive Directors						
KA Sinclair	77 136	21 904	2 898	(14 600)	–	84 440
N Naidoo	8 176	10 976	2 898	(3 379)	–	15 773
Management	71 096	46 919	2 898	(27 657)	–	90 358
Total	156 408	79 799		(45 636)	–	190 571

Deferred bonus shares available for further grants:

	Number of shares	
	2026	2025
Shares authorised for the deferred bonus scheme	763 200	763 200
Shares granted and vested as at the end of the financial year	(142 411)	(81 144)
Shares granted and unexpired as shown above	(118 541)	(190 571)
Balance available⁽²⁾	502 248	491 485

⁽²⁾ Remaining shares authorised to be utilised, from issued share capital, for settling obligations under the deferred bonus scheme.

36.2 Employee cash-settled share-based payments

After March 2025, the Group and Company introduced an alternative cash-settled Deferred Bonus Unit Scheme for all new awards granted. Existing awards granted under the equity-settled Deferred Bonus Scheme will continue in accordance with the terms of that scheme until settlement.

Deferred Bonus units granted to employees for services rendered or to be rendered are raised as a liability and recognised in profit or loss over the vesting period. The liability is remeasured annually until settled and any changes in value are recognised in profit or loss.

Fair value (Company equity valuation) is measured as the higher of the smoothed equity value or 40% of the net asset value reflected in the most recent Group financial statements.

The following table summarises the movements in the forfeitable deferred bonus unit scheme during the year.

Award date	Group					
	Vesting date	Number of units awarded	Award price (cents)*	Number of units vested	Number of units forfeited	Total units**
8 August 2025	Aug-28	143 604	2 909	(2 715)	(19 171)	121 718
		143 604		(2 715)	(19 171)	121 718

* The award price reflects the value of a unit on the award date that is determined on the basis of the Company equity valuation.

** At 31 March 2026, the fair value of these units was R3.5 million.

Award date	Company					
	Vesting date	Number of units awarded	Award price (cents)*	Number of units vested	Number of units forfeited	Total units**
8 August 2025	Aug-28	108 100	2 909	(2 715)	(12 879)	92 506
		108 100		(2 715)	(12 879)	92 506

* At 31 March 2026, the fair value of these units was R2.7 million.

The table below shows the executive participants in the scheme and forfeitable units granted to the executives and management:

	Group					
	Opening balance 1 April 2025	Units granted during the year	Weighted average grant price (cents)	Units vested during the year	Units forfeited during the year	Units as at 31 March 2026

Total borrowings	(%)	99%	0%	0%	0%	99%

The Company's general banking facilities remained unutilised during the prior financial year .

Fluctuations in interest rates impact on the return on short-term cash investments and the cost of financing activities giving rise to cash flow interest rate risk. The exposure to interest rate risk is managed through the Group's cash management system which enables the Group to maximise returns while minimising risks. The Group manages its interest rate risk by ensuring that demand deposit facilities are paid up regularly, to avoid treatment of the facilities as term loans by the financial institutions who provided the finance.

The Company and Group has not entered into any interest rate derivatives during the year.

			Group		Company	
Effective interest rate on borrowings	Type		2026	2025	2026	2025
Amounts due to local bankers	variable	%	9.60	10.35	9.60	10.35
Amounts due to foreign bankers	variable	%	10.25	10.50	–	–
Revolving credit loan – Akwandze (secured)	variable	%	11.25	12.00	–	–
Revolving credit loan – Akwandze (secured)	variable	%	11.25	12.00	–	–
Term loans – Akwandze	variable	%	10.25	11.00	–	–
Term loan – AgDevCo	fixed	%	8.00	8.00	–	–
Term loan – African Bank	variable	%	10.25	11.00	–	–
Term loan – Investec	variable	%	9.75	10.50	–	–
Term loan – FNB Eswatini	variable	%	11.75	12.00	–	–
Lease liabilities	fixed	%	8.14	8.14	–	–

Based on year-end exposure to interest-bearing borrowings at variable rates, a 2.00% (200 basis points) change in interest rates will have a R5.3 million (2025: R3.3 million) effect on pre-tax profit or loss and a R3.8 million (2025: R2.4 million) impact on equity for the Group. Effect on the Company is immaterial.

