Our 2025 reporting suite

Integrated Annual Report

Details how Gold Fields creates, preserves and erodes value over time, and serves as our primary report to capital providers. This report also includes valuable information for other stakeholders.

Notice of Annual General Meeting

Details the resolutions to be tabled to shareholders at our 2025 Annual General Meeting (AGM).

Annual Financial Report

Contains the Directors' Report, Audit Committee Report and Annual Financial Statements, fulfilling our statutory financial reporting requirements.

Mineral Resources and Mineral Reserves Supplement

Provides detailed technical and operational information relating to our operations.

Tax Report

Defines our tax principles and the Group's approach to tax, and includes our country-by-country report.

Sustainability Report

Provides an overview of how Gold Fields delivers positive social and environmental impact.

ESG databook

Includes key data, as well as cross references to the GRI, ICMM Principles, United Nations (UN) Global Compact Principles, UN SDGs and the Value Reporting Foundation.

Form 20-F

Comprises our annual report on Form 20-F filed with the United States (US) Securities and Exchange Commission (SEC) as a foreign private issuer trading on the New York Stock Exchange (NYSE).

About this cover

The audited financial statements for the year ended 31 December 2025 were prepared by the corporate accounting staff of Gold Fields headed by Tzvet Ilarionova, the Group Financial Controller. This process was supervised by Alex Dall, the Group's Chief Financial Officer (CFO).

Note

Gold Fields is a globally diversified gold producer with nine mines in Australia, South Africa, Ghana, Peru and Chile and one project in Canada. We have total attributable annual gold-equivalent production of 2.438Moz, proved and probable gold Mineral Reserves of 48.3Moz, measured and indicated gold Mineral Resources of 34.2Moz (excluding Mineral Reserves) and inferred Gold Mineral Resources of 12.8Moz (excluding Mineral Reserves). Our shares are listed on the Johannesburg Stock Exchange (JSE) and our American depositary shares trade on the New York Stock Exchange (NYSE).

Send us your feedback

We value your feedback on our reporting suite. To support our efforts to report on the issues our stakeholders care about, please provide any feedback and questions to investors@goldfields.com or sustainability@goldfields.com.

Statement of responsibility by the Board of Directors

The directors are responsible for the preparation, integrity and fair presentation of the Annual Financial Statements ("AFS") of Gold Fields Limited ("Gold Fields") and its subsidiaries (together referred to as the Group or the Company), comprising the Consolidated Statement of Financial Position at 31 December 2025, the Consolidated Income Statement and Consolidated Statement of Comprehensive Income, Changes in Equity and Cash-Flows for the year then ended, the accounting policies and the notes to the Consolidated Financial Statements, as well as the Directors' Report. These financial statements presented on pages 15 to 169 were prepared in accordance with the IFRS® Accounting Standards and the requirements of the South African Companies Act No 71 of 2008, as amended ("Companies Act"), the JSE Limited Listings Requirements and include amounts based on judgements and estimates made by management.

The directors consider that, in the preparation of the financial statements, the most appropriate accounting policies have been used, consistently applied and supported by reasonable and prudent judgements and estimates, and that all IFRS Accounting Standards they consider to be applicable have been followed. The directors are satisfied that the information contained in the AFS fairly presents the results of operations and cash-flows for the year and the financial position of the Group at year-end. The directors are responsible for the accuracy of the other information included in the Annual Financial Report ("AFR") and its consistency with the financial statements.

The directors are responsible for ensuring accounting records are kept. The accounting records should disclose with reasonable accuracy the financial position of the Group to enable the directors to ensure the financial statements comply with the relevant legislation.

The directors are also responsible for such internal controls as they deem necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and for maintaining adequate accounting records and an effective system of risk management.

The directors are also responsible for the controls over and the security of the website and, where applicable, for establishing and controlling the process for electronically distributing annual reports and other financial information to shareholders and to the Companies and Intellectual Property Commission ("CIPC").

The auditors are responsible for reporting on whether the Consolidated Financial Statements are fairly presented in accordance with the applicable financial reporting framework.

The going concern basis has been adopted in preparing the financial statements. The directors have no reason to believe that the Group, or any company within the Group, will not be a going concern in the foreseeable future, based on forecasts and available cash resources. These financial statements support the viability of the Group.

Gold Fields has adopted a Code of Conduct, which is available on the Gold Fields website and which is adhered to by the Group.

The Group's external auditors, PricewaterhouseCoopers Inc (PwC), audited the financial statements, and their report is presented on pages 47 to 52.

Approval of consolidated annual financial statements

Gold Fields' consolidated AFS, as identified in the first paragraph, were approved by the Board of Directors ("Board") on 30 March 2026 and are signed on its behalf by:

Mike Fraser

Chief Executive Officer
Authorised director

Alex Dall

Chief Financial Officer
Authorised director

Company Secretary's Certificate

In terms of section 88(2)(e) of the Companies Act, I certify that the Company has lodged with the CIPC all such returns required to be lodged by a public company in terms of the Companies Act, and that all such returns are true, correct and up to date.

Anré Weststrate

Company Secretary

30 March 2026

Chief Executive Officer and Chief Financial Officer Responsibility Statement

In terms of section 5.9 of the JSE Listings Requirements, the directors, whose names are stated below, hereby confirm that:

- a. The AFS set out on pages 53 to 137 fairly present in all material respects the financial position, financial performance and cash-flows of the issuer in terms of IFRS® Accounting Standards;
- b. To the best of our knowledge and belief, no facts have been omitted or untrue statements made that would make the AFS false or misleading;
- c. Internal financial controls have been put in place to ensure material information relating to the issuer and its consolidated subsidiaries have been provided to effectively prepare the financial statements of the issuer;
- d. The internal financial controls are adequate and effective and can be relied upon in compiling the AFS, having fulfilled our role and function as executive directors with primary responsibility for implementation and execution of controls;
- e. Where we are not satisfied, we have disclosed to the Audit Committee and the auditors any deficiencies in design and operational effectiveness of the internal financial controls, and have remediated the deficiencies/taken steps to remedy the deficiencies; and
- f. We are not aware of any fraud involving directors.

Audit Committee Report

for the year ended 31 December 2025

Introduction

We are pleased to present the Audit Committee (the "Committee") report for the year ended 31 December 2025.

Composition and meetings

The members of the Gold Fields' Audit Committee were appointed by our shareholders at the AGM on 28 May 2025. At the AGM, Ms PG Sibiya (Chairperson) was re-elected member of the Audit Committee while Mr CAT Smit and Ms ZBM Bassa were re-elected as members of the Committee. On 1 December 2025, Mr MI Rawlinson, a newly appointed Non-executive Director of the Gold Fields Board, also joined the Audit Committee.

Details of the number of meetings held during the year, as well as the attendance thereof by Committee members, are on page 17 of the Integrated Annual Report ("IAR"). The Gold Fields' Board continues to believe that, as a collective, the Committee members have the necessary skills and expertise to carry out their duties effectively and with due care.

Responsibilities

The Committee has certain reporting responsibilities to both the shareholders and the Board and is accountable to them. Its duties, as set out in the Committee Terms of Reference, are reviewed annually and incorporate the Committee's statutory obligations as set out in the Companies Act, King IV, and paragraph 5.7(h) of the JSE Listings Requirements (South Africa), as well as the New York Stock Exchange Standards related to Listed Company Audit Committees and the Securities and Exchange Act 1934 (USA). A work plan is approved every year, encompassing all these duties, and progress is continuously monitored to ensure these obligations are fulfilled by the Committee.

Among other things, the Committee monitors and reviews:

- The preparation of the Annual Financial Statements ("AFS") in the Annual Financial Report ("AFR"), ensuring fair presentation and compliance with IFRS Accounting Standards and the Companies Act, and recommending same to the Board for approval;
- The integrity of the Integrated Annual Report ("IAR") and Form 20-F by ensuring its content is reliable and includes all relevant operational, financial and other non-financial information, risks and other relevant factors;
- Together with the Board, quarterly, interim and other shareholder-specific financial information;
- Filing of the Form 20-F with the US SEC;
- Accounting policies of the Group and proposed revisions, and significant and unusual transactions, estimates and accounting judgements;
- The effectiveness of the internal control environment;
- The effectiveness and independence of both the internal and external audit functions;
- The effectiveness of the Company's Sarbanes-Oxley Act ("SOX") controls;
- The effectiveness of the Group's financial risk management;
- Recommendation of financial restatements to the Remuneration Committee in line with the Group's incentive-based Remuneration Clawback Policy (none in 2025);
- The recommendation and appointment of Gold Fields' external auditors, and approves their remuneration, reviews the scope of their audit, their reports and findings, and pre-approves non-audit services and fees in line with Company policy;
- JSE attestation and the evaluation of the performance of the CFO;
- The adequacy and effectiveness of the Group's enterprise-wide risk management policies, processes and mitigating strategies;
- The governance of information communication technology ("ICT") and the effectiveness of the Group's information systems;
- The cash/debt position of the Group to determine whether the going concern basis of reporting is appropriate;
- The combined assurance model, and provides independent oversight of the effectiveness of the Group's assurance functions and services, with particular focus on combined assurance arrangements;
- Compliance with applicable legislation, regulations and applicable rules, codes and standards;
- Compliance with the Company's Code of Conduct;
- Compliance with policies and procedures relating to Anti-Money Laundering ("AML"), Combating of Financing of Terrorism ("CFT") and Anti-Bribery and Corruption ("ABC");
- Approval of hedging activities as and when mandated by the Board (none in 2025);
- Approval of accounting treatment of material acquisitions (Gold Road in 2025);
- Approval of Salares Norte achieving commercial levels of production and accounting treatment implications;
- Reviewed and reduced scope of Treasury activities; and
- Consideration of ad-hoc matters relating to regulatory requirements.

Key audit matters

The Committee considered the appropriateness of key audit matters reported in the external auditor's report and considered the significant areas requiring the use of management estimates and assumptions. These are detailed in note 1 to the accounting policies. Management presented position papers to the Committee for approval detailing the accounting treatment and related accounting implications for significant transactions, which included estimates and assumptions used, the external sources and experts consulted, and the basis on which they were applied in the calculations.

Key audit matter	How the Committee addressed the matter
Accounting for the acquisition of Gold Road	Reviewed the accounting for the acquisition of Gold Road and the related purchase price allocation thereof.
Impairment assessment of property, plant and equipment	Reviewed the assessment for impairment triggers performed by management, as well as indicators for reversal of previously recorded impairment losses at 31 December 2025. Where cash generating units (CGU) had previously been impaired, management considered whether the impairment losses no longer exist or might have decreased. The committee reviewed and approved the reversal of the South Deep CGU impairment. Management considered general and specific factors for the Tarkwa and Peru CGU and concluded that although overall the gold price had improved from the time that the impairment losses had been recognised, taking into consideration the specific circumstances of each asset (including those that led to the original impairment losses), the impairment losses had not reversed.
Contingent liabilities	Reviewed management's assessment and disclosure in note 39 relating to contingent liabilities.

Key focus areas in 2025

External audit

The Committee is responsible for recommending the appointment or reappointment of a firm of external auditors to the Board which, in turn, recommends the appointment to shareholders. Upon this recommendation, the Committee is responsible for determining whether the designated appointee firm and audit partner have the necessary independence, experience, qualifications and skills, and that the audit fee is appropriate.

An external audit fee of R82.3 million (US\$4.6 million) for 2025 was approved, as well as R11.0 million (US\$0.6 million) for other fees.

The Committee reviewed the annual external audit strategy plan and budget at its meeting on 14 August 2025, including the scope, materiality levels and significant risk areas, and established that the approach would appropriately support the management of organisational risks, as well as applicable regulatory changes and requirements. The audit plan forms the basis of providing the Committee with the necessary assurances on risk management, including the effectiveness of the internal control and IT governance environment. The plan was approved by the Committee.

PwC had direct access to the Committee throughout the year and met with the Chairperson of the Committee before each meeting and, when required, on an ad hoc basis. PwC reported to the Committee at each quarterly meeting, as well as at the year-end meeting. In addition, the Committee regularly met with PwC separately without the management team present in closed session meetings. The Committee is satisfied that PwC is independent of the Group.

During the year, the Committee reviewed the quality and suitability of the external auditor's work focusing on internal quality control procedures, and in particular external reviews performed by audit Regulators on the firm and the lead engagement partner. The Audit Committee reviewed reports from PwC relating to quality assessment reviews undertaken internally and by the Independent Regulatory Board for Auditors ("IRBA") and the Public Company Accounting Oversight Board ("PCAOB"), including remediation plans to address findings, as necessary. There are no significant matters to report to the shareholders. The Committee concluded the work of the external auditor was satisfactory.

Internal audit

Gold Fields Internal Audit ("GFIA") is an independent department within the Company, headed by a Vice President Internal Audit ("VP IA") who is appointed by the Committee. The VP IA reports directly to the Committee and has direct access to the Chairperson and members of the Committee, as well as the Board Chairperson. The Committee Chairperson meets with the VP IA once per quarter and on an ad hoc basis, as required. The VP IA also meets with the Committee, without management in closed session meetings, at least annually and whenever deemed necessary by either the VP IA or the Committee.

The Committee is satisfied that the resources available to GFIA, along with the skills and experience of the department, will allow the team to fulfil its mandate.

The Committee determines the purpose, authority and responsibility of GFIA in an Internal Audit Charter, which is reviewed and approved annually. The Committee assesses the performance of GFIA every year. GFIA operates in accordance with the International Standards for the Professional Practice of Internal Auditing as prescribed by the Institute of Internal Auditors. The internal audit activities carried out during the year were identified through a combination of the Gold Fields risk management framework, which includes the combined assurance framework, and the risk-based methodologies adopted by GFIA. The Committee approves the annual internal audit assurance plan presented by GFIA and monitors progress against the plan reported to the Committee each quarter. GFIA ensured that its framework is aligned with the Committee of Sponsoring Organizations of the Treadway Commission's ("COSO") 2013 internal control framework.

Audit Committee Report *continued*

for the year ended 31 December 2025

The Group's internal control systems are designed to provide reasonable assurance on the maintenance of proper accounting records and the reliability of financial information. It also covers operational areas, compliance with the Gold Fields Code of Conduct and sustainability records. These systems are monitored by GFIA, and its findings and recommendations are reported to the Committee and senior management.

GFIA reports identify deficiencies to the Committee every quarter, together with recommended remedial actions, which are then followed up on to ensure the necessary action has been taken.

GFIA provided the Committee with a written assurance statement on the adequacy and effectiveness of governance, risk management and controls. No significant events occurred, nor have any been brought to GFIA's attention, to believe that governance, risk management and the control environment are inadequate or ineffective.

An external quality assessment review was performed on the performance and effectiveness of GFIA. The report and findings were reviewed by the Committee and recommendations' progress was monitored.

Information communication and technology governance

The ICT strategy, aligned with the Group's strategy, empowers the Group to operate in a safe, reliable and cost-effective way. It provides the digital foundation and technologies necessary to drive modernisation and innovation across our operations. ICT manages the full lifecycle of our technology assets while ensuring robust governance, risk management and cybersecurity compliance across all jurisdictions. The Audit Committee considered and reviewed the quarterly ICT reports.

Given the nature of cybersecurity and the rising global cyber risk, cybersecurity is a key component of the Group's ICT governance and risk agenda. Group ICT continues to implement mitigating controls and remedial solutions relating to cybersecurity vulnerabilities, as and when identified.

An ICT assessment was completed with some recommended areas of improvement. The Committee reviewed the findings of the review and monitored progress.

Chief Financial Officer

The Committee evaluated the skills, expertise and performance of the CFO, Mr AT Dall, who acted as Interim CFO after the retirement of Mr PA Schmidt in April 2024 and was appointed permanent CFO on 1 March 2025. The Committee continues to be satisfied that Mr AT Dall has the appropriate expertise to carry out his duties as CFO of the Company and the Group and is supported by highly qualified and competent senior staff. This conclusion is supported by input from both internal and external auditors.

Going concern

After having duly considered the Group's solvency and liquidity position, the Board has a reasonable belief that the Group will continue as a going concern for the foreseeable future.

Group compliance governance

The Committee is also responsible for monitoring compliance governance for the Group – a key focus area for the Board and management as a whole.

The Group has a detailed, systematic and risk-based framework in place. The framework is applied to identify all laws, regulations and adopted, rules, codes and standards applicable to Gold Fields in all jurisdictions in which the Group operates. Updates on regulatory changes are identified on a monthly basis and internally assessed for application and impact. The assessment of potential and/or actual risk exposure of non-compliance regarding the identified applicable instruments per jurisdiction, includes potential exposure to financial loss, as well as operational and reputational risks, and the adequacy of recorded controls. Mitigating controls designed to manage the risks are identified, documented and maintained proactively. GFIA carries out a review of the effectiveness (in terms of design and operating effectiveness) of the controls and reports on the level of compliance.

All active suppliers and contractors are screened based on an array of predefined risk criteria, including adverse media exposure. A screening risk calculator is applied to those assessed entities, based on the outcome of the screening due diligence. Eliminary or mitigating measures are identified and implemented as required.

Apart from screening due diligence, the Committee also oversees the engagement with, and commitments made, to external stakeholders.

The Committee also ensures that the Gold Fields' Code of Conduct is effective, promotes ethical decision making and is implemented diligently throughout the Group.

The Committee is also responsible for ensuring all calls to the Gold Fields hotline – administered by an independent external party – are proactively dealt with. The Chairperson of the Committee, together with GFIA, are custodians of the reporting and investigation procedure and, where appropriate, will make use of external advisors and experts to investigate reporting matters. The number and nature of these calls are reported at the quarterly Committee meetings. The details of the investigations, including details on any action taken, are also reported to the SET Committee.

The Group's Risk Committee deals with Group operational and strategic risks, as well as the requisite reporting as required annually. While there is ongoing interaction between the Risk and Audit Committees, the management of strategic risk remains a key focus of the Committee, management and GFIA. Gold Fields' Group risk disclosures are on pages 44 to 55 of the IAR.

Combined assurance

The Committee oversaw the development of the Combined Assurance Model with the Risk Committee, received quarterly feedback on the combined assurance process and focused on enhancing the Group's combined assurance model and ensuring alignment with the new requirements of King IV.

The combined assurance model provides an effective basis for the Committee to conclude that the following objectives were met:

- Enabling an effective control environment;
- Supporting the integrity of information used for internal decision making; and
- Supporting the integrity of external reports.

Internal control statement

As part of its US listing, Gold Fields has to comply with the requirement of the Sarbanes-Oxley Act of 2002 (US), which requires management to establish and maintain adequate internal control over financial reporting using a recognised internal controls framework.

Management is accountable to the Board for the design, implementation, monitoring and integration of internal financial controls for the day-to-day running of the Group, focusing on the efficiency and effectiveness of operations, safeguarding the Group's assets, legal and regulatory compliance, business sustainability and reliable reporting, including financial reporting.

The Committee believes that Gold Fields' internal controls are effective, and that the financial records can be relied upon as a reasonable basis for the preparation of the AFS.

Annual financial report and other reports

The Committee considered and discussed the Annual Financial Report ("AFR"), the Governance and Remuneration Report ("GRR") and the IAR with both management and the external auditors.

During this process, the Committee:

- Reviewed the AFS included in the AFR for consistency, fair presentation and compliance with IFRS Accounting Standards;
- Evaluated significant estimates and judgements and reporting decisions;
- Reviewed the documentation supporting the going concern basis of accounting and concluded that it is appropriate;
- Evaluated the material factors and risks that could impact the AFR and IAR;
- Ensured that all comments and recommendations made in the JSE Proactive Monitoring reports were appropriately considered and addressed in the preparation of the AFR;
- Examined and reviewed the interim and quarterly financial information;
- Evaluated the completeness of the financial and sustainability disclosures;
- Evaluated subsequent events and their impact on the financial statements up to the date of this report;
- Considered the external auditor's report;
- Discussed the treatment of significant and unusual transactions with management and the external auditors; and
- Reviewed and discussed the sustainability information disclosed in the IAR and based on these discussions, is satisfied that the information is reliable.

The Committee considers that the AFR, GRR and the IAR comply with the statutory requirements of the various regulations governing disclosure and reporting in all material respects, and that the AFS comply in all material respects with the Companies Act and IFRS Accounting Standards.

The Committee recommended to the Board that the AFS included in the AFR be adopted and approved.

Looking ahead to 2026

The Committee will continue its focus on:

- Ensuring effective functioning of the Group's financial systems and processes and financial control environment;
- Audit quality and independence;
- Evaluating significant estimates and judgements and reporting decisions;
- Future changes to accounting standards, legislation and other regulations impacting reporting;
- Monitoring and implementing further improvements to the integrated combined assurance model;
- Integration of Windfall in the Group's reporting and SOX environment;
- Reviewing the one SAP roll out and S/4HANA implementation road map.

Philisiwe Sibiyi

Chairperson: Audit Committee

30 March 2026

Directors' report

The directors have pleasure in submitting their report and the AFS of the Group for the year ended 31 December 2025.

Review of operations

The activities of the various Gold Fields operations are detailed in our 2025 IAR.

Financial results

The information on the financial position of the Group for the period ended 31 December 2025 is set out on pages 53 to 137 of this AFR. The income statement for the Group shows a profit attributable to owners of the parent from continuing operations of US\$3,567m for the year ended 31 December 2025, compared with a profit attributable to owners of the parent from continuing operations of US\$1,245m for the year ended 31 December 2024.

Compliance with financial reporting standards

The Group's AFS were prepared in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IASB"), the South African Institute of Chartered Accountants ("SAICA") Financial Reporting Guides as issued by the Accounting Practices Committee, Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements and the Companies Act.

Listings

The abbreviated name under which the Company is listed on the JSE is GFIELDS, and the short code is GFI. The Company also has a secondary listing on the NYSE.

As at 31 December 2025, the Company had in issue, through The Bank of New York Mellon (BNY Mellon) on the NYSE, 173,202,526 (31 December 2024: 180,901,758) American Depositary Receipts (ADRs). Each ADR is equal to one ordinary share.

Directorate

Composition of the Board

The Board currently consists of two executive directors and eleven NEDs.

Rotation of directors

Directors being elected in terms of the Company's Mol and the Companies Act 71 of 2008 are Mr JF Mackenzie and Mr MI Rawlinson. The Directors retiring in terms of the Company's Mol are Mr TP Goodlace and Ms PG Sibiya, all of whom are eligible and offer themselves for re-election. The Company confirms that the requisite fit and proper assessment, as contemplated in the JSE Listings Requirements, has been conducted in respect of each of these directors. In February 2026, Gold Fields announced that Mr Yunus Suleman will retire as Chairperson and director of the Board and succeeded by Mr John MacKenzie (subject to his appointment), an independent non-executive director of the Board, at the Company's AGM in May 2026.

The boards of Gold Fields' various subsidiaries comprise of some of the executive officers and one or both of the executive directors, where appropriate, as well as NEDs of the Group from time to time.

Directors' and officers' disclosure of interests in contracts

During the year under review, no contracts were entered into in which directors or officers of the Company had an interest and which significantly affected the business of the Group.

For the year ended 31 December 2025, the directors' beneficial interest in the issued share capital and listed share capital of the Company (see adjacent table) was approximately 0.01%. No one director individually exceeded 1% of the issued share capital or voting control of the Company.

Related-party information is disclosed in note 44 of the AFR.

Save as disclosed on the Stock Exchange News Services on 2 March 2026, there are no changes in the directors' interests occurring between the end of the financial year and the date of approval of the AFR.

¹ Direct ownership – Shares held in individual's own name or account, including personal investment shares. Grossed up for tax for minimum shareholding requirement purposes.

² Indirect ownership – Shares held for the individual through another person or vehicle, such as a trust or nominee. Not grossed up for tax.

³ Mr MacKenzie was appointed as NED to the Board from 1 August 2025 and does not hold any Gold Fields Limited ordinary shares or American Depositary Rights.

⁴ Mr Rawlinson was appointed as NED to the Board from 1 August 2025 and does not hold any Gold Fields Limited ordinary shares or American Depositary Rights.

⁵ The following former directors and prescribed officers exited during 2024 and had no direct and indirect shareholding at 31 December 2024:

- P Schmidt – former CFO, exited on 30 June 2024;
- N Chohan – former EVP: Sustainability, exited on 31 August 2024;
- S Mathews – former EVP: Australia, exited on 31 March 2024;
- R Barden – former EVP: People, exited on 31 January 2024; and
- J Mortati – former EVP: West Africa, exited on 30 June 2024.

⁶ S Reid retired on 29 May 2025.

⁷ P Bacchus retired on 29 May 2025.

⁸ Mr Mokoatle retained 7,138 ordinary shares from his vesting settlement during 2025 increasing his direct beneficial holding from 20,373 GFI ordinary shares at 31 December 2024 to 27,511 GFI ordinary shares at 31 December 2025.

⁹ Mr Sander stepped into the Acting Chief Technical Officer role from 1 September 2025 and does not hold any Gold Fields Limited ordinary shares or American Depositary Rights.

¹⁰ Mr Preece retired on 31 August 2025.

¹¹ Mr Rivera separated from the Company on 31 March 2025 through mutual agreement.

Financial affairs

Dividend Policy

During 2025, the Company implemented a new dividend policy. The new policy, which took effect with the final 2025 dividend declaration, targets a base dividend of 35% of free cash flow before discretionary growth investments, with a minimum annual dividend of US\$0.50 per share (paid semi-annually at US\$0.25 per share). In addition, the Company communicated the intention to provide additional returns to shareholders of up to US\$500 million over the next 24 months based on current cash flow projections, in the form of special dividends and/or share buybacks. The additional shareholder returns are subject to maintaining an adjusted net debt to adjusted EBITDA ratio of below 1.0 times. All payouts are subject to the applicable legal, regulatory and Board approval requirements.

Directors' report *continued*

The Company's previous dividend policy was to declare an interim and final dividend of 30% – 45% of normalised earnings.

On 19 February 2026, the Company declared a final cash dividend number 103 of 1850 South African cents per ordinary share (2024: 700 South African cents) to shareholders reflected in the register of the Company on 10 March 2026. This dividend was paid on 16 March 2026. The dividend resulted in a total dividend of 2550 South African cents per share for the year ended 31 December 2024 (2024: 1000 South African cents), with the final dividend being accounted for in 2026.

In addition to the base dividend, on 19 February 2026, Gold Fields declared an additional return of US\$353.0 million. This comprised US\$253.0 million in special dividends (450 South African cents per ordinary share) and US\$100 million in share buy-backs.

Borrowing powers

In terms of the provisions of section 19(1) of the Companies Act, read together with clause 4 of the Company's Mol, the borrowing powers of the Company are unlimited. As at 31 December 2025, the Company's borrowings totalled US\$2,738 million, compared with total borrowings of US\$2,496 million at 31 December 2024.

Capital expenditure

Capital expenditure (capex) for the year ended 31 December 2025 amounted to US\$1,399 million compared with US\$1,183 million for the year ended 2024. Estimated capex for 2026 is US\$1,900 million to US\$2,100 million and is intended to be funded from internal sources and, to the extent necessary, borrowings.

Significant announcements in 2025

Alex Dall appointed as Gold Fields CFO

7 February 2025

The Board of Gold Fields announced the appointment of AT Dall as its CFO and executive director with effect from 1 March 2025.

Retirement of two directors of the Board and changes to the Board Committees

20 February 2025

The Board of Gold Fields announced that SP Reid and PJ Bacchus will retire as Non-Executive Directors and Members of the Board on 28 May 2025. As a consequence of the retirement of these two directors, the allocation of Non-Executive Directors to the Board Committees was changed, effective 28 May 2025.

Gold Fields enters into binding agreement to acquire Gold Road Resources Limited

5 May 2025

The Board of Gold Fields announced that Gruyere Holdings Pty Ltd (a wholly-owned subsidiary of the Company) ("Gruyere") has entered into a binding Scheme Implementation Deed (the "Scheme") to acquire 100% of the issued and outstanding share capital of Gold Road Resources Limited ("Gold Road") by way of an Australian scheme of arrangement. Refer note 18.3 for further details.

Gold Fields concludes US\$750 million 7-year notes offering

13 May 2025

The Board of Gold Fields announced that it has successfully concluded the raising of US\$750 million 7-year notes with a coupon of 5.854% (the "Notes"). The Notes were issued by Windfall Mining Group Inc. and guaranteed by Gold Fields and Gold Fields Holdings Company Limited. The Company intends to use the net proceeds from the Notes offering for general corporate purposes, including to repay amounts outstanding under the US\$750 million multi-currency bridge facilities that were used to fund the acquisition of Osisko Mining Inc in October 2024.

Gold Fields appoints two new directors to the Board

11 June 2025

The Board of Gold Fields announced the appointments of J. MacKenzie and M. Rawlinson as Non-Executive Directors to the Board with effect from 1 August 2025.

Gold Road acquisition conditions precedent met and successful execution of Northern Star share sale

26 September 2025

The Gold Fields Board announced that Gold Road has received the requisite majority of votes from its shareholders in favour of the proposed acquisition of 100% of the issued and outstanding share capital of Gold Road by Gruyere. The Supreme Court of Western Australia has also subsequently made orders approving the Scheme and these orders have been lodged with the Australian Securities and Investments Commission. Consequently, all conditions precedent have now been met and the Scheme became effective as 26 September 2025.

The Board of Gold Fields also announced the successful monetisation of the underlying shares acquired by Gruyere in Northern Star under the Scheme. Gold Fields, via Gruyere, entered into a Share Forward Transaction ("Equity Forward") with J.P. Morgan Securities plc ("J.P. Morgan Securities"), pursuant to which Gruyere has agreed to sell the shares in Northern Star which it will acquire as part of the Transaction. In connection with the Equity Forward, J.P. Morgan Securities has sold Northern Star shares by way of a block trade at a price of A\$22.05 per Northern Star share, for total proceeds of A\$1.1bn under the Equity Forward. Upon receipt by Gruyere these proceeds will be utilised to repay a portion of the acquisition financing bridge facility that will be drawn upon to fund the Transaction.

Gold Fields hosted a capital markets day

12 November 2025

The Gold Fields Board announced that the Company will be hosting its inaugural Capital Markets Day on 12 November 2025. The event will provide shareholders with a comprehensive update on Gold Fields' strategic initiatives aimed at enhancing both the quality and value of its portfolio.

Ghana matters

In March 2025, the Gold Fields' application to extend the Damang main mining lease for a further 21 years was rejected by the Government of Ghana, with agreement reached that the Government of Ghana would grant a one-year mining lease extension, expiring 18 April 2026, during which time Gold Fields would work with a Government appointed Transition Team to prepare the mine for transfer of ownership to the Government of Ghana.

As part of the commitment to sustain ongoing operations at Damang, mining activities were restarted in May 2025 and the mine has been safely operated since then. Gold Fields has continued to invest in the mine, including completing and providing the Government of Ghana with a detailed feasibility study in December 2025, setting Damang up for an extended life of mine.

Over the past year, Gold Fields has worked with the Government of Ghana and the Government Transition Team to prepare the mine for transfer of ownership. The shared focus of both Gold Fields and the Transition Team throughout this process has been to ensure that Damang is well-positioned for continued sustainable operations following the transition, supporting ongoing employment, host community development, and broader economic contributions in Ghana.

The final step in the transition process is the transfer of ownership of the Damang mine to the Government of Ghana, in line with Ghana's mining laws and the terms of the agreement reached with Government. Decisions regarding the future ownership of the mine rest solely with the Government of Ghana.

At Tarkwa, five of Gold Fields' six mining leases and its existing development agreement are due to expire in April 2027. Consistent with the agreement reached with the Government of Ghana in April 2025 in respect of the Damang mining lease, Gold Fields submitted, in November 2025, an application for the renewal of the Tarkwa mining leases, together with supporting technical reports, in accordance with applicable law.

At the same time, the Government of Ghana indicated that it intended to progress material amendments to the Minerals and Mining Act (Act 703), which governs the grant and renewal of mining leases. The proposed amendments include the introduction of a maximum term of 10 years for mining lease renewals and the abolition of development agreements. These amendments, however, have not yet been implemented and continue to be under discussion/ consideration by Government.

The existing development agreement between Gold Fields and the Government of Ghana is of importance to Gold Fields, as it provides a range of fiscal concessions for the Tarkwa mine and includes key stabilising provisions in relation to taxes, royalties and other matters.

Gold Fields is seeking to progress its ongoing discussions with the Government of Ghana regarding the proposed renewal of the Tarkwa mining leases, however, no agreement has been reached with Government yet. If the Tarkwa mining leases are not renewed by the Government of Ghana, Gold Fields would be required to cease mining operations at Tarkwa entirely.

To the extent that the Tarkwa mining leases are renewed on terms that are less favourable than those currently in place (including as a result of the abolition of development agreements and any changes to the applicable fiscal regime), Gold Fields' costs at Tarkwa could increase materially, including through higher taxes and royalties and the loss of other fiscal concessions.

In particular, the Government of Ghana has announced the replacement of the existing flat 5% gold royalty rate with a sliding scale rate (depending on the prevailing gold price) of 5% to 12%, effective March 2026.

Engineers and Planners ("E&P") have purported to commence dispute resolution processes under the terms of our Mining Agreements at the Tarkwa and Damang mines. Gold Fields' assessment is that it has a clear and sufficient basis to challenge E&P's claims through the dispute resolution mechanisms provided in the Agreements. The ultimate outcome of the process cannot presently be determined and, accordingly, no adjustment for any effects on the Group that may result from the process, if any, has been made in the consolidated financial statements.

Going concern

Gold Fields' AFS were prepared using appropriate accounting policies, supported by reasonable judgements and estimates. The directors have reasonable belief that the Company and Group have adequate resources to continue as a going concern for the foreseeable future.

Dematerialisation of the shares

Shareholders are reminded that, as a result of the clearing and settlement of trades through Strate, the Company's share certificates are no longer good for delivery for trading. Dematerialisation of the Company's share certificates is a prerequisite when dealing in the Company's shares.

Property

The register of property and mineral rights is available for inspection at the registered office of the Company during normal business hours.

Directors' report *continued*

Environmental obligations

The Company's total gross closure liability for environmental rehabilitation costs amounted to US\$847 million at 31 December 2025 compared with US\$641 million at 31 December 2024. The regional gross closure liabilities are as follows:

- Australia: US\$338 million
- South Africa: US\$54 million
- Ghana: US\$149 million
- Chile: US\$63 million
- Peru: US\$220 million
- Canada: US\$23 million

The funding methods used by each region to make provision for the mine closure cost estimates are:

- Australia – self-funding, using existing cash resources
- South Africa – contributions into environmental trust funds and guarantees
- Ghana – reclamation security agreement bonds underwritten by banks and restricted cash
- Chile – bank guarantees
- Peru - bank guarantees and cash resources
- Canada - bank guarantees

Contingent liabilities and litigation

A material Group Litigation Report is presented at each Audit Committee meeting for discussion and consideration on whether the matter remains contingent or whether a provision has to be recognised. Details of Gold Fields' contingent liabilities and litigation matters can be found in note 39 of the AFR.

Administration

Ms A Weststrate held the position of Company Secretary for the period under review.

Computershare Investor Services Proprietary Limited (Computershare) is the Company's South African transfer secretary and Link Asset Services is the registrar of the Company in the UK.

Auditors

The Audit Committee has recommended to the Board that PwC be re-appointed as the external auditors of the Company, until the conclusion of the next AGM, in accordance with section 90(1) of the Companies Act.

Subsidiary Companies

Details of major subsidiary companies in which the Company has a direct or indirect interest are set out in note 46 of the AFR.

Management's discussion and analysis of the financial statements

The following Management's Discussion and Analysis of the Financial Statements should be read together with the Gold Fields consolidated financial statements, including the notes accompanying these financial statements.

A Management's Discussion and Analysis comparing the Financial Statements for the years ended 31 December 2024 and 2023 may be found in the Management's Discussion and Analysis of the Financial Statements of the Gold Fields Limited 2024 Form 20-F, filed with the SEC on 27 March 2025, which is available free of charge on the SEC's website at www.sec.gov and our website at www.goldfields.com.

Overview

Gold Fields is a significant producer of gold and a major holder of gold reserves and resources in South Africa, Ghana, Australia, Peru and Chile. In Peru, Gold Fields also produces copper. In Chile, Gold Fields produces silver and gold. Gold Fields is primarily involved in underground and surface gold, silver and copper and related activities, including exploration, extraction, processing and smelting.

In 2025, the South African, Ghanaian, Peruvian, Australian and Chilean operations produced on a managed basis 12%, 23%, 7%, 42% and 16% of its total gold production, respectively.

Gold Fields owns 100% of the St Ives, Agnew, Granny Smith and Gruyere gold mines in Australia, 100% of the Salares Norte mine in Chile, 100% of the Windfall Project in Canada, 99.5% of the Cerro Corona mine in Peru and 90.0% of the Tarkwa and Damang mines in Ghana. Gold Fields' economic interest in the South Deep mine in South Africa is 93.1%.

Salares Norte

Salares Norte (100% owned) had a successful ramp-up in 2025 with a particularly strong second half. The mine achieved commercial levels of production on 31 August 2025 and reached steady state operations in Q4 2025, resulting in production of 397koz eq for the year ended 31 December 2025, which is above the guidance range (325koz eq – 375koz eq). Salares Norte delivered US\$808 million in free cash flow for the year which was the highest in the Group.

Gold Road

In October 2025, Gold Fields completed the acquisition of Gold Road Resources and paid US\$1.42 billion (A\$2.19 billion), net of cash received, the special dividend paid by Gold Road upon transaction close and the disposal of the Northern Star Resources shares that were acquired as part of the transaction.

Full ownership of Gruyere, together with the surrounding land package, enables Gold Fields to optimise the life-of-mine plan for the asset. The incremental expansion of the processing facility, together with consolidation of Gruyere, Golden Highway and the Yamarna land packages is expected to allow the asset to ramp-up to c.400koz on a sustainable basis over an extended period.

During 2026, Gold Fields will advance studies to optimise the value of the Gruyere deposit, including an open-pit cutback versus underground trade-off study.

Ghana matters

During 2025, Gold Fields worked closely with the Government of Ghana to develop a transition plan for the Damang mine. In April 2026, the 12-month lease extension comes to an end, at which point Gold Fields will transfer ownership of the mine to the Government of Ghana.

At Tarkwa, five of Gold Fields' six mining leases and its existing Development Agreement ("DA") are due to expire in April 2027. Consistent with the agreement reached with the Government of Ghana in April 2025 in respect of the Damang mining lease, Gold Fields submitted in November 2025, an application for the renewal of the Tarkwa mining leases, together with supporting technical reports, in accordance with applicable law. Negotiations on the Tarkwa lease renewals are taking place in an environment where the Government of Ghana is reviewing mining legislation and fiscal dispensation for mining in the country.

In December 2025, the Government of Ghana tabled a Legislative Instrument ("LI") in Parliament to effect new regulations which introduce new royalty rates in Ghana for gold and other minerals (except Lithium). The LI was approved effective 10 March 2026 with a royalty range of 5% to 12% on a sliding scale, depending on global gold prices. As a measure of relief, The Government of Ghana has agreed to reduce the Growth and Sustainability Levy on the mining sector back to 1% from 3% previously applicable. Gold Fields has a Development Agreement (DA), which provides a range of fiscal concessions and includes key stabilising provisions in relation to taxes, royalties and other matters. However, the DA protects Tarkwa from these royalty changes until April 2027.

Gold Fields is seeking to progress its ongoing discussions with representatives of the Government of Ghana regarding the proposed extension of the Tarkwa mining leases and related fiscal terms, including the extension of the DA. However, no agreement has been reached and there is no assurance that an agreement will be concluded and the terms of any renewal are uncertain.

Reserves

As of 31 December 2025, Gold Fields reported attributable proved and probable gold, silver and copper reserves of approximately 48 million ounces (2024: 44 million ounces) of gold, 193 million pounds (2024: 271 million pounds) of copper and 43 million ounces (2024: 46 million ounces) of silver.

Management's discussion and analysis of the financial statements *continued*

Non-IFRS financial measures

The Annual Financial Report ("AFR") contains certain non-IFRS financial measures in respect of the Group's financial performance, the statement of financial position and cash flows presented in order to provide users with relevant information and measures used by the Group to assess performance. Non-IFRS financial measures are financial measures other than those defined or specified under relevant accounting standards. To the extent that these measures are not extracted from the segment disclosure included in the audited consolidated financial statements of Gold Fields for the year ended 31 December 2025, these measures constitute pro forma financial information in terms of the JSE Limited Listings Requirements and are the responsibility of the Group's Board of Directors. They are presented for illustrative purposes only and due to their nature may not fairly present Gold Fields' financial position, changes in equity, results of operations or cash flows. In addition, these measures may not be comparable to similarly titled measures used by other companies. The following table sets out the non-IFRS financial measures disclosed throughout the AFR and where they are reconciled to IFRS® Accounting Standards:

Non-IFRS measure	Purpose of measure	Reference to where reconciled to IFRS Accounting Standards
All-in sustaining costs ("AISC")	Intended to provide transparency into the costs associated with producing and selling an ounce of gold.	page 16
All-in sustaining costs (gross of by-product revenue) ("AISC gross of by-product revenue")		
All-in costs ("AIC")	Intended to provide transparency into the costs associated with producing and selling an ounce of gold (including growth capital).	page 16
All-in costs (gross of by-product revenue) ("AIC gross of by-product revenue")		
Adjusted EBITDA	Used in the ratio to monitor the capital of the Group.	page 41 and page 128
Net debt		
Net debt (excluding lease liabilities)		
Net debt to adjusted EBITDA ratio		
Net finance charges		
Adjusted EBITDA to net finance charges ratio	Used to measure the cash generated by the core business.	page 40
Adjusted free cash flow		
Adjusted free cash flow from operations	Used to measure the cash generated by the core business.	page 40
Sustaining and non-sustaining capital expenditure	Used in the determination of AISC and AIC.	page 16
Normalised profit attributable to owners of the parent and normalised profit per share attributable to owners of the parent	Forms the basis of the dividend pay-out policy.	page 34

This pro forma financial information has been reported on by the Group's auditors, being PricewaterhouseCoopers Inc. Their unqualified auditor's report thereon is on pages 182 to 183 of the Annual Financial Report.

All-in sustaining and all-in costs

The World Gold Council worked closely with its member companies to develop definitions for AISC and AIC. The World Gold Council is not a regulatory industry organisation and does not have the authority to develop accounting standards or disclosure requirements. AISC and AIC are non-IFRS financial measures. These non-IFRS financial measures are intended to provide further transparency into the costs associated with producing and selling an ounce of gold. These metrics are helpful to investors, governments, local communities and other stakeholders in understanding the economics of gold mining. The AISC incorporates costs related to sustaining current production. The AIC include additional costs which relate to the growth of the Group. AISC, as defined by the World Gold Council, are operating costs plus all costs not already included therein relating to sustaining current production, including sustaining capital expenditure. The value of by-product revenues such as silver and copper is deducted from operating costs as it effectively reduces the cost of gold production. AIC starts with AISC and adds additional costs which relate to the growth of the Group, including non-sustaining capital expenditure and exploration, evaluation and feasibility costs not associated with current operations.

AISC and AIC are reported on a per ounce of gold basis, net of by-product revenues (as per the World Gold Council definition) as well as on a per ounce of gold equivalent basis, gross of by-product revenues.

An investor should not consider AISC and AIC or operating costs in isolation or as alternatives to operating costs, cash flows from operating activities or any other measure of financial performance presented in accordance with IFRS Accounting Standards. AISC and AIC as presented in this Annual Financial Report may not be comparable to other similarly titled measures of performance of other companies.

The tables below and on the following pages set out a reconciliation of Gold Fields' cost of sales before gold inventory change and amortisation and depreciation, as calculated in accordance with IFRS[®] Accounting Standards (refer to the consolidated financial statements), to its AISC and AIC net of by-product revenues per ounce of gold sold for 2025 and 2024. The following tables also set out AISC and AIC gross of by-product revenue on a gold equivalent ounce basis for 2025 and 2024.

All-in sustaining costs net of by-product revenue per ounce of gold sold (US\$/oz)	1,841	2,049	2,461	1,669	1,434	1,506	2,030	436	933	—	1,645
All-in costs	(568.5)	(971.5)	(238.4)	(798.4)	(409.8)	(416.9)	(375.4)	(87.2)	(452.1)	(325.3)	(4,643.4)
All-in costs net of by-product revenue per ounce of gold sold (US\$/oz)	1,841	2,049	2,461	2,160	1,682	1,564	2,030	860	1,244	—	1,927

¹ By-product revenue at Cerro Corona relates to copper. For all the other operations, by-product revenue relates to silver.

² Sustaining capital expenditure represents the majority of capital expenditures at existing operations, including underground mine development costs, deferred stripping costs of open-pit operations, ongoing replacement of mine equipment and other capital facilities and other capital expenditures at existing operations and is calculated as total capital expenditure of US\$1,398.5 million per note 45 to the consolidated financial statements, less non-sustaining capital expenditures. Non-sustaining capital expenditures (or growth capital) represent capital expenditures for major growth projects as well as enhancement capital for significant infrastructure improvements at existing operations. The corporate and projects non-sustaining capital expenditure of US\$36.9 million relates to the Windfall Project capital.

³ This total may not reflect the sum of the line items due to rounding.

⁴ Includes exploration, feasibility and evaluation for the Windfall Project.

⁵ Other includes offshore structure costs and management fees.

⁶ Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2025.

⁷ Results are reported on a 50% basis up to the acquisition of Gold Road on 26 September 2025 and on a 100% basis from that date forward.

⁸ Salares Norte reached commercial levels of production on 31 August 2025.

Gold only ounces sold ('000oz)	267.9	539.6	135.6	339.7	234.4	282.6	143.8	87.5	34.2	—	2,065.4
All-in sustaining costs	(480.7)	(878.7)	(271.5)	(597.3)	(308.4)	(331.6)	(232.8)	(65.4)	(163.4)	(33.8)	(3,363.6)
All-in sustaining costs net of by-product revenue per ounce of gold sold (US\$/oz)	1,794	1,629	2,002	1,759	1,316	1,173	1,619	747	4,776	—	1,629
All-in costs	(480.7)	(878.7)	(271.5)	(646.2)	(346.3)	(358.9)	(234.7)	(79.2)	(425.9)	(145.5)	(3,867.7)
All-in costs net of by-product revenue per ounce of gold sold (US\$/oz)	1,794	1,629	2,002	1,903	1,477	1,270	1,632	905	12,452	—	1,873

¹ By-product revenue at Cerro Corona relates to copper. For all the other operations, by-product revenue relates to silver.

² Sustaining capital expenditure represents the majority of capital expenditures at existing operations, including underground mine development costs, deferred stripping costs of open-pit operations, ongoing replacement of mine equipment and other capital facilities and other capital expenditures at existing operations and is calculated as total capital expenditure of US\$1,183.4 million per note 45 to the consolidated financial statements, less non-sustaining capital expenditures. Non-sustaining capital expenditures (or growth capital) represent capital expenditures for major growth projects as well as enhancement capital for significant infrastructure improvements at existing operations. The corporate and projects non-sustaining capital expenditure of US\$24.4 million relates to the Windfall Project capital.

³ This total may not reflect the sum of the line items due to rounding.

⁴ Includes exploration, feasibility and evaluation and share of equity-accounted losses of Far Southeast Gold Resources Incorporated ("FSE") up to the date of disposal.

⁵ Other includes offshore structure costs and management fees.

⁶ Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2024.

¹ By-product revenue at Cerro Corona relates to copper. For all the other operations, by-product revenue relates to silver.

² This total may not reflect the sum of the line items due to rounding.

³ Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2024.

AISC and AIC

AISC net of by-product revenues increased by 1% from US\$1,629 per ounce of gold in 2024 to US\$1,645 per ounce of gold in 2025, mainly due to higher cost of sales before amortisation and depreciation, higher royalties, higher share-based payments and long-term incentives and higher sustaining capital expenditure. These increases were partially offset by higher gold sales and higher by-product credits to cost. AIC net of by-product revenues increased by 3% from US\$1,873 per ounce of gold in 2024 to US\$1,927 per ounce of gold in 2025, mainly due to the reasons mentioned above as well as higher non-sustaining capital expenditure and higher exploration costs.

AISC gross of by-product revenues increased by 4% from US\$1,658 per ounce of gold in 2024 to US\$1,722 per ounce of gold in 2025, due to the same reasons as above. AIC gross of by-product revenues increased by 5% from US\$1,892 per ounce of gold in 2024 to US\$1,993 per ounce of gold in 2025, due to the same reasons as above.

Royalties

South Africa

The Royalty Act was promulgated on 24 November 2008 and came into operation on 1 March 2010. The Royalty Act imposes a royalty on refined and unrefined minerals payable to the South African government.

The royalty in respect of refined minerals (which include gold and platinum) is calculated by dividing earnings before interest and taxes ("EBIT"), as defined by the Royalty Act, by the product of 12.5 times gross revenue calculated as a percentage, plus an additional 0.5%. EBIT refers to taxable mining income (with certain exceptions such as no deduction for interest expense and foreign exchange losses) before assessed losses but after capital expenditure. A maximum royalty of 5% is levied on refined minerals.

For Gold Fields, this means that currently it pays a royalty based on the refined minerals royalty calculation as applied to its gross revenue. The rate of royalty tax payable for 2025 and 2024 was 2.4% and 0.5% of revenue, respectively.

Ghana

Minerals are owned by the Republic of Ghana and held in trust by the President. Under the terms of the March 2016 Development Agreement ("DA") entered into with the government of Ghana, Tarkwa and Damang have been subject to a sliding scale for royalty rates, linked to the prevailing gold price from 1 January 2017. The royalty sliding scale is as follows:

Average gold price

Low value	High value	Royalty rate
US\$0.00 – US\$1,299.99		3.0 %
US\$1,300.00 – US\$1,449.99		3.5 %
US\$1,450.00 – US\$2,299.99		4.0 %
US\$2,300.00 – Unlimited		5.0 %

The average rate of royalty tax payable for 2025 and 2024 based on the above sliding scale was 5% and 4% to 5% on revenue, respectively. Tarkwa's initial tax stability period under the DA is valid until 17 April 2027.

Damang's mining lease and DA expired on 18 April 2025, however following negotiations with the Government of Ghana, a one year extension, which was ratified by Parliament was granted to 18 April 2026.

In December 2025, the Government of Ghana tabled a Legislative Instrument ("LI") in Parliament to effect new regulations which introduce new royalty rates in Ghana for gold and other minerals (except Lithium). The LI was approved effective 10 March 2026 with a royalty range of 5% to 12% on a sliding scale, depending on global gold prices. As a measure of relief, The Government of Ghana has agreed to reduce the Growth and Sustainability Levy on the mining sector back to 1% from 3% previously applicable.

By virtue of their respective DAs, Tarkwa and Damang continue to apply the existing royalty sliding scale with a top rate of 5% while these are still in force.

Australia

Royalties are payable to the state based on the amount of gold produced from a mining tenement. Royalties are payable quarterly at a fixed rate of 2.5% of the royalty value of gold sold. The royalty value of gold is the amount of gold produced during the month multiplied by the average gold spot price for the month.

Peru

Royalties and Special Mining Tax are both calculated with reference to the operating margin and ranges from 1% (for operating margins less than 10%) to 12% (for operating margins of more than 80%), or 1% of revenue, the highest of both amounts. Cerro Corona's effective royalty and Special Mining Tax rate for 2025 and 2024 was 4.8% and 4.0% of operating profit, respectively.

Chile

Chile levies a royalty (referred to as the special mining income tax) on all medium to large scale mining operations in Chile. Gold Fields anticipates that its Chilean subsidiary will be treated as a large scale mineral producer. This is because it will produce annual gold equivalent ounces in excess of 50,000 metric tonnes of fine copper. The applicable mining tax percentage is calculated on a sliding scale with reference to the mining operational profit margin. The tax rate is from 5% (for operating margins equal to or less than 35%) to 14% (for operating margins of 85% or more). The mining tax payable is calculated at the applicable tax rate on the net operating income of the Chilean subsidiary. The mining tax is a deductible expense in the calculation of the Chilean corporate tax. Chile's effective special mining income tax rate for 2025 and 2024 was 7.66% and 4.76% of the mining operational profit margin, respectively.

Canada

Mining royalties in Canada are imposed by provinces on mining operations within their jurisdictions. Gold Fields Windfall Project is located in the Quebec province in Canada. Quebec levies a mining tax on annual profit using progressive tax rates calculated with reference to the operating margin in specific bands being 16% (for operating margins up to 35%) then 22% (for operating margins between 35% and 50%) and 28% (for operating margins exceeding 50%). In any event, Quebec imposes a minimum mining tax based on the mine-mouth output value, less certain deductible allowances. The rate for the minimum tax are 1% for the first C\$80 million and 4% for the remainder. The mining tax is a deductible expense in the calculation of Quebec and Canadian Federal income taxes.

Management's discussion and analysis of the financial statements *continued*

Income and mining taxes

Gold Fields tax strategy and policy

Gold Fields global tax strategy's primary purpose is to set out the Group's framework for meeting its tax obligations from an operational, governance and tax risk management perspective. This is to ensure that we operate in a transparent, responsible and sustainable manner, acknowledging the differing interests of all our stakeholders.

The Group does not engage in aggressive tax planning and seeks to maintain professional real-time relationships with the relevant tax authorities. In material or complex matters the Group would generally seek advance tax rulings or alternatively obtain external counsel's opinion.

The Group does not embark on intra-group gold sales and only sells its gold (or gold-equivalent product) directly to independent third parties at arm's-length prices – generally at the prevailing gold spot price. Active business income is therefore fully declared and taxed in the source country where the relevant mining operation is located, with the revenue accruing to the host country.

The Group oversees its tax affairs through multiple levels of management. The Board oversees the approval, monitoring and compliance with our Tax Strategy through the Audit Committee. Our Chief Financial Officer has ultimate responsibility for setting the Group's Tax Strategy. In contrast the day-to-day operational responsibility for executing this policy resides with the Vice President Global Tax. The Vice President Global Tax and Chief Financial Officer reports tax matters to the Board's Audit Committee quarterly. The Group's Tax Strategy is reviewed and formally approved by the Audit Committee biennially. We review this strategy, along with our processes and controls, biennially to ensure we consider changes in the internal and external environment.

This includes compliance with Transfer Pricing ("TP") legislation and associated TP documentation requirements. Our Group TP standards are fully compliant with OECD guidelines and are regularly updated and benchmarked by independent experts. Uncertain tax positions are properly evaluated and reported in terms of IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and IFRIC 23 *Uncertainty over Income Tax Treatments*.

The Group has invested and allocated appropriate resources in the group tax department to ensure we comply with our global tax obligations. The Group has a global team of tax professionals; located in all of its operating jurisdictions, charged with managing their respective jurisdictions tax affairs in line with Group's Code of Conduct, global tax strategy and internal policies.

South Africa

Generally, South Africa imposes tax on the worldwide income (including capital gains) of all of Gold Fields' South African incorporated and tax resident entities. Certain classes of passive income such as interest and royalties, and certain capital gains, derived by Controlled Foreign Companies ("CFC") could be subject to South African tax on a notional imputation basis. CFCs generally constitute a foreign company in which Gold Fields owns or controls more than 50% of the shareholding.

Gold Fields pays taxes on its taxable income generated by its mining and non-mining tax entities. Under South African law, gold mining companies and non-gold mining companies are taxed at different rates. Companies in the Group not carrying on direct gold mining operations are taxed at a statutory rate of 27%.

At the same time, Companies are entitled to set off any balance of assessed losses to the extent that the set-off amount does not exceed the higher of R1 million and 80% of the taxable income for that year.

Gold Fields Operations Limited ("GFO"), and GFI Joint Venture Holdings Proprietary Limited ("GFIJVH"), jointly own the South Deep mine and constitute gold mining companies for South African taxation purposes. These companies are subject to the gold tax formula on their mining income.

The gold tax formula is $Y = 33 - 165/X$. In the formula above, Y is the tax rate to be determined and X is the ratio of taxable income to the total income (expressed as a percentage). The effective mining tax rate for GFO and GFIJVH has been calculated at 29% at 31 December 2025 and 2024.

Ghana

Ghanaian resident entities are subject to tax on a worldwide income basis however, general source based tax principles are applied. Where income has a source in Ghana, it accrues in or is derived from Ghana. Mining companies in Ghana are taxed at a corporate income tax rate of 35%. Under the terms of the Development Agreement ("DA") entered into with the government of Ghana, Tarkwa and Damang are liable to a 32.5% corporate income tax rate during the tax stability period per the DA.

Dividends paid by Tarkwa and Damang are generally subject to an 8% withholding tax rate, which is reduced to 5% per the applicable Double Tax Agreement.

Tarkwa and Damang deduct 20% on a straight-line basis for capital allowances on depreciable assets (i.e. over five years). Under the DA, the deferred stripping costs are fully deductible in the year such costs are incurred. Any capital allowances which are not utilised in a particular year are added to operating losses (if any), thereby increasing operating losses and then carried forward for five years. Any operating losses carried forward are extinguished if not utilised within five years on a first in, first out basis.

Australia

Generally, Australia imposes tax on the worldwide income (including capital gains) of all of Gold Fields' Australian incorporated and tax resident entities. The current income tax rate for companies with turnover of A\$50 million or more is 30%. Exploration expenditure is deductible in full as incurred. The Australian Uniform Capital Allowance regime allows tax deductions for the decline in value of depreciable assets and certain other capital expenditures over the effective lives of the assets acquired or constructed.

Gold Fields Australia and its eligible related Australian sister companies, together with all wholly owned Australian subsidiaries, have elected to be treated as a tax consolidated group for income taxation purposes. As a tax consolidated group, a single income tax return is lodged for the Group based on the consolidated results of all companies within the Group.

Withholding tax is payable on dividends, interest and royalties paid by Australian residents to non-residents. In the case of dividend payments to non-residents, withholding tax at a rate of 30% will apply. However, where the recipient of the dividend is a resident of a country with which Australia has concluded a double taxation agreement, the rate of withholding tax is generally limited to between 0% and 15%, depending on the applicable agreement and shareholding percentage. Where dividends are paid out of profits that have been subject to Australian corporate tax there is no withholding tax, regardless of whether a double taxation agreement is in place.

Peru

Peruvian taxes for resident individuals and domiciled corporations are based on their worldwide income, and for non-resident individuals and non-domiciled corporations are based on their Peruvian income source. The general income tax rate applicable to domiciled corporations is 29.5% on taxable income and to non-resident corporations is 30%. The income tax applied to interest paid to non-residents is 4.99%. The dividends tax rate (to residents and non-residents) is 5%. Capital gains are also taxed as ordinary income for domiciled corporations.

Chile

Gold Fields Chilean subsidiary will be subject to the 27% corporate tax rate and dividends paid by the Chilean subsidiary to the parent company is subject to a 35% withholding tax rate. The 27% corporate tax paid offsets as a credit against the withholding tax levied, so that the effective dividend withholding tax rate will approximate 8%.

Payments made by Chilean companies to non-resident entities are subject to withholding tax. The rate is between 4% to 35% depending on the type of payment. Interest paid to qualifying Foreign Financial Institutions is reduced from 35% to a 4% of withholding tax.

Canada

Canadian Corporations are subject to both federal and provincial taxes. At federal level, corporations are taxed on their worldwide income on active business income at a flat rate of 15%. Gold Fields Windfall Project is located in the Quebec province which imposes its own provincial income tax at a rate of 11.5%.

Organisation for Economic Co-operation and Development ("OECD") Pillar Two model rules

The Group is within the scope of the OECD Pillar Two model rules.

Six of the jurisdictions in which the Group operates, including South Africa, Australia, Canada, Isle of Man, Netherlands and Gibraltar have enacted or substantively enacted Pillar Two legislation to implement the global minimum top-up tax at 31 December 2025. This legislation is effective from as early as 1 January 2024 for many of these jurisdictions.

The Group determined that the global minimum top-up tax, which it is required to pay under Pillar Two legislation, is an income tax in the scope of IAS 12. The Group applies a temporary mandatory relief from deferred taxation accounting for the impacts of the top-up tax and accounts for it as a current taxation when it is incurred, as provided in the amendments to IAS 12 issued in May 2023.

Under the legislation, the Group may be liable to pay top-up tax for the difference between its Global Anti-Base Erosion ("GloBE") effective tax rate per jurisdiction and the 15% minimum rate.

The Group has performed an impact assessment of its potential exposure in relation to the Pillar Two legislation. Based on the outcome of the impact assessment, the Group does not anticipate being subject to material top-up tax exposure in any of the jurisdictions in which it operates.

Management's discussion and analysis of the financial statements *continued*

Significant accounting judgements and estimates

Gold Fields' significant accounting policies are fully described in note 1 to the accounting policies to its consolidated financial statements included in this Annual Financial Report. Some of Gold Fields' accounting policies require the application of significant judgements and estimates by management that can affect the amounts reported in the consolidated financial statements. By their nature, these judgements are subject to a degree of uncertainty and are based on Gold Fields' historical experience, terms of existing contracts, management's view on trends in the gold mining industry, information from outside sources and other assumptions that Gold Fields considers to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions.

Results for the period – years ended 31 December 2025 and 31 December 2024

Profit attributable to owners of the parent for the Group increased by 187% from US\$1,245 million (or US\$1.39 per share) in 2024 to US\$3,567 million (or US\$3.99 per share) in 2025. The reasons for this increase are discussed on the following pages.

Exchange rates

Gold Fields' Australian and South African revenues and costs are very sensitive to the Australian Dollar/US Dollar exchange rate and the Rand/US Dollar exchange rate, because revenues are generated using a gold price denominated in US Dollar, while the costs of the Australian and South African operations are incurred principally in Australian Dollar and Rand, respectively. Depreciation of the Australian Dollar and the Rand against the US Dollar reduces Gold Fields' average costs when they are translated into US Dollar, thereby increasing the operating margin of the Australian and South African operations. Conversely, appreciation of the Australian Dollar and Rand results in Australian and South African operating costs being translated into US Dollar at a lower Australian Dollar/US Dollar exchange rate and Rand/US Dollar exchange rate, resulting in higher costs in US Dollar terms and in lower operating margins.

The impact on profitability of any change in the value of the Australian Dollar and Rand against the US Dollar can be substantial. Furthermore, the exchange rates obtained when converting US Dollar to Australian Dollar and Rand are set by foreign exchange markets, over which Gold Fields has no control. In 2024, the Rand strengthened by 2% against the US Dollar, from an average of R18.33 per US\$1.00 in 2024 to R17.88 per US\$1.00 in 2025. The Australian Dollar strengthened by 3% from an average of A\$1.00 per US\$0.66 in 2024 to A\$1.00 per US\$0.64 in 2025.

The Windfall Project costs are mainly denominated in Canadian Dollar. Depreciation or appreciation of the Canadian Dollar against the US dollar will reduce or increase their costs when translating into US dollars. The Canadian Dollar weakened by 1% from C\$1.00 per US\$0.73 in 2024 to C\$1.00 per US\$0.72 in 2025.

With respect to its operations in Ghana, Peru and Chile, a substantial portion of Gold Fields' operating costs (including wages) are either directly incurred in US Dollar or are translated to US Dollar. Accordingly, fluctuations in the Ghanaian Cedi, Peruvian Nuevo Soles and Chilean Peso do not materially impact operating results for the Ghana, Peru and Chilean operations.

Inflation

Gold Fields' operations have been, and may continue to be, directly affected by inflationary pressures and volatile commodity costs. Inflation rates in the countries in which Gold Fields operates generally decreased in 2025 compared with 2024, although trends were not uniform across all countries. Global inflation is expected to continue affecting Gold Fields' operations. Prolonged periods of inflation may impact Gold Fields' profitability by negatively impacting its fixed costs and expenses, including raw materials, transportation and labour costs. If these increased costs are not offset by an increase in gold prices or improved efficiencies, they could have a material adverse effect on Gold Fields' business, operating results and financial condition. Furthermore, if cost increases outpace increases in gold price, this would have an impact on Gold Fields' profitability.

Revenue

Revenue increased by 68% from US\$5,202 million in 2024 to US\$8,751 million in 2025. The increase in revenue of US\$3,549 million was mainly due to a 45% higher gold price and 16% higher gold-equivalent ounces sold.

Substantially all of Gold Fields' revenues are derived from the sale of gold, silver and copper. As a result, Gold Fields' revenues are directly related to the prices of gold, silver and copper. Historically, the prices of gold, silver and copper have fluctuated widely. The gold, silver and copper prices are affected by numerous factors over which Gold Fields does not have control. The volatility of gold, silver and copper prices is illustrated in the following tables, which show the annual high, low and average of the London afternoon fixing price of gold and silver and the London Metal Exchange ("LME") cash settlement price for copper in US Dollar for the past 5 calendar years:

	Price per ounce ¹		
	High	Low	Average
Gold	(US\$/oz)		
2021	1,943	1,684	1,799

2021	10,725	7,756	9,318
2022	10,730	7,000	8,798
2023	9,346	7,813	8,477
2024	10,857	8,092	9,145
2025	12,512	8,539	9,943

Source: Iress

¹ Rounded to the nearest US Dollar.

On 24 March 2026, the LME cash settlement price for copper was US\$12,009/t.

Gold Fields sells the gold it produces at market prices to obtain the maximum benefit from prevailing gold prices. As a general rule, Gold Fields does not enter into hedging arrangements such as forward sales or derivatives which establish a price in advance for the sale of its future gold production. However, hedges can be undertaken in one or more of the following circumstances:

- to protect cash flows at times of significant capital expenditures;
- for specific debt servicing requirements; and
- to safeguard the viability of higher cost operations.

Significant changes in the prices of gold, silver and copper over a sustained period of time may lead Gold Fields to increase or decrease its production in the near term, which could have a material impact on Gold Fields' revenues.

Sales of copper concentrate are "provisionally priced" – that is, the selling price is subject to final adjustment at the end of a period normally ranging from 30 to 90 days after delivery to the customer, based on market prices at the relevant quotation points stipulated in the contract. Revenue on provisionally priced copper concentrate sales is recorded on the date of shipment, net of refining and treatment charges, using the forward LME price to the estimated final pricing date, adjusted for the specific terms of the agreements. Variations between the price used to recognise revenue and the actual final price received can be caused by changes in prevailing copper and gold prices. Changes in the fair value as a result of changes in forward metal prices are classified as provisional price adjustments and included as a component of revenue.

Management's discussion and analysis of the financial statements *continued*

Gold Fields' realised gold, silver and copper prices

The following table sets out the average, the high and the low London afternoon fixing price per ounce of gold and Gold Fields' average US Dollar realised gold price during the past two years.

Realised gold price ¹	2025	2024
Average	3,439	2,388
High	4,449	2,778
Low	2,633	1,985
Gold Fields' average realised gold price²	3,496	2,418

¹ Prices stated per ounce.

² Gold Fields' average realised gold price may differ from the average gold price due to the timing of its sales of gold within each year.

The following table sets out the average, the high and the low London afternoon fixing price per ounce of silver and Gold Fields' average US Dollar realised silver price during the past two years.

Realised silver price ¹	2025	2024
Average	40	28
High	75	35
Low	29	22
Gold Fields' average realised silver price²	48	30

¹ Prices stated per ounce.

² Gold Fields' average realised silver price may differ from the average gold price due to the timing of its sales of gold within each year.

The following table sets out the average, the high and the low LME cash settlement price per tonne for copper and Gold Fields' average US Dollar realised copper price during the past two years.

Realised copper price ¹	2025	2024
Average	9,943	9,145
High	12,512	10,857
Low	8,539	8,092
Gold Fields' average realised copper price²	9,939	9,144

¹ Prices stated per tonne.

² Gold Fields' average realised copper price may differ from the average copper price due to the timing of its sales of copper within each year.

The average US Dollar gold price achieved by the Group increased by 45% from US\$2,418 per equivalent ounce in 2024 to US\$3,496 per equivalent ounce in 2025.

The following table sets out revenue, gold sold and gold produced for each operation and the Group for 2025 and 2024:

	2025			2024		
	Revenue US\$ million	Gold sold '000oz	Gold produced '000oz	Revenue US\$ million	Gold sold '000oz	Gold produced '000oz
South Deep	1,065.9	308.8	308.8	646.4	267.9	267.3
Tarkwa	1,642.6	474.2	474.5	1,301.9	539.6	537.2
Damang	333.1	96.9	97.5	323.5	135.6	134.6
Cerro Corona	596.7	166.8	167.6	410.8	171.6	172.5
Salares Norte ¹	1,421.4	391.8	396.5	93.6	35.6	45.3

	8,751.3	2,503.2	2,507.5	5,201.6	2,150.9	2,148.6

¹ Salares Norte reached commercial levels of production on 31 August 2025.

² Results are reported on a 50% basis up to the acquisition of Gold Road on 26 September 2025 and on a 100% basis from that date forward.

Gold sales fluctuations have been explained below. In all cases, gold sold is driven by gold produced.

Gold sales increased by 16% from 2,150,900 equivalent ounces in 2024 to 2,503,200 equivalent ounces in 2025.

At South Deep, gold sales increased by 15% from 8,334 kilograms (267,900 ounces) in 2024 to 9,605 kilograms (308,800 ounces) in 2025. This increase was primarily driven by improved grades due to the mining footprint and enhanced plant recovery.

At Tarkwa, gold sales decreased by 12% from 539,600 ounces in 2024 to 474,200 ounces in 2025 mainly due to lower yield. Yield decreased due to lower feed grade as a result of feeding more lower-grade materials from stockpiles. Damang's gold sales decreased by 29% from 135,600 ounces in 2024 to 96,900 ounces in 2025 due to lower yield resulting from lower grade of ore processed.

At Peru, copper sales increased by 1% from 22,167 tonnes in 2024 to 22,442 tonnes in 2025 mainly due to higher recovery, while gold sales increased by 16% from 87,519 ounces in 2024 to 101,470 ounces in 2025 due to higher gold grade and recovery. Gold equivalent sales decreased by 3% from 171,600 ounces in 2024 to 166,800 ounces in 2025 due to a lower Cu/Au price factor as a result of a higher increase in gold price in relation to the copper price, which had a negative impact on equivalent production in 2025.

On 31 August 2025, Salares Norte achieved commercial levels of production. Gold and silver sales for 2025 were 363,573 ounces gold and 2,268,179 ounces silver, respectively. Gold equivalent sales increased from 35,600 ounces in 2024 to 391,800 ounces in 2025 driven by the ramp-up of the processing plant.

At St Ives, gold sales increased by 9% from 339,700 ounces in 2024 to 369,600 ounces in 2025 due to an 8% increase in tonnes milled and a 3% increase in yield. At Agnew, gold sales increased by 4% from 234,400 ounces in 2024 to 243,700 ounces in 2025 due to improved plant throughput and feed grade from available stockpiled material. At Granny Smith, gold sales decreased by 6% from 282,600 ounces in 2024 to 266,500 ounces in 2025 in accordance with the business plan. At Gruyere, gold sales increased by 29% from 143,800 ounces in 2024 to 184,900 ounces in 2025 due to an increase in tonnes milled partially offset by a reduction in yield. In 2024, Gruyere production was impacted by a wet weather event during March and April. In 2025, Gruyere operations continued to ramp-up, with the Gruyere open pit achieving a 37% increase in tonnes mined compared to the prior year. Gruyere's results are reported on a 50% basis up to the acquisition of Gold Road on 26 September 2025 and on a 100% basis from that date forward.

Cost of sales

Cost of sales, which comprises cost of sales, gold inventory change and amortisation and depreciation, increased by 29% from US\$2,844 million in 2024 to US\$3,681 million in 2025. The reasons for this increase are described below.

Cost of sales before amortisation and depreciation

Cost of sales before amortisation and depreciation increased by 25% from US\$2,216 million in 2024 to US\$2,760 million in 2025 mainly due to the increase in production as well as inflationary increases affecting all the regions and a US\$14 million gold inventory debit to cost in 2024 compared to US\$61 million in 2025.

At South Deep, cost of sales before amortisation and depreciation increased by 8% from R6,565 million (US\$358 million) in 2024 to R7,123 million (US\$398 million) in 2025 mainly due to inflationary increases and increased volumes mined.

At Tarkwa, cost of sales before amortisation and depreciation increased by 20% from US\$507 million in 2024 to US\$607 million in 2025 mainly due to a gold inventory credit to costs in 2024 of US\$13 million as a result of a build-up of stockpiles compared to a gold inventory charge to costs in 2025 of US\$117 million as a result of draw-down of stockpiles. At Damang, cost of sales before amortisation and depreciation decreased by 11% from US\$238 million in 2024 to US\$211 million in 2025 mainly due to lower tonnes mined.

At Cerro Corona, cost of sales before amortisation and depreciation increased by 2% from US\$191 million in 2024 to US\$194 million in 2025.

At Salares Norte, cost of sales before amortisation and depreciation was US\$196 million in 2025. In 2024, cost of sales before amortisation and depreciation was a net positive of US\$18 million due to gold inventory credit to costs being higher than the cost of sales before gold inventory change and amortisation and depreciation as a result of a build of stockpiles in line with the ramp-up of the project after achieving first gold in March 2024. Salares Norte reached commercial levels of production on 31 August 2025 and achieved steady state operations in Q4 2025.

At St Ives, cost of sales before amortisation and depreciation increased by 16% from A\$569 million (US\$375 million) in 2024 to A\$662 million (US\$426 million) in 2025 mainly due to increased employee and contractor costs. At Agnew, cost of sales before depreciation increased by 18% from \$333 million (US\$220 million) in 2024 to A\$394 million (US\$254 million) in 2025 mainly due to increased commodity input prices and employee and contractor costs. At Granny Smith, cost of sales before amortisation and depreciation increased by 5% from A\$352 million (US\$232 million) in 2024 to A\$370 million (US\$239 million) in 2025 mainly due to inflationary increases. At Gruyere, cost of sales before amortisation and depreciation increased by 113% from A\$172 million (US\$113 million) in 2024 to A\$366 million (US\$236 million) in 2025 mainly due to higher mining unit costs as a result of higher contractor mining rates and additional processing plant maintenance costs. Gruyere's results are reported on a 50% basis up to the acquisition of Gold Road on 26 September 2025 and on a 100% basis from that date forward.

Management's discussion and analysis of the financial statements *continued*

Amortisation and depreciation

Amortisation and depreciation is calculated on the units-of-production method and is based on current gold production as a percentage of total expected gold production over the lives of the different mines based on proved and probable reserves.

The amortisation in 2025 was based on the reserves as at 31 December 2024. The life-of-mine information is based on the operations reserve life of mine models. In basic terms, amortisation is calculated using the life-of-mine for each operation, which is based on: (1) the proved and probable reserves for the operation at the start of the relevant year; and (2) the amount of gold produced/mined by the operation during the year.

	Amortisation for the year ended	
	31 December 2025 US\$ million	31 December 2024 US\$ million
South Deep	78	62
Tarkwa	137	135
Damang	27	32
Cerro Corona	60	59
Salares Norte ¹	159	45
St Ives	138	63
Agnew	72	72
Granny Smith	71	70
Gruyere ²	135	75
Corporate and other	44	16
Total amortisation and depreciation	920	627

¹ Salares Norte reached commercial levels of production on 31 August 2025.

² Results are reported on a 50% basis up to the acquisition of Gold Road on 26 September 2025 and on a 100% basis from that date forward.

Amortisation and depreciation increased by 47% from US\$627 million in 2024 to US\$920 million in 2025, mainly due to higher production.

At South Deep, amortisation and depreciation increased by 24% from R1,130 million (US\$62 million) in 2024 to R1,401 million (US\$78 million) in 2025 mainly due to an increase in infrastructure and fleet capital expenditure, as well as an increase in gold production.

At Tarkwa, amortisation and depreciation increased by 1% from US\$135 million in 2024 to US\$137 million in 2025. At Damang, amortisation and depreciation decreased by 16% from US\$32 million in 2024 to US\$27 million in 2025 mainly due to the completion of mining in 2023 resulting in the rehandling and treatment of stockpiles in 2024 and 2025.

At Cerro Corona, amortisation and depreciation increased by 2% from US\$59 million in 2024 to US\$60 million in 2025 mainly due to higher capital expenditure.

At Salares Norte, amortisation and depreciation increased from US\$45 million in 2024 to US\$159 million in 2025. Salares Norte Salares Norte reached commercial levels of production on 31 August 2025 and amortisation on the processing plant commenced from that date. Salares Norte reached steady state operations in Q4 2025.

At St Ives, amortisation and depreciation increased by 124% from A\$96 million (US\$63 million) in 2024 to A\$215 million (US\$138 million) in 2025 mainly due to higher ounces mined. In addition, Swiftsure and Invincible South open pits were fully amortised in 2025 with both open pits having relatively short mine lives combined with high development costs. At Agnew, amortisation and depreciation increased by 3% from A\$108 million (US\$72 million) in 2024 to A\$111 million (US\$72 million) in 2025 mainly due to higher capital project expenditure, partially offset by lower ounces mined. At Granny Smith, amortisation and depreciation increased by 4% from A\$106 million (US\$70 million) in 2024 to A\$110 million (US\$71 million) in 2025 due to higher capital development and project expenditure, partially offset by lower ounces mined. At Gruyere, amortisation and depreciation increased by 84% from A\$114 million (US\$75 million) in 2024 to A\$210 million (US\$135 million) in 2025 mainly due to the Gold Road acquisition and inclusion of the 100% cost base from the December quarter (previously 50%).

Investment income

Income from investments increased by 83% from US\$29 million in 2024 to US\$53 million in 2025.

The investment income in 2025 of US\$53 million comprised US\$5 million interest on monies invested in the South African and Ghanaian rehabilitation trust funds, US\$41 million interest on other cash and cash equivalent balances and US\$7 million unwinding of discount rate and net change in fair value of the Asanko deferred and contingent considerations.

The investment income in 2024 of US\$29 million comprised US\$4 million interest on monies invested in the South African and Ghanaian rehabilitation trust funds, US\$18 million interest on other cash and cash equivalent balances and US\$7 million unwinding of discount rate and net change in fair value of the Asanko deferred and contingent considerations.

Interest on other cash balances increased by 128% from US\$18 million in 2024 to US\$41 million in 2025 mainly due to higher average cash balances in 2025.

The US\$7 million unwinding of discount rate and net change in fair value of the Asanko deferred and contingent considerations in 2024 and 2025 relates to the considerations receivable in terms of the disposal of Asanko Gold.

Finance expense

Finance expense increased by 142% from US\$50 million in 2024 to US\$121 million in 2025.

The finance expense of US\$121 million in 2025 comprised US\$29 million relating to the accretion of the environmental rehabilitation liability, US\$1 million relating to the unwinding of the silicosis provision, US\$26 million lease interest and US\$134 million on various Group borrowings, partially offset by borrowing costs capitalised of US\$69 million.

The finance expense of US\$50 million in 2024 comprised US\$25 million relating to the accretion of the environmental rehabilitation liability, US\$1 million relating to the unwinding of the silicosis provision, US\$25 million lease interest and US\$106 million on various Group borrowings, partially offset by borrowing costs capitalised of US\$106 million.

The environmental rehabilitation liability accretion expense increased by 16% from US\$25 million in 2024 to US\$29 million in 2025 due to higher gross cost estimates at the end of 2024.

The unwinding of the silicosis provision remained flat at US\$1 million.

The interest expense on lease liability increased by 4% from US\$25 million in 2024 to US\$26 million in 2025 due to additional leases entered into.

Interest on Group borrowings increased by 26% from US\$106 million in 2024 to US\$134 million in 2025 due to higher average borrowings in 2025.

Below is an analysis of the components making up the interest on the various Group borrowings, stated on a comparative basis:

United States Dollar		
Figures in millions unless otherwise stated	2025	2024
Interest on borrowings to fund capital expenditure and operating costs at the South African operation	1	1
Interest on US\$500 million 5-year notes issue	—	10
Interest on US\$500 million 10-year notes issue	31	31
Interest on US\$750 million 7-year notes issue	28	—
Interest on US\$100 million revolving senior secured credit facility	1	1
Interest on US\$150 million revolving senior secured credit facility	—	3
Interest on US\$85 million revolving senior secured credit facility	—	4
Interest on A\$500 million syndicated revolving credit facility	4	6
Interest on US\$750 million multi-currency bridge facilities	12	14
Interest on US\$1,200 million term loan and revolving credit facility	52	36
Interest on A\$1,250 million multi-currency term loan facility	5	—
	134	106

Interest on borrowings at the South African operation remained flat at US\$1m. The Rand facilities are fully undrawn and the expense relates to commitment fees.

Interest on the US\$500 million 5-year notes issue was US\$10 million in 2024. The US\$500 million 5-year notes matured and were repaid on 25 May 2024.

The US\$500 million 10-year notes issue remained flat at US\$31 million.

On 13 May 2025, Gold Fields successfully concluded the raising of US\$750 million 7-year notes. Interest on the US\$750 million 7-year notes was US\$28 million in 2025.

Interest on the US\$100 million term revolving senior secured credit facility remained flat at US\$1 million. The facility is fully undrawn and the expense relates to commitment fees.

Interest on the US\$150 million revolving senior secured facility was US\$3 million in 2024. The US\$150 million revolving senior secured facility was refinanced with the US\$85 million revolving senior secured facility during 2024 and cancelled.

Interest on the US\$85 million revolving senior secured facility was US\$4 million in 2024. The US\$85 million revolving senior credit facility was cancelled on 9 July 2025.

Management's discussion and analysis of the financial statements *continued*

Interest on the A\$500 million syndicated revolving credit facility decreased by 33% from US\$6 million in 2024 to US\$4 million in 2025. The decrease was due to repayments in 2025.

Interest on the US\$750 million multi-currency bridge facilities decreased by 14% from US\$14 million in 2024 to US\$12 million in 2025. The facilities were entered into on 18 October 2024 and used to finance the Osisko acquisition. The facilities had a maturity date of 17 October 2025 and were fully repaid and cancelled in May 2025.

Interest on the US\$1,200 million term loan and revolving credit facility increased by 44% from US\$36 million in 2024 to US\$52 million in 2025. The increase was due to additional drawdowns in 2025.

Interest on the A\$1,250 million multi-currency term loan facility was US\$5 million in 2025. The facility was entered into on 2 December 2025 and used to finance the Gold Road acquisition.

Capitalised interest decreased by 35% from US\$106 million in 2024 to US\$69 million in 2025 due to the cessation of interest capitalisation at Salares Norte from 31 August 2025 due to the mine having reached commercial levels of production. An average interest capitalisation rate of 4.3% (2024: 7.0%) was applied. The interest was capitalised in terms of IAS 23 *Borrowing Costs*. IAS 23 requires capitalisation of borrowing costs whenever general or specific borrowings are used to finance qualifying projects.

Gain on financial instruments, net

Gain on financial instruments net was US\$58 million in 2025.

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Royalties - fair value gain	78	—
Northern Star shares - fair value gain	53	—
Northern Star shares - fair value loss on forward sales	(73)	—
Total gain on financial instruments, net	58	—

On 12 December 2025, Gold Fields entered into agreements to sell a portfolio of royalty assets for a total cash consideration of US\$115 million and its right to the Asanko deferred and contingent considerations for US\$30 million and US\$22 million, respectively. Certain assets within the royalty portfolio, having a combined value of US\$78 million, were subject to a third-party right of first refusal ("ROFR"). Completion of the overall transaction was conditional upon the purchaser acquiring these royalties. At 31 December 2025, the US\$78 million royalties were presented as assets held for sale as the sale was considered highly probable in the sense that they will be purchased either by the purchaser or the third party. A fair value gain of US\$78 million was recognised in profit or loss.

On 26 September 2025, Gold Fields entered into a forward share transaction ("forward sale") pursuant to which it agreed to sell the Northern Star shares acquired as part of the acquisition of Gold Road. The investment in Northern Star was presented as an asset held for sale until 14 October 2025, the settlement date of the forward sale. A fair value gain of US\$53 million (A\$83 million) was recognised in profit or loss.

On 14 October 2025, Gold Fields sold the 49,258,234 Northern Star shares by way of the forward sale at a price of A\$22.05 per Northern Star share for a total consideration of US\$707 million (A\$1,086 million). A fair value loss of US\$73 million (A\$113 million) was recognised in profit or loss.

Foreign exchange gain/(loss)

The foreign exchange loss of US\$7 million in 2024 compared to a gain of US\$7 million in 2025. These gains or losses on foreign exchange related to the conversion of offshore cash holdings into their functional currencies.

Share-based payments

Gold Fields recognises the cost of share options granted (share-based payments) in terms of IFRS 2 *Share-based Payment*.

The Group grants share options and restricted shares to Executive Directors, as well as senior and middle management. Gold Fields has adopted appropriate valuation models to fair value share-based payments. The value of the equity-settled instruments is determined at the grant date of the options and depending on the rules of the plan expensed on a straight-line basis over a three-year vesting period, adjusted for forfeitures as appropriate.

Share-based payments increased from US\$4 million in 2024 to US\$25 million in 2025 mainly due to higher vesting percentages, as well as a higher number of awards granted in 2025 as a result of a change in the employee share scheme with shares granted to a broader group of employees and not only executives and certain officers. The corresponding entry for the share-based payment expense was the share-based payment reserve within shareholders' equity.

Long-term incentive plan expense

Gold Fields recognises the long-term incentive plan expense in terms of IAS 19 *Employee Benefits*.

The Group granted cash awards to senior and middle management, conditional on the achievement of specified performance conditions relating to total shareholder return and free cash flow margin. The conditions were assessed over the performance cycle which runs over three calendar years. The expected timing of the cash outflows in respect of each grant was at the end of three years after the original award was made. The last award under this plan was made in 2024.

The performance conditions of LTIP are approved annually by the Remuneration Committee. The expected timing of the cash outflows in respect of each grant is at the end of three years after the original award was made.

The LTIP expense increased by 187% from US\$15 million in 2024 to US\$43 million in 2025 mainly due to the current marked-to-market valuation of the plan reflecting improved forecast performance.