Based on year-end exposure to bank balances and cash investments and loans receivable with yields linked to variable interest rates, a 2.00% (200 basis points) change in interest rates will have a R3.5 million (2025: R2.6 million) effect on pre-tax profit or loss and a R2.6 million (2025: R1.9 million) impact on equity for the Group. Effect on the Company is immaterial.

37.2 Liquidity risk management

The Group manages liquidity risk by monitoring forecast cash flows and ensuring that adequate unutilised borrowing facilities are maintained. The Company and Group has access to short-term financing facilities as described in note 29, of which R32 million was undrawn at year end (2025: undrawn: R105 million). See note 29.4.

Current borrowings have been disclosed in note 29 to the annual financial statements.

Trade and other payables have been disclosed in note 34 to the financial statements. All payables are due within one year and the impact of discounting them is not significant.

The board regularly reviews and monitors the liquidity position and covenants of the Group. Refer to note 29.8 for further details on covenants.

The maturities of contractual financial and non-financial liabilities are as follows:

	Group							
	Carrying value R'000	<3 months R'000	>3 months <6 months R'000	>6 months <1 year R'000	>1 year <3 years R'000	>3 years <5 years R'000	>5 years R'000	Total R'000

⁽¹⁾ The loans from ZAM, CPL and BAR J, although disclosed as current are not expected to be settled within the next 12 months. Refer to note 22 for repayment terms.

37.3 Credit risk management

Credit risk primarily relates to short-term cash and bank balances, financial assets in the form of loans receivable and trade and other receivables.

As part of its total investments in subsidiaries and joint venture and associates, the Company has granted loans to certain of these related parties.

In order to minimise credit risk, the Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group regards “default” as the failure of a counterparty to honour its financial obligations to the Group.

The Group and Company considers their maximum exposure to credit risk to be:

	Group		Company	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Cash and other short-term investments	143 934	122 441	26 751	16 750
Trade and other receivables	74 003	92 803	8 548	8 926
Loans receivable	15 772	14 045	11 041	10 754
Loans to subsidiaries	–	–	489 563	400 696
Loans to joint venture and associate	25 539	24 236	14 782	14 232
	259 248	253 525	550 685	451 358

The Group and Company expected credit losses:

	Group		Company	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Trade and other receivables	3 171	3 042	611	552
Loans receivable	4 947	4 324	4 947	4 324
	8 118	7 366	5 558	4 876

In order to minimise credit risk, the Group has tasked its executive management committee to develop and maintain the Group's credit risk ratings to categorise exposures according to their degree of risk of default. The credit rating information is supplied by independent rating agencies where available and, if not available, the executive management committee uses other publicly available financial information and the group's own trading records to rate its major customers and other debtors.

The Group's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

The Group's current credit risk grading framework comprises of the following categories:

Category	Description	Basis for recognising expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amounts.	12-month ECL – stage 1
Underperforming	Significant increase in credit risk since initial recognition, but not yet defaulted.	Lifetime ECL – stage 2
In default	Amount is past due and evidence indicates that the asset is credit impaired.	Lifetime ECL – stage 3
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery.	Amount is written off

Cash and other short-term investments

The Group limits its exposure in relation to cash balances by only dealing with well established financial institutions of high quality credit standings and limits the amount of credit exposure to any one counterparty. Refer to the inside back cover for details of the Group's bankers. All bank balances are assessed to have low credit risk at each reporting date as they are held with reputable banking institutions. The Group assesses its respective banks intrinsic creditworthiness before considering external factors, e.g. affiliate or government support. To this end, a standalone credit rating of BBB- is considered "high quality". During the current reporting period, the Group's banks met this credit rating criteria, accordingly the Directors concluded that any possible loss allowance on cash in bank was immaterial.

Loans receivable

Loans receivable measured at amortised cost are disclosed in note 21.2.

The amounts owed from co-ops and suppliers have strong credit ratings and a long business history with the Group. The Group employs an executive who sits on the Komati Kortpad Board. There has been no significant increase in the risk of default on the underlying balances since initial recognition. Refer to note 21.4 for the ECL assessments for this category.

The Group recognises 12-months ECL for the unsecured loans advanced to the Libuyile Community Trust ("LCT"), Renishaw Estate Management Association ("REMA") and Renishaw Hills Homeowners Association ("RHOA"). During the current reporting period, the Directors reassessed the risk of default on the underlying balances.

The Directors have considered forward looking inputs around the RHOA and REMA loans, which include:

- RHOA and REMA have a strong balance sheet with a significant general and cash reserve, which continues to grow, providing sufficient collateral to the Group.
- The RHOA development continues to grow with a further 12 units sold (2025: 19 units), adding further financial strength.

Based on this underlying information, the Directors conclude that any ECL over these debtors will be immaterial. Refer to 21.4.6 and 21.4.7.

During the current reporting period, the Directors reaffirmed their conclusion that any ECL on the LCT loan would be immaterial, due to the Group's recourse to deduct the full balance owing, against future lease rentals due. Refer to note 21.4.3

Notes to the financial statements continued

for the year ended 31 March 2026

37. Financial instruments continued

37.3 Credit risk management continued

Loans to related party subsidiaries, joint venture and associates

Refer to note 22 for details of working capital loans granted by the Company to its related party subsidiaries, and to note 23 for details of loans to the Group's joint venture.

Expected credit loss (ECL) on loans to subsidiaries

The Group has performed an assessment on loans to subsidiaries in terms of IFRS 9 and has concluded that these loans represent loans at amortised cost, except for loans which are non repayable which are classified as equity.

Based on the current profitability, financial outlook and forward-looking information available, the Company has performed an expected credit loss (ECL) calculation for the loans receivable from its subsidiaries by taking into account their available cash resources, net liquid current assets and non-current assets available for settlement of the loan. These loans have thus been assessed for impairment using the lifetime basis.

Expected credit loss (ECL) on loans to joint venture and associate

The Group has performed an assessment on receivables from joint ventures and associates in terms of IFRS 9 and has concluded that these loans represent loans at amortised cost.

Based on the current profitability, financial outlook and forward-looking information available, the Company has performed an expected credit loss (ECL) calculation by taking into account their available cash resources, net liquid current assets and non-current assets available for settlement of the loan. Refer below for additional credit risk disclosures.

Silverlands Mozambique Holdings Limited

The loan to Silverlands Mozambique Holdings Limited ("SMHL"), is in relation to the Group's equity accounted share of the QBV banana operation in Mozambique.

See note 3.2. SMHL owes the Group R25.6 million (2025: R24.2 million), of which the Company is owed R14.8 million (2025: R14.2 million). In the case of the Company, it's 49.5% share of the net assets of SMHL amounts to R54.2 million (2025: R52.8million), whilst the overall group's share is R52.9 million (2025: R45.6 million). See note 23.

In assessing the lifetime ECL for the loan to SMHL, the Directors considered the following forward looking information:

- The QBV operation has concluded initial phases of planting and is fully operational, harvesting and selling bananas.
- QBV exports its bananas into neighbouring South Africa to the Groups associate Lebombo, therefore benefiting from hard currency prices.
- The Group and Silverstreet Capital are 100% shareholders in SMHL. The working capital loan in this context is a shareholder loan, which is fully within the control of the Group.
- The SMHL Group is fully capitalised with US\$4 million in equity, a US\$2 million OPIC loan and US\$4.5 million in DFI funding.
- The SMHL Group is generating a favourable EBITDA.
- The loan will be settled partly out of proceeds from the DFI funding, together with trading profits realised.

Based on the above mentioned forward looking assumptions, the Directors are satisfied that there is sufficient security over this loan as at 31 March 2026, and have therefore deemed the ECL to be immaterial.

Guarantees

Refer to note 29.7 for details regarding borrowings where the Company provides surety or guarantee. The Company has performed an assessment on the subsidiaries ability to settle the borrowings in terms of IFRS 9. This was based on the current profitability, financial outlook and forward-looking information available.