Exploration expense

The exploration expense increased by 204% from US\$98 million in 2024 to US\$298 million in 2025 mainly due to higher spend at the Windfall Project in Canada, which is still in the pre-feasibility phase.

United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024

Reversal of impairment of assets, net of impairment

Impairment of assets of US\$4 million in 2024 compared to a reversal of impairment of assets, net of impairment amounting to US\$281 million in 2025.

United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024
Salares Norte redundant assets (2024: Peru)	(4)	(4)
South Deep cash-generating unit - reversal of impairment	285	—
Reversal of impairment of assets, net of impairment	281	(4)

For the year ended 31 December 2018, the Group recognised an impairment of US\$410 million (R5,507 million) in respect of property, plant and equipment relating to the South Deep CGU. At 31 December 2025, the Group reversed an impairment of US\$285 million (R4,722 million) in respect of property, plant and equipment relating to the South Deep CGU as a result of significantly higher gold prices and the stabilisation of the ramp-up at the South Deep mine during 2025. The impairment reversal was limited to what the carrying amounts of the CGU would have been at 31 December 2025 had the assets not been impaired. Refer note 8 for further details.

Other costs, net

Other costs, net increased by 65% from US\$82 million in 2024 to US\$135 million in 2025.

The costs in 2025 were mainly made up of:

- Social contributions of US\$26 million;
- Offshore structure costs of US\$17 million; and
- Rehabilitation expense of US\$44 million as a result of changes in estimates relating to the provision for environmental rehabilitation costs recognised in profit or loss.

The costs in 2024 were mainly made up of:

- Social contributions of US\$21 million;
- Offshore structure costs of US\$18 million; and
- Gruyere rainfall event related costs of US\$12 million.

Restructuring costs

Restructuring costs increased by 43% from US\$7 million in 2024 to US\$10 million in 2025. The cost in 2024 and 2025 related mainly to the separation packages at Ghana.

Ghana expected credit loss

Ghana expected credit loss ("ECL") was US\$66 million in 2025.

The ECL of US\$66 million in 2025 comprised US\$46 million raised against a contractor loan receivable at Tarkwa and US\$20 million raised against a Tarkwa receivable. The amounts advanced were provided to ensure the sustainability of the operation and delivery of the mine plan. Gold Fields has communicated to the contractor that this amount remains payable and has reserved all rights in this regard.

Profit on disposal of asset held for sale - Asanko Gold

Asanko Gold was disposed of during 2024. The transaction was subject to a number of conditions and was concluded on 4 March 2024 with the receipt of US\$65 million cash and 28.5 million Galiano shares, resulting in the recognition of a profit on disposal amounting to US\$6m in 2024.

Management's discussion and analysis of the financial statements *continued*

Profit on disposal of asset held for sale - Rusoro

On 9 January 2024, Gold Fields announced that it entered into a share purchase agreement with Fulcrum Global Markets LLC, a Delaware limited liability company, to sell its 140,000,001 common shares in the capital of Rusoro for an aggregate initial cash purchase price of US\$62 million and certain additional contingent consideration upon the occurrence of specified events described below.

The US\$62 million was received by Gold Fields on 22 January 2024, resulting in the recognition of a profit on disposal of Rusoro amounting to US\$62 million in 2024.

Gain on remeasurement of 50% previously held interest in Gruyere

Gain on remeasurement of 50% previously held interest in Gruyere was US\$808 million (A\$1,235 million) in 2025.

On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road Resources Limited ("Gold Road").

On 5 May 2025, Gold Fields entered into an agreement to acquire 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project (the "second Transaction").

When a joint operation is acquired through stages that results in control of an entity that is a business, the transaction is treated as a business combination achieved in stages. On acquisition date the previously held 50% interest in the Gruyere Gold Project was remeasured to its fair value and the resulting gain was recognised in profit or loss.

Transaction costs on acquisition of Gold Road

Transaction costs of US\$51 million (A\$80 million) relating to the Gold Road acquisition were recognised in profit or loss in 2025.

Share of results of equity-accounted investees, net of taxation

The share of results of equity-accounted investees, net of taxation decreased by 96% from a loss of US\$54 million in 2024 to a loss of US\$2 million in 2025.

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Far South East Resources Incorporated ("FSE")	—	(2)
Windfall Project	—	(48)
Lunnon Metals Limited ("Lunnon")	(2)	(4)
Share of result of equity-accounted investees, net of taxation	(2)	(54)

FSE's share of loss of equity-accounted investees, net of taxation was US\$2 million in 2024. Gold Fields disposed of FSE for US\$1 million in 2024.

On 2 May 2023, Gold Fields, through a 100% held Canadian subsidiary, acquired a 50% interest in the Windfall Project in Québec, Canada, which is in the feasibility stage, from Osisko Mining Incorporated (the "Partnership"). Gold Fields and Osisko had joint control over the Windfall Project, the transaction was structured as a separate vehicle and the Group had a residual interest in the net assets of the Windfall Project. Accordingly, the Group classified its interest in the Windfall Project as a joint venture.

On 12 August 2024, Gold Fields entered into an agreement with Osisko to acquire 100% of its issued share capital. This represents a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project (the "second Transaction"). The acquisition date was 25 October 2024, the date on which all conditions precedent were met and the consideration was paid in full by Gold Fields. On 25 October 2024, the initial 50% interest in the Windfall Project was derecognised as a joint venture and recognised as an asset acquisition together with the additional 50% interest held by Osisko, in terms of the second Transaction.

Windfall's share of loss of equity-accounted investees, net of taxation was US\$48 million in 2024. Windfall's share of equity accounting loss for 2024 was based on results to 25 October 2024.

Lunnon's share of losses of equity-accounted investees decreased by 50% from US\$4 million in 2024 to US\$2 million in 2025. Gold Fields holds 30.5% (2024: 30.5%) of Lunnon at 31 December 2025.

Silicosis settlement costs

Silicosis settlement costs were US\$1 million in 2025.

A consolidated application was brought against several South African mining companies, including Gold Fields, for certification of a class action on behalf of current or former mineworkers (and their dependants) who have allegedly contracted silicosis and/or tuberculosis while working for one or more of the mining companies listed in the application (refer to notes 29.2 and 39 of the consolidated financial statements for further details).

Profit on disposal of assets

Profit on disposal of assets remained flat at US\$1 million. The profit in 2024 and 2025 related mainly to the sale of redundant assets at various operations.

Royalties

Royalties increased by 57% from US\$148 million in 2024 to US\$232 million in 2025 in line with the increases in revenue.

Mining and income tax

The mining and income tax charge increased by 137% from US\$697 million in 2024 to US\$1,649 million in 2025.

The table below indicates Gold Fields' effective tax rate in 2025 and 2024:

	United States Dollar	
Figures in millions unless otherwise stated	2025	2024
Income and mining tax charge (US\$ million)	(1,649)	(697)
Effective tax rate (%)	31	35

In 2025, the effective tax rate of 31.0% was lower than the maximum South African mining statutory tax rate of 33% mainly due to the tax effect of the following:

- US\$131 million adjustment to reflect the actual realised company tax rates in South Africa and offshore;
- US\$267 million non-taxable gain on remeasurement of 50% previously held interest in Gruyere;
- US\$18 million non-taxable fair value gain on Northern Star shares; and
- US\$8 million deferred tax movement on Peruvian Nueva Sol devaluation against US dollar;
-

The above were offset by the following tax effected charges:

- US\$8 million non-deductible share-based payments;
- US\$4 million non-deductible exploration expense;
- US\$21 million non-deductible interest paid;
- US\$1 million of non-deductible share of results of equity-accounted investees, net of taxation;
- US\$24 million non-deductible fair value loss on forward sale of Northern Star shares;
- US\$12 million non-deductible transaction costs on acquisition of Gold Road;
- US\$38 million dividend withholding tax;
- US\$42 million of net non-deductible expenditure and non-taxable income;
- US\$20 million of various Peruvian non-deductible expenses;
- US\$88 million deferred tax assets not recognised at Windfall; and
- US\$1 million prior year adjustments.
-

In 2024, the effective tax rate of 35.0% was higher than the maximum South African mining statutory tax rate of 33% mainly due to the tax effect of the following:

- US\$57 million adjustment to reflect the actual realised company tax rates in South Africa and offshore;
- US\$2 million non-taxable profit on disposal of Asanko Gold; and
- US\$21 million non-taxable profit on disposal of Rusoro.
-

The above were offset by the following tax effected charges:

- US\$2 million non-deductible share-based payments;
- US\$26 million non-deductible interest paid;
- US\$18 million of non-deductible share of results of equity-accounted investees, net of taxation;
- US\$23 million dividend withholding tax;
- US\$29 million of net non-deductible expenditure and non-taxable income;
- US\$11 million of various Peruvian non-deductible expenses;
- US\$17 million deferred tax assets not recognised at Windfall; and
- US\$8 million prior year adjustments.

Profit for the year

As a result of the factors discussed above, the profit increased by 182% from US\$1,291 million in 2024 to US\$3,645 million in 2025.

Profit attributable to owners of the parent

Profit attributable to owners of the parent increased by 187% from US\$1,245 million in 2024 to US\$3,567 million in 2025.

Profit attributable to non-controlling interests

Profit attributable to non-controlling interests increased by 70% from US\$46 million in 2024 to US\$78 million in 2025.

The non-controlling interest at the end of 2025 and 2024 consists of Gold Fields Ghana Limited (Tarkwa) and Abosso Goldfields Limited (Damang) at 10% each, Gold Fields La Cima S.A. (Cerro Corona) at 0.47% and Newshelf 899 (Proprietary) Limited (South Deep) at 6.90% (2024: 3.57%).

Management's discussion and analysis of the financial statements *continued*

The amount making up the non-controlling interest is shown below:

	2025	2024	2025	2024
	Non-controlling interest Effective ¹	Non-controlling interest Effective ¹	US\$ million	US\$ million
Gold Fields Ghana – Tarkwa	10.0 %	10.0 %	46	38
Abosso Goldfields – Damang	10.0 %	10.0 %	3	2
Gold Fields La Cima – Cerro Corona	0.47 %	0.47 %	1	—
Newshef 899 – South Deep ²	6.90 %	3.57 %	28	6
			78	46

¹ Average for the year

² On 6 December 2025, per the South Deep BEE transaction an economic interest of 6.90% In Newshef 899 (Proprietary) Limited vested to the BEE non-controlling interest holders.

Basic earnings per share

As a result of the above, Gold Fields earnings per share increased by 187% from US\$1.39 per share in 2024 to US\$3.99 per share in 2025.

Dividend policy

During 2025, the Company implemented a new dividend policy. The new policy, which took effect with the final 2025 dividend declaration, targets a base dividend of 35% of free cash flow before discretionary growth investments, with a minimum annual dividend of US\$0.50 per share (paid semi-annually at US\$0.25 per share). The Company's previous dividend policy was to declare an interim and final dividend of 30% – 45% of normalised earnings. All payouts are subject to the applicable legal, regulatory and Board approval requirements.

Normalised profit attributable to owners of the parent

Normalised profit attributable to owners of the parent is considered an important measure by Gold Fields of the profit realised by the Group in the ordinary course of operations. In addition, it formed the basis of the previous dividend policy. Normalised profit attributable to owners of the parent is defined as profit attributable to owners of the parent excluding gains and losses on foreign exchange, financial instruments, non-recurring net realisable value adjustment to stockpiles and non-recurring items after taxation and non-controlling interest effect.

Normalised profit attributable to owners of the parent increased by 119% from US\$1,227 million or US\$1.37 per share in 2024 to US\$2,684 million or US\$3.00 per share in 2025.

Normalised profit attributable to owners of the parent reconciliation for the Group is calculated as follows:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Profit for the year attributable to owners of the parent	3,567	1,245
<i>Adjusted for the following:</i>		
Non-recurring items ¹	(941)	(16)
Tax effect of non-recurring items*	64	(10)
Non-controlling interest effect of non-recurring items*	3	—
Loss on foreign exchange	(7)	7
Tax effect on foreign exchange*	(2)	—
Cerro Corona net realisable value adjustment to stockpiles	—	3
Tax effect on Cerro Corona net realisable value adjustment to stockpiles*	—	(1)
South Deep deferred tax change*	—	(1)
Normalised profit attributable to owners of the parent	2,684	1,227

¹ Non-recurring items are considered unusual and not expected during regular business operations and comprise the following:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Profit on the sale of assets	(1)	(1)
Gain on financial instruments, net	(58)	—
Gain on remeasurement of 50% previously held interest in Gruyere	(808)	—
Transaction costs on acquisition of Gold Road	51	—
Profit on disposal of Rusoro	—	(62)
Profit on disposal of Asanko Gold	—	(6)
Reversal of Impairment of assets, net of impairment of assets	(281)	4
Restructuring costs	10	7
Rehabilitation adjustments	44	(1)
Gruyere rainfall event	(6)	12
Ghana expected credit losses	66	—
Other non-recurring items*	42	31
Total non-recurring items	(941)	(16)

* Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2025 and 2024.

Liquidity and capital resources – years ended 31 December 2025 and 31 December 2024

Cash flows from operating activities

Cash inflows from operating activities increased by 135% from US\$1,607 million in 2024 to US\$3,772 million in 2025. The items comprising these are discussed below.

The increase in inflow of US\$2,165 million was due to the following movements:

<i>Figures in millions unless otherwise stated</i>	United States Dollar
Increase in cash generated by operations mainly due to higher revenue as a result of the higher gold price	2,732
Increase in interest received	24
Increase in release of working capital	173
Increase in interest paid due to higher average borrowings	(30)
Increase in royalties paid mainly due to higher revenue as a result of the higher gold price	(87)
Increase in taxes paid mainly due to higher revenue as a result of the higher gold price	(264)
Increase in dividends paid	(383)
	2,165

Cash flows from investing activities

Cash outflows from investing activities increased by 7% from US\$2,591 million in 2024 to US\$2,766 million in 2025.

The increase in outflow of US\$175 million was due to the following movements:

<i>Figures in millions unless otherwise stated</i>	United States Dollar
Increase in additions to property, plant and equipment	(215)
Increase in capital expenditure – working capital	(19)
Decrease in proceeds on disposal of property, plant and equipment	(1)
Increase in purchase of investments	(35)
Windfall Project capital contributions - 2024	65
Purchase of Osisko - 2024	1,453
Purchase of Gold Road - 2025	(2,124)
Increase in proceeds on disposal of investments	825
Proceeds on disposal of Rusoro - 2024	(62)
Proceeds on disposal of Asanko Gold - 2024	(65)
Decrease in contributions to environmental trust funds	3
	(175)

Management's discussion and analysis of the financial statements *continued*

Additions to property, plant and equipment

Capital expenditure increased by 18% from US\$1,183 million in 2024 to US\$1,399 million in 2025.

United States Dollar

Figures in million unless otherwise stated	2025			2024		
	Sustaining capital*	Non-sustaining capital*	Total capital	Sustaining capital*	Non-sustaining capital*	Total capital
South Deep	128	—	128	112	—	112

Other	6	35	41	1	—	1
Total	1,029	370	1,399	849	334	1,183

¹ On 26 September 2025, Gold Fields acquired 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project. The capital expenditure for 2025 represents 100% of Gruyere from acquisition date compared to 50% for the 12 months in 2024.

* Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the years ended 31 December 2025 and 2024.

Sustaining capital expenditure at South Deep increased by 12% from R2,046 million (US\$112 million) in 2024 to R2,292 million (US\$128 million) in 2025, mainly due to an increase in equipment purchases, winder upgrades, electrical upgrades and water reticulation upgrades.

Sustaining capital expenditure at Tarkwa increased by 20% from US\$207 million in 2024 to US\$249 million in 2025. The increase in capital expenditure was mainly due to an increase in capital waste tonnes mined and infrastructure relocation project expenditure (US\$22 million).

Sustaining capital expenditure at Damang decreased by 179% from US\$5 million in 2024 to negative US\$4 million in 2025 due to capital cost reclassified as operational cost in 2025 and other capital reversals.

Total capital expenditure at Cerro Corona increased by 35% from US\$34 million in 2024 to US\$46 million in 2025. The increase in total capital expenditure is due to the construction of the in-pit tailing facility.

Total capital expenditure at Salares Norte decreased by 25% from US\$389 million in 2024 to US\$293 million in 2025. Sustaining capital expenditure increased in 2025 mainly due to the ramp-up expenditure up to achieving commercial levels of production at the end of August 2025. Non-sustaining capital expenditure decreased in 2025 due to the completion of the project stage capital expenditure.

Total capital expenditure at St Ives increased by 46% from A\$300 million (US\$198 million) in 2024 to A\$437 million (US\$281 million) in 2025. The increased capital mainly relates to A\$177 million (US\$114 million) spent on the Renewables Power Project (2024: A\$49 million (US\$32 million)).

Total capital expenditure at Agnew increased by 21% from A\$110 million (US\$72 million) in 2024 to A\$133 million (US\$86 million) in 2025 driven by increased non-sustaining expenditure in 2025 associated with bringing the Barren Lands underground mine to full production in December 2025 and ongoing development of the lower Kath orebody at the Waroonga complex.

Total capital expenditure at Granny Smith increased by 55% from A\$122 million (US\$80 million) in 2024 to A\$190 million (US\$122 million) in 2025 due to increased underground development and expenditure on the new mine fresh air intake system to support the Z135 and Z150 extraction levels

Total capital expenditure at Gruyere increased by 89% from A\$129 million (US\$85 million) in 2024 to A\$244 million (US\$157 million) in 2025 reflecting the 2025 focus on pre-stripping of Stages 5 and 6 of the Gruyere open pit. Following the acquisition of Gold Road on 26 September 2025, capital expenditure has been recognised at 100% of the Gruyere cost profile.

Proceeds on disposal of property, plant and equipment

Proceeds on the disposal of property, plant and equipment decreased by 33% from US\$3 million in 2024 to US\$2 million in 2025. In both 2025 and 2024, the proceeds related mainly to the disposal of various redundant assets at the mines.

Purchase of investments

Investment purchases increased by 60% from US\$58 million in 2024 to US\$93 million in 2025.

Purchase of investments of US\$93 million in 2025 comprised:

<i>Figures in millions unless otherwise stated</i>	United States Dollar
Founders Metals Inc.	36
Onyx Gold Corp	5
Investment in bonds	49
Other	3
	93

Purchase of investments of US\$58 million in 2024 comprised:

<i>Figures in millions unless otherwise stated</i>	United States Dollar
Tesoro Gold Limited	2
Torq Resources Inc.	1
Investment in bonds	52
Other	3
	58

Windfall Project capital contributions

Gold Fields capital contribution in terms of the obligation under the Windfall joint venture was US\$65 million (C\$89 million) in 2024. Refer below for derecognition of the Windfall joint venture as part of the Osisko asset acquisition.

Purchase of Osisko

On 12 August 2024, Gold Fields entered into an agreement with Osisko to acquire 100% of its issued share capital. This represented a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project. The acquisition date was 25 October 2024, the date on which all conditions precedent were met and the consideration was paid in full by Gold Fields.

On 25 October 2024, the initial 50% interest in the Windfall Project was derecognised as a joint venture and recognised as an asset acquisition together with the additional 50% interest held by Osisko, in terms of the Osisko asset acquisition.

The agreed upon consideration for this transaction was US\$1,483 million (C\$2,061 million) for 420.53 million shares at the purchase price of C\$4.90 per share.

As part of the Osisko acquisition, Gold Fields acquired cash of US\$31 million (C\$43 million).

Purchase of Gold Road

On 26 September 2025, Gold Fields acquired 100% of the issued and outstanding share capital of Gold Road. This represented a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project. The purchase of Gold Road comprised US\$2,169 million (A\$3,349 million) cash consideration paid on 10 October 2025 and US\$315 million (A\$478 million) special dividend paid to Gold Road shareholders on 3 October 2025, partially offset by US\$360 million (A\$550 million) Gold Road take-on cash and cash equivalents at 26 September 2025.

Proceeds on disposal of investments

Proceeds on the disposal of investments increased from US\$57 million in 2024 to US\$882 million in 2025.

The proceeds on disposal in 2025 and 2024 comprised:

<i>Figures in US\$ millions unless otherwise stated</i>	2025	2024
Northern Star shares	707	—
Galiano Gold Inc. shares	106	—
O3 Mining Inc. shares	21	—
FSE	—	1
Insurance cell captives - maturing of bonds	46	56
Other	2	—
	882	57

Management's discussion and analysis of the financial statements *continued*

Proceeds on disposal of Rusoro

On 9 January 2024, Gold Fields announced that it entered into a share purchase agreement with Fulcrum Global Markets LLC, a Delaware limited liability company, to sell its 140,000,001 common shares in the capital of Rusoro for an aggregate initial cash purchase price of US\$62 million.

The US\$62 million was received by Gold Fields on 22 January 2024.

Proceeds on disposal of Asanko Gold

Asanko Gold was disposed of during 2024. The transaction was subject to a number of conditions and was concluded on 4 March 2024 with the receipt of US\$65 million cash and 28.5 million Galiano shares.

Contributions to environmental trust funds

The contributions to environmental trust fund decreased by 23% from US\$13 million in 2024 to US\$10 million in 2025.

The contributions to environmental trust funds of US\$10 million in 2025 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
South Deep mine environmental trust fund	1
Tarkwa mine environmental trust fund	8
Damang mine environmental trust fund	1
	10

The contributions to environmental trust funds of US\$13 million in 2024 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
South Deep mine environmental trust fund	1
Tarkwa mine environmental trust fund	10
Damang mine environmental trust fund	2
	13

Cash flows from financing activities

Cash flows from financing activities was an inflow of US\$1,213 million in 2024 compared to an outflow of US\$173 million in 2025. The items comprising these numbers are discussed below.

The movement of US\$1,386 million was due to the following:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
Increase in loans raised	1,795
Increase in loans repaid	(3,134)
Purchase of treasury shares - 2025	(36)
Increase in payment of lease liability	(11)
	(1,386)

Loans raised

Loans raised increased by 78% from US\$2,291 million in 2024 to US\$4,086 million in 2025.

The US\$4,086 million loans raised in 2025 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
US\$750 million 7-year notes issue ¹	742
US\$1,200 million term loan and revolving credit facilities	234
US\$2,300 million multi-currency bridge facility ²	2,276
A\$1,250 million multi-currency term loan facility ³	834
	4,086

¹ On 13 May 2025, Gold Fields successfully concluded the raising of US\$750 million 7-year notes. The net proceeds from the 7-year notes was used to repay in full the outstanding loans under the US\$750 million multi-currency bridge facilities.

² On 15 July 2025, Gruyere entered into a US\$2,300 million multi-currency syndicated bridge facility. The facility was used to finance the acquisition of Gold Road. On 12 January 2026, the facility was repaid in full and cancelled, utilising available cash resources together with proceeds from the A\$1,250 million multi-currency term loan facility.

³ On 2 December 2025, Gruyere entered into an A\$1,250 million multi-currency syndicated term loan facility. The proceeds were used to partially repay the US\$2,300 million multi-currency bridge facility.

The US\$2,291 million loans raised in 2024 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
US\$85 million revolving senior secured credit facility	84
A\$500 million syndicated revolving credit facility	263
US\$1,200 million term loan and revolving credit facilities	1,202
US\$750 million multi-currency bridge facilities ¹	742
	2,291

¹ On 18 October 2024, Orogen and Windfall entered into a US\$500 million multi-currency bridge facility and a US\$250 million multi-currency parallel bridge facility (collectively called the "US\$750 million multi-currency bridge facilities"). The facility was mainly used to finance of the Osisko asset acquisition.

Loans repaid

Loans repaid increased by 318% from US\$986 million in 2024 to US\$4,120 million in 2025.

The US\$4,120 million loans repaid in 2025 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
US\$85 million revolving senior secured credit facility ¹	34
A\$500 million syndicated revolving credit facility	214
US\$1,200 million term loan and revolving credit facilities	802
US\$750 million multi-currency bridge facilities ²	753
US\$2,300 million multi-currency bridge facility ³	2,120
Gold Road take-on loan ⁴	197
	4,120

¹ The US\$85 million revolving senior credit facility was settled and cancelled on 9 July 2025.

² The facilities had a maturity date of 17 October 2025 and were fully repaid and cancelled in May 2025.

³ On 12 January 2026, the facility was repaid in full and cancelled, utilising available cash resources together with proceeds from the A\$1,250 million multi-currency term loan facility.

⁴ The Gold Road take-on loan of US\$197 million (A\$301 million) was fully repaid in October 2025.

The US\$986 million loans repaid in 2024 comprised:

	United States Dollar
<i>Figures in millions unless otherwise stated</i>	
US\$500 million 5-year notes issue ¹	500
US\$150 million revolving senior secured credit facility ²	84
US\$85 million revolving senior secured credit facility ²	50
A\$500 million syndicated revolving credit facility	39
US\$1,200 million term loan and revolving credit facilities	313
	986

¹ On 15 May 2024, US\$500 million 5-year notes issue matured and was repaid.

² On 10 May 2024, the US\$150 million revolving senior secured credit facility was refinanced with the US\$85 million revolving senior credit facility and cancelled.

Purchase of treasury shares

Treasury shares amounting to US\$36 million were purchased by the Group and a portion was issued to participants upon vesting of employee share options in 2025.

Payment of lease liabilities

Payment of lease liabilities increased by 12% from US\$92 million in 2024 to US\$103 million in 2025. The increase related mainly to additional lease liabilities during 2025.

Net cash generated/(utilised)

As a result of the above, net cash generated increased by 264% from \$229 million in 2024 to US\$833 million in 2025.

Cash and cash equivalents increased by 107% from US\$860 million at 31 December 2024 to US\$1,779 million at 31 December 2025.

Management's discussion and analysis of the financial statements *continued*

Adjusted free cash flow

This is a measure that management uses to measure the cash generated by the core business. In addition, it forms the basis of the new dividend policy. Adjusted free cash flow is defined as net cash from operations adjusted for the South Deep BEE dividend, additions to property, plant and equipment, capital expenditure – working capital, proceeds on disposal of property, plant and equipment, contributions to environmental trust funds and payment of principal lease liabilities per the statement of cash flows.

The cash inflow increased from US\$605 million in 2024 to US\$2,970 million in 2025 due to the higher gold price received.

Below is a table reconciling the adjusted free cash flow to the statement of cash flows.

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Net cash from operations	4,534	1,986
South Deep BEE dividend	(1)	(1)
Additions to property, plant and equipment	(1,399)	(1,183)
Capital expenditure – working capital	(23)	(6)
Proceeds on disposal of property, plant and equipment	2	3
Contributions to environmental trust funds	(10)	(13)
Payment of principal lease liabilities	(103)	(92)
Windfall Project capital contributions	—	(65)
Contributions for rehabilitation purposes at Australia*	(30)	(24)
Adjusted free cash flow	2,970	605

* Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2025 and 2024.

Below is a table reconciling adjusted free cash flow to adjusted free cash flow from operations:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Adjusted free cash flow	2,970	605
Salares Norte net cash (generated)/utilised ¹	(261)	354
Interest paid by corporate entities ²	64	91
Windfall net cash utilised ³	261	—
Gold Road transaction costs	51	—
Loss on Northern Star shares, net*	19	—
Windfall Project capital contributions	—	65
Other corporate costs*	67	34
Adjusted free cash flow from operations⁴	3,171	1,149
– St Ives	529	150
– Agnew	432	217
– Granny Smith	548	300
– Gruyere	295	123
– Gold Fields Australia - taxation for Australian operations ³	(443)	(238)
– South Deep	511	168
– Tarkwa	474	225
– Damang	94	138
– Cerro Corona	184	66
– Salares Norte	547	—
Adjusted free cash flow from operations⁴	3,171	1,149

¹ Prior to commercial levels of production being achieved, Salares Norte was a project for purposes of the adjusted free cash flow calculation.

² Does not agree to interest paid per the cash flow of US\$160 million (2024: US\$130 million) due to interest paid by the mines reflected under adjusted free cash flow from operations.

³ The Australian operations are entitled to transfer and off-set profits and losses from one company to another, therefore it is not meaningful to split the taxation and tax paid is reflected under Gold Fields Australia.

* Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2025 and 2024.

Statement of financial position

Borrowings

Total borrowings increased by 10% from US\$2,496 million at 31 December 2024 to US\$2,738 million at 31 December 2025. Net debt is defined as total borrowing plus lease liabilities less cash and cash equivalents. Net debt decreased by 31% from US\$2,086 million at 31 December 2024 to US\$1,442 million at 31 December 2025 mainly due to the increase in cash and cash equivalents as a result of the higher sales and gold price. Net debt (excluding lease liabilities) decreased by 41% from US\$1,635 million at 31 December 2024 to US\$959 million at 31 December 2025 for the same reasons discussed above.

The Group monitors capital using the ratio of net debt to adjusted EBITDA. The definition of adjusted EBITDA and net debt is defined in the Group's facilities agreements. Adjusted EBITDA is defined as profit or loss for the year adjusted for interest, taxation, amortisation and depreciation and certain other non-operating costs. The bank covenants on external borrowings require a net debt to adjusted EBITDA ratio of 3.5 or below and EBITDA to net finance charges of 4.0 or above and the ratios are measured based on amounts in United States Dollar. Net debt to adjusted EBITDA at 31 December 2025 was 0.26x (2024: 0.73x). Net finance charges to adjusted EBITDA at 31 December 2025 was 41.3x (2024: 22.4x). Refer to note 43 of the consolidated financial statements for further details including the reconciliation of profit for the year to adjusted EBITDA.

Provisions

Total provisions increased by 25% from US\$481 million in 2024 to US\$601 million in 2025 and included the following:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Provision for environmental rehabilitation costs	595	475
Silicosis settlement costs	6	5
Other provisions	—	1
Total provisions	601	481
Current portion of provision ¹	(108)	(79)
Non-current portion of provisions	493	402

¹ Current portion of provision comprises US\$105 million (2024: US\$78 million) of the current portion of the environmental rehabilitation costs and US\$3 million (2024: US\$1 million) of the current portion of the silicosis settlement costs.

Provision for environmental rehabilitation costs

The amount provided for environmental rehabilitation costs increased by 25% from US\$475 million at 31 December 2024 to US\$595 million at 31 December 2025. The increase is due to the increase in the gross base cases mainly at the Australian operations. This provision represents the present value of closure, rehabilitation and other environmental obligations at 31 December 2025. This provision is updated annually to take account of inflation, the time value of money, any new environmental obligations incurred or rehabilitation performed during the year. Refer to note 29.1 of the consolidated financial statements for inputs used in the determination of the provision.

The South African and Ghanaian operations contribute to a dedicated environmental trust fund and a dedicated bank account, respectively, to provide financing for final closure and rehabilitation costs. The amount invested in the fund is shown as a non-current asset in the financial statements and increased by 13% from US\$125 million at 31 December 2024 to US\$141 million at 31 December 2025. The increase is mainly as a result of contributions amounting to US\$10 million and interest income of US\$5 million. The South African and Ghanaian operations are required to contribute annually to the trust fund over the remaining lives of the mines, to ensure that sufficient funds are available to discharge commitments for future rehabilitation costs.

At 31 December 2025, Australia and Peru had set aside US\$119 million (2024: US\$80 million) and US\$20 million (2024: US\$20 million), respectively, for future rehabilitation costs. These comprised secured cash deposits and are included in cash and cash equivalents. The contributions in Australia and Peru are pro-active and not legally required by local legislation.

Management's discussion and analysis of the financial statements *continued*

Silicosis settlement costs provision

The Tshiamiso Trust has been established to carry out the terms of the settlement agreement reached between six gold mining companies (including Gold Fields) and claimant attorneys in the Silicosis and Tuberculosis class action. The Tshiamiso Trust is responsible for ensuring that all eligible current and former mineworkers across southern Africa with Silicosis or work-related Tuberculosis (or their dependents where the mineworker has passed away) are compensated pursuant to the Silicosis and Tuberculosis Class Action Settlement Agreement.

Gold Fields has provided for the estimated cost of the above settlement based on actuarial assessments and the provisions of the Silicosis and Tuberculosis Settlement Agreement. At 31 December 2025, the provision for Gold Fields' share of the settlement of the class action claims and related costs amounted to US\$6 million (R95 million) (2024: US\$5 million (R92 million)) of which US\$3 million (R50 million) (2024: US\$1 million (R16 million)) was classified as current and US\$3 million (R45 million) (2024: US\$4 million (R76 million)) as non-current. The nominal value of this provision is US\$7 million (R107 million) (2024: US\$6 million (R119 million)).

The assumptions that were made in the determination of the provision include silicosis prevalence rates, estimated settlement per claimant, benefit take-up rates and disease progression rates. A discount rate of 7.34% (2024: 9.02%) was used, based on government bonds with similar terms to the anticipated settlements.

The ultimate outcome of this matter however remains uncertain, with the number of eligible workers successfully submitting claims and receiving compensation being uncertain. The provision is consequently subject to adjustment in the future. Refer to notes 29.2 and 39 of the consolidated financial statements for further details.

Other long-term provisions

Other long-term provisions decreased from US\$1 million in 2024 to US\$nil in 2025.

Credit facilities

At 31 December 2025, the Group had unutilised committed banking facilities available under the following facilities, details of which are discussed in note 28:

- US\$716 million available under the US\$1,200 million revolving credit facility;
- US\$100 million available under the US\$100 million revolving credit facility;
- A\$500 million (US\$334 million) under the A\$500 million syndicated revolving credit facility;
- R500 million (US\$30 million) available under the R500 million Nedbank revolving credit facility;
- R500 million (US\$30 million) available under the new R500 million Absa Bank revolving credit facility;
- R1,000 million (US\$60 million) available under the R1,000 million Rand Merchant Bank revolving credit facility; and
- R500 million (US\$30 million) available under the R500 million Standard Bank revolving credit facility.

Substantial contractual arrangements for uncommitted borrowing facilities are maintained with several banking counterparties to meet the Group's normal contingency funding requirements.

As of the date of this report, the Group was not in default under the terms of any of its outstanding credit facilities.

Working capital

Following its going concern assessment performed, which takes into account the 2026 operational plan, net debt position and unutilised loan facilities, management believes that Gold Fields' working capital resources, by way of internal sources and banking facilities, are sufficient to fund Gold Fields' currently foreseeable future business requirements.

Off-balance sheet items

At 31 December 2025, Gold Fields had no material off-balance sheet items except as disclosed under guarantees and capital commitments.

Contractual obligations, commitments and guarantees at 31 December 2025

United States Dollar

	Payments due by period			
	Total	Within one year	Between one and five years	After five years

Environmental obligations ²	847	107	186	555
Trade and other payables	748	748	—	—
South Deep dividend	2	—	2	—
Total contractual obligations	5,615	1,306	2,770	1,539

¹ The capital amounts of the US\$500 10-year notes issue and the US\$750 million 7-year notes issue in the table above represent the principal amounts to be repaid and differ from the carrying values presented in the statement of financial position due to the unwinding of transaction costs capitalised at inception.

² Gold Fields makes full provision for all environmental obligations based on the net present value of the estimated cost of restoring the environmental disturbance that has occurred up to the reporting date. Management believes that the provisions made for environmental obligations are adequate to cover the expected volume of such obligations.

United States Dollar

	Amounts of commitments expiring by period			
	Total	Within one year	Between one and five years	After five years

Total commitments	221	221	—	—

Guarantees

Guarantees consist of numerous obligations. Guarantees consisting of US\$230 million committed to guarantee Gold Fields' environmental and other obligations with respect to its South African, Peruvian, Chilean, Ghanaian and Australian operations are fully provided for under the provision for environmental rehabilitation and certain lease liabilities and are not included in the amount above.

Management's discussion and analysis of the financial statements *continued*

Information communication and technology ("ICT")

The ICT function supports Gold Fields' business resilience as it provides the digital infrastructure that enables the Group to operate efficiently, while keeping it protected from cybersecurity breaches and related risks.

The ICT strategy, aligned with the Group's strategy, empowers the Group to operate in a safe, reliable and cost-effective way. It provides the digital foundation and technologies necessary to drive modernisation and innovation across our operations. ICT manages the full lifecycle of our technology assets while ensuring robust governance, risk management and cybersecurity compliance across all our jurisdictions. Guided by the ICT Management Committee and overseen by the Audit Committee, we are committed to securing Gold Fields' digital future and achieving our strategic goals.

Key projects in 2025	Outcomes
Digital infrastructure	
Executed Gold Fields' cloud-first strategy by migrating key systems to a secure, resilient cloud infrastructure.	Enabling the seamless flow of data across the Group, while ensuring that the necessary safeguards are in place.
AI and data analytics	
Completed several data analytics initiatives. We continue adopting data lake technology and robot process automation.	Creating solutions across the mining value chain. Leveraging advanced analytics to uncover insights and inform strategic decision-making and operational improvements.
Cybersecurity	
Strengthened security posture by implementing key initiatives in identity and access management, third-party threat management and cyberthreat detection.	Protecting information assets within Gold Fields' technology landscape.
People management platform	
Optimised the digital people platforms and extending employee experience to the entire workforce.	Delivering on the future of work and enhancing employee experience.
Information technology and operational technology	
Established unified architecture and standards to facilitate the convergence of data.	Advancing our goal of becoming an insights-driven Company.
Digital value	
Managed digital value integration while maintaining custodianship of architecture and data governance.	Ensuring ongoing value realisation from digital investments.
ICT operating model	
Repositioned and enhanced the ICT function to effectively deliver on the digital strategy.	Shifted ICT focus to strategic imperatives by partnering for capacity and identifying deployment opportunities.

Cybersecurity

Our commitment to protecting the Group's digital assets is underpinned by a comprehensive ICT Governance Framework that integrates rigorous security policies with industry-leading standards, including, NIST and the CIS Critical Security Controls, which ensure all components of our digital environment remain well-governed and resilient.

We maintain a proactive defence posture through continuous risk assessments of the adoption of cutting-edge technologies. By integrating automated controls, we achieve a unified view of our cyber ecosystem, enabling the rapid identification of threats and vulnerabilities. This technical defence is bolstered by our dedicated Security Operations Centre, which provides 24-hour monitoring and incident response.

Recognising that our digital footprint extends beyond our internal network, we employ a robust third-party risk assessment capability. This allows us to continuously monitor our digital attack surface and manage risks associated with external service providers.

To ensure business continuity, our incidence response and recovery strategies are integrated into our broader ICT business continuity plans, minimising potential disruptions. We regularly review the effectiveness of these measures through cybersecurity simulations throughout the year.

Cultivating a security-conscious culture is equally important. We provide ongoing training and awareness programmes for employees at all levels to mitigate the risk of human error. We ensure strict adherence to evolving global regulations, including the South African Protection of Personal Information Act No 4 of 2013 and the European General Data Protection Regulation, enhancing our procedures as legislation changes.

In 2025, there were no cybersecurity incidents that affected Gold Fields, including its strategy, results of operations, or financial position.

Future focus areas

- Continuing to strengthen the cybersecurity defences by adopting adaptive countermeasures to mitigate evolving risks, including AI-enabling threats and third-party supply chain vulnerabilities;
- Advancing the responsible deployment of AI, automation and machine learning across the mining value chain to enhance predictive maintenance, operational decision-making and efficiency across business workflows;
- Consolidating five legacy systems into a single SAP S/4HANA platform, standardising global transactional processes and embedding automation to reduce complexity and lower the cost of ownership;
- Integrating information and operational technology, supported by cloud infrastructure modernisation, to enable real-time, integrated data flows across all jurisdictions in alignment with the Group's cloud-first strategy; and
- Undertaking the overhaul of the Group's Governance, Risk and Compliance Framework to unify information and operational technology standards, including a strategic suspension of ISO 27001 to build a more fit-for-purpose compliance model.

Governance

The Gold Fields Board of Directors and its committees are focused on ICT and particularly cybersecurity, governance and risk management. Accordingly, governance is a critical component forming a part of the management of ICT at Gold Fields.

The Gold Fields Audit Committee mandates that the Gold Fields ICT Charter is updated and approved annually and that it articulates the ICT and cybersecurity governance mechanisms adopted within the Group. This Charter is compliant with the King IV Code of Corporate Governance and provides assurance to the Board that the ICT function is being managed efficiently and effectively and that ICT risks are adequately mitigated. The ICT governance structure which is outlined in the Charter, mandates certain responsibilities and delegations of authority applicable to ICT.

An ICT Management Committee is established to define and deliver on the ICT digital strategy as approved by the Executive Committee and the Audit Committee. The ICT management committee, headed by the Vice President: Information Communication & Technology ("VP: ICT"), responds to the direction provided by the Audit Committee and seeks approval of the goals being targeted in the long-term. The Chief Information Security Officer has over 18 years of cybersecurity experience and holds a Bachelor's degree in Cyber Forensics, Information Security & Management and a Masters in Information Security, and Cyber Security Certification from MIT and Harvard. This management committee is made up of ICT leadership from the mining assets, convenes monthly to assess the performance of ICT as well as ICT's progress in achieving the defined ICT goals and digital strategy. The management committee reports to the CFO and Audit Committee on governance, risk, cybersecurity and other strategic matters on a quarterly basis.

Internal control over financial reporting

Gold Fields' management is responsible for establishing and maintaining adequate internal control over financial reporting. The Securities Exchange Act of 1934 defines internal control over financial reporting in Rule 13a-15(f) and 15d-15(f) as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers, and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS Accounting Standards, as issued by the IASB.

It includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS Accounting Standards, as issued by the IASB, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and Directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness into future periods are subject to risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Gold Fields' management assessed the effectiveness of its internal control over financial reporting as of 31 December 2025. In making this assessment, Gold Fields' management used the criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based upon its assessment, Gold Fields' management concluded that, as of 31 December 2025, its internal control over financial reporting is effective based upon those criteria.

Gold Fields completed the Windfall Mining Inc./Groupe Minier Windfall Inc. ("Windfall Mining") acquisition on 25 October 2024. Windfall Mining has been fully integrated into the assessment of Internal Control over Financial Reporting ("ICFR") as of 31 December 2025.

Management's discussion and analysis of the financial statements *continued*

Gold Fields acquired the remaining 50% equity interest in the Gruyere mine from Gold Road Resources Limited ("Gold Road") following the Group's acquisition of all the issued and outstanding share capital of Gold Road, resulting in Gold Road becoming a wholly owned subsidiary of Gold Fields, effective 26 September 2025. Prior to the transaction, the Gruyere mine was included in management's assessment of ICFR in prior periods based on Gold Fields' level of control over the relevant financial reporting processes.

Following the change in ownership, the scope of ICFR for the Gruyere mine was expanded to reflect 100% ownership and full consolidation. Management is assessing Gold Road's control environment and integrating the controls into Gold Fields' existing control environment.

Except as described above, there were no changes to Gold Fields' ICFR during the period covered by this report that have materially affected, or are reasonably likely to materially affect, Gold Fields' internal control over financial reporting.

Outlook and guidance for 2026

Gold Fields primary focus for 2026 remains ensuring safe, reliable and cost-effective delivery against our production plans and guidance for the year, which will provide the platform for continued progress of our strategic priorities.