Additionally, the fair value of the guarantee was measured at the date of issue and amortised to the financial period end date.

This amortised cost was compared to the ECL measured on a one year or lifetime basis depending on the stage and the higher of the two was assessed. The Company concluded the ECL to be immaterial.

Trade and other receivables

The Group and Company applies the simplified approach and recognises lifetime ECL for trade and rental receivables. Other receivables apply the general ECL model.

Refer to note 26 for details of the various categories making up the Group's trade and other receivables.

Given that the revenue streams of the Group and Company have different risk profiles, the Directors disaggregated gross trade receivables into the following components when considering impairments:

	Group					
	Total R'000	Current R'000	30 days R'000	60 days R'000	90 days R'000	120 + days R'000

The Directors considered forward looking information in the form of various inputs, assumptions and estimation techniques to calculate the Group's overall ECL.

The Directors assessed R76.9 million (2025: R 95.5 million) of the trade and other receivables specifically resulting in an ECL of R3.2 million (2025: R3 million) and the remaining R0.3 million (2025: R0.4 million) using the general approach, which resulted in an immaterial ECL. See note 26. Detailed discussion relating to loss allowance including forward looking information is further explained below.

The risk profile associated with the above disaggregated debtors plays a key role in the "estimated credit loss" calculation of each of these categories of debtors.

While historic payment behaviour is pertinent, the Group considers all current and forecast macroeconomic factors as well, including changes in debtor payment intervals, tenant deposit values (in the case of its rental debtors) and the performance of the industry of the debtor, in the case of the sugar milling, banana and macadamia sales segments.

Using the below forward looking input assumptions and techniques, and taking into consideration the various industry each debtor of significance operates in, the following notes per the above table of categories apply, in calculating the most appropriate ECL.

(i) Trade and rental debtors

Rental debtors consist of tenants renting buildings and houses on the various farms that the Group operates in. These tenants include employees, and also external companies and individuals unrelated to the Group.

Trade debtors comprise customers that procure various goods and services from the Group's farming and property divisions.

Expected credit loss ("ECL") allowance

Rental debtors

The majority of rental debtors were current and most of these tenants normally settle their outstanding balances, post 31 March each year. The Group calculated an immaterial ECL value for these rental debtors aged current as well as for those aged between 30 to 120 days.

Tenants with balances owing between 60 to 120 days were usually slow payers, however deposits available were more than sufficient to cover any risk of shortfall.

Using the quantum of the deposits available, less the amount outstanding from 60 to 120 day tenants, the calculated ECL was immaterial.

For renters owing in 120+ days, the Group considered the following for each and every renter:

- Tenant deposit available
- Correspondence with renter concerning their business performance

The Group took the conservative approach by applying the full value of these debtors of R0.9 million (2025: R 0.8 million) as the calculated ECL.

Trade debtors

In the current year, included in the balances of debtors aged 120 + days are the following:

- R6 million owed by a related party, QBV, for cartons purchased on their behalf. The Directors assessed an immaterial ECL to this debtor.
- A customer that purchased seed cane from the Group to the value of R0.70 million, which can not be traced. The Directors therefore continue to apply the full outstanding value as the calculated ECL for this debtor.
- A service provider agreed to refund the Group the value of R0.4 million, which has still remained outstanding. The Directors therefore apply the full outstanding value as the calculated ECL for this debtor.
- R0.6million owed by a service provider that collected prepaid electricity from tenants that has been put under business rescue. The Directors therefore applied the full value outstanding as the calculated ECL for this debtor.

Total ECL

A year end ECL of R3.2 million (R0.9 million rental debtors and R2.3 million trade debtors) (2025: R3 million, rental debtors R0.8 million and R2.2 million trade debtors) was calculated as the maximum credit risk exposure to the Group. Refer to note 26 for a reconciliation of the loss allowance.

⁽²⁾ Banana revenue receivables

The banana revenue accrual raised at year end is based on the actual pool deliveries to the Group's banana customer.

Historically the accrual is always settled within one month of financial year end. Nevertheless an immaterial ECL was calculated for this debtor at year end. Refer to note 38 which deals with the sensitivity analysis of the price of a carton of bananas, which is negligible, due to the fact that revenue proceeds from banana deliveries over year end are received within two weeks of the new financial year.

⁽³⁾ Sugar cane revenue receivables

The sugar cane revenue accrual raised at year end relates to the final Illovo Sugar retention due to the Zambia operation and ERC price adjustment, as well as the final Illovo Sugar estimate payable to the Eswatini operation.

Historically payment has always been settled with the Group after year end, and these customers have never defaulted on payment to the Group.

Therefore at year end, and considering the impact of forward looking information, the Directors assessed an immaterial ECL for these debtor.

⁽⁴⁾ Macadamia revenue receivables

The final remittance payments from Mayo Macs and Green Farms were settled prior to financial year end. Therefore at year end, no ECL assessment was required.

Historically payment has always been settled with the Group shortly after year end, and these customers have never defaulted on payment to the Group.

⁽⁵⁾ Property revenue receivables

Included in property revenue receivables is R20.4 million (2025: R12 million) relating to the sale of Renishaw Hills units, as well as R28.5 million in the prior year relating to the sale of the Renishaw Precinct shopping centre and petrol station sites.

The full proceeds had been received by the Groups lawyers prior to year end.

At year end, considering the impact of forward looking information, the Directors assessed an immaterial ECL for this receivable.

⁽⁶⁾ Other receivables

Other receivables consists of sundry receivables and deposits, which the Directors have assessed an immaterial ECL.

Notes to the financial statements continued

for the year ended 31 March 2026

37. Financial instruments continued

37.4 Foreign currency risk management

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposure is managed by a separate committee as well as the Board of Directors.

There were no hedging activities employed during the current or prior financial year.

Besides the Republic of South Africa, the Group also operates in Eswatini, Zambia and Mozambique, the local currencies being the Emalangeni (E), Kwacha (ZMW) and Metical (MZN) respectively. The Eswatini Emalangeni ranks 1:1 with the South African Rand (ZAR), therefore no foreign currency translation differences arise when translating Eswatini monetary assets and monetary liabilities.

Year end spot rates applied by Group	2026	2025
ZAR/MZN	3.7806	3.5138
USD/MZN	64.4600	64.4600
ZAR/ZMW	1.1144	1.5401
USD/ZMW	19.1172	28.3132
USD/ZAR	17.0635	18.3570

The functional currency of the Group's foreign operations, is assessed on an annual basis. There was no change in the functional currency of any of the foreign operations.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

	Liabilities		Assets	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Bank accounts (USD)	–	–	4 858	2 687
Bank accounts (MZN)	–	–	207	1 366
Bank accounts (ZMW)	–	–	1 074	1 844
Trade and other receivables (MZN)	–	–	364	1 478
Trade and other receivables (ZMW)	–	–	5 723	2 830
Interest-bearing shareholder loan (ZMW)	60 419	–	–	–
Interest-bearing term loan (USD)	90 499	93 559	–	–
Trade and other payables (MZN)	5 099	3 504	–	–
Trade and other payables (ZMW)	1 194	1 512	–	–
	157 211	98 575	12 226	10 205

Sensitivity analysis

The following table details the Group's sensitivity to a 10% devaluation and appreciation in the Rand against the relevant foreign currencies.

10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the functional currency of the lender or the borrower. A positive number below indicates an increase in profit or equity where the Rand strengthens 10% against the relevant currency. For a 10% weakening of the Rand against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

	USD impact		MZN impact		ZMW impact	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Profit or loss and equity*	9 536	9 625	494	339	5 696	53
Foreign currency translation reserve	–	–	(1 123)	(3 189)	1 173	4 992

* From the above table, it is evident that a 10% change in the value of the Rand against the other currencies, will have a material impact on profit or loss and equity of the Group, particularly in terms of the Group's exposure as a result of the AgDevCo term loan granted to Murrmo, which is USD denominated. The sensitivity analysis is also not a complete representation of the inherent foreign exchange risk in the trading and economic environment of Zambia during the current and prior financial years. This is because the reporting period end ZMW spot rate does not reflect the extreme month on month fluctuations in the average ZMW rate during the current and prior financial year. The month on month average USD and MZN exchange rates remained relatively stable against the ZAR throughout the current financial year, while the ZMW strengthened against the ZAR.