Attributable gold-equivalent production for 2026 is expected to be between 2.400Moz and 2.600Moz (compared to 2.438Moz delivered in 2025). AISC is expected to be between US\$1,800/oz and US\$2,000/oz and AIC is expected to be between US\$2,075/oz and US\$2,300/oz.

The exchange rates used for the 2026 guidance are: R/US\$16.00, US\$/A\$0.70 and C\$/US\$0.73. The metal price assumptions for the calculation of royalties and copper and silver by-products are: gold price US\$5,000/oz (A\$7,100/oz, R2,450,000/kg); copper price US\$9,000/t and silver price US\$65/oz.

2026 is another year in which capital expenditure levels will remain elevated, given the capital budgeted for Windfall, as well as sustaining capital expenditure across the portfolio required to maintain the production base of the Group. Total capital expenditure for the Group for the year is expected to be US\$1,900 million - US\$2,100 million in 2026. Sustaining capital expenditure is expected to be US\$1,300 million and US\$1,400 million, while non-sustaining capital expenditure is expected to be US\$240 million - US\$340 million, excluding the Windfall Project capital of US\$361 million (C\$495 million).

Guidance for 2026 remains unchanged from that provided at our Capital Markets Day in November 2025 for production. However, we have seen increases in AISC and AIC, driven primarily by the strengthening of exchange rates in Australia and South Africa as well as the impact of higher gold price on royalty payments. In comparison to the rates disclosed above, the exchange rates used at our Capital Markets Day were R/US\$18.50, US\$/A\$0.67 and C\$/US\$0.71. The metal price assumptions for the Capital Markets Day were: gold price US\$3,872/oz and silver price US\$44/oz. The Capital Markets Day also excluded non-core assets (Cerro Corona and Damang).

Alex Dall

Chief Financial Officer

30 March 2026

Independent auditor's report

To the shareholders of Gold Fields Limited

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Gold Fields Limited (the Company) and its subsidiaries (together the Group) as at 31 December 2025, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa.

What we have audited

Gold Fields Limited's consolidated financial statements set out on pages 53 to 137 comprise:

- the consolidated statement of financial position as at 31 December 2025;
- the consolidated income statement for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code), as applicable to audits of financial statements of public interest entities, and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)*.

Our audit approach

Overview

Final materiality

Overall Group materiality: US\$210 million, which represents 5% of adjusted consolidated profit before taxation

Group audit scope

Full scope audit procedures were conducted over eleven components located in Ghana, Australia, South Africa, Peru and Chile due to their financial significance to the Group. In addition, audit procedures were performed at Canada and at the Group level over various material component account balances which were not subject to full scope audits.

Key audit matters

Accounting for the acquisition of Gold Road Resources

Reversal of impairment of property, plant and equipment

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where the directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette Number 49309 dated 15 September 2023 (EAR Rule), we report final materiality and group audit scope below.

Independent auditor's report *continued*

Final materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the final materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the consolidated financial statements as a whole.

Consolidated financial statements	
Final materiality	US\$210 million
How we determined it	5% of adjusted consolidated profit before taxation
Rationale for the materiality benchmark applied	We chose consolidated profit before taxation as the most appropriate benchmark, because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users and is a generally accepted benchmark. Consolidated profit before taxation is adjusted for the impairment reversal of the South Deep cash-generating unit (note 8) and the gain on remeasurement of the 50% previously held interest in Gruyere (note 18.3). These adjustments are not considered to be part of the Group's continuing operations. We chose 5%, which is consistent with quantitative materiality thresholds used for profit-oriented companies in this sector.

Group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Components that contributed significantly to consolidated revenue, consolidated profit before taxation and consolidated total assets were subject to full scope audits. Full scope audit procedures were conducted over eleven components located in Ghana, Australia, South Africa, Peru and Chile due to their financial significance to the Group. In addition, audit procedures were performed at the Canada and at the Group level over various material component account balances which were not subject to full scope audits.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In terms of ISA 701 *Communicating key audit matters in the independent auditor's report* / the EAR Rule (as applicable), we are required to report key audit matters and the outcome of audit procedures or key observations with respect to the key audit matters, and these are included below.

Key audit matter	How our audit addressed the key audit matter
Accounting for the acquisition of Gold Road Resources ("Gold Road") Refer to note 18.3 to the consolidated financial statements (Acquisition of Gold Road). On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road for the development and operation of the Gruyere Gold Project in Western Australia. On 5 May 2025, Gold Fields entered into an agreement to acquire 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project (the "second Transaction"). On 26 September 2025 (the effective acquisition date), the previously held 50% interest in the Gruyere Gold Project was remeasured to its fair value and the resulting gain was recognised in profit or loss. The fair value of the previously held 50% interest was included as part of the total cost of the operation and recognised as a business combination together with the additional 50% interest held by Gold Road, in terms of the second Transaction. We considered the accounting for the acquisition of Gold Road to be a matter of most significance to the current year audit due to: • The complexity and judgement applied by management in correctly accounting for the transaction in respect of the acquisition date in accordance with the reporting framework; • The inherent uncertainty, significant judgements, assumptions and estimates applied by management in determining the fair values of the assets and liabilities included within the take-on balances as well as the valuation of the mineral asset; and • The magnitude of the amounts involved and their sensitivity to the significant assumptions.	Our procedures included the following: • Using our accounting technical expertise, we inspected the relevant agreements pertaining to the acquisition and evaluated management's accounting treatment with reference to the terms set out in these agreements and the applicable requirements of the reporting framework. We noted no matters requiring further consideration. • We evaluated the design, implementation and operating effectiveness of the relevant internal controls over management's process used to account for the acquisition of Gold Road. This included controls over the preparation, review and approval of the valuation of the acquisition and significant assumptions used in the calculations. • We obtained and inspected the valuations prepared by management's external valuers of the fair value of the assets and liabilities acquired and performed the following procedures: – We evaluated the objectivity, competence and capabilities of management's external valuers through inspection of curriculum vitae, membership certificates from professional bodies and competent persons reports. We further obtained an understanding of the work performed by the external valuers and evaluated the appropriateness of the conclusions reached. Based on the procedures performed, no areas requiring additional consideration were noted. – Using our corporate finance and financial modelling expertise, we reviewed and reperformed the fair value calculation of the assets acquired and the fair value of liabilities assumed, using our own independent key assumptions, to determine the reasonableness of management's valuations. We found management's fair values to be within our reasonable range of estimated values. • We benchmarked the key assumptions used by management to estimate the fair value of the assets and liabilities acquired. Management's key assumptions were benchmarked against external market and third-party data which were found to be comparable. • We assessed the Group's disclosures in respect of the acquisition, including those disclosures related to significant judgements and estimates in accordance with the prevailing accounting standards and noted no material matters for further consideration.

Independent auditor's report *continued*

Key audit matter	How our audit addressed the key audit matter
Reversal of impairment of property, plant and equipment Refer to note 1 of the accounting policies (Basis of Preparation – Significant accounting judgements and estimates), note 4.10 of the accounting policies (impairment) and note 8 to the consolidated financial statements (Reversal of impairment of assets, net of impairment). The Group reviews and tests the carrying value of property, plant and equipment for impairment or reversal of impairment annually or whenever events or changes in circumstances suggest the recoverable amount of each cash-generating unit ("CGU") may not be recoverable or when the recoverable amount exceeds the carrying value where historical impairments were recognised. For the financial year ended 31 December 2025, indicators of impairment reversal were identified for South Deep, Tarkwa and Cerro Corona and therefore an impairment reversal assessment was performed for these CGUs. For the year ended 31 December 2025, the Group recognised a reversal of impairment of US\$285.1 million (before tax) in respect of the South Deep CGU. The recoverable amount of the South Deep CGU was based on a discounted cash flow valuation applying the fair value less cost of disposal ("FVLCD") model. The reversal of impairment was as a result of higher gold prices and the stabilisation of production ramp-up at the South Deep Mine during 2025. No impairment reversal was recognised for the Tarkwa CGU due to significant uncertainties associated with the renewal of the mining leases, the proposed abolition of development agreements, and the planned increase in the gold royalty regime. Similarly, no impairment reversal was recognised for the Cerro Corona CGU due to uncertainty relating to anticipated grade and recovery outcomes from processing existing stockpiles as the operation transitions to the cessation of mining activities in 2026. We considered the reversal of impairment of property, plant and equipment to be a matter of most significance to the current year audit due to: • The significant judgement applied by management in relation to the significant assumptions used in determining the recoverable amounts of these CGUs; and • The magnitude of the impairment reversal recognised in relation to the consolidated financial statements.	Our audit addressed this key audit matter as follows: • We held discussions with management to obtain an understanding of management's process for identifying impairment reversal indicators, as well as their conclusions reached. We also obtained an understanding of management's assessment of potential impairment reversals across the various CGUs in the Group, including the methodologies and valuation models applied in determining fair value less costs of disposal. We noted no matters requiring further consideration. • We evaluated the design, implementation and operating effectiveness of the relevant internal controls over management's process used for the identification of impairment reversal indicators and their process to develop their estimates of the recoverable amounts for CGUs identified for impairment reversal testing. This included controls over the preparation, review and approval of the impairment reversal calculations and significant assumptions used in the calculations. • Management engaged external and internal experts to assess the reserves and resources declared and used in the impairment calculations for reasonability. Through inspection of curriculum vitae, membership certificates from professional bodies and competent persons reports, we assessed the objectivity, competence and experience of management's experts. Based on the procedures performed, no areas requiring additional consideration were noted. • We assessed the valuation model used by management in their impairment reversal assessment, by comparing it to industry norms and acceptable valuation methodology. We found that it was consistent with industry norms and acceptable valuation methodology. • Using our corporate finance and financial modelling expertise, we evaluated management's discounted cash flow models for the respective CGUs assessed for impairment reversal against life-of-mine plans and our understanding of the operations; and tested the key estimates and assumptions used by management in each discounted cash flow model selected for testing. Our procedures in respect of the estimates and assumptions included: – We assessed the reasonableness of management's future forecasts of annual production volumes and revenue generated, capital expenditure and operating and other costs included in the cash flow forecasts by comparing them to current and historical operational results and comparing forecasted production to the Reserves and Resources signed off by the Group's Competent Person and final approved business plans. We further performed a retrospective comparison of the forecasted cash flows to actual past performance and previous forecasts. We evaluated differences noted against relevant documentation and explanations obtained from management. We noted no matters requiring further consideration; – We benchmarked management's key assumptions relating to commodity prices, foreign exchange and inflation rates used in determining the recoverable amount against independent third-party data. We found this to be within a reasonable range of possible outcomes; – We independently calculated a range of discount rates, including the use of relevant independent third-party sources and data such as the cost of debt, risk-free rates in the market, market risk premiums, debt/equity ratios, the beta of comparable companies, as well as the impact of economic and industry factors. Our assessment of discount rates also included consideration of country and asset specific risks and challenging management to ensure that these had been appropriately captured in either the discount rate or underlying cash flow forecasts. In cases where discount rates independently determined by us differed from those used by management, we gained an understanding of the differences and assessed there to be no material impact on the outcome of the impairment reversal assessment;

Key audit matter	How our audit addressed the key audit matter
	– Using the assumptions tested above, we recalculated the results of management's discounted cash flow models by using independently obtained key input assumptions such as commodity prices, exchange rates and market discount rates and determined a reasonable range of possible outcomes. We assessed the appropriateness of management's assumptions and performed independent sensitivity/ scenario analyses to evaluate how changes in key inputs would affect the valuation. We found management's final recoverable amounts to be within a reasonable range of possible outcomes; and – We also assessed whether the disclosures regarding sensitivities and estimation uncertainty were appropriate and complete. We noted no aspects in this regard requiring further consideration. • In respect of the Tarkwa CGU, we conducted independent research on the Ghana mining sector which included the review of news articles, web searches and discussions with local and Group management. We noted that the Government of Ghana is proposing significant reforms to the Mining industry, including the reduction in mining lease terms, increased royalty rates and the abolition of development agreements, and evaluated how management had considered these within the future forecasts. We noted no matters requiring further consideration. • We recalculated the maximum reversal limit for each of the CGU's for which impairment losses had previously been recognised, in line with IFRS Accounting Standards. We noted no aspects in this regard requiring further consideration. • We evaluated the disclosures included within the notes to the consolidated financial statements against the requirements of IFRS Accounting Standards and noted no material matters for further consideration.

Other information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Gold Fields Limited Annual Financial Report 2025", which includes the Directors' Report, the Audit Committee Report and the Company Secretary's Certificate as required by the Companies Act of South Africa, and the document titled "Gold Fields Limited Sustainability Report 2025", "Gold Fields Limited Mineral Resources and Mineral Reserves Supplement to the Integrated Annual Report 2025", "Gold Fields Limited Integrated Annual Report 2025" and "Gold Fields Limited Tax Transparency Report 2025", which we obtained prior to the date of this auditor's report, and the document titled "Gold Fields Limited ESG Databook 2025", which is expected to be made available to us after that date. The other information does not include the consolidated or the separate financial statements and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the consolidated financial statements

The directors are responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Independent auditor's report *continued*

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Audit tenure

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that PricewaterhouseCoopers Inc. has been the auditor of Gold Fields Limited for seven years.

PricewaterhouseCoopers Inc

PricewaterhouseCoopers Inc.

Director: CS Masondo

Registered Auditor
Johannesburg, South Africa

30 March 2026

Accounting policies

The material accounting policies applied in the preparation of these financial statements (referred to as the “consolidated financial statements” or “financial statements”) are set out below. These policies have been consistently applied to all the years presented, except for the adoption of new and revised standards and interpretations or unless otherwise indicated.

Gold Fields Limited (the “Company” or “Gold Fields”) is a company domiciled in South Africa. The registration number of the Company is 1968/4880/6. The address of the Company is 150 Helen Road, Sandton, Johannesburg. The consolidated financial statements of the Company as at 31 December 2025 and 2024 and for each of the years in the three-year periods ended 31 December 2025, 2024 and 2023 comprise the Company and its subsidiaries (together referred to as the “Group” and individually as “Group entities”) as well as the Group’s share of the assets, liabilities, income and expenses of its joint operations and the Group’s interest in associates and its joint ventures. The Group is primarily involved in gold mining.

1. Basis of preparation

The financial statements of the Group have been prepared in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board (“IASB”), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements and the requirements of the South African Companies Act.

The consolidated financial statements were authorised for issue by the Board of Directors on 30 March 2026.

Standards, interpretations and amendments to published standards effective for the year ended 31 December 2025 or early adopted by the Group

During the financial year, the following new and revised accounting standards, amendments to standards and new interpretations were adopted by the Group:

<i>Standard(s) Amendment(s) Interpretation(s)</i>	<i>Nature of the change</i>	<i>Salient features of the changes</i>	<i>Impact on financial position or performance</i>
IAS 21 <i>The Effect of Changes in Foreign Exchange Rates</i>	Amendment	- The amendment to IAS 21 provides guidance on when a currency is exchangeable and how to determine the exchange rate when it is not; and - The amendment did not have an impact on the Group, due to the fact that the Group does not have currencies that are not exchangeable.	No impact

Standards, interpretations and amendments to published standards that are not yet effective

Certain new standards, amendments and interpretations to existing standards have been published that apply to the Group’s accounting periods beginning on 1 January 2026 or later periods but have not been early adopted by the Group.

These standards, amendments and interpretations that are relevant to the Group are:

<i>Standard(s) Amendment(s) Interpretation(s)</i>	<i>Nature of the change</i>	<i>Salient features of the changes</i>	<i>Effective date*</i>
IFRS 9 <i>Financial Instruments and</i> IFRS 7 <i>Financial Instruments: Disclosures</i>	Amendments	- The amendments provide the following guidance: - Clarify the requirements for the timing of recognition and derecognition of financial assets and liabilities, with an exception for financial liabilities settled through an electronic cash transfer system; - Clarify and add guidance for assessing whether a financial asset meets the solely payments of principal and interest criterion; - Additional disclosures for instruments with contractual terms that can change cash flows (instruments linked to the achievement of environmental, social and governance (“ESG”) targets); and - Additional disclosures for equity instruments designated at fair value through other comprehensive income. - The Group is currently in the process of assessing the impact of these amendments.	1 January 2026

Accounting policies *continued*

Standards, interpretations and amendments to published standards that are not yet effective continued

Standard(s) Amendment(s) Interpretation(s)	Nature of the change	Salient features of the changes	Effective date*
<i>Annual Improvements</i>	Amendments	- The following improvements were finalised and are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in the Accounting Standards: – IFRS 1 First-time Adoption of International Financial Reporting Standards; – IFRS 7 Financial Instruments: Disclosures; – IFRS 9 Financial Instruments; – IFRS 10 Consolidated Financial Statements; and – IAS 7 Statement of Cash Flows. - The amendments will not have an impact on the Group.	1 January 2026
IFRS 18 <i>Presentation and Disclosure in Financial Statements</i>	New Standard	- IFRS 18 replaces IAS1 Presentation of Financial Statements; - The following major updates are introduced by the new standard: – Classification of all income and expenses in the Income Statement into three defined categories: operating, investing and financing; – Requires companies to present specific subtotals in the Income Statement; – Introduces new requirements for disclosure of management-defined performance measures in the financial statements; and – Enhanced principles on the aggregation and disaggregation of financial statement items. - The Group is currently in the process of assessing the impact	1 January 2027
IFRS 19 <i>Subsidiaries without Public Accountability</i>	New Standard	- IFRS 19 is a voluntary accounting standard with the objective to provide reduced disclosure requirements for eligible subsidiaries. - The new standard will not have an impact on the Group's consolidated financial statements.	1 January 2027
IAS 21 <i>Effects of Changes in Foreign Exchange Rates</i>	Amendments	- The amendments specify the translation procedures for an entity whose presentation currency is that of a hyperinflationary economy. - The amendments will not have an impact on the Group.	1 January 2027

* Effective date refers to annual period beginning on or after said date.

Significant accounting judgements and estimates

Use of estimates: The preparation of the financial statements in accordance with IFRS Accounting Standards requires the Group's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgement based on various assumptions and other factors such as historical experience, current and expected economic conditions, and in some cases actuarial techniques. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to the following:

- Mineral reserves and resources estimates (this forms the basis of future cash flow estimates used for impairment assessments and units-of-production depreciation and amortisation calculations);
- Carrying value of property, plant and equipment;
- Business combinations and asset acquisitions;
- Commencement of commercial levels of production;
- Estimates of recoverable gold and other materials in heap leach and stockpiles, gold in process and product inventories including write-downs of inventory to net realisable value;
- Provision for environmental rehabilitation costs;
- Income taxes;
- Share-based payments; and
- Contingencies.

Estimates and judgements are continually evaluated and are based on historical experience, discount rates and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial year are discussed below.

Mineral Reserves and Resources estimates

Mineral Reserves are estimates of the amount of product, inclusive of diluting materials and allowances for losses, which can be economically and legally extracted from the Group's properties, as determined by life-of-mine schedules or pre-feasibility studies.

Mineral Resources are estimates, based on specific geological evidence and knowledge, including sampling, of the amount of product in situ, for which there is a reasonable prospect for eventual legal and economic extraction.

In order to calculate the reserves and resources, estimates and assumptions are required about a range of geological, technical and economic factors, including but not limited to quantities, grades, production techniques, recovery rates, production costs, capital expenditure, transport costs, commodity demand, commodity prices and exchange rates.

Estimating the quantity and grade of the mineral reserves and resources is based on exploration and sampling information gathered through appropriate techniques (primarily diamond drilling, reverse circulation drilling, air-core and sonic drilling), surface three-dimensional reflection seismics, ore body faces modelling, structural modelling, geological mapping, detailed ore zone wireframes and geostatistical estimation. This process may require complex and difficult geological judgements and calculations to interpret the data.

The Group is required to determine and report on the Mineral Reserves and Resources in accordance with the South African Mineral Resource Committee ("SAMREC") code and the United States Security and Exchange Commission Rule SK 1300 on an annual basis. The Mineral Reserves and Resources were approved by the Competent Person.

Estimates of Mineral Reserves and Resources may change from year to year due to the change in economic, regulatory, infrastructural or social assumptions used to estimate ore reserves and resources, and due to additional geological data becoming available.

Changes in reported proved and probable reserves may affect the Group's financial results and position in a number of ways, including the following:

- The recoverable amount used in the impairment calculations may be affected due to changes in estimated cash flows or timing thereof (refer to note 8);
- Amortisation and depreciation charges to profit or loss may change as these are calculated on the units-of-production method, or where the useful economic lives of assets change (refer to note 2);
- Provision for environmental rehabilitation costs may change where changes in ore reserves affect expectations about the timing or cost of these activities (refer to note 29.1); and
- The carrying value of deferred tax assets may change due to changes in estimates of the likely recovery of the tax benefits (refer to note 27).

Changes in reported measured and indicated resources may affect the Group's financial results and position in a number of ways, including the following:

- The recoverable amount used in the impairment calculations may be affected due to changes in estimated market value of resources exclusive of reserves (refer to note 8); and
- Amortisation and depreciation charges for the mineral rights asset at the Australian operations may change as a result of the change in the portion of mineral rights asset being transferred from the non-depreciable component to the depreciable component (refer to note 2).

Carrying value of property, plant and equipment

All mining assets are amortised using the units-of-production method where the mine operating plan calls for production from proved and probable mineral reserves.

Mobile and other equipment are depreciated over the shorter of the estimated useful life of the asset or the estimate of mine life based on proved and probable mineral reserves.

The calculation of the units-of-production rate of amortisation could be impacted to the extent that actual production in the future is different from current forecast production based on proved and probable mineral reserves. This would generally result from the extent that there are significant changes in any of the factors or assumptions used in estimating mineral reserves. These factors could include:

- Changes in proved and probable mineral reserves;
- Unforeseen operational issues at mine sites;
- Changes in capital, operating, mining, processing and reclamation costs, discount rates and foreign currency exchange rates; and
- Changes in mineral reserves could similarly impact the useful lives of assets depreciated on a straight-line basis, where those lives are limited to the life of the mine.

Accounting policies *continued*

1. Basis of preparation *continued*

The Group reviews and tests the carrying value of long-lived assets when events or changes in circumstances suggest that the carrying amount may not be recoverable by comparing the recoverable amounts to these carrying values. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment or reversal of impairment may have occurred, estimates are prepared of recoverable amounts of each group of assets. The recoverable amounts of cash-generating units ("CGU") and individual assets have been determined based on the higher of value in use and fair value less cost of disposal ("FVLCD") calculations. Expected future cash flows used to determine the value in use or FVLCD of property, plant and equipment are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including reserves and production estimates, together with economic factors such as the gold, silver and copper prices, discount rates, foreign currency exchange rates, inflation rates, resource valuations (determined based on comparable market transactions), estimates of costs to produce reserves, future capital expenditure and stockpile grade and recoveries (Peru).

The Group used FVLCD to determine the recoverable amount of each CGU.

Significant assumptions used in the Group's impairment assessments (FVLCD calculations) include:

	2025	2024	2023
US\$ Gold price per ounce – year 1	US\$4,060	US\$2,590	US\$1,910

A\$/US\$ – year 5 onwards	0.71	0.69	0.71

¹ In line with the 2024 ramp-up plan limiting production to 11tpa of gold, resulting in an increase of the life-of mine.

² In November 2025, Gold Fields published an out-of-cycle Mineral Resources and Mineral Reserves declaration for Tarkwa. In this declaration, managed Mineral Reserves increased to 7.4 million ounces from 4.3 million ounces in the 2024 declaration and managed Mineral Resources (inclusive of Reserves) increased to 11.2 million ounces, from 8.9 million ounces. The approximately 70% increase in attributable Reserves was driven by a higher Reserve gold price of known Mineral Resources, together with the removal of key operational constraints. The updated declaration is based on the assumption that the mining lease will be renewed. Refer note 8 for further details.

³ During 2025, Gold Fields worked closely with the Government of Ghana to develop a transition plan for the Damang mine. Damang will qualify as an abandoned asset and will be classified as a discontinued operation from mid-April 2026, when the 12-month lease extension comes to an end, at which point Gold Fields will transfer ownership of the mine to the Government of Ghana.

Management performed an assessment for impairment triggers, as well as indicators for reversal of previously recorded impairment losses at 31 December 2025. Where CGUs had previously been impaired, management considered whether the impairment losses no longer exist or might have decreased.

At 31 December 2025, the Group reversed an impairment of US\$285.1 million (R4,721.9 million) in respect of property, plant and equipment relating to the South Deep CGU as a result of significantly higher gold prices and the stabilisation of the ramp-up at the South Deep mine during 2025. The impairment reversal was limited to what the carrying amounts of the CGU would have been at 31 December 2025 had the assets not been impaired. There were no reversals of impairment in 2024 or 2023.

Management considered general and specific factors for the Tarkwa and Cerro Corona CGU and concluded that although overall the gold price had improved from the time that the impairment losses had been recognised, taking into consideration the specific circumstances of each asset (including those that led to the original impairment losses), the impairment losses had not reversed. Management resolved it to be appropriate for no reversal of previously recognised impairment losses to be recorded for the Tarkwa and Peru CGU at 31 December 2025.

Cerro Corona

Cerro Corona stopped mining in 2025 and the site will process only stockpiles for the remainder of its life-of-mine. There is uncertainty about whether declared stockpile grade and recovery will meet expectations, which can only be confirmed during processing.

Due to this uncertainty, management has run a number of sensitivity analyses to assess potential reductions in the actual grade achieved between 2.5% and 10.% and lower recoveries achieved between 1% to 4% from processing the long-term low-grade stockpiles. The different scenarios resulted in a range of outcomes reasonably supporting the conclusion in terms of IAS 36 Impairment of Assets that the underlying reasons for the original impairment have not been removed nor has the service potential of the asset increased. As a result, management concluded that no impairment reversal should be recorded.

Tarkwa

At Tarkwa, five of Gold Fields' six mining leases and its existing Development Agreement ("DA") are due to expire in April 2027. Consistent with the agreement reached with the Government of Ghana in April 2025 in respect of the Damang mining lease, Gold Fields submitted in November 2025, an application for the renewal of the Tarkwa mining leases, together with supporting technical reports, in accordance with applicable law. Negotiations on the Tarkwa lease renewals are taking place in an environment where the Government of Ghana is reviewing mining legislation and fiscal dispensation for mining in the country.

Accounting policies *continued*

1. Basis of preparation *continued*

In December 2025, the Government of Ghana tabled a Legislative Instrument ("LI") in Parliament to effect new regulations which introduce new royalty rates in Ghana for gold and other minerals (except Lithium). The LI was approved effective 10 March 2026 with a royalty range of 5% to 12% on a sliding scale, depending on global gold prices. As a measure of relief, The Government of Ghana has agreed to reduce the Growth and Sustainability Levy on the mining sector back to 1% from 3% previously applicable. Gold Fields has a Development Agreement (DA), which provides a range of fiscal concessions and includes key stabilising provisions in relation to taxes, royalties and other matters. However, the DA protects Tarkwa from these royalty changes until April 2027.

Gold Fields is seeking to progress its ongoing discussions with representatives of the Government of Ghana regarding the proposed extension of the Tarkwa mining leases and related fiscal terms, including the extension of the DA. However, no agreement has been reached yet and there is no assurance that an agreement will be concluded and the terms of any renewal are uncertain.

Due to this uncertainty, management has run a number of sensitivity analyses to assess potential outcomes of the negotiations with the Government of Ghana, including changes to royalty rates, discount rates, shorter lease periods and a scenario where the mining lease is not renewed. The different scenarios resulted in a range of outcomes reasonably supporting the conclusion in terms of IAS 36 Impairment of Assets that the underlying reasons for the original impairment have not been removed nor has the service potential of the asset increased. As a result, management concluded that no impairment or reversal of impairment should be recorded.

The FVLCO calculations are sensitive to the gold and copper price assumptions and an increase or decrease in the gold or copper price could materially change the FVLCO. Should there be a significant decrease in the gold or copper price, the Group would take actions to assess the implications on the life-of-mine plans, including the determination of reserves and resources and the appropriate cost structure for the CGUs. Refer to notes 8 and 17 for further details.

The carrying amount of property, plant and equipment at 31 December 2025 was US\$11,336.8 million (2024: US\$7,298.4 million).

Business combinations and asset acquisitions

The acquisition method of accounting is used to account for business combinations by the Group. If a transaction does not meet the definition of a business under IFRS Accounting Standards, the transaction is recorded as an asset acquisition.

Acquisition of Osisko Mining Incorporated

On 2 May 2023, Gold Fields acquired a 50% interest in the Windfall Project from Osisko. On 25 October 2024, Gold Fields acquired 100% of the issued share capital of Osisko. This represents a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project. Refer note 18.2 for further details.

The only significant asset acquired in Osisko is the additional 50% interest in the Windfall Project. As part of the acquisition, Gold Fields did not acquire sufficient infrastructure or processes, including an organised workforce, which could develop the acquired inputs into an operating mine. Accordingly, the transaction was accounted for as an asset acquisition. The Group elected to recognise the previously held 50% interest in the Windfall Project at its carrying value as part of the total cost of the asset acquisition.

For asset acquisitions, the total consideration paid at acquisition date is allocated based on relative fair values to the identifiable assets acquired and liabilities assumed. Expected future cash flows have been used to determine the fair value at acquisition date and are inherently uncertain. They are significantly affected by a number of factors including reserves, production start date estimates, together with economic factors such as the gold price, discount rates, foreign currency exchange rates, resource valuations (determined based on comparable market transactions), estimates of costs to produce reserves and future capital expenditure.

The key assumptions used for measurement of the fair values of Osisko's assets acquired and liabilities assumed were as follows:

	25 October 2024
C\$ Gold price per ounce – year 1	C\$3,067
C\$ Gold price per ounce – year 2	C\$3,004
C\$ Gold price per ounce – year 3 onwards	C\$2,760
Discount rates – real	7.9 %
Life-of-mine	15 years
Resource value per ounce (used to calculate the value beyond proved and probable reserves)	US\$37
Long-term exchange rates	
C\$/US\$ – years 1 and 2	0.75
C\$/US\$ – year 3 onwards	0.76

Acquisition of Gold Road

On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road Resources Limited ("Gold Road").

On 5 May 2025, Gold Fields entered into an agreement to acquire 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project. Refer note 18.3 for further details.

When a joint operation is acquired through stages that results in control of an entity that is a business, the transaction is treated as a business combination achieved in stages. Expected future cash flows have been used to determine the fair value at acquisition date and are inherently uncertain. They are significantly affected by a number of factors including reserves, together with economic factors such as the gold price, discount rates, foreign currency exchange rates, resource valuations (determined based on comparable market transactions), estimates of costs to produce reserves and future capital expenditure.

The key assumptions used for measurement of the fair values of assets acquired and liabilities assumed and the previously held 50% interest were as follows:

26 September 2025	
A\$ Gold price per ounce – year 1	A\$4,619
A\$ Gold price per ounce – year 2	A\$4,960
A\$ Gold price per ounce – year 3	A\$4,494
A\$ Gold price per ounce – year 4	A\$4,117
A\$ Gold price per ounce – year 5 onwards	A\$3,675
Discount rates – real	6.8 %
Life-of-mine	9 years
Resource value per ounce (used to calculate the value beyond proved and probable reserves)	US\$106.7
Long-term exchange rates	
A\$/US\$ – years 1	0.70
A\$/US\$ – years 2	0.67
A\$/US\$ – years 3	0.70
A\$/US\$ – year 4 onwards	0.72

Commencement of commercial levels of production

The Group assesses the stage of each mine construction project to determine when a mine moves into the production stage. The criteria used to assess the start date are determined based on the unique nature of each mine construction project. The Group considers various relevant criteria to assess when the mine is substantially complete, ready for its intended use and moves into the production stage. Some of the criteria would include, but are not limited to the following:

- The level of capital expenditure compared to the construction cost estimates;
- Ability to produce metal in saleable form (within specifications); and
- Ability to sustain commercial levels of production of metal based on plant throughput and recoveries.

When a mine construction project moves into the production stage, the capitalisation of certain mine construction costs ceases and costs are either regarded as inventory or expensed, except for capitalisable costs related to mining asset additions or improvements, underground mine development, deferred stripping activities or ore reserve development.

Gold may be produced while bringing a mine to the condition necessary for it to be capable of operating as intended by management. The Group recognises the proceeds from selling gold as revenue and the associated production cost as cost of sales in profit or loss. The Group measures the cost of gold produced applying the measurement requirements of IAS 2 at normalised production levels using the life-of-mine planned production. Production costs in excess of normal production up to reaching commercial levels of production are capitalised as property, plant and equipment.

Salares Norte reached commercial levels of production on 31 August 2025.

Stockpiles, gold in process and product inventories

Costs that are incurred in or benefit the productive process are accumulated as stockpiles, gold in process, ore on leach pads and product inventories. Net realisable value tests are performed on a monthly basis for short-term stockpiles, gold in process and product inventories and represent the estimated future sales price of the product based on prevailing spot metals prices at the reporting date, less estimated costs to complete production and bring the product to sale.

Net realisable value tests are performed annually for long-term stockpiles and represent the estimated future sales price of the product based on long-term metal prices at the reporting date, less estimated costs to complete production and bring the product to sale on a discounted basis. Refer pages 56 to 57 for long-term gold prices and below for the discount rates:

Discount rates	2025	2024
Ghana	6.6 %	7.1 %
Peru	5.8 %	6.5 %
Chile	5.9 %	7.2 %

Accounting policies *continued*

1. Basis of preparation *continued*

Stockpiles, gold in process and product inventories *continued*

Stockpiles are measured by estimating the number of tonnes added and removed from the stockpile, the number of contained gold ounces based on assay data, and the estimated recovery percentage based on the expected processing method. Stockpile tonnages are verified by periodic surveys.

Although the quantities of recoverable metal are reconciled by comparing the grades of ore to the quantities of metals actually recovered (metallurgical balancing), the nature of the process inherently limits the ability to precisely monitor the recoverability levels. As a result, the metallurgical balancing process is constantly monitored and engineering estimates are refined based on actual results over time.

Variations between actual and estimated quantities resulting from changes in assumptions and estimates that do not result in write downs to net realisable value are accounted for on a prospective basis.

The carrying amount of total gold in process and stockpiles (non-current and current) at 31 December 2025 was US\$845.2 million (2024: US\$791.0 million). Refer to notes 2 and 23 for further details.

Provision for environmental rehabilitation costs

The Group's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. The Group recognises management's best estimate for the provision of environmental rehabilitation costs in the period in which they are incurred. Actual costs incurred in future periods could differ materially from the estimates. Additionally, future changes to environmental laws and regulations, life-of-mine estimates, inflation rates and discount rates could affect the carrying amount of this provision.

Refer to note 29.1 for details of key assumptions used to estimate the provision.

The carrying amounts of the provision for environmental rehabilitation costs at 31 December 2025 was US\$594.5 million (2024: US\$475.5 million) of which US\$105.3 million (2024: US\$78.4 million) was classified as current and US\$489.2 million (2024: US\$397.1 million) as non-current.

Income taxes

The Group is subject to income taxes in numerous jurisdictions. Significant judgement is required in determining the liability for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact income tax and deferred tax in the period in which such determination is made. Refer note 11 for further details.

The Group recognises the future tax benefits related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the Group to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Group to realise the net deferred tax assets recorded at the reporting date could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the Group operates could limit the ability of the Group to obtain tax deductions in future periods.

Carrying values at 31 December 2025:

- Deferred taxation liability: US\$1,401.7 million (2024: US\$503.8 million);
- Deferred taxation asset: US\$38.2 million (2024: US\$154.9 million);
- Taxation payable: US\$311.5 million (2024: US\$112.4 million); and
- Taxation receivable: US\$73.4 million (2024: US\$75.8 million).

Refer to notes 27 and 35 for further details and note 11 for details of unrecognised deferred tax assets.

Share-based payments

The Group issues equity-settled share-based payments to Executive Directors, certain officers and employees. The fair value of these instruments is measured at grant date, using the Monte Carlo simulation valuation models, which require assumptions regarding the estimated term of the option, share price volatility and expected dividend yield. While Gold Fields' management believes that these assumptions are appropriate, the use of different assumptions could have an impact on the fair value of the option granted and the related recognition of the share-based payments expense in the consolidated income statement. Gold Fields' options have characteristics significantly different from those of traded options and therefore fair values may also differ.

Refer to note 6 for further details.

The income statement charge for the year ended 31 December 2025 was US\$25.4 million (2024: US\$4.4 million and 2023: US\$9.1 million).

Contingencies

By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of such contingencies inherently involves the exercise of significant judgement and estimates of the outcome of future events. Such contingencies include, but are not limited to, environmental obligations, litigation, regulatory proceedings, tax matters and losses resulting from other events and developments.

When a loss is considered probable and reasonably estimable, a liability is recorded based on the best estimate of the ultimate loss. The likelihood of a loss with respect to a contingency can be difficult to predict and determining a meaningful estimate of the loss or a range of losses may not always be practicable based on the information available at the time and the potential effect of future events and decisions by third parties that will determine the ultimate resolution of the contingency. It is not uncommon for such matters to be resolved over many years, during which time relevant developments and new information is continuously evaluated to determine both the likelihood of any potential loss and whether it is possible to reasonably estimate a range of possible losses. When a loss is probable but a reasonable estimate cannot be made, disclosure is provided.

Refer to note 39 for details on contingent liabilities.

2. Consolidation

2.1 Business combinations

The acquisition method of accounting is used to account for business combinations by the Group. The consideration transferred for the acquisition of a business is the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred, other than those associated with the issue of debt or equity securities. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets. Subsequently, the carrying amount of non-controlling interest is the amount of the interest at initial recognition plus the non-controlling interest's share of the subsequent changes in equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in profit or loss.

If a transaction does not meet the definition of a business under IFRS Accounting Standards, the transaction is recorded as an asset acquisition. Accordingly, the total consideration paid at acquisition date is allocated based on relative fair values to the identifiable assets acquired and liabilities assumed. Acquisition-related costs are included in the consideration paid and capitalised. Any contingent consideration payable that is dependent on the purchaser's future activity is not included in the consideration paid until the activity requiring the payment is performed. Any resulting future amounts payable are recognised in profit or loss when incurred. No goodwill and no deferred tax asset or liability arising from the assets acquired and liabilities assumed are recognised upon the acquisition of assets.

When an equity-accounted investment is acquired in stages and results in control of an entity that is not a business, the previously held interest is recognised at its carrying amount as part of the total cost of acquisition.

2.2 Subsidiaries

Subsidiaries are all entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group until the date on which control ceases.

Inter-company transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

2.3 Transactions with non-controlling interests

The Group treats transactions with non-controlling interests that do not result in loss of control as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

Accounting policies *continued*

2. Consolidation *continued*

2.4 Equity-accounted investees

The Group's interests in equity-accounted investees comprise interests in associates and joint ventures.

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies. Joint ventures are arrangements in which the Group has joint control, whereby the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Interests in associates and joint ventures are accounted for using the equity method. They are recognised initially at cost, which includes transaction costs and an estimate of any contingent and other considerations. Subsequent to initial recognition and until the date on which significant influence or joint control ceases, the consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of equity-accounted investees, as well as changes in the contingent and other considerations.

Results of associates and joint ventures are equity-accounted using the results of their most recent financial information. Any losses from associates or joint ventures are brought to account in the consolidated financial statements until the interest in such associates or joint ventures is written down to zero. Thereafter, losses are accounted for only insofar as the Group is committed to providing financial support to such associates or joint ventures.

The carrying value of an investment in associate and joint ventures represents the cost of the investment, including goodwill where relevant, a share of the post-acquisition retained earnings and losses, any other movements in reserves, any accumulated impairment losses, changes in value of the contingent and other considerations and other adjustments to align with Gold Fields accounting policies. The Group applies IFRS 9 to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture but to which the equity method is not applied. The carrying value is assessed annually for existence of indicators of impairment and if such exist, the carrying amount is compared to the recoverable amount, being the higher of value in use or fair value less cost of disposal. If an impairment/reversal of impairment has occurred, it is recognised in profit or loss in the period in which the impairment/reversal of impairment arose.

2.5 Joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the use of assets and obligations for the liabilities of the arrangement. The Group accounts for activities under joint operations by recognising in relation to the joint operation, the assets it controls and the liabilities it incurs, the expenses it incurs and the revenue from the sale or use of its share of the joint operations' output.

3. Foreign currencies

3.1 Functional and presentation currency

Items included in the financial statements of each of the Group entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in US Dollar, which is the Group's presentation currency. The functional currency of the parent company is South African Rand.

3.2 Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in profit or loss.

3.3 Foreign operations

The results and financial position of all the Group entities (none of which has the functional currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

Assets and liabilities are translated at the exchange rate ruling at the reporting date (ZAR/US\$: 16.56; US\$/A\$: 0.67; US\$/C\$: 0.73 (2024: ZAR/US\$: 18.84; US\$/A\$: 0.62; US\$/C\$: 0.70 and 2023: ZAR/US\$: 18.30; US\$/A\$: 0.68; US\$/C\$: 0.75)). Equity items are translated at historical rates. The income and expenses are translated at the average exchange rate for the year (ZAR/US\$: 17.88; US\$/A\$: 0.64; US\$/C\$: 0.72 (2024: ZAR/US\$: 18.33; US\$/A\$: 0.66; US\$/C\$: 0.73 and 2023: ZAR/US\$: 18.45; US\$/A\$: 0.66; US\$/C\$: 0.74)), unless this average was not a reasonable approximation of the rates prevailing on the transaction dates, in which case these items were translated at the rate prevailing on the date of the transaction. Exchange differences on translation are accounted for in other comprehensive income. These differences will be recognised in profit or loss upon realisation of the underlying operation.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations (i.e. the reporting entity's interest in the net assets of that operation), and of borrowings and other currency instruments designated as hedges of such investments, are taken to other comprehensive income. When a foreign operation is sold, exchange differences that were recorded in other comprehensive income are recognised in profit or loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is re-attributed to non-controlling interests. When the Group disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and are translated at each reporting date at the closing rate.

4. Property, plant and equipment

4.1 Mine development and infrastructure

Mining assets, including mine development and infrastructure costs and mine plant facilities, are recorded at cost less accumulated depreciation and accumulated impairment losses.

Expenditure incurred to evaluate and develop new orebodies, to define mineralisation in existing orebodies and to establish or expand productive capacity, is capitalised until commercial levels of production are achieved, at which time the costs are amortised as set out below.

Development of orebodies includes the development of shaft systems and waste rock removal that allows access to reserves that are economically recoverable in the future. Subsequent to this, costs are capitalised if the criteria for recognition as an asset are met.

4.2 Borrowing costs

Borrowing costs incurred in respect of assets requiring a substantial period of time to prepare for their intended future use are capitalised to the date that the assets are substantially completed.

Borrowing costs capitalised are included in finance expense and adjusted for in cash generated from operating activities in the statement of cash flows.

4.3 Mineral and surface rights

Mineral and surface rights are recorded at cost less accumulated amortisation and accumulated impairment losses. When there is little likelihood of a mineral right being exploited, or the recoverable amount of mineral rights has diminished below cost, an impairment loss is recognised in profit or loss in the year that such determination is made.

4.4 Land

Land is shown at cost less accumulated impairment losses and is not depreciated.