37.5 Commodity price risk management

The Group is exposed to commodity price risk based on the various commodities it trades in and geographic territories it operates in.

The sugar price in South Africa, Eswatini and Zambia is government protected and regulated prices, therefore cannot be hedged by the Group. In South Africa, the sale of sugar on the world market, as well as the related hedging activities, is undertaken by the South African Sugar Association (SASA). Sugar cane price risk in Eswatini is not hedged by the Group and neither are foreign currency fluctuations relating to sugar cane sales in Zambia.

Commodity price risk arises from fluctuations in the prices for bananas sold in the local market. The Group, through its association with Lebombo Growers (Pty) Ltd (see note 23), markets the sale of bananas to receive the best possible prices. The price of bananas per carton is largely driven by demand and supply, and cannot be hedged by the Group.

The Group's macadamia development produced its 8th harvest of nuts during the current reporting period. Commodity price risk arises in the form of demand and supply, based on the changing appetites of consumers around the world due to the health benefits of macadamia nuts. Foreign exchange risk is hedged by the Group's co-operative partner Mayo Macs SA, who pays the Group in ZAR. The remaining customers paid in USD for their purchase of macadamia nuts from the Group.

Refer to note 38 for a price sensitivity analysis performed over the commodities of the Group.

37.6 Capital management

The Group manages its capital to ensure that it will be able to continue as a going-concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy is to maximise the internal rate of return associated with capital projects of an expansion, improvement and replacement nature, and remains unchanged from 2025.

See note 40 for the budgeted capital expenditure of the Group.

The capital structure of the Group consists of net debt (bank overdraft, facilities and interest-bearing borrowings as detailed in note 29 offset by cash and bank balances) and equity (comprising issued share capital, reserves, retained earnings and non-controlling interests as detailed in note 28).

The Group is exposed to externally imposed capital requirements. See note 29 for details of financial institution imposed encumbrances and requirements.

The Group risk committee formally reviews the capital structure of the Company on a semi-annual basis, while the Board of Directors reviews the capital structure on an ongoing basis. As part of this review, the Directors consider the cost of capital and the risks associated with each class of capital. The Group has a target financial gearing ratio of 25%–30%. This target financial gearing ratio is determined as interest-bearing debt, expressed as a percentage of shareholders' funds.

Gearing ratio

The Group reviews the capital structure on a quarterly basis. As part of the review, the Group considers the cost of capital and the risks associated with each class of capital.

The gearing ratio at the end of the reporting period was as follows:

	Group		Company	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000
Debt ⁽¹⁾	475 842	391 457	52 447	2 856
Cash and other short-term investments ⁽²⁾	(166 366)	(122 441)	(26 751)	(16 750)
Net debt	309 476	269 016	25 696	(13 894)
Equity ⁽³⁾	811 634	1 110 218	186 911	524 510
Net debt to equity ratio	38.13%	24.23%	13.75%	(2.65%)

⁽¹⁾ Debt comprises bank overdraft, facilities, lease liabilities and interest-bearing debt (non-current and current) as disclosed in note 29. For the purposes of the gearing ratio, the interest-free loan relating to the obligation to return leased farmland (see note 30) is excluded from debt, as this liability is offset by an opposite but equal bearer asset (see note 16).

⁽²⁾ Cash and other short-term investments include all bank balances, call and notice deposits.

⁽³⁾ Equity includes all capital and reserves of the Group that are managed as capital (see note 28).

Notes to the financial statements continued

for the year ended 31 March 2026

38. Fair value measurements

The Directors are of the opinion that the carrying value of financial assets and liabilities approximates their fair value. Where the carrying amount of each class of financial assets and financial liabilities are a reasonable approximation of the fair value, the respective fair values are not disclosed.

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable or based on observable inputs:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

	Group			
	Level 1 R'000	Level 2 R'000	Level 3 R'000	Total R'000
2026				
Investment property	–	124 199	–	124 199
Financial assets: equity investments	–	–	858	858
Biological assets	–	–	323 405	323 405
	–	124 199	324 263	448 462

2025				
Investment property	–	124 549	–	124 549
Financial assets: equity investments	–	–	858	858
Biological assets	–	–	345 162	345 162
Property, plant and equipment – market value disclosure	–	–	1 608 740	1 608 740
	–	124 549	1 954 760	2 079 309

	Company			
	Level 1 R'000	Level 2 R'000	Level 3 R'000	Total R'000
2026				
Financial assets: equity investments	–	–	858	858
Biological assets	–	–	9 372	9 372
	–	–	10 230	10 230

2025				
Financial assets: equity investments	–	–	858	858
Biological assets	–	–	11 170	11 170
	–	–	12 028	12 028

The above assets are measured at fair value on a recurring basis.

Valuation inputs and relationship to fair value

The following table gives information about how the fair values of these assets are determined (in particular, the valuation technique(s) and inputs used).

Assets	Fair value as at 2026 R'000	Fair value as at 2025 R'000	Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable inputs to fair value	Relationship of unobservable inputs to fair value
Investment property	124 199	124 549	Level 2	Comparable sales method. Relevant selling price per square metre with respect to similar residential units or number of bedrooms.	None.	None.
Financial assets: equity investments	858	858	Level 3	Fair value approximates cost.	None.	None.
Biological assets	323 405	345 162	Level 3	Recoverable value. Current estimated market prices for the following season, less the estimated costs of harvesting, transport, packing and point-of-sale costs.	Refer to sensitivity analysis below for significant unobservable inputs.	In arriving at the fair value, the estimated price is applied against the expected area to harvest, together with the estimated yields and average maturity of the crop. The higher the estimated market price less the estimated costs, the higher the value of the biological assets.
Property, plant and equipment (land including buildings and bearer assets) – market value disclosure	N/A	1 608 740	Level 3	Independent external property valuation using the market approach.	Rate per hectare determined per expert valuation.	Increase of rate per hectare by 10% would increase the fair value by R160.9 million.

The Group's growing crops and agricultural produce are measured at fair value, which is determined using estimated unobservable inputs and is categorised as level 3 under the fair value hierarchy. The unobservable inputs are disclosed in the fair value hierarchy.

Changes in the fair value of biological assets are included in profit or loss, with a decrease of R29.6 million (2025: increase of R15.4 million) being recognised in profit or loss in the current year. A reconciliation of the change in fair value for the year is included in note 24.1.

The Group's valuation policy and methodology are fully disclosed in the accounting policies in note 3.12. The assumptions and valuation inputs are disclosed in notes 16, 18, 21 and 24.2.

Biological assets	Company			
	Significant unobservable inputs	Range of unobservable inputs	Sensitivity of the input to fair value	
			%	R'000
2026				
Sugar cane	Price per tonne	RSA: R7 005	10%	1 542
	Direct costs per tonne	RSA: R2 765	10%	(605)
	Tonnes per hectare (Yield)	RSA: 55.99	10%	937
	Extraction rate	RV %: 12.2%	0.5%	379
2025				
Sugar cane	Price per tonne	RSA: R7 580	10%	1 675
	Direct costs per tonne	RSA: R2 545	10%	(558)
	Tonnes per hectare (Yield)	RSA: 58.4	10%	1 117
	Extraction rate	RV %: 12.1%	0.5%	456

A 10% sensitivity rate is used when reporting the fair value of the Group's biological assets in so far as its fluctuations relating to unobservable inputs. Although a 10% sensitivity is not always reflective of extreme year on year movements in unobservable inputs that occur due to macro-economic, geopolitical and climatic events outside of the Group's control.

The impact of a change in each of the biological asset unobservable inputs up or (down) would give rise to a positive or (negative) effect on pre-tax profit or loss.

The impact of a 10% change in the price of a carton of bananas has a negligible effect on pre-tax profit or loss.

Likewise, revenue proceeds from banana deliveries over year end are received within two weeks of the new financial year. The revenue is essentially accrued for at this actual value received, hence there is no price movement due to the passage of time between accrual and actual receipt.