4.5 Other assets

Non-mining assets are recorded at cost less accumulated depreciation and accumulated impairment losses. These assets include the assets of the mining operations not included in mine development and infrastructure, capitalised borrowing costs, mineral and surface rights and land and all the assets of the non-mining operations.

4.6 Amortisation and depreciation of mining assets

Amortisation and depreciation is determined to give a fair and systematic charge to profit or loss taking into account the nature of a particular ore body and the method of mining that ore body. To achieve this, the following calculation methods are used:

- Mining assets, including mine development and infrastructure costs, mine plant facilities and evaluation costs, are amortised over the life of the mine using the units-of-production method, based on estimated proved and probable ore reserves;
- Stripping activity assets are amortised on a units-of-production method, based on the estimated proved and probable ore reserves of the ore body to which the assets relate; and
- The mineral rights asset at the Australian operations are divided at the respective operations into a depreciable and a non-depreciable component. The mineral rights asset is initially capitalised to the mineral rights asset as a non-depreciable component.

Subsequently, and on an annual basis, as part of the preparation of the updated reserve and resource statement and preparation of the updated life-of-mine plan, a portion of resources will typically be converted to reserves as a result of ongoing resource definition drilling, resultant geological model updates and subsequent mine planning. Based on this conversion of resources to reserves a portion of the historic cost is allocated from the non-depreciable component of the mineral rights asset to the depreciable component of the mineral rights asset. Therefore, the category of non-depreciable mineral rights asset is expected to reduce and will eventually be fully allocated within the depreciable component of the mineral rights asset.

Each operation typically comprises a number of mines and the depreciable component of the mineral rights asset is therefore allocated on a mine-by-mine basis at the operation and is transferred at this point to mine development and infrastructure and is then amortised over the estimated proved and probable ore reserves of the respective mine on the units-of-production method. The remaining non-depreciable component of the mineral rights asset is not amortised but, in combination with the depreciable component of the mineral rights asset and other assets included in the CGU, is evaluated for impairment when events and changes in circumstances indicate that the carrying amount may not be recoverable.

Proved and probable ore reserves reflect estimated quantities of economically recoverable reserves, which can be recovered in future from known mineral deposits.

Certain mining plant and equipment included in mine development and infrastructure is depreciated on a straight-line basis over the lesser of their estimated useful lives or life-of-mine.

Accounting policies *continued*

4. Property, plant and equipment *continued*

4.7 Depreciation of non-mining assets

Non-mining assets are recorded at cost and depreciated on a straight-line basis over their current expected useful lives to their residual values. The assets' useful lives, depreciation methods and residual values are reassessed at each reporting date and adjusted if appropriate.

4.8 Depreciation of right-of-use assets

The right-of-use assets are depreciated over the shorter of the lease term and the useful life of the right-of-use asset, using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use assets are depreciated over the useful life of the underlying asset. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

4.9 Mining exploration

Expenditure on advances solely for exploration activities is charged against profit or loss until the viability of the mining venture has been proven. Expenditure incurred on exploration "farm-in" projects is written off until an ownership interest has vested. Exploration expenditure to define mineralisation at existing ore bodies is considered mine development costs and is capitalised until commercial levels of production are achieved.

Exploration activities at certain of the Group's non-South African operations are broken down into defined areas within the mining lease boundaries. These areas are generally defined by structural and geological continuity. Exploration costs in these areas are capitalised to the extent that specific exploration programmes on existing ore bodies have yielded targets and/or results that warrant further exploration in future years.

4.10 Impairment

Recoverability of the carrying values of long-term assets or CGUs of the Group are reviewed annually or whenever events or changes in circumstances indicate that such carrying values may not be recoverable. To determine whether a long-term asset or CGU may be impaired, the higher of "value in use" (defined as: "the present value of future cash flows expected to be derived from an asset or CGU") or "fair value less costs of disposal" (defined as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date") is compared to the carrying value of the asset/CGU. Impairment losses are recognised in profit or loss.

Previously recognised impairment losses are reversed when estimates change as a result of events occurring after the impairment was recognised. Impairment losses are reversed only to the extent that long-term assets or CGUs carrying amounts do not exceed the carrying amounts that would have been determined had no impairment been recognised. Reversals of previously recognised impairment losses are recognised in profit or loss.

A CGU is defined by the Group as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Generally for the Group this represents an individual operating mine, including mines which are part of a larger mine complex. The costs attributable to individual shafts/pits of a mine are impaired if the shaft/pit is closed/depleted.

Exploration targets in respect of which costs have been capitalised at certain of the Group's international operations are evaluated on an annual basis to ensure that these targets continue to support capitalisation of the underlying costs. Those that do not are impaired.

When any infrastructure is closed down during the year, any carrying value attributable to that infrastructure is impaired.

4.11 Gain or loss on disposal of property, plant and equipment

Any gain or loss on disposal of property, plant and equipment (calculated as the net proceeds from disposal less the carrying amount of the item) is recognised in profit or loss.

4.12 Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for a consideration.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. Subsequent to initial recognition, the right-of-use asset is accounted for in accordance with the accounting policy applicable to that asset.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

4. Property, plant and equipment *continued*

4.12 Leases *continued*

Subsequent to initial recognition, the lease liability is measured at amortised cost using the effective interest rate method. It is re-measured when there is a change in future lease payments:

- If there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee;
- If the Group changes its assessment of whether it will exercise a purchase, extension or termination option;
- If there is a revised in-substance fixed lease payment; and
- If there is a change in future lease payments resulting from a change in an index or a rate used to determine these payments.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term. Low-value assets relate mainly to cellphones, computer equipment and photocopiers.

4.13 Deferred stripping

Production stripping costs in a surface mine are capitalised to property, plant and equipment if, and only if, all of the following criteria are met:

- It is probable that the future economic benefit associated with the stripping activity will flow to the entity;
- The entity can identify the component of the ore body for which access has been improved; and
- The costs relating to the stripping activity associated with that component can be measured reliably.

If the above criteria are not met, the stripping costs are recognised directly in profit or loss.

The Group initially measures the stripping activity asset at cost, this being the accumulation of costs directly incurred to perform the stripping activity that improves access to the identified component of ore.

After initial recognition, the stripping activity asset is carried at cost less accumulated amortisation and accumulated impairment losses.

5. Taxation

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is measured on taxable income at the applicable statutory rate substantively enacted at the reporting date.

Interest and penalties are accounted for in current tax.

The Group determined that the global minimum top-up tax, which is required to be paid under the Pillar Two legislation, is an income tax in the scope of IAS 12. The Group applied a temporary mandatory relief from accounting for deferred taxation of the impacts of the top-up tax and accounts for it as a current tax when it is incurred.

Deferred taxation is provided on temporary differences existing at each reporting date between the tax values of assets and liabilities and their carrying amounts. Substantively enacted tax rates are used to determine future anticipated tax rates which in turn are used in the determination of deferred taxation.

Deferred taxation is not recognised for temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and taxable temporary differences arising on the initial recognition of goodwill.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

These temporary differences are expected to result in taxable or deductible amounts in determining taxable profits for future periods when the carrying amount of the asset is recovered or the liability is settled.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and equity-accounted investees except where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future.

Deferred tax assets relating to the carry forward of unutilised tax losses and/or deductible temporary differences are recognised to the extent it is probable that future taxable profit will be available against which the unutilised tax losses and/or deductible temporary differences can be recovered. Deferred tax assets are reviewed at each reporting date and are adjusted if recovery is no longer probable.

Accounting policies *continued*

5. **Taxation *continued***

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

When assessing uncertain tax positions, the Group considers whether it is probable that the relevant authority will accept each tax treatment, or group of tax treatments, that the Group used or plans to use in its income tax filing.

No provision is made for any potential taxation liability on the distribution of retained earnings by Group companies if it is probable that the related taxable temporary differences will not reverse in the foreseeable future.

6. **Inventories**

Inventories are valued at the lower of cost and net realisable value. Gold on hand represents production on hand after the smelting process.

Cost is determined on the following basis:

- Gold on hand and gold in process is valued using weighted average cost. Cost includes production, amortisation and related administration costs;
- Heap leach and stockpile inventories are valued using weighted average cost. Cost includes production, amortisation and direct administration costs. The cost of materials on the heap leach and stockpiles, from which metals are expected to be recovered in a period longer than 12 months is classified as non-current assets; and
- Consumable stores are valued at weighted average cost, after appropriate provision for redundant and slow-moving items.

Net realisable value is determined with reference to relevant market prices or the estimated future sales price of the product if it is expected to be realised in the long term.

7. **Financial instruments**

7.1 **Non-derivative financial instruments**

Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument. A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

Classification and subsequent measurement

Financial assets – Classification policy

On initial recognition, an equity instrument is either classified as fair value through other comprehensive income ("FVOCI") if an irrevocable election is made or FVTPL.

On initial recognition, a debt instrument is classified as:

- Amortised cost;
- FVOCI; or
- FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held with a business model whose objective is to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held with a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets.

7. Financial instruments *continued*

Non-derivative financial instruments *continued*

Financial assets – Measurement policy

Financial asset category	Description
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.
Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets – Classification of financial assets

The following information is considered by the Group in determining the classification of financial assets:

- The Group's business model for managing financial assets; and
- The contractual cash flow characteristics of the financial assets.

The business model assessment of the financial assets is based on the Group's strategy and rationale for holding the financial assets on a portfolio level. When considering the strategy, the following is considered:

- Whether the financial assets are held to collect contractual cash flows;
- Whether the financial assets are held for sale; and
- Whether the financial assets are held for both collecting contractual cash flows and to be sold.

Financial assets – Assessment of contractual cash flows

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Impairment

The Group recognises loss allowances for expected credit losses ("ECLs") on financial assets measured at amortised cost. When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information. The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive). At each reporting date, the Group assesses whether financial assets carried at amortised cost are credit impaired. A financial asset is "credit impaired" when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Derecognition of financial instruments

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Accounting policies *continued*

7. Financial instruments *continued*

7.1.1 Investments

Investments comprise listed and unlisted equity instruments and listed bonds. Equity instruments are designated at FVOCI and are accounted for at fair value, with unrealised gains and losses subsequent to initial recognition recognised in other comprehensive income and included in other reserves. Profit or loss realised when investments are sold or impaired are never reclassified to profit or loss. Listed bonds are measured at amortised cost which is deemed to be fair value as they have a short-term maturity.

Purchases and sales of investments are recognised on the trade date, which is the date that the Group commits to purchase or sell the asset. Cost of purchase includes transaction costs. The fair value of listed investments is based on quoted bid prices.

7.1.2 Cash and cash equivalents

Cash comprises cash on hand and demand deposits and cash equivalents are short-term, highly liquid investments readily convertible to known amounts of cash and subject to insignificant risk of changes in value and are measured at amortised cost which is deemed to be fair value as they have a short-term maturity.

Bank overdrafts, to the extent applicable, are included within current liabilities in the statement of financial position and within cash and cash equivalents in the statement of cash flows.

7.1.3 Trade receivables

Trade receivables are carried at amortised cost less ECLs using the Group's business model for managing its financial assets, except for trade receivables from provisional copper and gold concentrate sales. The trade receivables from provisional copper and gold concentrate sales are carried at fair value through profit or loss and are marked-to-market at the end of each period until final settlement occurs, with changes in fair value classified as provisional price adjustments and included as a component of revenue.

7.1.4 Environmental trust funds

The environmental trust funds comprise mainly term deposits which are recognised at amortised cost less ECLs using the Group's business model for managing its financial assets.

7.1.5 Trade payables

Trade payables are recognised at amortised cost using the effective interest method.

7.1.6 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred, where applicable and subsequently measured at amortised cost using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Interest payable on borrowings is recognised in profit or loss over the term of the borrowings using the effective interest method. Finance expense comprises interest on borrowings and environmental rehabilitation costs offset by interest capitalised on qualifying assets.

Cash flows from interest paid are classified under operating activities in the statement of cash flows.

7.2 Derivative financial instruments

The Group may from time to time establish currency and/or interest rate and/or commodity financial instruments to protect underlying cash flows.

Derivative financial instruments are initially recognised at fair value and subsequently re-measured to their fair value with changes therein recognised in profit or loss.

8. Provisions

Provisions are recognised when the Group has a present legal or constructive obligation resulting from past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

9. Provision for environmental rehabilitation costs

Long-term provisions for environmental rehabilitation costs are based on the Group's environmental management plans, in compliance with applicable environmental and regulatory requirements.

Rehabilitation work can include facility decommissioning and dismantling, removal or treatment of waste materials, site and land rehabilitation, including compliance with and monitoring of environmental regulations, security and other site-related costs required to perform the rehabilitation work and operation of equipment designed to reduce or eliminate environmental effects.

Full provision is made based on the net present value of the estimated cost of restoring the environmental disturbance that has occurred up to the reporting date. The unwinding of the obligation is accounted for in profit or loss.

The estimated costs of rehabilitation are reviewed annually and adjusted as appropriate for changes in legislation, technology or other circumstances. Cost estimates are not reduced by the potential proceeds from the sale of assets or from plant clean up at closure.

Changes in estimates are capitalised or reversed against the relevant asset, except where a reduction in the provision is greater than the remaining net book value of the related asset, in which case the value is reduced to nil and the remaining adjustment is recognised in profit or loss. In the case of closed sites, changes in estimates and assumptions are recognised in profit or loss. Estimates are discounted at the pre-tax risk-free rate in the jurisdiction of the obligation.

Increases due to additional environmental disturbances are capitalised and amortised over the remaining lives of the mines. These increases are accounted for on a net present value basis.

For the South African and Ghanaian operations, annual contributions are made to a dedicated rehabilitation trust fund and dedicated bank account, respectively, to fund the estimated cost of rehabilitation during and at the end of the life-of-mine. The amounts contributed to this trust fund/bank account are included under non-current assets. Interest earned on monies paid to rehabilitation trust fund/bank account is accrued on a time proportion basis and is recorded as interest income.

In respect of the South African, Ghanaian, Peruvian, Chilean and Canadian operations, bank and other guarantees are provided for funding of the environmental rehabilitation obligations. Refer to financial instruments accounting policy 7.1.4 Environmental trust fund and note 38 of the consolidated financial statements.

10. Employee benefits

10.1 Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

10.2 Pension and provident funds

The Group operates a defined contribution retirement plan and contributes to a number of industry-based defined contribution retirement plans. The retirement plans are funded by payments from employees and Group companies.

Contributions to defined contribution funds are recognised as an employee benefit expense in profit or loss in the periods during which related services are rendered by employees.

10.3 Share-based payments

The Group operates an equity-settled compensation plan. The fair value of the equity-settled instruments is measured by reference to the fair value of the equity instrument granted which in turn is determined using Monte Carlo simulation models on the date of grant.

Fair value is based on market prices of the equity-settled instruments granted, if available, taking into account the terms and conditions upon which those equity-settled instruments were granted. Fair value of equity-settled instruments granted is estimated using appropriate valuation models and appropriate assumptions at grant date. Non-market vesting conditions (service period prior to vesting) are not taken into account when estimating the fair value of the equity-settled instruments at grant date. Market conditions are taken into account in determining the fair value at grant date.

The fair value of the equity-settled instruments is recognised as an employee benefit expense over the vesting period based on the Group's estimate of the number of instruments that will eventually vest, with a corresponding increase in equity. Vesting assumptions for non-market conditions are reviewed at each reporting date to ensure they reflect current expectations.

Where the terms of an equity-settled award are modified, the originally determined expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any modification, which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the participant as measured at the date of the modification.

Accounting policies *continued*

10. Employee benefits *continued*

10.4 Long-term incentive plan

The Group operates a long-term incentive plan.

The Group's net obligation in respect of the long-term incentive plan is the amount of future benefit that employees have earned in return for their services in the current and prior periods. That benefit is estimated using appropriate assumptions and is discounted to determine its present value at each reporting date. Re-measurements are recognised in profit or loss in the period in which they arise.

10.5 Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. Termination benefits are expensed at the earlier of the date the Group can no longer withdraw the offer of those benefits or the date the Group recognises costs for a restructuring. Benefits falling due more than 12 months after the reporting date are discounted to present value.

11. Stated capital

11.1 Ordinary share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

11.2 Repurchase and reissue of share capital

When share capital recognised as equity is repurchased, the amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are deducted from equity. When treasury shares are sold or reissued subsequently, the amount received is recognised as an increase in equity, and the resulting surplus or deficit on the transaction is presented in share premium.

12. Revenue from contracts with customers

The Group recognises revenue when control over its gold, copper and silver is transferred to the customer. The price is determined by market forces (commodity price and exchange rates). Revenue is measured based on the consideration specified in a contract with the customer.

Customers obtain control of gold, copper and silver on the settlement date. In Peru, customers obtain control of copper and gold concentrate on the shipment date. Copper and gold concentrate revenue is calculated, net of refining and treatment charges, on a best estimate basis on shipment date, using forward metal prices to the estimated final pricing date, adjusted for the specific terms of the agreements. Variations between the price recorded at the shipment date and the actual final price received are caused by changes in prevailing copper and gold prices. Changes in the fair value as a result of changes in the forward metal prices are classified as provisional price adjustments and included as a component of revenue.

13. Investment income

Investment income comprises interest income on funds invested and dividend income from listed and unlisted investments.

Investment income is recognised to the extent that it is probable that economic benefits will flow to the Group and the amount of investment income can be reliably measured. Investment income is stated at the fair value of the consideration received or receivable.

13.1 Dividend income

Dividends are recognised in profit or loss when the right to receive payment is established.

13.2 Interest income

Interest income is recognised in profit or loss using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset or amortised cost of the financial liability.

Cash flows from dividends and interest received are classified under operating activities in the statement of cash flows.

14. Dividends declared

Dividends and the related taxation thereon are recognised only when such dividends are declared.

Dividend withholding tax is a tax on shareholders receiving dividends and is applicable to all dividends paid, except dividends paid to South African resident companies, South African retirement funds and other prescribed exempt taxpayers. The Group withholds dividend tax on behalf of its shareholders at a rate of 20% on dividends paid. Amounts withheld are not recognised as part of the Group's tax charge but rather as part of the dividend paid recognised directly in equity.

Cash flows from dividends paid are classified under operating activities in the statement of cash flows.

15. Earnings per share

The Group presents basic and diluted earnings per share. Basic earnings per share is calculated based on the profit attributable to ordinary shareholders divided by the weighted average number of ordinary shares in issue during the period. Diluted earnings per share is determined by adjusting the profit attributable to ordinary shareholders, if applicable, and the weighted average number of ordinary shares in issue for ordinary shares that may be issued in the future.

16. Assets held for sale

Assets (or disposal groups) comprising assets and liabilities, are classified as held for sale if it is highly probable they will be recovered primarily through sale rather than through continuing use. These assets may be a component of an entity, a disposal group or an individual non-current asset.

Assets held for sale are stated at the lower of carrying amount and fair value less costs to sell. Once classified as held for sale or distribution, property, plant and equipment is no longer amortised or depreciated.

17. Discontinued operations

Classification as a discontinued operation occurs on disposal or when the operation meets the criteria to be classified as held-for-sale (refer accounting policy 16), if earlier. When an operation is classified as a discontinued operation, the comparative income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows are re-presented as if the operation had been discontinued from the start of the comparative period.

In cases where an asset is abandoned, such asset is classified as a discontinued operation from the date it ceases to be used.

18. Segmental reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker ("CODM") and is based on individual mining operations. The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Executive Committee that makes strategic decisions. The Group's segmental profit measure is profit for the year.

The accompanying notes form an integral part of these financial statements.

¹ Accumulated other comprehensive income mainly comprises foreign currency translation.

² Other reserves include mainly share-based payments. The aggregate of accumulated other comprehensive income and other reserves in the consolidated statement of changes in equity is disclosed in the Consolidated statement of financial position as other reserves.

³ Refer to note 13 for dividends paid to owners of the parent.

⁴ Treasury shares were purchased by the Group and a portion was issued to participants upon vesting of employee share options in 2025.

⁵ On 6 December 2025, per the South Deep BEE transaction an economic interest of 6.90% in Newshelf 899 (Proprietary) Limited vested to the BEE non-controlling interest holders.

Consolidated statement of cash flows

for the year ended 31 December 2025

United States Dollar

Figures in millions unless otherwise stated				
	Notes	2025	2024	2023
Cash flows from operating activities		3,772.2	1,607.0	1,192.8

Cash and cash equivalents at beginning of the year		860.2	648.7	769.4
Cash and cash equivalents at end of the year	25	1,779.2	860.2	648.7

The accompanying notes form an integral part of these financial statements.

¹ The purchase of Osisko comprises US\$1,483.2 million cash consideration paid, partially offset by US\$30.7 million Osisko take-on cash and cash equivalents.

² The purchase of Gold Road comprises US\$2,169.1 million (A\$3,348.8 million) fixed and variable cash considerations paid on 10 October 2025, US\$315.3 million (A\$477.5 million) special dividend paid on 3 October 2025, partially offset by US\$360.2 million (A\$550.3 million) Gold Road take-on cash and cash equivalents at 26 September 2025.

³ Proceeds on disposal of investments in 2025 comprise mainly US\$707.4 million (A\$1,086.1 million) for Northern Star and US\$106.4 million for Galiano Gold Inc.

Notes to the consolidated financial statements

for the year ended 31 December 2025

1. Revenue

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
Revenue from contracts with customers ¹	8,751.3	5,201.6	4,500.7
– Gold ²	8,406.5	5,008.9	4,293.1
– Copper ³	228.1	192.7	207.6
– Silver ⁴	116.7	—	—

¹ The Group generates revenue primarily from the sale of gold and silver bullion and copper concentrate to refineries and banks. The disaggregation of revenue from contracts with customers by primary geographical market and product is described in the segment note (note 45).

² All regions.

³ Only Peru region (Cerro Corona).

⁴ Mainly Salares Norte.

2. Cost of sales

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
Salaries and wages	(503.6)	(405.4)	(399.7)
Consumable stores	(445.9)	(392.2)	(400.8)
Utilities	(186.7)	(168.4)	(150.0)
Mine and other contractors	(996.7)	(851.5)	(715.9)
Other	(566.2)	(384.8)	(376.0)
Cost of sales before gold inventory change and amortisation and depreciation	(2,699.1)	(2,202.3)	(2,042.4)
Gold inventory change ¹	(61.3)	(14.0)	90.7
Cost of sales before amortisation and depreciation	(2,760.4)	(2,216.3)	(1,951.7)
Amortisation and depreciation	(920.4)	(627.4)	(795.3)
Total cost of sales	(3,680.8)	(2,843.7)	(2,747.0)

¹ Included in the gold inventory change is a net realisable value adjustment to stockpiles of US\$nil (2024: US\$3.0 million at Cerro Corona and 2023: US\$33.8 million at Damang).

3. Investment income

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
Dividends received	—	0.1	0.3
Unwinding of discount rate/net change in fair value of Asanko deferred and contingent considerations	7.2	6.8	—
Interest received – environmental trust funds	4.9	4.4	1.2
Interest received – cash balances	41.2	17.4	23.4
Total investment income	53.3	28.7	24.9

4. Finance expense

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
Interest expense – environmental rehabilitation	(29.1)	(24.8)	(21.8)
Unwinding of discount rate on silicosis settlement costs	(0.6)	(0.6)	(0.9)
Interest expense – lease liability	(25.9)	(24.8)	(22.7)
Interest expense – borrowings	(134.2)	(105.8)	(82.4)
Borrowing costs capitalised ¹	69.1	105.6	64.9
Total finance expense	(120.7)	(50.4)	(62.9)

¹ Borrowing costs of US\$69.1 million (2024: US\$105.6 million and 2023: US\$64.9 million) arising on Group general borrowing were capitalised during the year until 31 August 2025 and related to the Salares Norte project, which reached commercial levels of production at that date.

² Interest paid per the statement of cash flows amounts to US\$159.9 million (2024: US\$130.4 million and 2023: US\$104.8 million) and comprises interest expense - lease liability of US\$25.9 million (2024: US\$24.8 million and 2023: US\$22.7 million), interest expense - borrowings of US\$134.2 million (2024: US\$105.8 million and 2023: US\$82.4 million), partially offset by non-cash interest of US\$0.2 million (2024: US\$0.2 million and 2023: US\$0.3 million).

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

5. Gain on financial instruments, net

	United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Royalties - fair value gain ¹	77.5	—	—
Northern Star shares - fair value gain ²	53.6	—	—
Northern Star shares - fair value loss on forward sales ²	(73.0)	—	—
Total gain on financial instruments, net	58.1	—	—

¹ During 2025, a fair value gain of US\$77.5 million was recognised in profit or loss relating to royalties. Refer note 16 (b) for further details.

² On 26 September 2025, Gold Fields entered into a forward share transaction ("forward sale") pursuant to which it agreed to sell the Northern Star shares acquired as part of the acquisition of Gold Road (refer note 18.3 for further details). The investment in Northern Star was presented as an asset held for sale until 14 October 2025, the settlement date of the forward sale. A fair value gain of US\$53.6 million (A\$83.2 million) was recognised in profit or loss. On 14 October 2025, Gold Fields sold the 49,258,234 Northern Star shares by way of a forward sale at a price of A\$22.05 per Northern Star share for a total consideration of US\$707.4 million (A\$1,086.1 million). A fair value loss of US\$73.0 million (A\$113.3 million) was recognised in profit or loss.

6. Share-based payments

The Group grants equity-settled instruments comprising share awards and restricted shares to Executive Directors, as well as senior and middle management. During the year ended 31 December 2025, the Gold Fields Limited 2025 share incentive plan and the Gold Fields Limited 2012 share plan were in place. Allocations under these plans were made during 2023, 2024 and 2025.

Gold Fields Limited 2025 share plan

At the Annual General Meeting on 28 May 2025, shareholders approved the adoption of the Gold Fields Limited 2025 share incentive plan to replace the Gold Fields Limited 2012 share plan and the long-term incentive scheme ("LTIP"). The plan provides for performance shares ("PS"), retention shares ("RS"), restricted shares ("RSS") and deferred shares ("MS"). This plan is in place to attract, retain, motivate and reward participating employees on a basis which seeks to align the interests of such employees with those of the Company's shareholders. Currently, the last vesting date will be in February 2028.

The expense is as follows:

	United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Share-based payments	(25.4)	(4.4)	(9.1)
Total included in profit or loss for the year	(25.4)	(4.4)	(9.1)

The following table summarises the movement of share awards under the Gold Fields Limited share plans during the years ended 31 December 2025, 2024 and 2023:

	2025	2024	2023
	Performance (PS) and Restricted (RS) Shares	Performance Shares (PS)	Performance Shares (PS)
Outstanding at beginning of the year	1,529,304	2,347,489	2,986,790
Movement during the year:			
Granted	3,205,497	886,257	790,833
Exercised and released	(519,832)	(1,005,541)	(1,322,084)
Forfeited	(408,805)	(698,901)	(108,050)
Outstanding at end of the year	3,806,164	1,529,304	2,347,489

At 31 December 2025, none of the outstanding awards above had vested.

6. Share-based payments *continued*

The fair value of equity instruments granted during the year ended 31 December 2025, 2024 and 2023 were valued using the Monte Carlo simulation model:

	2025	2024	2023
Monte Carlo simulation			
Performance shares			
The inputs to the model for awards granted during the year were as follows:			
• – weighted average historical volatility (based on a statistical analysis of the share price on a weighted moving average basis for the expected term of the option)	50.3%	53.2%	51.7%
– expected term (years)	3 years	3 years	3 years
– dividend yield ¹	n/a	n/a	n/a
• – average three-year risk free interest rate (based on US interest rates)	4.1%	3.2%	1.8%
– weighted average fair value (United States dollars)	15.2	14.1	9.8

¹ There is no dividend yield applied to the Monte Carlo simulation model as the performance conditions follow a total shareholder return method.

The weighted average share price for the year ended 31 December 2025 on the Johannesburg Stock Exchange was R504.59 (US\$28.22) (2024: R278.95 (US\$15.22) and 2023: R246.56 (US\$13.33)).

The compensation costs related to awards not yet recognised under the above plans at 31 December 2025, 2024 and 2023 amount to US\$63.0 million, US\$7.0 million and US\$11.1 million, respectively, and are to be recognised over 3 years.

Under the Gold Fields Limited 2012 share plan, the Directors were authorised to issue and allot all or any of such shares required for the plans, but in aggregate all plans may not exceed 41,076,635 of the total issued ordinary stated capital of the Company. The number of shares available for utilisation for purposes of the share plan amounted to 6,265,652 (2024: 6,265,652).

Although the Directors retain the authority to issue and allot shares under the 2012 Share Plan, the Company has settled and intends to continue settling, vested awards by purchasing ordinary shares on the open market, thereby eliminating dilution to existing shareholders. No new shares have been issued under the plans since the 2024 vesting.

The Gold Fields Limited 2025 share plan does not provide for the issue of new shares. Awards under this plan are settled through the procurement of ordinary shares in the open market, which are held as treasury shares prior to transfer to participants.

An individual participant may also not be awarded an aggregate of shares from all or any such plans exceeding 4,107,663 of the Company's total issued ordinary stated capital. The unexercised options and shares under all plans represented 0.4% of the total issued stated capital at 31 December 2025.

7. Exploration expense

	United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Australia	(67.5)	(44.1)	(33.4)
Ghana	—	(3.0)	(9.0)
Peru	(10.5)	(7.0)	(3.9)
Chile	(20.1)	(16.1)	(29.3)
Canada ¹	(187.1)	(27.9)	—
Other	(12.6)	(0.3)	(0.6)
Total exploration expense	(297.8)	(98.4)	(76.2)

¹ Relates to the Windfall Project.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

8. Reversal of impairment of assets, net of impairment

	United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Property, plant and equipment	281.3	(3.5)	(156.4)
Cerro Corona cash-generating unit ¹	—	—	(156.2)
South Deep cash-generating unit - reversal of impairment ²	285.1	—	—
Impairment of property, plant and equipment – other ³	(3.8)	(3.5)	(0.2)
Reversal of impairment of assets, net of impairment	281.3	(3.5)	(156.4)

¹ For the year ended 31 December 2023, the Group recognised an impairment of US\$156.2 million in respect of the Cerro Corona cash-generating unit ("CGU").

The recoverable amount was based on its fair value less cost of disposal ("FVLCD") calculated using a combination of the market (resource value) and the income approach (level 3 of the fair value hierarchy). The impairment in 2023 was mainly due to the increased costs and capital expenditure as a result of a change in the life-of-mine plan to accommodate the unloading of the east wall and continued cost pressures, as well as the derecognition of the resource as a result of the life-of-mine sterilising the resource through the deposition of in-pit tailings from 2026 onwards. Refer accounting policies pages 56 to 57 for the assumptions used.

² For the year ended 31 December 2018, the Group recognised an impairment of US\$409.8 million (R5,507.0 million) in respect of property, plant and equipment relating to the South Deep CGU. At 31 December 2025, the Group reversed an impairment of US\$285.1 million (R4,721.9 million) in respect of property, plant and equipment relating to the South Deep CGU as a result of significantly higher gold prices and the stabilisation of the ramp-up at the South Deep mine during 2025. The impairment reversal was limited to what the carrying amounts of the CGU would have been at 31 December 2025 had the assets not been impaired. The recoverable amount was based on its FVLCD calculated using a combination of the market (resource value) and the income approach (level 3 of the fair value hierarchy). The recoverable amount is significantly higher than the carrying value and a reasonable possible change in the assumptions would not change the conclusion to reverse the impairment or the quantum of the reversal. The recoverable amount at 31 December 2025 was US\$4,163.2 million (R68,941.8 million). Refer accounting policies pages 56 to 57 for the assumptions used based on the 2025 life-of-mine plan.

³ The US\$3.8 million in 2025 comprises US\$3.8 million (2024: US\$nil and 2023: US\$nil) impairment of redundant assets at Salares Norte, US\$nil (2024: US\$3.5 million and 2023: US\$0.1 million) impairment of redundant assets at Cerro Corona and US\$nil (2024: US\$nil and 2023: US\$0.1 million) impairment of redundant assets at Agnew.

9. Included in profit before royalties and taxation are the following:

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
Social contributions ¹	(25.9)	(21.0)	(19.4)
Rehabilitation (expense)/income ¹	(43.6)	1.2	(4.0)
Offshore structure costs ¹	(17.3)	(18.0)	(18.6)
Restructuring costs ²	(10.3)	(6.6)	(7.8)
Audit fee	(4.6)	(4.2)	(3.5)
Non-audit services fee	(0.6)	(0.4)	(0.4)
Gruyere rainfall event ¹	6.0	(12.0)	—

¹ Included under "Other costs, net" in the consolidated income statement.

² The restructuring costs in 2025 comprise mainly separation packages at Tarkwa amounting to US\$8.7 million (2024: US\$3.6 million and 2023: US\$1.6 million), Damang of US\$1.6 million (2024: US\$0.4 million and US\$5.5 million) and Australia of US\$nil million (2024: US\$1.8 million and 2023: US\$0.7 million).

10. Royalties

United States Dollar			
Figures in millions unless otherwise stated	2025	2024	2023
South Africa	(25.3)	(3.2)	(3.1)
Peru	(15.9)	(7.1)	(7.0)
Ghana	(98.8)	(77.9)	(54.6)
Australia	(91.9)	(59.5)	(51.7)
Total royalties	(231.9)	(147.7)	(116.4)
Royalty rates			
South Africa (effective rate) ¹	2.4%	0.5%	0.5%
Australia ²	2.5%	2.5%	2.5%
Ghana ³	5.0%	4.0% – 5.0%	4.1%
Peru ⁴	4.8%	4.0%	4.1%

¹ The Mineral and Petroleum Resource Royalty Act 2008 ("Royalty Act") was promulgated on 24 November 2008 and became effective from 1 March 2010. The Royalty Act imposes a royalty on refined (mineral resources that have undergone a comprehensive level of beneficiation such as smelting and refining as defined in Schedule 1 of the Royalty Act) and unrefined (mineral resources that have undergone limited beneficiation as defined in Schedule 2 of the Royalty Act) minerals payable to the state. The royalty in respect of refined minerals (which include gold refined to 99.5% and above and platinum) is calculated by dividing earnings before interest and taxes ("EBIT") by the product of 12.5 times gross revenue calculated as a percentage, plus an additional 0.5%. EBIT refers to taxable mining income (with certain exceptions such as no deduction for interest expense and foreign exchange losses) before assessed losses but after capital expenditure. A maximum royalty of 5% has been introduced on refined minerals. The effective rate of royalty tax payable for the year ended 31 December 2025 was 2.4% of mining revenue (2024: 0.5% and 2023: 0.5%) equalling the minimum charge per the formula.

² The Australian operations are subject to a 2.5% (2024: 2.5% and 2023: 2.5%) gold royalty on revenue as the mineral rights are owned by the state.

³ Minerals are owned by the Republic of Ghana and held in trust by the President. Gold Fields signed a Development Agreement ("DA") with the government of Ghana for both the Tarkwa and Damang mines. This agreement states that the Ghanaian operations will be subject to a sliding scale for royalty rates, linked to the prevailing gold price. The sliding scale is as follows:

Average gold price		Royalty rate
Low value	High value	
US\$0.00 – US\$1,299.99		3.0%
US\$1,300.00 – US\$1,449.99		3.5%
US\$1,450.00 – US\$2,299.99		4.0%
US\$2,300.00 – Unlimited		5.0%

⁴ The Peruvian operations are subject to a mining royalty calculated on a sliding scale with rates ranging from 1% to 12% of the value of operating profit.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

11. Mining and income taxation

	United States Dollar		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
The components of mining and income tax are the following:			
South African taxation			
– company and capital gains taxation	(4.8)	(4.1)	(6.0)
– withholding tax	(23.6)	(13.1)	(5.9)
– prior year adjustment – current taxation	0.3	0.2	4.8
– non-mining taxation	(0.6)	—	—
– deferred taxation	(241.3)	(63.0)	(84.6)
– prior year adjustment – deferred taxation	—	3.7	—
Foreign taxation			
– current taxation	(942.1)	(514.6)	(443.0)
– withholding tax	(8.3)	(6.3)	(5.4)
– prior year adjustment – current taxation ¹	(1.1)	(12.3)	(2.8)
– deferred taxation	(427.7)	(87.6)	77.8
Total mining and income taxation	(1,649.2)	(697.1)	(465.1)
Major items causing the Group's income taxation to differ from the maximum South African statutory mining tax rate of 33.0% (2024: 33.0% and 2023: 33.0%) were:			
Taxation on profit before taxation at maximum South African statutory mining tax rate	(1,747.2)	(655.9)	(399.4)
Rate adjustment to reflect the actual realised company tax rates in South Africa and offshore ²	130.6	56.5	41.4
Non-deductible share-based payments	(8.4)	(1.5)	(3.0)
Non-deductible exploration expense	(4.2)	(0.1)	(0.2)
Non-deductible interest paid	(21.1)	(25.5)	(21.8)
Share of results of equity accounted investees, net of taxation	(0.8)	(17.7)	(10.8)
Non-taxable profit on disposal of asset held for sale - Asanko Gold	—	1.8	—
Non-taxable profit on disposal of assets held for sale - Rusoro	—	20.6	—
Non-taxable capital gains portion of Yamana break fee and transaction costs	—	—	5.8
Non-taxable gain on remeasurement of 50% previously held interest in Gruyere	266.7	—	—
Non-taxable fair value gain on Northern Star shares	17.7	—	—
Non-deductible fair value loss on forward sales of Northern Star shares	(24.1)	—	—
Non-deductible transaction costs on acquisition of Gold Road	(12.2)	—	—
Withholding tax	(38.3)	(22.9)	(13.1)
Net non-deductible expenditure and non-taxable income	(41.9)	(28.6)	(17.6)
Deferred taxation movement on Peruvian Nuevo Sol devaluation against US dollar ³	7.6	0.6	2.5
Various Peruvian non-deductible expenses	(19.8)	(11.0)	(6.1)
Deferred tax assets (not recognised)/utilised at Cerro Corona, net	(12.8)	15.3	(5.1)
Deferred tax assets (not recognised)/utilised at Damang and Tarkwa	(27.2)	3.9	(30.3)
Deferred tax utilised on disposal of Northern Star shares	(25.9)	—	—
Deferred tax assets not recognised at Windfall ⁴	(87.7)	(17.2)	—
Prior year adjustments	(0.9)	(8.0)	(3.3)
Deferred tax charge on change of tax rate at South Deep	—	0.9	—
Other	0.7	(8.4)	(4.1)
Total mining and income taxation	(1,649.2)	(697.1)	(465.1)

¹ The US\$12.3 million in 2024 relates mainly to additional transfer pricing charges at Tarkwa.

² Due to different tax rates in various jurisdictions, primarily South Africa, Ghana, Australia, Chile and Peru.

³ The functional currency of Cerro Corona is US Dollar, however, the Peruvian tax base is based on values in Peruvian Nuevo Sol.

⁴ Deferred tax assets at Windfall of US\$87.7 million (2024: US\$17.2 million) were not recognised during the year ended 31 December 2025 to the extent that there is insufficient future taxable income available. The Windfall Project is still in the feasibility phase and a final investment decision is expected to be made in 2026.

11. Mining and income taxation continued

United States Dollar

	2025	2024	2023
South Africa – current tax rates			
Mining tax ¹	$Y = 33 - 165/X$	$Y = 33 - 165/X$	$Y = 33 - 165/X$
Non-mining tax ²	27.0%	27.0%	27.0%
Company tax rate	27.0%	27.0%	27.0%
International operations – current tax rates			
Australia	30.0%	30.0%	30.0%
Ghana	32.5%	32.5%	32.5%
Peru	29.5%	29.5%	29.5%
Chile	27.0%	27.0%	27.0%

¹ South African mining tax on mining income is determined according to a formula which takes into account the profit and revenue from mining operations. South African mining taxable income is determined after the deduction of all mining capital expenditure, with the proviso that this cannot result in an assessed loss. Capital expenditure amounts not deducted are carried forward as unredeemed capital expenditure to be deducted from future mining income. Accounting depreciation is ignored for the purpose of calculating South African mining taxation. The effective mining tax rate used for deferred tax purposes for Gold Fields Operations Limited ("GFO") and GFI Joint Venture Holdings (Proprietary) Limited ("GFIJVH"), owners of the South Deep mine, has been calculated at 29% (2024: 29% and 2023: 28%). In the formula above, Y is the percentage rate of tax payable and X is the ratio of mining profit, after the deduction of redeemable capital expenditure, to mining revenue expressed as a percentage.

² Non-mining income of South African mining operations consists primarily of interest income.

Deferred tax is provided at the expected future rate for mining operations arising from temporary differences between the carrying values and tax values of assets and liabilities. In South Africa the tax rate which has been used for deferred tax purposes for mining assets is $Y = 33 - 165/X$ and for non-mining assets is 27%.

At 31 December 2025, the Group had the following estimated amounts available for set-off against future income:

	2025			2024		
	Gross unredeemed capital expenditure	Gross tax losses	Gross tax losses not recognised	Gross unredeemed capital expenditure	Gross tax losses	Gross tax losses not recognised
	R'million	R'million	R'million	R'million	R'million	R'million
South Africa¹						
Gold Fields Operations Limited	1,865.0	552.9	—	6,230.7	626.8	—
GFI Joint Venture Holdings (Pty) Ltd	4,251.1	500.7	—	8,980.1	578.1	—
Gold Fields Group Services (Pty) Ltd	—	134.3	—	—	—	—
Gold Fields Holdings Company Ltd	—	—	—	—	54.0	54.0
	6,116.1	1,187.9	—	15,210.8	1,258.9	54.0
	US\$ million	US\$ million	US\$ million	US\$ million	US\$ million	US\$ million
South Africa¹						
Gold Fields Operations Limited	112.6	33.4	—	330.7	33.3	—
GFI Joint Venture Holdings (Pty) Ltd	256.7	30.2	—	476.7	30.7	—
Gold Fields Group Services (Pty) Ltd	—	8.1	—	—	—	—
Gold Fields Holdings Company Ltd	—	—	—	—	2.9	2.9
	369.3	71.7	—	807.4	66.8	2.9

¹ These deductions are available to be utilised against income generated by the relevant tax entity and do not expire unless the tax entity concerned ceases to operate for a period of longer than one year. Under South African mining tax ring-fencing legislation, each tax entity is treated separately and as such these deductions can only be utilised by the tax entities in which the deductions have been generated. South African tax losses and unredeemed capital expenditure have no expiration date.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

	2025			2024		
	Gross unredeemed capital expenditure	Gross tax losses	Gross tax losses not recognised	Gross unredeemed capital expenditure	Gross tax losses	Gross tax losses not recognised
	US\$ million	US\$ million	US\$ million	US\$ million	US\$ million	US\$ million

Minera Gold Fields Salares Norte ²	344.4	—	—	507.3	366.7	—
Windfall Mining Group Inc. ^{3,4}	—	684.3	684.3	—	390.5	390.5
Abosso Goldfields Limited ^{5,6}	—	4.2	4.2	—	27.6	27.6
Gold Fields Ghana Limited ^{5,7}	—	6.8	6.8	—	26.7	26.7
Gold Fields Australia (Pty) Ltd (tax consolidated group) ⁸	—	119.4	119.4	—	—	—
	344.4	1,002.7	1,002.7	507.3	998.1	631.4

¹ The total tax losses of US\$188.0 million (2024: US\$186.6 million) comprise US\$1.9 million (2024: US\$1.1 million) tax losses that expire between one and two years, US\$0.1 million (2024: US\$0.9 million) tax losses that expire between two and five years, US\$nil (2024: US\$nil) tax losses that expire between five and 10 years, US\$0.2 million (2024: US\$158.0 million) tax losses that expire after 10 years and US\$185.8 million (2024: US\$26.6 million) tax losses that have no expiry date.

² These deductions are available to be utilised against income generated by the relevant tax entity against income tax (US\$198.9 million) and the Chilean special mining tax (US\$145.5 million), respectively, and do not expire. Salares Norte achieved commercial levels of production in August 2025 and reached steady state operations in Q4 2025, resulting in the utilisation of the carried forward tax losses in 2025.

³ The increase in tax losses arose from pre-existing losses acquired as part of the Osisko asset acquisition on 25 October 2024 and additional project spending post-closing. The Windfall Project is still in the feasibility phase and a final investment decision is expected to be made in 2026, therefore the deferred tax asset relating to the tax losses were not recognised at 31 December 2024 and 2025. The total tax losses of US\$684.3 million (2024: US\$390.5 million) comprise US\$8.8 million (2024: US\$nil) tax losses that expire between one and two years, US\$17.3 million (2024: US\$5.0 million) tax losses that expire between two and five years, US\$26.3 million (2024: US\$29.4 million) tax losses that expire between five and 10 years, US\$479.6 million (2024: US\$284.2 million) tax losses that expire after 10 years and US\$152.3 million (2024 US\$71.9 million) tax losses that have no expiry date.

⁴ Unredeemed capital expenditure at 31 December 2025 of US\$245.1 million (2024: \$212.2 million) relates to the assets acquired as part of the Osisko asset acquisition on 25 October 2024 and additional capital expenditure post-closing. The Windfall Project is still in the feasibility phase and a final investment decision is expected to be made in 2026, therefore the deferred tax asset relating to the unredeemed capital expenditure was not recognised at 31 December 2024 and 2025. These deductions are available to be utilised against income generated by the relevant tax entity and do not expire.

⁵ Tax losses may be carried forward for five years. These losses expire on a first-in-first-out basis. Tax losses of US\$nil (2024: US\$32.6 million) expire between one and two years and tax losses of US\$11.0 million (2024: US\$21.7 million) expire between two and five years.

⁶ At 31 December 2025, tax losses at Damang of US\$4.2 million (2024: US\$27.6 million) comprise deferred tax assets not recognised relating to financial instruments losses.

⁷ At 31 December 2025, deferred tax assets at Tarkwa of US\$6.8 million (2024: US\$26.7 million) not recognised relating to losses on financial instruments.

⁸ The capital loss arose on the disposal of the 49,258,234 Northern Star shares acquired as part of the acquisition of Gold Road. Refer notes 5 and 18.3 for further details. The loss is available to be utilised against future capital gains generated in the Australian tax consolidated group.

Organisation for Economic Co-operation and Development ("OECD") Pillar Two model rules

The Group is within the scope of the OECD Pillar Two model rules.

Six of the jurisdictions in which the Group operates, including South Africa, Australia, Canada, Isle of Man, Netherlands and Gibraltar have enacted or substantively enacted Pillar Two legislation to implement the global minimum top-up tax at 31 December 2025. This legislation is effective from as early as 1 January 2024 for many of these jurisdictions.

The Group determined that the global minimum top-up tax, which it is required to pay under Pillar Two legislation, is an income tax in the scope of IAS 12. The Group applies a temporary mandatory relief from deferred taxation accounting for the impacts of the top-up tax and accounts for it as a current taxation when it is incurred, as provided in the amendments to IAS 12 issued in May 2023.

Under the legislation, the Group may be liable to pay top-up tax for the difference between its Global Anti-Base Erosion ("GloBE") effective tax rate per jurisdiction and the 15% minimum rate.

The Group has performed an impact assessment of its potential exposure in relation to the Pillar Two legislation. Based on the outcome of the impact assessment, the Group does not anticipate being subject to material top-up tax exposure in any of the jurisdictions in which it operates.

12. Earnings per share

United States Dollar

<i>Figures in millions unless otherwise stated</i>		2025	2024	2023
12.1	Basic earnings per share – cents Basic earnings per share is calculated by dividing the profit attributable to owners of the parent of US\$3,567.4 million (2024: US\$1,245.0 million and 2023: US\$703.3 million) by the weighted average number of ordinary shares in issue during the year of 894,972,803 (2024: 894,881,526 and 2023: 893,318,864).	399	139	79

14.1 Ghana expected credit loss

United States Dollar			
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Tarkwa expected credit loss – loan advanced to contractor ¹	(46.0)	—	(25.4)
Damang expected credit loss – receivable ²	—	—	(7.8)
Tarkwa expected credit loss – receivable ³	(20.0)	—	—
Total expected credit loss	(66.0)	—	(33.2)

¹ An expected credit loss of US\$46.0 million (2024: US\$nil and 2023: US\$25.4 million) was raised against a loan advanced to a contractor at Ghana during 2025. The loan was provided to ensure the sustainability of the operation and delivery of the mine plan. Gold Fields has communicated to the contractor that this amount remains payable and has reserved all rights in this regard. Refer note 42 for further details.

² An expected credit loss of US\$nil (2024: US\$nil and 2023: US\$7.8 million) was raised against a receivable at 31 December 2025. The receivable of US\$7.8 million in 2023 related to a payment advanced to a contractor at Damang.

³ An expected credit loss of US\$20.0 million (2024: US\$nil and 2023: US\$nil) was raised against a receivable advanced to a contractor at Tarkwa during 2025. The amount advanced was provided to ensure the sustainability of the operation and delivery of the mine plan.

for the year ended 31 December 2025

15. Discontinued operation

	United States Dollars		
<i>Figures in millions unless otherwise stated</i>	2025	2024	2023
Asanko Gold			
– Asanko Gold – earnings	—	—	28.0
– Asanko Gold – impairment ¹	—	—	(46.9)
Loss from discontinued operation	—	—	(18.9)

¹ As a result of the sale transaction discussed below, the investment in Asanko was classified as an asset held for sale at 31 December 2023 and was required to be measured at the lower of carrying value or fair value less costs to sell. Management determined the fair value less costs to sell based on the consideration to be received per the sale agreement. The assumptions used in the determination of the fair values of the deferred and contingent considerations were as follows:

- The share consideration was calculated as 28.5 million Galiano shares at a share price of US\$0.92 at 31 December 2023;
- US\$25 million and US\$30 million deferred consideration discounted using a rate of 7.9%; and
- US\$30 million contingent consideration discounted using a rate of 15.1%.

The fair value was allocated first to the Asanko redeemable preference shares based on the fair value of the preference shares using the expected redemption period. The residual amount after deducting the fair value of the preference shares from the total fair value of the consideration was allocated to the Asanko Gold equity-accounted investee, which resulted in an impairment of US\$46.9 million for the year ended 31 December 2023.

On 21 December 2023, Gold Fields announced the divestment of its 45% shareholding in Asanko Gold (both the preference shares and equity-accounted investee) to the joint venture partner Galiano Gold for a total consideration of US\$170 million. Gold Fields will also receive a 1% net smelter royalty on future production from the Nkran deposit, the main deposit at the mine.

The Asanko mine was owned 45% each by Gold Fields and Galiano Gold, with Galiano managing the mine. The Government of Ghana holds the remaining 10%.

The transaction would be settled by Galiano to Gold Fields through a combination of upfront, deferred and contingent consideration as follows:

- US\$85 million which was settled with US\$65 million in cash and US\$20 million in Galiano shares on completion of the transaction;
- US\$25 million which was paid on 31 December 2025;
- US\$30 million to be paid on 31 December 2026; and
- US\$30 million plus a 1% net smelter royalty ("contingent consideration") to be paid once more than 100,000 ounces of gold is produced from the Nkran deposit. The royalty is capped at a volume of 447,000 ounces of gold production from the deposit.

The share of results of equity investee of Asanko Gold for the year ended 31 December 2023 was presented as a discontinued operation in the consolidated financial statements.

The transaction was subject to a number of conditions and was concluded on 4 March 2024 with the receipt of US\$65.0 million in cash and 28.5 million in Galiano shares, resulting in the recognition of a profit on disposal amounting to US\$5.6 million in 2024.

The Asanko deferred and contingent considerations were recognised as follows:

	United States Dollars	United States Dollars
<i>Figures in millions unless otherwise stated</i>	2025	2024
– Present value/Fair value at beginning of the year (2024: 4 March 2024)	67.9	61.1
– Net change in fair value/unwinding of discount rate	7.2	6.8
– Settlement of US\$25 million deferred consideration on 31 December 2025	(25.0)	—
Asanko deferred and contingent considerations	50.1	67.9
Current portion of Asanko deferred and contingent considerations	(28.1)	(23.3)
Non-current portion of Asanko deferred and contingent considerations	22.0	44.6

The total consideration receivable of US\$50.1 million (2024: US\$67.9 million) comprise US\$22.0 million (2024: US\$18.4 million) contingent consideration valued at fair value and US\$28.1 million (2024: US\$49.5 million) deferred consideration carried at amortised cost. During 2025, a net change in fair value of US\$3.6 million (2024: US\$3.3 million) was recognised for the contingent consideration and an unwinding of the discount rate of US\$3.6 million (2024: US\$3.5 million) was recognised for the deferred consideration.

The key inputs used in the fair value of the contingent consideration at 31 December 2025 were the discount rate of 10.9% (2024: 13.0%) and the contractually agreed period. The key inputs used in the valuation of the deferred consideration at 31 December 2025 were the discount rate of 6.6% (2024: 7.1%) and the contractually agreed period.

On 12 December 2025, Gold Fields entered into agreements to sell a portfolio of royalty assets for a total cash consideration of US\$115.0 million and its right to the Asanko deferred and contingent considerations for US\$30.0 million and US\$22.0 million, respectively. Refer note 40 for further details.

16 Assets held for sale

	United States Dollars	
<i>Figures in millions unless otherwise stated</i>	2025	2024
(a) O3 Mining Inc. ("O3 Mining")	—	21.1
(b) Royalties	77.5	—
Assets held for sale	77.5	21.1

(a) O3 Mining

On 12 December 2024, Agnico Eagle Mines Limited ("Agnico Eagle") and O3 Mining Inc. ("O3 Mining") announced that they entered into a definitive support agreement, pursuant to which Agnico Eagle agreed to offer to acquire, directly or indirectly, all of the outstanding common shares of O3 Mining at US\$1.67 per common share.

At 31 December 2024, the investment in O3 Mining was presented as an asset held for sale as Gold Fields entered into the lock-up agreement with Agnico Eagle before 31 December 2024.

On 24 January 2025, Agnico Eagle acquired 110,424,431 common shares of O3 Mining, which included the Gold Fields owned shares, representing approximately 94.1% of the outstanding common shares. Gold Fields received US\$21.3 million for the disposal of its O3 Mining shares.

(b) Sale of royalty portfolio

On 12 December 2025, Gold Fields entered into agreements to sell a portfolio of royalty assets for a total cash consideration of US\$115.0 million and its right to the Asanko deferred and contingent considerations for US\$30.0 million and US\$22.0 million, respectively.

Certain assets within the royalty portfolio, having a combined a value of US\$77.5 million, were subject to a third-party right of first refusal ("ROFR"). Completion of the overall transaction was conditional upon the purchaser acquiring these royalties.

At 31 December 2025, the US\$77.5 million royalties were presented as assets held for sale as the sale was considered highly probable in the sense that they will be purchased either by the purchaser or the third party. A fair value gain of US\$77.5 million was recognised in profit or loss.

At that date, the outcome of the ROFR was unknown and no evidence existed that the sale of the remaining royalty portfolio amounting to US\$37.5 million or the deferred and contingent considerations were highly probable and therefore they were not recognised as held for sale. Refer note 40.

(c) Rusoro

On 9 January 2024, Gold Fields announced that it entered into a share purchase agreement (the "Agreement") with Fulcrum Global Markets LLC, a Delaware limited liability company ("Fulcrum"), to sell its 140,000,001 common shares ("Common Shares") in the capital of Rusoro for an aggregate initial cash purchase price of US\$62.3 million and certain additional contingent consideration upon the occurrence of specified events described below (the "Transaction").

Under the Agreement, Gold Fields will be entitled to receive from Fulcrum the following additional contingent consideration for the Common Shares to be purchased by Fulcrum (the "Purchased Shares"):

- A top-up amount in cash calculated in accordance with the Agreement in the event that, within 18 months following closing of the Transaction, Fulcrum or any of its affiliates acquires, directly or indirectly, in one or more transactions, additional Common Shares which collectively result in their aggregate holdings exceeding 50% of the issued and outstanding Common Shares; and
- An amount in cash equal to 15% of the value of any gross proceeds paid at any time to Fulcrum or any of its affiliates by Rusoro or third parties in respect of the Purchased Shares (including in connection with any disposition of the Purchased Shares, or as a dividend, distribution, return of capital, share repurchase or similar amount), to the extent that the gross amount of such cumulative proceeds exceeds US\$210 million.

The investment in Rusoro was presented as an asset held for sale at 31 December 2023 as Fulcrum was in advanced discussions with Gold Fields at 31 December 2023 to purchase the Rusoro shares from Gold Fields.

The US\$62.3 million was received by Gold Fields on 22 January 2024, resulting in the recognition of a profit on disposal of Rusoro amounting to US\$62.3 million in 2024.

¹ Refer to note 18.2 for details of the Osisko asset acquisition.

² Refer to notes 18.3 and 19 for details of the Gold Road acquisition.

³ The re-measurements in 2025 relate mainly to leases at the Group's Australian operations that have variable payments linked to the Australian consumer price index ("CPI"). (2024: Leases at the Group's Australian operations that have variable payments linked to the Australian CPI).

⁴ General borrowing costs of US\$69.1 million (2024: US\$105.6 million) arising on Group general borrowings relating to the Salares Norte project and were capitalised during the year up to 31 August 2025, the date Salares Norte reached commercial levels of production. An average interest capitalisation rate of 4.3% (2024: 7.0%) was applied.

18. Acquisitions

18.1 Acquisition of Windfall Project

Background

On 2 May 2023, Gold Fields, through a 100% held Canadian subsidiary, acquired a 50% interest in the Windfall Project (the "Partnership") in Québec, Canada, which is in the feasibility stage, from Osisko Mining Incorporated.

- Under the Partnership structure, each of Osisko Mining Incorporated ("Osisko") and Gold Fields, respectively, held an effective 50% partnership interest in the Windfall Project and the Exploration Properties; and
- The management company (responsible for the operation) would be governed by a Board of Directors comprising three directors nominated by Gold Fields and three directors nominated by Osisko. Decisions over the relevant activities of the Partnership required unanimous consent of both the parties.

On 12 August 2024, Gold Fields entered into an agreement with Osisko to acquire 100% of its issued share capital. This represents a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project (the "second Transaction"). The acquisition date was 25 October 2024, the date on which all conditions precedent were met and the consideration was paid in full by Gold Fields. Refer note 18.2.

Recognition and measurement

Gold Fields and Osisko previously had joint control over the Windfall Project, the initial transaction was structured as a separate vehicle and the Group had a residual interest in the net assets of the Windfall Project. Accordingly, the Group classified its interest in the Windfall Project as a joint venture.

When an equity-accounted investment is acquired in stages and results in control of an entity that is not a business, the previously held interest is recognised at its carrying amount as part of the total cost of acquisition. On 25 October 2024, the initial 50% interest in the Windfall Project was derecognised as a joint venture and recognised at its carrying value as an asset acquisition together with the additional 50% interest held by Osisko, in terms of the second Transaction. Refer note 18.2.

Consideration

The following summarises the consideration and the cost of the Windfall joint venture:

	United States Dollar	Canadian Dollar	United States Dollar	Canadian Dollar

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

18.1 Acquisition of Windfall Project *continued*

Consideration *continued*

(a) C\$300 million cash payment

The US\$221.5 million (C\$300 million) cash payment represented the initial consideration paid on 2 May 2023 for the 50% interest in the joint venture.

(b) Pre-closing paid amounts

Osisko acquired certain assets for the benefit of the Windfall Project during the term sheet negotiation stage. Gold Fields agreed to refund Osisko 50% of the costs spent on these items in two equal payments of US\$12.8 million (C\$16.9 million) on 31 July 2023 and US\$12.8 million (C\$16.9 million) on 31 December 2023, respectively.

(c) C\$300 million contingent consideration

The C\$300.0 million contingent consideration was payable on issuance of an Environmental Impact Assessment ("EIA") permit to the Partnership authorising the construction and operation of the Windfall Project. In terms of the second Transaction, the C\$300.0 million contingent consideration is no longer payable.

The fair value of the contingent consideration was determined using a Monte Carlo valuation model that considers various scenarios and possibilities around the potential outcome of the EIA permit approval process and the timing of when the contingent consideration will be paid.

	25 Oct 2024	31 Dec 2023
<i>Key assumptions of the contingent consideration:</i>		
• – Fair value factor calculated using the Monte-Carlo valuation model using the following inputs:	0.931	0.894
– Probability	98 %	98 %
– Discount rate	5.7 %	7.0 %

	United States Dollar	Canadian Dollar
<i>Figures in millions unless otherwise stated</i>		
<i>Using the above inputs and valuation technique, the fair value of the contingent consideration amounted to:</i>		
Fair value at 2 May 2023	190.8	258.4
Net change in fair value	7.3	9.9
Translation	4.4	—
Fair value at 31 December 2023	202.5	268.3
Net change in fair value	8.0	10.9
Derecognition on 25 October 2024	(200.4)	(279.2)
Translation	(10.1)	—
Fair value at 25 October 2024	—	—

18.1 Acquisition of Windfall Project *continued*

Consideration *continued*

(d) C\$75 million exploration consideration

As part of the acquisition of the Windfall Project, Gold Fields acquired a 50% interest in certain developmental exploration projects and targets for a C\$75.0 million funding commitment by Gold Fields over 5 years commencing 2025. The C\$75.0 million funding commitment represented 100% of the initial exploration funding. The C\$75.0 million would be scheduled over the period of the exploration agreement and discounted using a market related discount rate. In terms of the second Transaction, the C\$75.0 million exploration consideration is no longer payable.

	25 Oct 2024	31 Dec 2023
<i>Key assumptions of the exploration consideration:</i>		
– Term	5.1 years	6.3 years
– Discount rate	5.7 %	7.0 %

	United States Dollar	Canadian Dollar
<i>Figures in millions unless otherwise stated</i>		
Using the above inputs, the value of the exploration consideration amounted to:		
Present value at 2 May 2023	39.1	52.9
Unwinding of discount rate	2.9	3.9
Translation	0.9	—
Carrying value at 31 December 2023	42.9	56.8
Unwinding of discount rate	4.8	6.6
Derecognition on 25 October 2024	(45.5)	(63.4)
Translation	(2.2)	—
Carrying value at 25 October 2024	—	—

(e) Capital considerations

The project required funding from the Partnerships in the feasibility and development stage of the project. During 2024 Gold Fields paid cash calls amounting to US\$65.3 million (C\$89.0 million) (2023: US\$69.1 million (C\$93.0 million)) to the Windfall Project which has been capitalised to the cost of the investment.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

18.2 Acquisition of Osisko Mining Incorporated

Background

On 2 May 2023, Gold Fields acquired a 50% interest in the Windfall Project from Osisko. Refer note 18.1 for further details.

On 12 August 2024, Gold Fields entered into an agreement with Osisko to acquire 100% of its issued share capital. This represents a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project.

The acquisition date was 25 October 2024, the date on which all conditions precedent were met and the consideration was paid in full by Gold Fields.

Recognition and measurement

The only significant asset acquired in Osisko is the additional 50% interest in the Windfall Project. As part of the acquisition, Gold Fields did not acquire sufficient infrastructure or processes, including an organised workforce, which could develop the acquired inputs into an operating mine. Accordingly, the transaction was accounted for as an asset acquisition. The previously held 50% interest in the Windfall Project was recognised at its carrying value as part of the total cost of the asset acquisition.

Consideration

The following summarises the total purchase consideration of the transaction:

	United States Dollar	Canadian Dollar
<i>Figures in millions unless otherwise stated</i>		
(a) Cash consideration	1,483.2	2,060.6
(b) Carrying value of previously held Windfall Project joint venture	519.3	723.5
(c) Transaction costs	8.5	11.9
(d) C\$300.0 million contingent consideration - fair value	(200.4)	(279.2)
(e) C\$75.0 million exploration consideration - 50% apportionment	(22.8)	(31.7)
(f) C\$110.3 million pre-existing payable	(79.2)	(110.3)
Total purchase consideration	1,708.6	2,374.8

(a) Cash consideration

The US\$1,483.2 million (C\$2,060.6 million) cash represents the initial consideration paid on 25 October 2024 for 420.53 million shares at the purchase price of C\$4.90 per Osisko share in an all-cash transaction.

(b) Carrying value of previously held Windfall Project joint venture

The US\$519.3 million (C\$723.5 million) represents the derecognition of the carrying value of the previously held Windfall Project as a joint venture at 25 October 2024 and recognised as an asset acquisition along with the additional 50% interest held by Osisko. Refer to note 18.1 for further details.

(c) Transaction costs

Transaction costs of US\$8.5 million (C\$11.9 million) relating to the asset acquisition were capitalised on 25 October 2024.

(d) C\$300.0 million contingent consideration - fair value

The fair value of the C\$300.0 million contingent consideration at 25 October 2024 was US\$200.4 million (C\$279.2 million). In terms of the transaction the consideration is no longer payable and has been eliminated. Refer to note 18.1 (c) for the key inputs used in valuation of the fair value at 25 October 2024.

(e) C\$75.0 million exploration consideration – 50% apportionment

The C\$75.0 million exploration consideration represented 100% of the initial exploration funding. Refer to note 18.1 (d) for further details. 50% of the remaining exploration consideration payable by Gold Fields has been purchased back as a result of the transaction and reduces the purchase consideration by US\$22.8 million (C\$31.7 million).

(f) C\$110.3 million pre-existing payable

On acquisition, a pre-existing payable of C\$110.3 million (US\$79.2 million) between Osisko and Gold Fields was extinguished.

18.2 Acquisition of Osisko Mining Incorporated *continued*

Assets acquired and liabilities assumed

The purchase consideration at 25 October 2024 was allocated based on the relative fair values of the assets acquired and liabilities assumed as follows:

<i>Figures in millions unless otherwise stated</i>		United States Dollar	Canadian Dollar
ASSETS			
Non-current assets		1,743.5	2,423.3
Listed investment		28.7	40.0
Equity accounted investee		8.0	11.2
Property, plant and equipment ¹		1,706.8	2,372.1
Current assets		44.0	61.4
Cash and cash equivalents		30.7	42.8
Trade and other receivables		9.7	13.5
Inventories		2.2	3.1
Other		1.4	2.0
Total assets		1,787.5	2,484.7
LIABILITIES			
Non-current liabilities		49.7	69.2
Lease liabilities		43.0	59.9
Environmental rehabilitation costs		6.7	9.3
Current liabilities		29.2	40.7
Trade and other payables		21.4	29.8
Current portion of lease liabilities		7.8	10.9
Total liabilities		78.9	109.9
Net assets		1,708.6	2,374.8

¹ The following key assumptions were used in the valuation of the mineral rights amounting to US\$1,329.1 million (C\$1,845.8 million) included in property, plant and equipment:

- Gold price: Long-term gold price of US\$2,100 per ounce;
- Discount rate: Real weighted average cost of capital ("WACC") of 7.9%;
- Exchange rate: Long term C\$/US\$ exchange rate of 0.761; and
- Resource multiple: US\$37 per resource ounce.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

18.3 Acquisition of Gold Road

Background

On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road Resources Limited ("Gold Road") for the development and operation of the Gruyere Gold Project in Western Australia, which comprises the Gruyere gold deposit as well as additional resources including Central Bore and Attila/Alaric.

On 5 May 2025, Gold Fields entered into an agreement to acquire 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project (the "second Transaction"). The acquisition date was 26 September 2025, the date on which all conditions precedent were met and control of Gold Road was obtained.

Recognition and measurement

Gold Fields and Gold Road previously had joint control over the Gruyere Gold Project. Accordingly, the Group classified its interest in the project as a joint operation.

When a joint operation is acquired through stages that results in control of an entity that is a business, the transaction is treated as a business combination achieved in stages. On 26 September 2025, the previously held 50% interest in the Gruyere Gold Project was remeasured to its fair value and the resulting gain was recognised in profit or loss. The fair value of the previously held 50% interest was included as part of the total cost of the operation and recognised as a business combination together with the additional 50% interest held by Gold Road, in terms of the second Transaction.

Consideration

The following summarises the consideration for the business combination at 26 September 2025:

<i>Figures in millions unless otherwise stated</i>	United States Dollar	Australian Dollar
(a) Fixed cash consideration	1,490.3	2,276.5
(b) Variable cash consideration	702.0	1,072.3
(c) Fair value of previously held interest in joint operation	1,197.9	1,829.8
(d) Add: Special dividend	312.6	477.5
Total purchase consideration	3,702.8	5,656.1

(a) Fixed cash consideration

The US\$1,490.3 million (A\$2,276.5 million) cash represents the fixed cash consideration of US\$1,802.9 million (A\$2,754.0 million) paid for 1,092,838,545 Gold Road shares at a purchase price of A\$2.52 per share, less the US\$312.6 million (A\$477.5 million) special dividend of A\$0.43694 per Gold Road share. The special dividend was declared by the Gold Road Board on 16 September 2025 and was payable to Gold Road shareholders. The final fixed consideration portion amounted to A\$2.08306 per Gold Road share.

(b) Variable cash consideration

The US\$702.0 million (A\$1,072.3 million) cash represents the variable cash consideration paid for 1,092,838,545 shares at the purchase price of A\$0.98117 per Gold Road share in an all-cash transaction. This reflects the shareholders proportionate value of Gold Road's shareholdings in Northern Star Resources Ltd ("Northern Star"). The purchase price of A\$0.98117 was determined by the weighted average price of Northern Star shares during the five trading days up to and including 25 September 2025.

(c) Previously held interest in joint operation

The US\$1,197.9 million (A\$1,829.8 million) represents the fair value of the previously held 50% interest in joint operation derecognised at 26 September 2025 and recognised as a business combination together with the additional 50% interest held by Gold Road. The fair value of the previously held 50% interest was based on its fair value less cost of disposal "FVLCD") calculated using a combination of the market (resource value) and the income approach. Refer the next page for assumptions used in the valuation.

The table below summarises the gain on remeasurement at acquisition date:

<i>Figures in millions unless otherwise stated</i>	United States Dollar	Australian Dollar
Fair value of 50% previously held interest in joint operation	1,197.9	1,829.8
Less: Carrying value of 50% previously held interest in joint operation	(389.7)	(595.3)
Gain on remeasurement of 50% previously held interest in joint operation	808.2	1,234.5

(d) Special dividend

The US\$312.6 million (A\$477.5 million) cash represents a special dividend of A\$0.43694 per Gold Road share payable to Gold Road shareholders as part of the contractual requirements of the second Transaction. The special dividend was funded by Gold Road's existing cash balances.

18.3 Acquisition of Gold Road *continued*

Transaction costs

Transaction costs of US\$51.4 million (A\$79.8 million) relating to the second Transaction were recognised in profit or loss for the year ended 31 December 2025.

Assets acquired and liabilities assumed

The fair values of assets acquired and liabilities assumed at 26 September 2025 are as follows:

	United States Dollar	Australian Dollar
<i>Figures in millions unless otherwise stated</i>		
ASSETS		
Non-current assets	3,987.8	6,091.5
Investments	742.1	1,133.6
Property, plant and equipment	643.5	983.0
Right-of-use assets	135.8	207.4
Inventories	25.1	38.4
Mining rights ¹	2,441.3	3,729.1
Current assets	557.7	851.9
Cash and cash equivalents	386.5	590.4
Trade and other receivables	27.2	41.5
Inventories	144.0	220.0
Total assets	4,545.5	6,943.4
Non-current liabilities	534.1	815.9
Lease liabilities	113.0	172.6
Environmental rehabilitation costs	47.5	72.6
Deferred taxation	371.8	568.0
Long-term incentive plan	1.8	2.7
Current liabilities	308.6	471.4
Borrowings	197.1	301.1
Trade and other payables	73.8	112.7
Current portion of environmental rehabilitation costs	0.8	1.2
Current portion of lease liabilities	22.8	34.8
Royalties and taxation payable	14.1	21.6
Total liabilities	842.7	1,287.3
Net assets	3,702.8	5,656.1

¹ The following key assumptions were used in the valuation of mining rights and the previously held 50% interest:

- Gold price: Long-term gold price of US\$2,646 (A\$3,675) per ounce;
- Discount rate: Real weighted average cost of capital ("WACC") of 6.8%;
- Exchange rate: Long-term A\$/US\$ exchange rate of 0.72; and
- Resource multiple: US\$106.7 per resource ounce.

Revenue and profit after taxation of the acquiree (Gold Road) from 26 September 2025 to 31 December 2025 amounted to US\$151.3 million and US\$49.0 million, respectively.

Revenue and profit after taxation of the combined entity for the year ended 31 December 2025 amounted to US\$9,111.0 million and US\$3,747.6 million, respectively. The combined entity includes the Gold Fields Group, Gold Road and Gold Road acquisition PPA adjustments and the figures were presented as if the acquisition was completed at the beginning of the year.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

19. Equity accounted investees

		United States Dollar		
<i>Figures in millions unless otherwise stated</i>		2025	2024	2023
Investment in joint ventures		—	—	
(a)	Far Southeast Gold Resources Incorporated ("FSE")	—	—	
(b)	Windfall Project	—	—	
Investment in associates		2.8	12.6	
(c)	Other associates	2.8	12.6	
Total equity accounted investees		2.8	12.6	
Share of results of equity accounted investees, net of taxation recognised in the consolidated income statement are made up as follows:				
(a)	Far Southeast Gold Resources Incorporated ("FSE")	—	(1.5)	(1.3)
	Asanko Gold – earnings ¹	—	—	28.0
	Asanko Gold – impairment ¹	—	—	(46.9)
(b)	Windfall Project	—	(47.5)	(28.4)
(c)	Other associates	(2.3)	(4.6)	(2.9)
Share of results of equity investees, net of taxation		(2.3)	(53.6)	(51.5)
Asanko Gold – recognised as a discontinued operation ¹		—	—	18.9
Total share of results of equity investees, net of taxation		(2.3)	(53.6)	(32.6)

¹ Gold Fields and Asanko had joint control over the Asanko joint venture entities. The Asanko operation was structured as a separate vehicle and the Group had a residual interest in the net assets of Asanko. Accordingly, the Group had classified its interest in Asanko as a joint venture. On 21 December 2023, Gold Fields announced the divestment of its 45% shareholding in Asanko Gold and the investment was presented as held for sale at 31 December 2023. The share of results of equity investee of Asanko Gold for the year ended 31 December 2023 was presented as a discontinued operation. Refer note 15 for further details. Asanko had a 31 December year-end and was equity accounted since 31 July 2018 up to the date it was classified as held for sale.

(a) FSE

Gold Fields interest in FSE, an unlisted entity incorporated in the Philippines, was nil% (2024: nil% and 2023: 40%) at 31 December 2025. Lepanto Consolidated Mining Company owned the remaining 60% shareholding in FSE during 2024 and 2023.

During 2024, Gold Fields disposed of FSE for US\$1.0 million.

FSE had a 31 December year-end and had been equity accounted since 1 April 2012. FSE's equity accounting was based on results to the date of disposal.

Investment in joint venture consists of:

		United States Dollar	
<i>Figures in millions unless otherwise stated</i>		2025	2024
Unlisted shares at cost		—	230.0
Equity contribution		—	100.6
Impairment – prior years		—	(230.0)
Share of accumulated losses brought forward		—	(99.1)
Share of loss after taxation ¹		—	(1.5)
Total investment in joint venture²		—	—

¹ Gold Fields' share of loss after taxation represented exploration and other costs, including work completed on a scoping study, which was fully funded by Gold Fields as part of their equity contribution.

² FSE had no revenues or significant assets or liabilities. Assets included in FSE represented the rights to explore and eventually mine the FSE project.

19. Equity accounted investees *continued*

(b) Windfall Project

On 2 May 2023, Gold Fields, through a 100% held Canadian subsidiary, acquired a 50% interest in the Windfall Project in Québec, Canada, which is in the feasibility stage, from Osisko Mining Incorporated (the "Partnership").

On 12 August 2024, Gold Fields entered into an agreement with Osisko to acquire 100% of its issued share capital. This represents a direct acquisition of Osisko as well as an indirect acquisition of the remaining 50% interest in the Windfall Project (the "second Transaction"). The acquisition date was 25 October 2024, the date on which all conditions precedent were met and the consideration was paid in full by Gold Fields. Refer note 18.2.

Gold Fields and Osisko previously had joint control over the Windfall Project, the initial transaction was structured as a separate vehicle and the Group had a residual interest in the net assets of the Windfall Project. Accordingly, the Group classified its interest in the Windfall Project as a joint venture.

On 25 October 2024, the initial 50% interest in the Windfall Project was derecognised as a joint venture and recognised as an asset acquisition together with the additional 50% interest held by Osisko, in terms of the second Transaction. Refer note 18.2.

The Partnership had a 31 December year-end and was equity accounted since 2 May 2023. The Partnership's equity accounting was based on results to 25 October 2024.

The following table summarises the financial information and the carrying amount of the Group's interest in the Partnership:

	United States Dollar		Canadian Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024	2025	2024

C\$75.0 million exploration consideration				
– Unwinding of discount rate	—	4.8	—	6.6
Share of loss¹	—	(47.5)	—	(64.9)
Derecognition of Windfall Project joint venture²	—	(519.3)	—	(723.5)
Derecognition of 50% exploration consideration²	—	(22.8)	—	(31.7)
Translation adjustment	—	(27.1)	—	—
Carrying value at 31 December	—	—	—	—

¹ The Windfall Project share of loss for 2024 related mainly to exploration expenses.

² Derecognised at 25 October 2024, the acquisition date of the transaction.

(c) Other

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Investment in associates - other	2.8	12.6
Lunnon Metals Limited ("Lunnon") ¹	2.8	4.8
Vior Mining Exploration Company Inc. ("Vior") ²	—	7.8

¹ During 2025, Gold Fields recognised a share of loss for the year of US\$2.3 million (2024: US\$4.7 million). Gold Fields' interest in Lunnon was 30.5% (2024: 30.5%) at 31 December 2025.

² Vior was acquired as part of the Osisko acquisition during 2024. On 27 February 2025, Gold Fields' shareholding was diluted to below 20%. An assessment was performed and the Group concluded it no longer had significant influence and Vior was reclassified to listed investments. Gold Fields recognised a share of profit of US\$nil (2024: US\$0.1 million) up to the date of classification to listed investments. Gold Fields' interest in Vior was 19.96% (2024: 20.7%) at 31 December 2025.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

20. Interest in joint operation

On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road Resources Limited ("Gold Road") for the development and operation of the Gruyere Gold Project in Western Australia, which comprises the Gruyere gold deposit as well as additional resources including Central Bore and Attila/Alaric.

On 5 May 2025, Gold Fields entered into an agreement to acquire 100% of the issued and outstanding share capital of Gold Road. This represents a direct acquisition of Gold Road, as well as an indirect acquisition of the remaining 50% interest in the Gruyere Gold Project (the "second Transaction"). The acquisition date was 26 September 2025, the date on which all conditions precedent were met and control of Gold Road was obtained.

Gold Fields and Gold Road previously had joint control over the Gruyere Gold Project. Accordingly, the Group classified its interest in the project as a joint operation.

When a joint operation is acquired through stages that results in control of an entity that is a business, the transaction is treated as a business combination achieved in stages. On 26 September 2025, the previously held 50% interest in the Gruyere Gold Project was remeasured to its fair value and the resulting gain was recognised in profit or loss. The fair value of the previously held 50% interest was included as part of the total cost of the operation and recognised as a business combination together with the additional 50% interest held by Gold Road, in terms of the second Transaction. Refer note 18.3 for further details.

Below is a summary of Gold Fields' share of the joint operation and included inter-company transactions and balances up to the date of recognition as a business combination:

	26 September 2025		31 December 2024

Authorised²	2,000,000,000	2,000,000,000

¹ Treasury shares amounting to 1,089,671 were purchased by the Group at an average price paid of US\$33.52 and a portion was issued to participants upon vesting of employee share options in 2025.

² Share capital comprises no par value shares.

Authorised and issued

Holders of shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company.

In terms of the general authority granted by shareholders at the AGM on 28 May 2025, the authorised but unissued ordinary stated capital of the Company representing not more than 5% of the issued stated capital of the Company from time to time at that date, after setting aside so many ordinary shares as may be required to be allotted and issued pursuant to the share incentive schemes. This authority expires at the next Annual General Meeting where shareholders will be asked to place under the control of the Directors the authorised but unissued ordinary stated capital of the Company representing not more than 5% of the issued stated capital of the Company from time to time.

In terms of the JSE Listings Requirements, shareholders may, subject to certain conditions, authorise the Directors to issue the shares held under their control for cash, other than by means of a rights offer, to shareholders. In order that the Directors of the Company may be placed in a position to take advantage of favourable circumstances which may arise for the issue of such shares for cash, without restriction, for the benefit of the Company, shareholders will be asked to consider a special resolution to this effect at the forthcoming AGM.

Repurchase of shares

During 2025, the Company exercised the general authority granted at the AGM held on 28 May 2025 to buy back shares from its issued ordinary stated capital. Treasury shares totalling 1,089,671 were bought during 2025 and 483,964 were issued to participants upon vesting of the employee share options.

In addition, the Company will implement a share buy-back programme during the 2026 financial year, subject to prevailing market conditions and applicable regulatory requirements. Refer note 40 for further details.

Currently, the number of ordinary shares that may be bought back in any one financial year may not exceed 5% of the issued ordinary share capital as of 28 May 2025. At the next AGM, shareholders will be asked to renew the general authority for the acquisition by the Company, or a subsidiary of the Company, of its own shares.

Beneficial shareholding

The following beneficial shareholders hold 5% or more of the Company's listed ordinary shares at 31 December 2025:

	Number of shares	% of issued ordinary shares
Public Investment Corporation (Government Employees Pension Fund) ¹	180,381,384	20.15 %

¹ The only transactions between Gold Fields and Public Investment Corporation related to dividends paid.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

27. Deferred taxation

The detailed components of the net deferred taxation liability which results from the differences between the carrying amounts of assets and liabilities recognised for financial reporting and taxation purposes in different accounting periods are:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Liabilities		
– Mining assets	1,568.1	814.6
– Right-of-use assets	108.3	110.5
– Investment in environmental trust funds	7.2	5.6
– Inventories	45.0	22.8
– Other	93.8	61.9

Recognised in OCI	(4.5)	6.9
Translation adjustment	51.8	(22.0)
Balance at end of the year	1,363.5	348.9

¹ Tax losses and unredeemed capital expenditure have been recognised, as disclosed in note 11, to the extent that the tax paying entities will have taxable profits in the foreseeable future (per the life-of-mine models of the respective operations) in order to utilise the unused tax losses and unredeemed capital expenditure before they expire. This was particularly assessed with reference to the South Deep and Damang life-of-mine models.

² Refer to notes 18.3 and 20 for details of the Gold Road acquisition.

28. Borrowings

The terms and conditions of outstanding loans are as follows:

United States Dollar

Facility	Notes	2025	2024	Borrower	Nominal Interest rate	Commitment fee	Maturity date

Non-current borrowings		2,559.5	1,776.5				

¹ On 9 May 2019, Gold Fields successfully concluded the raising of two new bonds, raising a total of US\$1 billion at an average coupon of 5.625%. On 15 May 2024, the US\$500 million 5-year notes matured and were repaid.

The balance of the 10-year notes is net of unamortised transaction costs amounting to US\$1.7 million (2024: US\$2.1 million).

The 10-year notes are unconditionally and irrevocably guaranteed by Gold Fields Limited ("Gold Fields"), Gold Fields Ghana Holdings (BVI) Limited ("GF Ghana") and Gold Fields Holdings Company (BVI) Limited ("GF Holdings") (collectively "the Guarantors"), on a joint and several basis.

² On 13 May 2025, Gold Fields successfully concluded the raising of US\$750 million 7-year notes at a coupon of 5.854%.

The balance of the 7-year notes is net of unamortised transaction costs amounting to US\$6.8 million.

The 7-year notes are unconditionally and irrevocably guaranteed by Gold Fields and GF Holdings (collectively "the Guarantors"), on a joint and several basis.

The net proceeds from the 7-year notes were used to repay in full the outstanding loans under the US\$750 million multi-currency bridge facilities.

³ On 10 May 2024, the US\$150 million revolving senior secured credit facility was refinanced with the US\$85 million revolving senior secured credit facility and cancelled.

The US\$85 million revolving senior credit facility was cancelled on 9 July 2025.

⁴ On 27 September 2021, Gold Fields Ghana Limited ("GF Ghana Limited") and Abosso Goldfields Limited ("Abosso") entered into a US\$100 million revolving credit facility. Borrowings under the facility are guaranteed by GF Ghana Limited and Abosso. This facility is non-recourse to the rest of the Group.

During April 2025, the maturity date of the facility was extended to 13 April 2026.

⁵ On 26 September 2023, Gruyere Holdings Proprietary Limited entered into a A\$500 million syndicated revolving credit facility.

The A\$500 million syndicated revolving credit facility has a A\$100 million accordion option (at the discretion of the lenders) and is a sustainability linked facility. The facility is linked to the achievement of three of Gold Fields' key ESG priorities namely gender diversity, decarbonisation and water stewardship. The achievement of the ESG metrics could impact the interest rate by up to a 0.05% decrease in rate to a 0.05% increase in rate.

Borrowings under the facility are guaranteed by Gold Fields, GF Holdings, Orogen and Gruyere.

⁶ On 25 May 2023, Gold Fields Orogen Holding (BVI) Limited ("Orogen") entered into a US\$1,200 million revolving credit facility.

The US\$1,200 million revolving credit facility is a sustainability linked facility which is linked to the achievement of three of Gold Fields' key ESG priorities namely gender diversity, decarbonisation and water stewardship. The achievement of the ESG metrics could impact the interest rate by up to a 0.05% decrease in rate to a 0.05% increase in rate.

The key terms of the new facility are:

- A principal loan amounting to US\$1,200 million, with a US\$400.0 million accordion option, subject to lender consent;
- Maturity of five years, with an option to extend the tenor through two one-year extensions;
- A competitive margin, subject to rating margin achievements and sustainability margin adjustments. The rating margin achievements and sustainability margin adjustments could impact the interest rates.

During October 2023, the facility was amended to include Gold Fields Windfall Holding Inc ("Windfall") as a borrower.