Notes to the financial statements continued

for the year ended 31 March 2026

39. Related party transactions

During each year, the Group, in the ordinary course of business, enters into various transactions with related parties. Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making financial and operating decisions. These transactions occurred under terms that are no more or less favourable than those arranged with third parties.

Joint venture and associate

Details of interests in joint venture and associates are set out in note 23 and are equity accounted.

Subsidiaries

Details of interests in subsidiaries are set out in note 22.

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation at a Group level. Details of transactions between the Group and other related parties are disclosed below.

39.1 Trading transactions

During the current reporting period, the Group entities and Company entered into the following trading transactions with related parties.

	Group					
	Balances owing from/(to)		Sale of goods and services		Purchase of goods and services	
	2026 R'000	2025 R'000	2026 R'000	2025 R'000	2026 R'000	2025 R'000

⁽¹⁾ Management fees are charged to Group companies based on actual time spent by head office employees.

⁽²⁾ Directors' fees are charged to the Group companies, based on the representation on these respective company boards by the Company's Directors.

⁽³⁾ Refer to note 22 for details of interest charged on these unsecured working capital loans.

⁽⁴⁾ Refer to note 3.3 for details of surety fees charged.

⁽⁵⁾ These current accounts are typically settled within 30 days and are interest-free.

⁽⁶⁾ Refer to note 22 for details of the Company's loans to and from its subsidiaries.

⁽⁷⁾ Refer to note 23 for details of the Group's investments in its related party joint venture and associate.

⁽⁸⁾ Loan to subsidiary has been disclosed excluding impairment provision. Refer to note 22.

Notes to the financial statements continued

for the year ended 31 March 2026

		Group	
		2026 R'000	2025 R'000
40. Budgeted capital expenditure			
Authorised by the Directors but not yet contracted			
– expansion and project development ⁽¹⁾		22 185	12 944
– improvement:			
– General		6 383	5 608
– Irrigation		6 967	12 069
– replacement		20 988	5 124
– bearer asset planting		13 074	27 659
– bearer conversion		–	14 853
		69 597	78 257

⁽¹⁾ A portion of the committed capital expenditure, amount of R19.3 million, relates to development spend that is conditional upon achieving precinct contracted sales. The remaining committed spend of R2.9 million relates to the Eswatini banana expansion.

The above expenditure will be funded from the Group's liquid resources, shareholder loans, short-term borrowing facilities, term loans and instalment sale agreements.

41. Events after the reporting period

Group and Company

Subsequent to year end, CBL entered into a memorandum of understanding ("MOU") with a well-known UK based agriculture investor regarding a possible sale of its entire shareholding in MML and MFL.

Pursuant to the MOU the UK based agriculture investor is granted exclusivity until 1 September 2026 to market MML and MFL to third parties for sale, subject to agreement of terms by CBL and, inter alia, any regulatory and/or shareholder approvals (if applicable). If a third-party buyer is not secured by that date, CBL and the UK based agriculture investor will, in good faith, enter into negotiations in relation to the possible sale by CBL to the UK based agriculture investor of 100% of the issued share capital of MML and MFL, together with shareholder loans.

The possible sale of MML and MFL forms part of the broader restructuring of the Group's operations and financing arrangements.

Additionally, Renishaw Hills Developments (Pty) Ltd drew down R39 million of the R48.1 million facility with Investec, secured in February 2026, to fund Phase 7A of its construction of 18 residential units. The drawdown was subject to Investec approved pre sales of R29 million, which were successfully achieved. An amount of R19.3 million has subsequently been repaid from proceeds received on the sale of completed units.

There were no other major changes in the affairs or financial position of the Group or its subsidiary companies since the end of the current reporting period.

42. Going concern

The Directors consider that the Group and Company have adequate resources to continue operating for the foreseeable future and that it is therefore appropriate to adopt the going concern basis of accounting in preparing the Group and Company's Annual Financial Statements.

Based on the financial performance of the Group, its cash flow projection to the end of March 2027, secured funding and positive solvency and liquidity tests, the Group and Company will remain operational for the foreseeable future.