During 2025, the facility was extended by one year, the maturity dates are as follows:

- US\$83.3 million matures on 25 May 2028;
- US\$50.0 million matures on 25 May 2029; and
- US\$1,066.7 million matures on 25 May 2030.

Borrowings under this facility are guaranteed by Gold Fields, GF Holdings, Orogen and Windfall.

⁷ On 18 October 2024, Orogen and Windfall entered into a US\$500 million multi-currency bridge facility and a US\$250 million multi-currency parallel bridge facility (collectively called the "US\$750 million multi-currency bridge facilities"). The facility was used to finance the Osisko asset acquisition.

The facilities had a maturity date of 17 October 2025 and was fully repaid and cancelled in May 2025.

Borrowings under the facilities were guaranteed by Gold Fields, GF Holdings, Orogen and Windfall.

⁸ On 15 July 2025, Gruyere entered into a US\$2,300 million multi-currency syndicated bridge facility. The facility was used to finance the acquisition of Gold Road.

On 12 January 2026, the facility was repaid in full and cancelled, utilising available cash resources together with proceeds from the A\$1,250 million multi-currency term loan facility.

⁹ On 2 December 2025, Gruyere entered into an A\$1,250 million multi-currency syndicated term loan facility. The proceeds were used to partially repay the US\$2,300 million multi-currency bridge facility.

Borrowings under the facility are guaranteed by Gold Fields, GF Holdings, Windfall and Gruyere.

¹⁰ On 8 May 2023, GFUVH and GFO entered into a R500 million Nedbank revolving credit facility. Borrowings under the facility are guaranteed by Gold Fields, GF Holdings, Orogen, GFO and GFUVH.

¹¹ On 19 April 2023, GFUVH and GFO entered into a R1,000 million Rand Merchant Bank revolving credit facility. Borrowings under the new facility are guaranteed by Gold Fields, GF Holdings, Orogen, GFO and GFUVH.

¹² On 5 May 2023, GFUVH and GFO entered into a R500 million Absa Bank revolving credit facility. Borrowings under the new facility are guaranteed by Gold Fields, GF Holdings, Orogen, GFO and GFUVH.

¹³ On 8 May 2023, GFUVH and GFO entered into a R500 million Standard Bank revolving credit facility. Borrowings under the facility are guaranteed by Gold Fields, GF Holdings, Orogen, GFO and GFUVH.

¹⁴ On 20 August 2025, the R2,500 million ZAR revolving credit facilities were amended to incorporate ZARONIA rate-switch provisions in preparation for the planned cessation of JIBAR as a benchmark on 31 December 2026.

¹⁵ The Group has access to uncommitted loan facilities from some of the major banks. These facilities have no fixed terms, are short-term in nature and interest rates are market related. Borrowings under these facilities are guaranteed by Gold Fields.

for the year ended 31 December 2025

29. Provisions

		United States Dollar	
<i>Figures in millions unless otherwise stated</i>		2025	2024
29.1	Environmental rehabilitation costs	594.5	475.5
29.2	Silicosis settlement costs	5.7	4.9
	Other	0.3	0.8
	Total provisions	600.5	481.2
	Current portion of provisions	(108.3)	(79.2)
	Non-current portion of provisions	492.2	402.0
29.1	Environmental rehabilitation costs		
	Balance at beginning of the year	475.5	452.9
	Changes in estimates – capitalised ¹	29.4	20.6
	Changes in estimates – recognised in profit or loss ¹	43.6	(1.2)
	Osisko asset acquisition ²	—	6.7
	Derecognition of Gruyere previously held interest - 50% ³	(22.7)	—
	Gold Road acquisition through business combination - 100% ³	48.3	—
	Interest expense	29.1	24.8
	Payments	(21.9)	(9.4)
	Translation adjustment	13.2	(18.9)
	Balance at end of the year⁴	594.5	475.5
	Current portion of environmental rehabilitation costs	(105.3)	(78.4)
	Non-current portion of environmental rehabilitation costs	489.2	397.1
	The provision is calculated using the following gross closure cost estimates:		
	South Africa	54.5	43.4
	Ghana	149.1	119.3
	Australia	337.7	228.8
	Peru	220.2	193.7
	Chile	62.7	48.4
	Canada	22.7	7.8
	Total gross closure cost estimates	846.9	641.4

The provision is calculated using the following assumptions:	Inflation rate Year 1	Inflation rate Year 2	Inflation rate Year 3	Inflation rate Year 4 onwards	Discount rate
2025					
South Africa	3.6%	3.2%	3.1%	3.1%	9.0%
Ghana	2.6%	2.3%	2.3%	2.3%	8.2% - 9.4%
Australia	3.0%	2.5%	2.5%	2.5%	4.8% - 5.1%
Peru	2.6%	2.3%	2.3%	2.3%	4.7%
Chile	2.6%	2.3%	2.3%	2.3%	4.8%
Canada	2.1%	2.0%	2.0%	2.0%	3.4%
2024					
South Africa	4.3%	4.6%	4.6%	4.6%	11.1%
Ghana	2.2%	2.3%	2.3%	2.3%	10.9% - 11.3%
Australia	3.0%	2.8%	2.6%	2.5%	4.3% - 4.6%
Peru	2.2%	2.3%	2.3%	2.3%	5.6%
Chile	2.2%	2.3%	2.3%	2.3%	5.2%
Canada	2.0%	2.0%	2.0%	2.0%	3.1%

¹ Changes in estimates are defined as changes in reserves and corresponding changes in life of mine as well as changes in laws and regulations governing environmental matters, closure cost estimates and discount rates.

² Refer to note 18.2 for details of the Osisko asset acquisition.

³ Refer to notes 18.3 and 19 for details of the Gold Road acquisition.

⁴ South African, Ghanaian, Australian, Peruvian, Chilean and Canadian mining companies are required by law to undertake rehabilitation as part of their ongoing operations. These environmental rehabilitation costs are funded as follows:

- Ghana – reclamation bonds underwritten by banks and restricted cash (refer to note 22);
- South Africa – contributions into environmental trust funds (refer to note 22) and guarantees (refer to note 38);
- Australia – cash (refer note 25);
- Peru – bank guarantees (refer note 38) and cash (refer to note 25);
- Canada – bank guarantees (refer note 38); and
- Chile – bank guarantees (refer note 38).

29. Provisions continued

	United States Dollar	
Figures in millions unless otherwise stated	2025	2024
29.2 Silicosis settlement costs¹		
Balance at the beginning of the year	4.9	5.1
Changes in estimates	0.7	(0.3)
Unwinding of provision recognised as finance expense	0.6	0.6
Payment	(1.2)	(0.4)
Translation	0.7	(0.1)
Balance at end of the year	5.7	4.9
Current portion of silicosis settlement costs	(3.0)	(0.8)
Non-current portion of silicosis settlement costs	2.7	4.1

¹ The principal health risks associated with Gold Fields' mining operations in South Africa arise from occupational exposure to silica dust, noise, heat and certain hazardous chemicals. The most significant occupational diseases affecting Gold Fields' workforce include lung diseases (such as silicosis, tuberculosis, a combination of the two and chronic obstructive airways disease ("COAD") as well as noise induced hearing loss ("NIHL").

A consolidated application was brought against several South African mining companies, including Gold Fields, for certification of a class action on behalf of current or former mineworkers (and their dependants) who have allegedly contracted silicosis and/or tuberculosis while working for one or more of the mining companies listed in the application.

The Tshiamiso Trust has been established to carry out the terms of the settlement agreement reached between six gold mining companies (including Gold Fields) and claimant attorneys in the Silicosis and Tuberculosis class action. The Tshiamiso Trust is responsible for ensuring that all eligible current and former mineworkers across southern Africa with Silicosis or work-related Tuberculosis (or their dependants where the mineworker has passed away) are compensated pursuant to the Silicosis and Tuberculosis Class Action Settlement Agreement. Gold Fields provided an amount of US\$5.7 million (R94.6 million) (2024: US\$4.9 million (R92.0 million)) for this obligation in the statement of financial position at 31 December 2025. The nominal amount of this provision is US\$6.5 million (R107.4 million). Gold Fields believes that this remains a reasonable estimate of its share of the settlement of the class action claims and related costs.

The assumptions that were made in the determination of the provision include silicosis prevalence rates, estimated settlement per claimant, benefit take-up rates and disease progression rates. A discount rate of 7.34% (2024: 9.02%) was used, based on government bonds with similar terms to the anticipated settlements. Refer to note 39 for further details.

30. Long-term incentive plan

	United States Dollar	
Figures in millions unless otherwise stated	2025	2024
Opening balance	51.0	78.9
Charge to income statement	43.2	14.5
Derecognition of Gruyere previously held interest - 50% ¹	(1.3)	—
Gold Road acquisition through business combination - 100% ¹	1.8	—
Payments	(33.2)	(38.2)
Translation adjustment	3.0	(4.2)
Balance at end of the year^{2,3}	64.5	51.0
Current portion of long-term incentive plan	(44.1)	(31.0)
Non-current portion of long-term incentive plan	20.4	20.0

¹ Refer to notes 18.3 and 19 for details of the Gold Road acquisition.

² Senior and middle management were granted awards under the LTIP during 2023 and 2024. At the Annual General Meeting on 28 May 2025, shareholders approved the adoption of the Gold Fields Limited 2025 share incentive plan to replace the LTIP. The performance conditions of the LTIP were approved annually by the Remuneration Committee. Performance conditions were based on the same conditions as the share-based payments plan. The expected timing of the cash outflows in respect of each grant is at the end of three years after the original award was made.

³ The value of instruments granted during the years ended 31 December 2024 and 2023 were valued using the Monte Carlo simulation model:

	2024	2023
The inputs to the model for instruments granted during the year were as follows:		
• – weighted average historical volatility (based on a statistical analysis of the share price on a weighted moving average basis for the expected term of the option)	52.6%	51.0%
– expected term (years)	3 years	3 years
– dividend yield*	n/a	n/a
• – average three-year risk free interest rate (based on US interest rates)	3.9%	2.6%
– weighted average fair value (United States dollars)	14.1	9.8

* There is no dividend yield applied to the Monte Carlo simulation model as the performance conditions follow a total shareholder return method.

Notes to the consolidated financial statements *continued*

– later than five years	178.4	131.3	468.3	778.0
	560.9	681.5	2,655.8	3,898.2

¹ No leases were entered into during 2025 for which the use of the assets has not yet commenced at year-end.

² The undiscounted lease liabilities relate to the gross cash flows used to determine the lease liabilities in terms of IFRS 16 Leases and will not agree to the leases recognised in note 37.

³ The non-lease elements are the amounts in the lease contracts relating mainly to contractor mining and power purchase agreements that are not accounted for as part of the lease liabilities.

⁴ These are the total commitments per lease contracts relating mainly to contractor mining and power purchase agreements where the payments have been determined to be fully variable, as a result no lease liability has been recorded. Included in these amounts are payment for non-lease elements of the arrangement.

Guarantees

The Group provides environmental obligation guarantees and other guarantees with respect to its South African, Peruvian, Chilean, Ghanaian, Australian and Canadian operations. These guarantees amounted to US\$230.4 million at 31 December 2025 (2024: US\$233.6 million) (refer note 29.1).

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

39. Contingent liabilities

Randgold and Exploration summons

On 21 August 2008, Gold Fields Operations Limited ("GFO") formerly known as Western Areas Limited, a subsidiary of Gold Fields, received a summons from Randgold and Exploration Company Limited ("R&E") and African Strategic Investment (Holdings) Limited (collectively the "Plaintiffs"). The summons claims that during the period that GFO was under the control of Brett Kebble, Roger Kebble and others, who were directors at the company, GFO assisted in the unlawful disposal of shares owned by R&E in Randgold Resources Limited ("Resources") and Afrikander Lease Limited, now Uranium One.

The claims have been computed in various ways. The highest value of the claims, when last calculated by the Plaintiffs during May 2017, equated to R43.7 billion (US\$2.6 billion). The Plaintiffs are currently undergoing a process to amend their claims. Arising from, inter alia, objections raised by Gold Fields in such process, the Plaintiffs have formally indicated that they intend to abandon significant portions of their claims (such abandonment equating to in excess of R31.0 billion (US\$1.9 billion) of the highest value of their claims). The value of the revised claims will be crystallised once the amendment process has run its course.

GFO has joined certain third parties to the action in order to enable it to claim compensation against such third parties in the event that the plaintiffs are successful in one or more of their claims. In addition, notices in terms of section 2(2)(b) of the Apportionment of Damages Act, 1956 were served on various parties by GFO, in order to enable it to make a claim for a contribution against such parties in terms of the Apportionment of Damages Act, should the plaintiffs be successful in one or more of its claims.

GFO's assessment is that it has sustainable defences to these claims and, accordingly, GFO's attorneys have been instructed to vigorously defend the claims.

The ultimate outcome of the claims cannot presently be determined and, accordingly, no adjustment for any effects on the Group that may result from these claims, if any, has been made in the consolidated financial statements.

Silicosis and Tuberculosis

Class Action Settlement

The Tshiamiso Trust has been established to carry out the terms of the settlement agreement reached between six gold mining companies (including Gold Fields) and claimant attorneys in the Silicosis and Tuberculosis class action. The Tshiamiso Trust is responsible for ensuring that all eligible current and former mineworkers across southern Africa with Silicosis or work-related Tuberculosis (or their dependents where the mine worker has passed away) are compensated pursuant to the Silicosis and Tuberculosis Class Action Settlement Agreement.

Financial provision raised

Gold Fields has provided for the estimated cost of the above settlement based on actuarial assessments and the provisions of the Silicosis and Tuberculosis Settlement Agreement. At 31 December 2025, the provision for Gold Fields' share of the settlement of the class action claims and related costs amounted to US\$5.7 million (R94.6 million) (2024: US\$4.9 million (R92.0 million)). The nominal value of this provision is US\$6.5 million (R107.4 million).

The ultimate outcome of this matter however remains uncertain, with the number of eligible workers successfully submitting claims and receiving compensation being uncertain. The provision is consequently subject to adjustment in the future.

Acid mine drainage

Acid mine drainage ("AMD") or acid rock drainage ("ARD"), collectively called acid drainage ("AD") is formed when certain sulphide minerals in rocks are exposed to oxidising conditions (such as the presence of oxygen, combined with water). AD can occur under natural conditions or as a result of the sulphide minerals that are encountered and exposed to oxidation during mining or during storage in waste rock dumps, ore stockpiles or tailings storage facilities. The acidic water that forms usually contains iron and other metals if they are contained in the host rock.

Gold Fields has identified incidences of AD, and the risk of potential short-term and long-term AD issues, specifically at its Cerro Corona, South Deep and St Ives mines.

Gold Fields commissioned technical studies at Cerro Corona to investigate technical solutions, to better inform appropriate short- and long-term mitigation strategies for AD management and to work towards a reasonable cost estimate of potential issues. While progress has been made in addressing potential long-term AD risks, Gold Fields is not able to generate a reliable estimate of the total potential impact on the Group. Cerro Corona continues to investigate technical solutions to better inform appropriate short and long-term mitigation strategies for AD management and to work towards a reasonable cost estimate of these potential issues.

39. **Contingent liabilities continued**

Acid mine drainage continued

South Deep has concluded technical studies which have indicated that, subject to the implementation of targeted mitigation measures and no regional hydrogeological changes, AD generation will be mitigated and/or contained, thus resulting in no potential residual environmental risk. South Deep continues to implement required mitigation measures to prevent AD. Due to the inherent uncertainty on the outcome of the cessation of dewatering of Cooke 4 (Ezulwini) over which South Deep does not have control, together with the application made by Rand Uranium (a subsidiary of Sibanye Stillwater) for the closure of Cooke 3, 2 and 1 shafts, which would result in the re-watering of these shafts, along with other possible hydrogeological influences unrelated to South Deep in the future, the post closure water liability continues to be a contingent liability.

St Ives has undertaken material characterisation at the Cave Rocks project since 2006. Physical, chemical and geochemical assessments continue to be undertaken to assess both cover material properties and propensity for AD.

No adjustment for any effects on the Group that may result from AD, if any, has been made in the consolidated financial statements other than through the Group's normal environmental rehabilitation costs provision (refer note 29.1).

Mining contractor in Ghana

In March 2026, Gold Fields received letters from its contractor Engineers and Planners ("E&P"), commencing dispute resolution processes under the terms of the Tarkwa and Damang mining agreements, according to which E&P claims US\$474.9 million and US\$264.7 million in respect of Tarkwa and Damang, respectively.

The Company has replied to each of the E&P letters confirming that it disagrees with E&P's position. Based on the opinion of its legal advisors, the Company believes that neither prospective claim has merit and intends to vigorously defend its position. Moreover, the Company has significant cumulative contractual set-off rights at Tarkwa and Damang, including with respect to outstanding loans and advances due.

Management has determined there is no present obligation, an adverse outcome is unlikely and the ultimate financial impact, if any, cannot be reliably estimated. Thus, no provision or adjustment has been made in the consolidated financial statements.

40. **Events after the reporting date**

Final dividend

On 19 February 2026, Gold Fields declared a final dividend of 1,850 SA cents per share.

Special dividend and share buy-back

In addition to the base dividend, on 19 February 2026, Gold Fields declared an additional return of US\$353.0 million. This will comprise US\$253.0 million in special dividends (450 SA cents per share) and US\$100 million in share buy-backs.

Sale of royalty portfolio and Asanko deferred and contingent considerations

On 12 December 2025, Gold Fields entered into agreements to sell a portfolio of royalty assets for a total cash consideration of US\$115.0 million and its right to the Asanko deferred and contingent considerations for US\$30.0 million and US\$22.0 million, respectively.

Certain assets within the royalty portfolio, having a combined value of US\$77.5 million, were subject to a third-party right of first refusal ("ROFR"). Completion of the overall transaction was conditional upon the purchaser acquiring these royalties.

At 31 December 2025, the US\$77.5 million royalties were presented as assets held for sale as the sale was considered highly probable in the sense that they will be purchased either by the purchaser or the third party.

At that date, the outcome of the ROFR was unknown and no evidence existed that the sale of the remaining royalty portfolio amounting to US\$37.5 million or the deferred and contingent considerations were highly probable and therefore they were not recognised as held for sale.

The third party was given until 13 January 2026 to exercise its ROFR, which they declined. As a result, the sale of the remaining royalty portfolio and the Asanko deferred and contingent considerations become unconditional. On this date, a fair value gain of US\$37.5 million was recognised through profit or loss.

The transaction is expected to conclude in Q2 2026.

Mining contractor in Ghana

In March 2026, Gold Fields received letters from its contractor Engineers and Planners ("E&P"), commencing dispute resolution processes under the terms of the Tarkwa and Damang mining agreements, according to which E&P claims US\$474.9 million and US\$264.7 million in respect of Tarkwa and Damang, respectively.

The Company has replied to each of the E&P letters confirming that it disagrees with E&P's position. Based on the opinion of its legal advisors, the Company believes that neither prospective claim has merit and intends to vigorously defend its position. Moreover, the Company has significant cumulative contractual set-off rights at Tarkwa and Damang, including with respect to outstanding loans and advances due. Refer note 39 for further details.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

41. Financial instruments

Accounting classifications and fair values

The following tables show the carrying amounts and fair values of financial assets and financial liabilities.

41. Financial instruments *continued*

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Trade and other receivables, trade and other payables and cash and cash equivalents

The carrying amounts approximate fair values due to the short maturity of these instruments.

Investments

The fair value of publicly traded instruments (listed investments) is based on quoted market values.

Asanko deferred and contingent considerations

The contingent consideration is measured at fair value and the deferred consideration is measured at amortised cost. The values of the considerations are based on the expected cash flows of the consideration receivable. Refer note 15 for the key inputs used in the valuation.

Royalties - asset held for sale

The royalties are measured at fair value. The fair value is based on the expected cash flows of the consideration receivable in terms of the contract. Refer note 16 (b) for further details.

Environmental trust funds

The trust funds consist of term deposits in South Africa as well as secured cash deposits in Ghana. The environmental trust funds are measured at amortised cost which approximates fair value based on the nature of the fund's underlying investments.

Other investments

Comprise mainly listed bonds and unlisted investments and warrants that are measured at amortised cost which approximates fair value. The fair value of the bonds is determined using quoted market prices in active markets.

Borrowings

The 10-year notes and seven-year notes (2024: the five-year notes and the 10-year notes) are issued at a fixed interest rate. The fair values of these notes are based on listed market prices. The fair value of the remaining borrowings approximates their carrying amount, determined using the discounted cash flow method using market related interest rates.

Fair value hierarchy

The Group has the following hierarchy for measuring the fair value of assets and liabilities at the reporting date:

Level 1

Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2

Inputs other than quoted prices in level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

Level 3

Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. There were no transfers during the years ended 31 December 2025 and 2024.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

41. Financial instruments *continued*

The following table sets out the Group's financial assets and financial liabilities by level within the fair value hierarchy at the reporting date:

United States Dollar								
<i>Figures in millions unless otherwise stated</i>	2025				2024			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Financial assets measured at fair value								
Trade receivables from provisional copper sales	31.0	—	31.0	—	16.5	—	16.5	—
Investments – listed	142.4	142.4	—	—	114.5	114.5	—	—
Asanko contingent consideration	22.0	—	—	22.0	18.4	—	—	18.4
Royalties - asset held for sale	77.5	—	—	77.5	—	—	—	—
Financial assets not measured at fair value								
Environmental trust funds	140.9	—	140.9	—	125.2	—	125.2	—
Other investment	47.2	47.2	—	—	46.5	46.5	—	—
Asanko deferred consideration	28.1	—	28.1	—	49.5	—	49.5	—
Financial liabilities not measured at fair value								
Borrowings	2,806.3	1,309.6	—	1,496.7	2,502.1	504.4	—	1,997.7

Trade receivables from provisional copper sales

Valued using quoted market prices based on the forward London Metal Exchange ("LME") and, as such, is classified within level 2 of the fair value hierarchy.

Listed investments

Comprise equity investments in listed entities and are therefore valued using quoted market prices in active markets.

Royalties - asset held for sales

The royalties are measured at fair value. The fair value is based on the expected cash flows of the consideration receivable in terms of the contract. Refer note 16 (b) for further details.

Asanko deferred and contingent considerations

The contingent consideration is measured at fair value and the deferred consideration is measured at amortised cost. The values of the considerations are based on the expected cash flows of the consideration receivable. Refer note 15 for the key inputs used in the valuations.

Environmental trust funds

The trust funds consist of term deposits in South Africa as well as secured cash deposits in Ghana. The environmental trust funds are measured at amortised cost which approximates fair value based on the nature of the fund's underlying investments.

Other investments

Comprise listed bonds and unlisted investments and warrants that are measured at amortised cost which approximates fair value. The fair value of the bonds is determined using quoted market prices in active markets.

Borrowings

The 10-year notes and 7-year notes (2024: the 5-year notes and the 10-year notes) are issued at a fixed interest rate. The fair values of these notes are based on listed market prices and are classified within level 1 of the fair value hierarchy. The fair value of the remaining borrowings approximates their carrying amount, determined using the discounted cash flow method and market related interest rates and are classified within level 3 of the fair value hierarchy.

42. Risk management activities

In the normal course of its operations, the Group is exposed to commodity price, currency, interest rate, liquidity, equity price and credit risk. In order to manage these risks, the Group has developed a comprehensive risk management process to facilitate control and monitoring of these risks.

Controlling and managing risk in the Group

Gold Fields has policies in areas such as counterparty exposure, hedging practices and prudential limits which have been approved by the Gold Fields' Board of Directors. Management of financial risk is centralised at Gold Fields' treasury department ("Treasury"), which acts as the interface between Gold Fields' operations and counterparty banks. Treasury manages financial risk in accordance with the policies and procedures established by the Gold Fields' Board of Directors and Executive Committee.

Treasury activities are guided by the Treasury Framework as well as domestic and international financial market regulations.

The financial risk management objectives of the Group are defined as follows:

Risk management objectives	Description
Credit risk	
Counterparty exposure	The objective is to only deal with approved counterparts that are of a sound financial standing. The Group is limited to a maximum investment of 2.5% of the financial institutions' equity, which is dependent on the institutions' national credit rating. The credit rating used is Fitch Ratings' short-term credit rating for financial institutions.
Investment risk management	The objective is to achieve optimal returns on surplus funds.
Liquidity risk	
Liquidity risk management	The objective is to ensure that the Group is able to meet its short-term commitments through the effective and efficient usage of credit facilities and cash resources.
Funding risk management	The objective is to meet funding requirements timeously and at competitive rates by adopting reliable liquidity management procedures.
Market risk	
Currency risk management	The objective is to manage the adverse effect of the currency fluctuations on the Group's results.
Interest rate risk management	The objective is to identify opportunities to prudently manage interest rate exposures.
Commodity price risk management	The Group's policy is to remain unhedged to the gold price. However, hedges are sometimes undertaken as follows: • to protect cash flows at times of significant expenditure; • for specific debt servicing requirements; and • to safeguard the viability of higher cost operations.
Other risks	
Operational risk management	The objective is to implement controls to adequately mitigate the risk of error and/or fraud to an acceptable level.
Banking relations management	The objective is to maintain relationships with credible financial institutions and ensure that all contracts and agreements related to risk management activities are coordinated and consistent throughout the Group and that they comply where necessary with all relevant regulatory and statutory requirements.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

42. Risk management activities *continued*

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, cash and cash equivalents as well as environmental trust funds.

The Group has reduced its credit exposure by dealing with a number of counterparties. The Group approves these counterparties according to its risk management policy and ensures that they are of good credit quality.

The combined maximum credit risk exposure of the Group is as follows:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Trade and other receivables ¹	161.8	172.5
Asanko deferred and contingent considerations	50.1	67.9

Expected credit loss assessment for customers

The Group determines each exposure to credit risk based on data that is determined to be predictive of the risk of loss and past experienced credit judgement.

Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Group also considers other factors that might impact on the credit risk of its customer base including default risk and the country in which the customer operates.

Impairment of trade receivables, carried at amortised cost, has been determined using the simplified expected credit loss ("ECL") approach and reflects the short term maturities of the exposures. Gold and silver revenue is recognised at the same time as receipt of the cash, except in certain cases where the cash is received one or two days after revenue recognition. In Peru, for the sale of copper concentrate, 90% of the cash is received when the revenue is recognised and the remaining 10% cash is received at the end of the quotational period.

Receivables due from the Ghana contractor were assessed using the simplified approach using the lifetime ECL. The ECL was based on the Group's understanding of the financial position of the counterparty, including the consideration of their credit risk grade. Refer note 13.1 for details.

Concentration risk

At 31 December 2025, the exposure to credit risk for trade receivables by geographic region was as follows:

	United States Dollar	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Ghana	49.7	38.4
Australia	—	83.4
Chile	52.2	1.5
Peru	31.0	16.5
Total trade receivables	132.9	139.8

Asanko deferred and contingent considerations

The deferred consideration was assessed at stage 1 in 2025. The ECL was assessed to be immaterial based on the Group's understanding of the financial position of the counterparty, including the consideration of their credit risk grade. The contingent consideration is measured at fair value. Refer note 15 for further details.

Other investments

Other investments are mainly held with reputable banks and financial institutions. The Group considers that its other investments have low credit risk based on the external credit ratings of the counterparties.

42. Risk management activities *continued*

Cash and cash equivalents

The Group held cash and cash equivalents of US\$1,779.2 million (2024: US\$860.2 million).

The cash and cash equivalents are held with reputable banks and financial institutions. The loss allowance for cash and cash equivalents is measured at an amount equal to the 12-month ECL. The Group considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

Environmental trust funds

The Group held environmental trust funds of US\$140.9 million (2024: US\$125.2 million).

The environmental trust funds are held with reputable banks and financial institutions. The loss allowance for environmental trust funds is measured at an amount equal to the 12-month ECL. The Group considers that its environmental trust funds have low credit risk based on the external credit ratings of the counterparties with which the funds are deposited.

Concentration of credit risk on cash and cash equivalents and environmental trust funds is considered minimal due to the Group's investment risk management and counterparty exposure risk management policies.

Royalties - assets held for sale

The asset held for sale relating to royalties is measured at fair value, which approximates the contractual offer received. Refer notes 16 (b) and 40 for further details.

Liquidity risk

In the ordinary course of business, the Group receives cash proceeds from its operations and is required to fund working capital and capital expenditure requirements. The cash is managed to ensure surplus funds are invested to maximise returns while ensuring that capital is safeguarded to the maximum extent possible by investing only with top financial institutions.

Uncommitted borrowing facilities are maintained with several banking counterparties to meet the Group's normal and contingency funding requirements.

The following are the contractually due undiscounted cash flows resulting from maturities of all financial liabilities, including interest payments:

	United States Dollar

In South Africa and Ghana, US\$125.2 million of the environmental rehabilitation costs are funded through the environmental trust funds.

42. Risk management activities *continued*

Market risk

Gold Fields is exposed to market risks, including foreign currency, commodity price, equity securities price and interest rate risk associated with underlying assets, liabilities and anticipated transactions. Following periodic evaluation of these exposures, Gold Fields may enter into derivative financial instruments to manage some of these exposures.

Outstanding hedges

At 31 December 2025 and 2024, there were no outstanding hedges.

Foreign currency sensitivity

General and policy

In the ordinary course of business, Gold Fields enters into transactions, such as gold sales, denominated in foreign currencies, primarily US Dollars. In addition, Gold Fields has investments and indebtedness in US Dollars, South African Rands, Australian Dollars and Canadian Dollars.

Gold Fields may from time to time establish currency financial instruments to protect underlying cash flows.

Gold Fields' revenues and costs are very sensitive to the Australian Dollar/US Dollar and South African Rand/US Dollar exchange rates because revenues are generated using a gold price denominated in US Dollars, while costs of the Australian and South African operations are incurred principally in Australian Dollar and South African Rand, respectively. Depreciation of the Australian Dollar and/or South African Rand against the US Dollar reduces Gold Fields' average costs when they are translated into US Dollars, thereby increasing the operating margin of the Australian and/or South African operations. Conversely, appreciation of the Australian Dollar and/or South African Rand results in Australian and/or South African operating costs increasing when translated into US Dollars, resulting in lower operating margins. The impact on profitability of changes in the value of the Australian Dollar and South African Rand against the US Dollar could be substantial.

The Windfall Projects costs are mainly denominated in Canadian Dollar. Depreciation or appreciation of the Canadian Dollar against the US dollar will reduce or increase their costs when translating into US dollars.

Although this exposes Gold Fields to transaction and translation exposure from fluctuations in foreign currency exchange rates, Gold Fields does not generally hedge its foreign currency exposure, although it may do so in specific circumstances, such as financing projects or acquisitions. Also, Gold Fields on occasion undertakes currency hedging to take advantage of favourable short-term fluctuations in exchange rates when management believes exchange rates are at unsustainable levels.

Currency risk only exists on account of financial instruments being denominated in a currency that is not the functional currency and being of a monetary nature. The Group had no significant exposure to currency risk relating to financial instruments at 31 December 2025 and 31 December 2024. Differences resulting from the translation of financial statements into the Group's presentation currency are not taken into account.

Commodity price hedging policy

Gold, copper and silver

The market prices of gold and to a lesser extent copper and silver have a significant effect on the results of operations of Gold Fields, the ability of Gold Fields to pay dividends and undertake capital expenditures, and the market price of Gold Fields' ordinary shares. Gold, copper and silver prices have historically fluctuated widely and are affected by numerous industry factors over which Gold Fields does not have any control. The aggregate effect of these factors on the gold, copper and silver prices, all of which are beyond the control of Gold Fields, is impossible for Gold Fields to predict.

Oil

The market price of oil has a significant effect on the results of the offshore operations of Gold Fields. The offshore operations consume large quantities of diesel in the running of their mining fleets. Oil prices have historically fluctuated widely and are affected by numerous factors over which Gold Fields does not have any control.

Commodity price hedging experience

The Group's policy is to remain unhedged to the gold, silver and copper price. However, hedges are sometimes undertaken as follows:

- to protect cash flows at times of significant expenditure;
- for specific debt servicing requirements; and
- to safeguard the viability of higher cost operations.

To the extent that it enters into commodity hedging arrangements, Gold Fields seeks to use different counterparty banks consisting of local and international banks to spread risk. None of the counterparties is affiliated with, or related parties of, Gold Fields.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

42. Risk management activities *continued*

IFRS 7 sensitivity analysis

IFRS 7 requires sensitivity analysis that shows the effects of reasonably possible changes of relevant risk variables on profit or loss or shareholders' equity. The Group is exposed to commodity price, currency, interest rate and equity price risks. The effects are determined by relating the reasonably possible change in the risk variable to the balance of financial instruments at reporting date.

The amounts generated from the sensitivity analysis are estimates of market risks assuming certain adverse or favourable market conditions occur. Actual results in the future may differ materially from those projected results and therefore should not be considered a projection of likely future events and gains/losses.

Equity securities price risk

The Group is exposed to equity securities price risk because of investments held by the Group which are designated at fair value through OCI. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with limits set by the Group.

The Group's equity investments are publicly traded and are listed on one of the following exchanges:

- JSE Limited;
- Toronto Stock Exchange; and
- Australian Stock Exchange.

The following table summarises the impact of increases/decreases of the equity prices of listed investments at fair value through OCI on the Group's shareholders' equity. The analysis is based on the assumption that the share prices quoted on the exchange have increased/decreased with all other variables held constant and the Group's investments moved according to the historical correlation with the index.

Sensitivity to equity security price	United States Dollar			
	(Decrease)/increase in equity price			
	(10.0%)	(5.0%)	5.0%	10.0%
<i>Figures in millions unless otherwise stated</i>

¹ Spot rate: R16.56 = US\$1.00 (2024: R18.84 = US\$1.00)

42. Risk management activities *continued*

Interest rate sensitivity

General

As Gold Fields has no significant interest-bearing assets, the Group's income and operating cash flows are substantially independent of changes in market interest rates. Gold Fields' interest rate risk arises from borrowings.

As of 31 December 2025, Gold Fields' borrowings amounted to US\$2,738.2 million (2024: US\$2,495.6 million). Gold Fields generally does not undertake any specific action to cover its exposure to interest rate risk, although it may do so in specific circumstances.

CDOR/CORRA developments

During 2024, Gold Fields either replaced or transitioned all the loan facilities using the Canadian Dollar Offered Rate ("CDOR") to the Canadian Overnight Repo Rate Average ("CORRA"). This did not have a material impact on the Group's finance cost.

JIBAR/ZARONIA developments

During 2025, the Group's R2,500 million ZAR revolving credit facilities were amended to incorporate the South African Rand Overnight Index Average ("ZARONIA") rate-switch provisions in preparation for the planned cessation of the Johannesburg Interbank Average Rate ("JIBAR") as a benchmark on 31 December 2026. This did not have a material impact on the Group's finance cost.

Interest rate sensitivity analysis

The portion of Gold Fields' interest-bearing borrowings at year-end that is exposed to interest rate fluctuations in the SOFR rate is US\$53.8 million (2024: SOFR/LIBOR rate US\$782.5 million), CORRA rate is US\$430.1 million (C\$590.2 million) (2024: CORRA rate US\$1,004.6 million (C\$1,444.9 million)) and BBSY rate is US\$1,012.8 million (A\$1,517.8 million) (2024: US\$210.6 million (A\$340.0 million)). These borrowings are normally rolled for periods between one and three months and are therefore exposed to the rate changes in this period. The remainder of the borrowings bear interest at a fixed rate.

The table below summarises the effect of a change in finance expense on the Group's profit or loss had SOFR, the Bank Bill Swap Rate ("BBSY") and CORRA differed as indicated. The analysis is based on the assumption that the applicable interest rate increased/decreased with all other variables held constant and is calculated on the weighted average borrowings for the year. All financial instruments with fixed interest rates that are carried at amortised cost are not subject to the interest rate sensitivity analysis.

United States Dollar						
Sensitivity to interest rates	Change in interest expense for a nominal change in interest rates

¹ Average rates: A\$0.64= US\$1.00 (2024: A\$0.66 = US\$1.00) and C\$0.72 = US\$1.00 (2024: C\$0.73 = US\$1.00).

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

43. Capital management

The primary objective of managing the Group's capital is to ensure that there is sufficient capital available to support the funding requirements of the Group, including capital expenditure, in a way that:

- optimises the cost of capital
- maximises shareholders' returns, and
- ensures that the Group remains in a sound financial position.

There were no changes to the Group's overall capital management approach during the current year. The Group actively manages its capital structure in response to maturing borrowings and funding requirements. This may include raising equity, accessing bank or capital markets debt or utilising hybrid instruments, as appropriate. Market opportunities are also monitored closely to ensure that the most efficient funding solutions are implemented.

The Group monitors capital using the ratio of net debt to adjusted EBITDA. The definition of adjusted EBITDA and net debt is defined in the Group's facilities agreements. Adjusted EBITDA is defined as profit or loss for the year adjusted for interest, taxation, amortisation and depreciation and certain other non-operating costs. Net debt is defined as total borrowing plus lease liabilities less cash and cash equivalents. The bank covenants on external borrowings require a net debt to adjusted EBITDA ratio of 3.5 or below and adjusted EBITDA to net finance charges ratio of 4 or above and the ratios are measured based on amounts in United States Dollar. The bank covenants compliance is assessed bi-annually at 30 June and 31 December. At the date of this report, the Group was not in default under the terms of any of its outstanding credit facilities.

¹ Based on information underlying the audited consolidated annual financial statements of Gold Fields Limited for the year ended 31 December 2025 and 2024.

44. Related parties

(a) Subsidiaries, associates and joint ventures

The subsidiaries, associates and joint ventures of the Company are disclosed in note 46.

All transactions and balances with these related parties have been eliminated in accordance with and to the extent required by IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements and IAS 28 Investments in Associates and Joint Ventures.

(b) Key management remuneration

Key management personnel include Executive Directors and prescribed officers ("Executive Committee"). The total key management remuneration amounted to US\$17.3 million (2024: US\$13.2 million) for 2025.

The details of key management personnel, including remuneration and participation in the Gold Fields Limited share scheme and LTIP are disclosed in note 44 (c).

(c) Directors' and prescribed officers' remuneration

None of the Directors and officers of Gold Fields or, to the knowledge of Gold Fields, their families, had any interest, direct or indirect, in any transaction during the last three fiscal periods or in any proposed transaction which has affected or will materially affect Gold Fields or its investment interests or subsidiaries.

None of the Directors or officers of Gold Fields or any associate of such Director or officer is currently or has been at any time during the past three fiscal periods indebted to Gold Fields.

At 31 December 2025, the Executive Committee and Non-executive Directors' beneficial interest in the issued and listed stated capital of the Company was nil% (2024: 0.1% and 2023: 0.1%). No one Director's interest individually exceeds 1% of the issued stated capital or voting control of the Company.

Non-executive Directors ("NEDs")

NEDs' fees reflect their services as Directors and services on various subcommittees on which they serve.

NEDs do not participate in any of the short- or long-term incentive plans and there are no arrangements in place for compensation to be awarded in the case of loss of office.

The Remuneration Committee seeks to align NEDs' fees to the median of an appropriate peer group and reviews fee structures for NEDs on an annual basis. Approval is sought from shareholders at the Annual General Meeting after recommendation by the Board.

Notes to the consolidated financial statements *continued*

¹ Y Suleman receives an all-inclusive fee as Chairperson of the Board.

² J McGill elected as the Lead Independent Director and Chair of the Remuneration Committee effective 29 May 2025. Retired as Chair and member of the Social and Ethics Committee. Receives an all-inclusive fee from 29 May 2025.

³ A Andani's term on the Audit Committee concluded on 29 May 2025. In addition to the fees disclosed above, A Andani received subsidiary board fees in 2025 for serving on the Gold Fields Ghana Limited and Abosso Goldfields Limited board amounting to US\$86,630 (2024: US\$81,460). The fees for these subsidiary boards are not determined by Gold Fields.

⁴ PG Sibiya retired from the Social and Ethics Committee effective 29 May 2025.

⁵ M Bitar elected as Chair of the Social and Ethics Committee effective 29 May 2025.

⁶ C Smit elected as Chair of the Strategy and Investment Committee and member of the SET Committee and retired from the Technical Committee, all effective 29 May 2025.

⁷ Z Bassa elected as Chair of the Risk Committee effective 29 May 2025.

⁸ J MacKenzie appointed as Non-Executive Director to the Board with effective from 1 August 2025. Appointed to the Nomination and Governance Committee, Safety, Health and Sustainable Development Committee, Strategy and Investment Committee and Technical Committee effective 1 December 2025.

⁹ M Rawlinson appointed as Non-Executive Director to the Board with effective from 1 August 2025. Appointed to the Audit Committee, Remuneration Committee, Strategy and Investment Committee, and Technical Committee effective 1 December 2025.

¹⁰ S Reid retired as Director, Lead Independent Director and Chair of the Remuneration Committee effective 29 May 2025. Resigned as Non-Executive Director of the Managing Board of the Gold Fields Netherlands Services B.V and Gold Fields Orogen Holding (BVI) Limited effective 31 March 2025. In addition to the fees disclosed above, S Reid received subsidiary board fees until resignation effective 31 March 2025 amounting to US\$9,360 (2024: US\$34,400).

¹¹ P Bacchus retired as Director and Chair of the Risk Committee and the Strategy and Investment Committee effective 29 May 2025.

Total - 2025	4,924.9	409.0	5,866.5	1,738.7	4,356.8	17,295.9

¹ The total US\$ amounts paid for 2025 and included in salary were as follows: M Fraser US\$324,480, C Gratiias US\$161,200 and A Dall US\$150,000.

² The annual bonuses for the year ended 31 December 2025 were paid in February/March 2026.

³ Other payments include business related reimbursements, leave encashment, long-service awards, acting allowances, retention bonuses, termination payments where applicable and any legislated payments.

⁴ The share-based payment expense is calculated in terms of IFRS Accounting Standards and is not the cash amounts paid.

⁵ A Dall assumed the interim CFO role on 1 May 2024 and was appointed permanent CFO on 1 March 2025. The amount disclosed under "Other" reflects the acting allowance paid in January and February 2025, calculated at 20% of total fixed remuneration during the acting period.

⁶ In addition to a local inflationary increase of 3.7% in 2025, M Steyn's base salary increased from A\$642,940 to A\$771,528 following her appointment as EVP: People and Sustainability and assumption of a dual executive portfolio, effective 1 April 2025.

M Steyn was appointed as EVP Sustainability effective 1 June 2024. Other payments include a second instalment amounting to A\$178,571 relating to the total 2024 sign-on payment of A\$1.2 million payable over three annual instalments.

⁷ G Lotz received an acting allowance of 20% of total fixed remuneration up to 31 March 2025 while serving as Acting EVP: People, which is reflected under "Other".

⁸ In addition to a local inflationary increase of 3.7% in 2025, F Swanepoel's base salary increased from A\$782,653 to A\$900,051 following his appointment as Chief Operating Officer, effective 1 September 2025.

During 2025, F Swanepoel assumed responsibility for the South America asset portfolio in addition to his executive duties, requiring frequent travel between Australia and South America. The Board approved an exertion allowance of A\$60,607, which is reflected under "Other".

⁹ J Sander assumed the role of Acting Chief Technical Officer on 1 September 2025 and received an acting allowance as part of the 2025 reporting year, which is reflected under "Other".

¹⁰ M Preece retired on 31 August 2025. His 2025 STI and LTI vesting were prorated to the retirement date. Payments for accrued annual leave are included under "Other".

¹¹ L Rivera separated from the Company on 31 March 2025 through mutual agreement. Payments included under "Other" comprise accrued annual leave and statutory severance in accordance with Peruvian legislation. No STI was payable under the Group's policy. LTI vesting was prorated to the termination date.

¹ The total US\$ amounts paid for 2024 and included in salary were as follows: M Fraser \$312,000, C Gratias \$46,746 and P Schmidt US\$74,067.

² The annual bonuses for the year ended 31 December 2024 were paid in February/March 2025.

³ Other payments include business related reimbursements, leave encashment, long-service awards, acting allowances, sign-on bonuses, termination payments where applicable and any legislated payments.

⁴ The share-based payment expense is calculated in terms of IFRS Accounting Standards and is not the cash amounts paid.

⁵ M Fraser was appointed as Chief Executive Officer effective 1 January 2024.

⁶ P Schmidt retired at 30 June 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

⁷ A Dall stepped into the interim CFO position on 1 May 2024 and received an acting allowance of 20% of total fixed remuneration for the 2024 reporting period reflected under "Other".

⁸ M Preece was appointed as Chief Operating Officer effective 15 March 2024.

⁹ Other payments for 2025 include advance payment of portion of estimated Peru Utilidades.

¹⁰ N Chohan retired at 31 August 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

¹¹ S Mathews retired at 31 March 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

¹² R Bardien exited at 31 January 2024 through mutual separation. Other payments include accrued annual leave, payment in lieu of six months notice and pro-rated bonus for the 2023 financial year.

¹³ J Mortoti exited at 30 June 2024 due to redundancy. Other payments include accrued annual leave, payment in lieu of six months notice and a redundancy payment in line with Ghana legislation.

¹⁴ M Steyn was appointed as EVP Sustainability effective 1 June 2024. Other payments include a sign-on payment of A\$1.2 million paid over three annual instalments.

¹⁵ C Gratias was appointed as EVP Strategy and Corporate Development effective 1 August 2024. Other payments include a relocation and sign-on payment of R7.4 million, as well as reimbursements for personal expenditure associated with relocation and immigration requirements. Upon appointment, he acquired and committed 20,000 Gold Fields American Depositary Receipts and met his required MSR target of 100% of annual salary.

¹⁶ G Lotz stepped into the Acting EVP People and Organisational Effectiveness position on 13 October 2023. He received an acting allowance of 20% of total fixed remuneration for a portion of the 2023 reporting year and the 2024 reporting period which is reflected under "Other".

¹⁷ J Ricciardone stepped into the Acting EVP Strategy, Planning and Corporate Development position on 1 April 2023. He received an acting allowance of 15% of total fixed remuneration for a portion of the 2023 reporting year and the 2024 reporting period which is reflected under "Other".

The above is a geographical analysis presented by location of assets. The Group's operations are primarily involved in gold mining, exploration and related activities. Activities are conducted and investments held both inside and outside South Africa. The segment results have been prepared and presented based on management's reporting format. Gold mining operations are managed and internally reported based on the following geographical areas: in South Africa, South Deep mine, in Ghana, Tarkwa and Damang mines, in Australia, St Ives, Agnew, Granny Smith and Gruyere, in Peru, the Cerro Corona mine and in Chile, Salares Norte. During 2025, Gold Fields acquired 100% of the share capital of Gold Road and the transaction was accounted for as a business combination (Refer note 18.3). The Group has exploration interests which are included in the "Corporate" segment. Refer to accounting policies on segment reporting on page 71. Figures may not add as they are rounded independently.

¹ The income statement and statement of financial position of South Deep is that of the operating mine and does not include any of the adjustments made in respect of the purchase price allocation relating to the acquisition of South Deep. South Deep Gold mine, being an unincorporated joint venture, is not liable for taxation. Taxation included in South Deep is indicative, as tax is provided in the holding companies at a rate of 29%.

² Salares Norte reached commercial levels of production on 31 August 2025.

³ "Corporate" represents the items to reconcile segment data to consolidated financial statement totals, including the elimination of intercompany transactions and balances as well as the Group's exploration interests. This does not represent a separate segment as it does not generate revenue. Included in "Corporate" is the adjustment made in respect of the purchase price allocation of South Deep.

⁴ Other costs "Corporate and other" comprise share of losses of equity-accounted investees, net of taxation of US\$2.3 million, Gruyere rainfall event reversal of costs of US\$6.0 million and the balance of US\$44.0 million expenses which consists mainly of corporate related costs.

⁵ The Australian operations are entitled to transfer and off-set profits and losses from one company to another, therefore it is not meaningful to split the royalties, income or deferred taxation.

⁶ Includes revenue from the sale of copper and silver amounting to US\$228.1 million and US\$116.7 million, respectively.

⁷ Capital expenditure for the year ended 31 December 2025.

Notes to the consolidated financial statements *continued*

for the year ended 31 December 2025

The above is a geographical analysis presented by location of assets. The Group's operations are primarily involved in gold mining, exploration and related activities. Activities are conducted and investments held both inside and outside South Africa. The segment results have been prepared and presented based on management's reporting format. Gold mining operations are managed and internally reported based on the following geographical areas: in South Africa, South Deep mine, in Ghana, Tarkwa and Damang mines, in Australia, St Ives, Agnew, Granny Smith and Gruyere, in Peru, the Cerro Corona mine and in Chile, Salares Norte. During 2024, Gold Fields acquired 100% of the share capital of Osisko and the transaction was accounted for as an asset acquisition (Refer note 18.2). The Group has exploration interests which are included in the "Corporate and other" segment. Refer to accounting policies on segment reporting on page 71. Figures may not add as they are rounded independently.

¹ The income statement and statement of financial position of South Deep is that of the operating mine and does not include any of the adjustments made in respect of the purchase price allocation relating to the acquisition of South Deep. South Deep Gold mine, being an unincorporated joint venture, is not liable for taxation. Taxation included in South Deep is indicative, as tax is provided in the holding companies at a rate of 29%.

² "Corporate" represents the items to reconcile segment data to consolidated financial statement totals, including the elimination of intercompany transactions and balances as well as the Group's exploration interests. This does not represent a separate segment as it does not generate revenue. Included in "Corporate and other" is the adjustment made in respect of the purchase price allocation of South Deep.

³ The Osisko asset acquisition is included in the "Corporate and other segment".

⁴ Other costs "Corporate" comprise share of losses of equity-accounted investees, net of taxation of US\$53.6 million, Gruyere rainfall event costs of \$12.0 million and the balance of US\$25.7 million consists mainly of corporate related costs.

⁵ The Australian operations are entitled to transfer and off-set profits and losses from one company to another, therefore it is not meaningful to split the royalties, income or deferred taxation.

⁶ Includes revenue from the sale of copper amounting to US\$192.7 million.

⁷ Capital expenditure for the year ended 31 December 2024.

The above is a geographical analysis presented by location of assets. The Group's operations are primarily involved in gold mining, exploration and related activities. Activities are conducted and investments held both inside and outside South Africa. The segment results have been prepared and presented based on management's reporting format. Gold mining operations are managed and internally reported based on the following geographical areas: in South Africa, South Deep mine, in Ghana, Tarkwa and Damang mines, in Australia, St Ives, Agnew, Granny Smith and Gruyere, in Peru, the Cerro Corona mine and in Chile, Salares Norte. Asanko Gold was presented as a discontinued operation as a result of the sale transaction (Refer notes 15). The Group also exploration interests which are included in the "Corporate and other" segment. Refer to accounting policies on segment reporting on page 71.

Figures may not add as they are rounded independently.

¹ The income statement and statement of financial position of South Deep is that of the operating mine and does not include any of the adjustments made in respect of the purchase price allocation relating to the acquisition of South Deep. South Deep Gold mine, being an unincorporated joint venture, is not liable for taxation. Taxation included in South Deep is indicative, as tax is provided in the holding companies at a rate of 28%.

² "Corporate" represents the items to reconcile segment data to consolidated financial statement totals, including the elimination of intercompany transactions and balances as well as the Group's exploration interests. This does not represent a separate segment as it does not generate revenue. Included in "Corporate and other" is the adjustment made in respect of the purchase price allocation of South Deep.

³ For the purpose of the review of the segment by the CODM, Asanko's income statement was proportionately consolidated as a discontinued operation. The proportionately consolidated income of US\$34.0 million above was reconciled to Asanko's equity-accounted loss of US\$18.9 million by deducting the purchase price allocation fair value adjustment amounting to US\$6.0 million and impairment amounting to US\$46.9 million. The profit for the year from continuing operations of US\$745.2 million reconciled to the total profit for the year of US\$726.3 million by deducting the loss from discontinued operation of US\$18.9 million. The Equity Accounted Joint Venture was carried at US\$153.3 million.

⁴ Other costs "Corporate" comprise share of losses of equity-accounted investees, net of taxation of US\$32.6 million and the balance of US\$6.0 million consists mainly of corporate-related costs.

⁵ The Australian operations are entitled to transfer and off-set profits and losses from one company to another, therefore it is not meaningful to split the royalties, income or deferred taxation.

⁶ Includes revenue from the sale of copper amounting to US\$207.6 million.

⁷ Capital expenditure for the year ended 31 December 2023.

⁸ Abosso Goldfields Ltd (“Abosso”) owns the Damang operation in Ghana. The accumulated non-controlling interest of Abosso at 31 December 2025 amounts to US\$6.0 million (2024: US\$14.8 million). A dividend of US\$11.5 million was paid to non-controlling interest holders during 2025 (2024: US\$8.4 million). Refer to the segment reporting, note 45, for summarised financial information of Damang.

⁹ Gold Fields Ghana Ltd (“GFG”) owns the Tarkwa operation in Ghana. The accumulated non-controlling interest of GFG at 31 December 2025 amounts to US\$118.7 million (2024: US\$113.9 million). A dividend of US\$41.0 million was paid to non-controlling interest holders during 2025 (2024: US\$18.0 million). Refer to the segment reporting, note 45, for summarised financial information of Tarkwa.

¹⁰ Gold Fields La Cima S.A. (“La Cima”) owns the Cerro Corona operation in Peru. The accumulated non-controlling interest of La Cima at 31 December 2025 amounts to US\$2.1 million (2024: US\$1.5 million). A dividend of US\$0.5 million was paid to non-controlling interest holders during 2025 (2024: US\$nil). Refer to the segment reporting, note 45, for financial information of Cerro Corona.

¹¹ The South Deep Joint Venture (“SDJV”) owns and operates the South Deep Gold Mine. The SDJV is an unincorporated joint venture between Gold Fields Operations Limited (“GFO”) and GFI Joint Venture Holdings Proprietary Limited (“GFIJVH”). GFO and GFIJVH are wholly owned subsidiaries of Newshef 899 Proprietary Limited (“Newshelf”). The share capital of Newshelf comprises of: 90,000,000 “A” shares, representing 90% of Newshelf’s equity. Gold Fields Limited is the holder of the “A” shares; and 10,000,000 “B” shares, representing 10% of Newshelf’s equity. South Deep’s BEE shareholders are the holders of the “B” shares. The accumulated non-controlling interest of Newshelf at 31 December 2025 amounts to US\$112.9 million (2024: US\$32.8 million). Refer to the segment reporting, note 45, for financial information of the South Deep mine.

¹² The “B” shares entitle the BEE shareholders to a cumulative preferential dividend of R20.0 million per annum for the first 10 years (expired in December 2020), R13.3 million per annum for the next five years and R6.7 million for the five years thereafter. After 20 years, this preferential dividend will cease. The “B” shares’ rights to participate in the profits of Newshelf over and above the cumulative preferred dividend were initially suspended. The suspension will be lifted over a 20 years period on a phased-in basis as follows:

- after 10 years, in respect of one-third of the “B” shares;
- after 15 years, in respect of another one-third of the “B” shares; and
- after 20 years, in respect of the remaining one-third of the “B” shares.

After 20 years, all of the “B” shares will substantially have the same rights as the “A” shares. The BEE shareholders must retain ownership of the “B” shares for 30 years.

¹³ On 6 December 2025, per the South Deep BEE transaction an economic interest of 6.90% in Newshef 899 (Proprietary) Limited vested to the BEE non-controlling interest holders.

¹ Only major investments are listed individually.

² On 27 February 2025, Gold Fields shareholding was diluted to below 20%. An assessment was performed and the Group concluded it no longer had significant influence and Vior was reclassified to listed investments on the date of dilution.

³ An assessment has been performed and the Group does not have significant influence.

Independent auditor's report

To the shareholders of Gold Fields Limited

Report on the audit of the separate financial statements

Our opinion

In our opinion, the separate financial statements present fairly, in all material respects, the separate financial position of Gold Fields Limited (the Company) as at 31 December 2025, and its separate financial performance and its separate cash flows for the year then ended in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa.

What we have audited

Gold Fields Limited's separate financial statements set out on pages 143 to 169 comprise:

- the separate statement of financial position as at 31 December 2025;
- the separate income statement for the year then ended;
- the separate statement of comprehensive income for the year then ended;
- the separate statement of changes in equity for the year then ended;
- the separate statement of cash flows for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the separate financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the Independent Regulatory Board for Auditors' *Code of Professional Conduct for Registered Auditors* (IRBA Code), as applicable to audits of financial statements of public interest entities, and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the *International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards)*.

Our audit approach

Overview

Final materiality	R482 million
Key audit matter	Recognition and measurement of financial guarantees Reversal of impairment of investment in subsidiaries

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the separate financial statements. In particular, we considered where the directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette Number 49309 dated 15 September 2023 (EAR Rule), we report final materiality below.

Final materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the separate financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the separate financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the final materiality for the separate financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the separate financial statements as a whole.

Separate financial statements	
Final materiality	R482 million
How we determined it	1% of the Company's total assets.
Rationale for the materiality benchmark applied	We chose the total assets benchmark because, in our view, it is the benchmark against which the performance of the company is most commonly measured by users and is a generally accepted benchmark. We chose 1% which is consistent with quantitative materiality thresholds used for investment holding companies.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the separate financial statements of the current period. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In terms of ISA 701 *Communicating key audit matters in the independent auditor's report* / the EAR Rule (as applicable), we are required to report key audit matters and the outcome of audit procedures or key observations with respect to the key audit matters, and these are included below.

Key audit matter	How our audit addressed the key audit matter
Recognition and measurement of financial guarantees Refer to note 1 of the accounting policies (Basis of preparation – Significant accounting judgements and estimates) and note 9 (Financial guarantees) to the separate financial statements. The Company acts as a co-guarantor for certain of its subsidiaries' borrowings, as detailed in note 9. Financial guarantee contracts are accounted for as financial instruments and are recognised initially at fair value using lifetime expected credit losses ("ECL"). They are subsequently measured at the higher of the amount of the loss allowance, based on a 12-month ECL, determined in accordance with IFRS 9 Financial Instruments ("IFRS 9") and the initial amount recognised less cumulative amortisation. The initial fair value is determined based on the probability of the subsidiaries defaulting on their obligations, which involves significant judgement and estimation. Financial guarantees are amortised on a straight-line basis over the period that the borrowing facilities are available. The initial fair value and subsequent measurement is determined based on the probability of default ("PD"), loss given default ("LGD") and exposure at default ("EAD"). In addition to this, a credit conversion factor is applied, which is the expected probability of drawdowns on undrawn facilities. We considered the recognition and measurement of financial guarantees by the Company to be a matter of most significance to the current year audit of the Company's separate financial statements due to: • The significant judgement, estimates and assumptions applied by management in determining the fair value of the financial guarantees; and • The magnitude of the financial guarantees in relation to the separate financial statements.	Our audit procedures performed included the following: • We assessed the Company's accounting policy for the recognition and measurement of financial guarantees with reference to the requirements of IFRS 9. We noted no matters requiring further consideration. • We agreed the terms pertaining to the underlying debt facilities to signed contracts in respect of guarantees issued or amended during the current financial year. We noted no matters requiring further consideration. • Utilising our valuation expertise, we performed the following: – We assessed the model used by management in their 'day one' fair value computations for guarantees issued during the current year and the 12-month ECL associated with the financial guarantees at the end of the year, by comparing it to industry norms and acceptable methodology. Based on our work performed, we accepted management's model. – We independently tested the assumptions related to PD, LGD, and EAD by evaluating third party data and considering the probability and exposure in the event that subsidiaries default on their obligations and compared this to management's assumptions. Based on the work that we performed, we found management's assumptions to be comparable with the market data. – For the EAD estimation on the undrawn facilities, we considered various industry benchmark credit conversion factors when assessing the off-balance sheet component of the exposures and calculated a range of credit conversion factors, given the subjectivity involved in determining this parameter. We noted no matters requiring further consideration. • Using the assumptions tested above, we calculated a range of 'day one' fair values for the guarantees recognised during the year, and ECL for all financial guarantees as at 31 December 2025. We found that management's fair values fell within our calculated range. • In testing the subsequent measurement, we recalculated the amortisation of the 'day one' fair value over the term of the guarantee. No material differences were noted. • We compared the higher of the amount of the loss allowance determined in accordance with IFRS 9 and the initial amount recognised less cumulative amortisation, to management's calculation. No material differences were noted. • We evaluated the disclosures included within the notes to the separate financial statements against the requirements of IFRS Accounting Standards and noted no material matters for further consideration.

Independent auditor's report *continued*

Key audit matter	How our audit addressed the key audit matter
Reversal of impairment of Investment in Subsidiaries Refer to note 1 of the accounting policies (Basis of Preparation – Significant accounting judgements and estimates) and note 3 to the separate financial statements (Reversal of impairment of investment). The carrying value of Investments ("investments" or "investment in subsidiaries") amounts to R45 billion at 31 December 2025. The company assessed its investment in subsidiaries for indicators of impairment or impairment reversal. The company recognised a reversal of impairment of R16.7 billion in respect of its investment in Newshelf 899 (Pty) Ltd ("Newshelf"). The recoverable amount of the investment in Newshelf was determined using the fair value less cost of disposal ("FVLCD") method. The value of Newshelf is mainly dependent on its underlying investment in South Deep Mine. A discounted cash flow valuation, applying the FVLCD model, was used to determine the recoverable amount of South Deep Mine. As detailed in note 3 to the separate financial statements, increased gold prices and the stabilisation of production ramp-up at South Deep Mine during 2025 served as indicators for an impairment reversal which resulted in the Company performing an assessment to determine the recoverable amount of Newshelf. We considered the reversal of impairment of Investment in Subsidiaries to be a matter of most significance to the current year audit due to the following reasons: • Significant judgement applied by management in determining the recoverable amount of the Investment; and • the magnitude of the impairment reversal recognised in relation to the separate financial statements.	Our audit addressed this key audit matter as follows: • We held discussions with management to obtain an understanding of management's processes for identifying impairment or impairment reversal indicators as it relates to investments, as well as their conclusions reached. We noted no matters requiring further consideration. • We evaluated the design, implementation and operating effectiveness of the relevant internal controls over management's process used for the identification of impairment reversal indicators and their process to develop their estimates of the recoverable amounts for CGUs underpinning investments identified for impairment reversal testing. This included controls over the preparation, review and approval of the impairment reversal calculations and significant assumptions used in the calculations. • Management engaged external and internal experts to assess the reserves and resources used in the impairment calculations for reasonability. Through inspection of Curriculum Vitae, membership certificates from professional bodies and competent persons reports, we assessed the objectivity, competence and experience of management's experts. Based on the procedures performed, no areas requiring additional consideration were noted. • We assessed the valuation model used by management in their impairment reversal assessment, by comparing it to industry norms and acceptable valuation methodology. We found that it was consistent with industry norms and acceptable valuation methodology. • Using our corporate finance and financial modelling expertise, we evaluated management's discounted cash flow models for the respective CGUs underpinning investments assessed for impairment reversal against life-of-mine plans and our understanding of the operations ; and tested the key estimates and assumptions used by management in each discounted cash flow model selected for testing. Our procedures in respect of the estimates and assumptions included: – We assessed the reasonableness of management's future forecasts of annual production volumes and revenue generated, capital expenditure and operating and other costs included in the cash flow forecasts by comparing them to current and historical operational results and comparing forecasted production to the Reserves and Resources signed off by the Group's Competent Person and final approved business plans. We further performed a retrospective comparison of the forecasted cash flows to actual past performance and previous forecasts. We evaluated differences noted against relevant documentation and explanations obtained from management. We noted no matters requiring further consideration. – We benchmarked management's key assumptions relating to commodity prices and inflation rates used in determining the recoverable amount against independent third-party data. We found this to be within a reasonable range of possible outcomes.

Key audit matter	How our audit addressed the key audit matter
	– We independently calculated a range of discount rates, including the use of relevant independent third-party sources and data such as the cost of debt, risk-free rates in the market, market risk premiums, debt/equity ratios, the beta of comparable companies, as well as the impact of economic and industry factors. We found management's discount rate to be within a reasonable range of possible outcomes; and – Using the assumptions tested above, we recalculated the results of management's discounted cash flow models by using independently obtained key input assumptions such as commodity prices, exchange rates and market discount rates and determined a reasonable range of possible outcomes. We assessed the appropriateness of management's assumptions and performed independent sensitivity/scenario analyses to evaluate how changes in key inputs would affect the valuation. We found management's final recoverable amounts to be within a reasonable range of possible outcomes. • We compared the recoverable amounts to the carrying amounts of these investments in subsidiaries and noted no material differences in the impairment reversal recognised. • We evaluated the disclosures included within the notes to the separate financial statements against the requirements of International Financial Reporting Standards and noted no material matters for further consideration.

Other information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Gold Fields Limited Annual Financial Report 2025", which includes the Directors' Report, the Audit Committee Report and the Company Secretary's Certificate as required by the Companies Act of South Africa, and the documents titled "Gold Fields Limited Sustainability Report 2025", "Gold Fields Limited Mineral Resources and Mineral Reserves Supplement to the Integrated Annual Report 2025", "Gold Fields Limited Integrated Annual Report 2025" and "Gold Fields Limited Tax Transparency Report 2025", which we obtained prior to the date of this auditor's report, and the document titled "Gold Fields Limited ESG Databook 2025", which is expected to be made available to us after that date. The other information does not include the consolidated or the separate financial statements and our auditor's reports thereon.

Our opinion on the separate financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the separate financial statements

The directors are responsible for the preparation and fair presentation of the separate financial statements in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the separate financial statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

Independent auditor's report *continued*

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
- detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Audit tenure

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that PricewaterhouseCoopers Inc. has been the auditor of Gold Fields Limited for seven years.

Separate accounting policies

for the year ended 31 December 2025

The material accounting policies applied in the preparation of these separate financial statements are set out below. These policies have been consistently applied to all the years presented, except for the adoption of new and revised standards and interpretations or unless otherwise indicated.

Gold Fields Limited (the "Company" or "Gold Fields") is a company domiciled in South Africa. The registration number of the Company is 1968/004880/06. The address of the Company is 150 Helen Road, Sandton, Johannesburg, 2196. Gold Fields Limited is an investment holding company.

1. Basis of preparation

The financial statements of the Company have been prepared in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IASB"), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council, the JSE Listings Requirements and the requirements of the South African Companies Act.

The financial statements were authorised for issue by the directors on 30 March 2026.

Standards, interpretations and amendments to published standards effective for the year ended 31 December 2025 or early adopted by the Company

During the financial year, the following new and revised accounting standards, amendments to standards and new interpretations were adopted by the Company:

Standard(s) Amendment(s) Interpretation(s)	Nature of the change	Salient features of the changes	Impact on financial position or performance
IAS 21 <i>The Effect of Changes in Foreign Exchange Rates</i>	Amendment	- The amendment to IAS 21 provides guidance on when a currency is exchangeable and how to determine the exchange rate when it is not; and - The amendment did not have an impact on the Company, due to the fact that the Company does not have currencies that are not exchangeable.	No impact

Standards, interpretations and amendments to published standards that are not yet effective

Certain new standards, amendments and interpretations to existing standards have been published that apply to the Company's accounting periods beginning on 1 January 2026 or later periods but have not been early adopted by the Company.

These standards, amendments and interpretations that are relevant to the Company are:

Standard(s) Amendment(s) Interpretation(s)	Nature of the change	Salient features of the changes	Effective date*
IFRS 9 <i>Financial Instruments and</i> IFRS 7 <i>Financial Instruments: Disclosures</i>	Amendments	- The amendments provide the following guidance: - Clarify the date of derecognition of financial assets and liabilities, with an exception for financial liabilities settled through an electronic cash transfer system; - Clarify and add guidance for assessing whether a financial asset meets the solely payments of principal and interest criterion; - Additional disclosures for instruments with contractual terms that can change cash flows (instruments linked to the achievement of environmental, social and governance ("ESG") targets; and - Additional disclosures for equity instruments designated at fair value through other comprehensive income. - The Company is currently in the process of assessing the impact of these amendments.	1 January 2026

1. Basis of preparation *continued*

Standards, interpretations and amendments to published standards that are not yet effective continued

Standard(s) Amendment(s) Interpretation(s)	Nature of the change	Salient features of the changes	Effective date*
<i>Annual Improvements</i>	Amendments	- The following improvements were finalised and are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in the Accounting Standards: – IFRS 1 First-time Adoption of International Financial Reporting Standards; – IFRS 7 Financial Instruments: Disclosures; – IFRS 9 Financial Instruments; – IFRS 10 Consolidated Financial Statements; and – IAS 7 Statement of Cash Flows. - The amendments will not have an impact on the Company.	1 January 2026
IFRS 18 <i>Presentation and Disclosure in Financial Statements</i>	New Standard	- IFRS 18 replaces IAS1 Presentation of Financial Statements; - The following major updates are introduced by the new standard: – Classification of all income and expenses in the Income Statement into three defined categories: operating, investing and financing; – Requires companies to present specific subtotals in the Income Statement; – Introduces new requirements for disclosure of management-defined performance measures in the financial statements; and – Enhanced principles on the aggregation and disaggregation of financial statement items. - The Company is currently in the process of assessing the impact of this new accounting standard.	1 January 2027
IFRS 19 <i>Subsidiaries without Public Accountability</i>	New Standard	- IFRS 19 is a voluntary accounting standard with the objective to provide reduced disclosure requirements for eligible subsidiaries. - The new standard will not have an impact on the Company's financial statements, as it only applies to subsidiaries.	1 January 2027
IAS 21 <i>Effects of Changes in Foreign Exchange Rates</i>	Amendments	- The amendments specify the translation procedures for an entity whose presentation currency is that of a hyperinflationary economy. - The amendments will not have an impact on the Company.	1 January 2027

* Effective date refers to annual period beginning on or after said date.

Significant accounting judgements and estimates

Use of estimates: The preparation of the financial statements in accordance with IFRS Accounting Standards requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgement based on various assumptions and other factors such as historical experience, current and expected economic conditions, and in some cases actuarial techniques. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to the following:

- The determination of fair value on initial recognition of financial guarantees;
- The determination of subsequent measurement of financial guarantees; and
- Carrying values of investments in subsidiaries.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial year are discussed below.

Separate accounting policies *continued*

for the year ended 31 December 2025

1. Basis of preparation *continued*

Financial guarantees

The Company acts as a co-guarantor for certain of its subsidiaries borrowings and provisions that are held by various parties across the Gold Fields Limited Group. The Company recognises financial guarantees for these contracts which are accounted for as financial instruments and recognised initially at fair value using lifetime expected credit losses ("ECL"). The financial guarantees are subsequently measured at the higher of the amount of the loss allowance, based on a 12 month ECL and the initial amount recognised less cumulative amortisation. The initial fair value is determined based on the probability of the subsidiaries defaulting on their obligations which involves significant judgement and estimation.

In determining the amount of the initial fair value and subsequent measurement, the specific areas of significant judgement include the following:

- The probability of default ("PD"), is a measure of the expectation of how likely the customer is to default. The following PDs are used in initial fair values and subsequent ECL calculation of the financial guarantees at 31 December 2025 and 2024:

	Life-time PDs		12-month PDs	
	2025	2024	2025	2024
US\$500 million 10-year notes issue	N/A	N/A	0.14 %	1.15 %
US\$750 million 7-year notes issue	1.82 %	N/A	0.14 %	— %
US\$1,200 million revolving credit facility	N/A	N/A	0.14 %	0.14 %
US\$750 million multi-currency bridge facilities	N/A	0.14 %	— %	0.14 %
A\$500 million syndicated revolving credit facility	N/A	N/A	0.14 %	0.93 %
US\$2,300 million multi-currency bridge facility	0.11 %	N/A	0.11 %	— %
A\$1,250 million multi-currency term loan facility	1.33 %	N/A	0.14 %	— %
Rand facilities	N/A	N/A	0.56 %	3.61% - 3.68%
Silicosis settlement costs	N/A	N/A	7.88 %	8.05 %

- The exposure at default of R65.6 billion (2024: R54.2 billion), which is the expected amount outstanding at the point of default;
- The loss given default of 50%, which is the expected loss that will be realised at default; and
- The credit conversion factor of 40%, which is the expected probability of drawdowns on undrawn facilities.

The carrying amount of financial guarantees at 31 December 2025 was R442.8 million (2024: R365.5 million). Refer note 9.

Carrying values of investments in subsidiaries

Investments in subsidiaries are stated at cost less accumulated impairment losses. The Company reviews and tests the carrying values of investments annually or when events or changes in circumstances suggest that the carrying amount may not be recoverable by comparing the recoverable amounts to these carrying values. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment and reversal of impairment may have occurred, estimates are prepared of recoverable amounts of the investments. The recoverable amounts are based on the fair value less cost of disposal ("FVLCD") of the underlying cash-generating unit ("CGU"). Expected future cash flows used to determine the FVLCD of the CGU's are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including reserves and production estimates, together with economic factors such as the gold prices, discount rates, foreign currency exchange rates, resource valuations (determined based on comparable market transactions), estimates of costs to produce reserves and future capital expenditure.

Newshelf is the holding company of GFI Joint Venture Holdings ("GFIJVH") and Gold Fields Operations ("GFO") which own the South Deep mine. Significant assumptions used in the FVLCD calculation of the South Deep CGU include:

	2025	2024
Rand Gold price per kilogram – year 1	R2,190,530	R1,465,000
Rand Gold price per kilogram – year 2	R2,189,480	R1,420,000
Rand Gold price per kilogram – year 3	R2,177,520	R1,410,000
Rand Gold price per kilogram – year 4	R2,070,810	R1,370,000
Rand Gold price per kilogram – year 5 onwards	R1,826,740	R1,233,000
Discount rates – South Africa (nominal)	14.3 %	15.9 %
Inflation rate – South Africa ¹	3.1 %	4.6 %
Life-of-mine – South Deep	83 years	85 years

¹ Due to the availability of unredeemed capital for tax purposes over several years into the life of the South Deep mine, nominal cash flows are used for South Africa. In order to determine nominal cash flows in South Africa, costs are inflated by the current South African inflation rate.

At 31 December 2017 and 2018, the Company recognised a total impairment of R16,672.6 million in respect of the investment in Newshelf. At 31 December 2025, the Company reversed the impairment of R16,672.6 million as a result of significantly higher gold prices and the stabilisation of the ramp-up at the South Deep mine during 2025. The impairment reversal was limited to what the carrying amount of Newshelf would have been at 31 December 2025 had the investment not been impaired. There were also no reversals of impairment in 2024. Refer note 3 for further details.

1. Basis of preparation *continued*

Carrying values of investments in subsidiaries *continued*

The FVLCOB calculations are sensitive to the gold price assumptions and an increase or decrease in the gold price could materially change the FVLCOB. Should there be a significant decrease in the gold price, the Company would take actions to assess the implications on the life-of-mine plans, including the determination of reserves and resources and the appropriate cost structure for the CGUs. The carrying amount of investments in subsidiaries at 31 December 2025 was R42,179.5 million (2024: R25,328.8 million).

2. Investments

2.1 Subsidiaries

Investments in subsidiaries are stated at cost less accumulated impairment losses.

3. Foreign currencies

3.1 Functional and presentation currency

The Company's functional and presentation currency is South African Rand and the separate financial statements are presented in South African Rand.

4. Financial instruments

4.1 Non-derivative financial instruments

Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

Classification and subsequent measurement

Financial assets – Classification policy

On initial recognition, an equity instrument is either classified as fair value through other comprehensive income ("FVOCI") if an irrevocable election is made or FVTPL.

On initial recognition, a debt instrument is classified as:

- Amortised cost;
- FVOCI; or
- FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held with a business model whose objective is to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held with a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets.

Financial asset category	Description
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.
Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets – Classification of financial assets

The following information is considered by the Company in determining the classification of financial assets:

- The Company's business model for managing financial assets; and
- The contractual cash flow characteristics of the financial assets.

Separate accounting policies *continued*

for the year ended 31 December 2025

4. Financial instruments *continued*

The business model assessment of the financial assets is based on the Company's strategy and rationale for holding the financial assets on a portfolio level. When considering the strategy, the following is considered:

- Whether the financial assets are held to collect contractual cash flows;
- Whether the financial assets are held for sale; and
- Whether the financial assets are held for both collecting contractual cash flows and to be sold.

Financial assets – Assessment of contractual cash flows

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Impairment

The Company recognises loss allowances for expected credit losses ("ECLs") on financial assets measured at amortised cost. When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information. The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit impaired. A financial asset is "credit impaired" when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Derecognition of financial instruments

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

4.2 Trade and other receivables and related entity loans receivable

Trade and other receivables and related entity loans receivable are carried at amortised cost less ECLs using the Company's business model for managing its financial assets.

4.3 Trade and other payables and related entity loans payable

Trade payables are recognised at amortised cost using the effective interest method.

The loans are interest free and have no fixed repayment terms.

5. Taxation

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is measured on taxable income at the applicable statutory rate substantively enacted at the reporting date.

Interest and penalties are accounted for in current tax.

Deferred taxation is provided on temporary differences existing at each reporting date between the tax values of assets and liabilities and their carrying amounts. Substantively enacted tax rates are used to determine future anticipated tax rates which in turn are used in the determination of deferred taxation.

Deferred taxation is not recognised for temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss and taxable temporary differences arising on the initial recognition of goodwill.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

These temporary differences are expected to result in taxable or deductible amounts in determining taxable profits for future periods when the carrying amount of the asset is recovered or the liability is settled.

Deferred tax assets relating to the carry forward of unutilised tax losses and/or deductible temporary differences are recognised to the extent it is probable that future taxable profit will be available against which the unutilised tax losses and/or deductible temporary differences can be recovered. Deferred tax assets are reviewed at each reporting date and are adjusted if recovery is no longer probable.

6. Financial guarantees

Financial guarantee contracts are accounted for as financial instruments and are recognised initially at fair value and are subsequently measured at the higher of the amount of the loss allowance determined in accordance with IFRS 9 Financial Instruments and the initial amount recognised less cumulative amortisation. Financial guarantees are amortised on a straight-line basis over the period that the borrowing facilities are available. Foreign exchange gains and losses in respect of foreign denominated financial guarantees are recognised in profit or loss. Assumptions applied in determining the fair value of the financial guarantees on initial recognition and subsequent measurement are the loss given default, probability of default, exposure at default and credit conversion factor.

As the issuer of financial guarantees to its subsidiaries, the Company accounts for the initial fair value of the guarantee as a capital contribution via an increase in investments in the subsidiary, which reflects the transaction's economic substance.

7. Ordinary share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

8. Investment income

Investment income comprises interest income and dividend income from listed and unlisted investments.

Investment income is recognised to the extent that it is probable that economic benefits will flow to the Company and the amount of investment income can be reliably measured. Investment income is stated at the fair value of the consideration received or receivable.

8.1 Dividend income

Dividends are recognised in profit or loss when the right to receive payment is established.

8.2 Interest income

Interest income is recognised in profit or loss using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset or amortised cost of the financial liability.

9. Dividends declared

Dividends and the related taxation thereon are recognised only when such dividends are declared.

Cash flows from dividends paid are classified under operating activities in the statement of cash flows.

Notes to the separate financial statements

for the year ended 31 December 2025

1. Investment income

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Dividends received from subsidiaries of the Company – cash	13,095.7	7,038.7
Interest received	13.8	—
Total investment income	13,109.5	7,038.7

2. Loss on foreign exchange, net

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Foreign exchange loss – Canadian withholding tax receivable ¹	(103.0)	(72.6)
Foreign exchange gain/(loss) – Financial guarantees ²	46.0	(7.9)
Other	0.3	(0.1)
Total loss on foreign exchange, net	(56.7)	(80.6)

¹ A foreign exchange loss of R103.0 million (2024: R72.6 million) was recognised on the revaluation of the CAD100.3 million tax receivable to South African Rand at 31 December 2025. Refer note 13 for further details.

² Relates to financial guarantees on United States Dollar, Australian Dollar and Canadian Dollar borrowings. Refer note 9 for further details.

3. Reversal of impairment of investment

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Newshelf 899 (Pty) Ltd ("Newshelf")	16,672.6	—
Reversal of impairment of investment	16,672.6	—

Newshelf is the holding company of GFJVH and GFO which own the South Deep mine. Refer note 6 for further details.

At 31 December 2017 and 2018, the Company recognised a total impairment of R16,672.6 million in respect of the investment in Newshelf. At 31 December 2025, the Company reversed the impairment of R16,672.6 million as a result of significantly higher gold prices and the stabilisation of the ramp-up at the South Deep mine during 2025. The impairment reversal was limited to what the carrying amount of Newshelf would have been at 31 December 2025 had the investment not been impaired.

The recoverable amount of the investment in Newshelf was based on the FVLCOF of the South Deep mine calculated using a combination of the market (resource value) and the income approach (level 3 of the fair value hierarchy). The recoverable amount is significantly higher than the carrying value and a reasonable possible change in the assumptions would not change the conclusion to reverse the impairment or the quantum of the reversal. Refer to the accounting policies on page 150 for the assumptions used based on the 2025 life-of-mine plan of the South Deep mine.

4. Taxation

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Current taxation	(6.3)	(16.6)
Deferred taxation ¹	27.8	21.2
Total taxation	21.5	4.6

4. Taxation *continued*

The tax calculated on the Company's profit before tax differs from the theoretical amount that would arise using the statutory tax rate as follows:

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Profit before taxation	29,399.7	6,912.5
Tax calculated at the Company tax rate of 27% (2024: 27.0%)	(7,937.9)	(1,866.4)
Non-taxable dividends received	3,535.8	1,900.4
Non-deductible expected credit losses on financial guarantees	(0.1)	(0.8)
Non-taxable amortisation of financial guarantees	28.2	26.4
Non-deductible foreign exchange gain/(loss) on financial guarantees	12.4	(2.1)
Reversal of impairment of investment	4,501.6	—
Non-deductible foreign exchange loss on Canadian withholding tax receivable	(27.8)	(19.6)
Non-deductible silicosis settlement costs	0.9	1.4
Deferred tax recognised on foreign exchange - Canadian withholding tax receivable ¹	27.8	21.2
Other imputed taxable income	—	(9.9)
Non-deductible expenditure	(119.4)	(46.0)
Total taxation	21.5	4.6

¹ The R27.8 million (2024: R21.2 million) deferred tax asset raised in 2025 relates to the temporary difference arising on foreign exchange losses attributable to the Canadian withholding tax receivable.

5.1 Dividend paid

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
2024 final dividend of 700 SA cents per share (2024: 420 SA cents) declared on 20 February 2025.	6,265.2	3,759.1
2025 interim dividend of 700 SA cents was declared during 2024 (2024: 300 SA cents).	6,265.2	2,685.1
Total dividends	12,530.4	6,444.2

A final dividend in respect of the financial year ended 31 December 2025 of 1850 SA cents per share was approved by the Board of Directors on 18 February 2026. This dividend payable is not recognised in these financial statements. Dividends are subject to dividend withholding tax.

In addition to the base dividend, on 19 February 2026, Gold Fields declared a special dividend of 450 SA cents per share. This dividend payable is not recognised in these financial statements. Dividends are subject to dividend withholding tax. Refer note 17 for further details.

5.2 Earnings per share

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
5.2.1 Basic earnings per share – cents	3,287	773
Basic earnings per share is calculated by dividing the profit of R29,421.2 million (2024: R6,917.1 million) by the weighted average number of ordinary shares in issue during the year of 895,024,247 (2024: 894,881,526).		

Notes to the separate financial statements *continued*

for the year ended 31 December 2025

5.2 Earnings per share *continued*

South African Rand		
<i>Figures in millions unless otherwise stated</i>	2025	2024
5.2.2 Diluted earnings per share – cents	3,279	772
Diluted earnings per share is calculated by dividing the profit of R29,421.2 million (2024: R6,917.1 million) by the diluted number of ordinary shares in issue during the year of 897,390,777 (2024: 895,503,589).		
The weighted average number of shares have been adjusted by the following to arrive at the diluted number of ordinary shares:		
Weighted average number of shares	895,024,247	894,881,526
Share options in issue	2,366,530	622,063
Diluted number of ordinary shares	897,390,777	895,503,589

South African Rand		
<i>Figures in millions unless otherwise stated</i>	2025	2024
5.2.3 Headline earnings per share – cents	1,424	773
Headline earnings per share is calculated by dividing the headline earnings of R12,748.6 million (2024: R6,917.1 million) by the number of ordinary shares in issue during the year of 895,024,247 (2024: 894,881,526).		
Net profit is reconciled to headline earnings as follows:		
Long-form headline earnings reconciliation		
Profit for the year	29,421.2	6,917.1
Reversal of impairment of investment	(16,672.6)	—
Headline earnings	12,748.6	6,917.1

South African Rand		
<i>Figures in millions unless otherwise stated</i>	2025	2024
5.2.4 Diluted headline earnings per share – cents	1,421	772
Diluted headline earnings per share is calculated by dividing the headline earnings of R12,748.6 million (2024: R6,917.1 million) by the diluted number of ordinary shares in issue during the year of 897,390,777 (2024: 895,503,589).

³ Incorporated in the Republic of South Africa.

⁴ Incorporated in Peru.

⁵ Incorporated in the British Virgin Islands.

⁶ Incorporated in Chile.

⁷ Incorporated in Canada.

⁸ The South Deep Joint Venture ("SDJV") owns and operates the South Deep Gold Mine. The SDJV is an unincorporated joint venture between Gold Fields Operations Limited ("GFO") and GFI Joint Venture Holdings Proprietary Limited ("GFIJVH"). GFO and GFIJVH are wholly owned subsidiaries of Newshelf 899 Proprietary Limited ("Newshelf"). The share capital of Newshelf comprises of: 90 000 000 "A" Shares, representing 90% of Newshelf's equity. Gold Fields Limited is the holder of the "A" Shares; and 10 000 000 "B" Shares, representing 10% of Newshelf's equity. South Deep's BEE shareholders are the holders of the "B" Shares.

⁹ At 31 December 2025, the Company reversed an impairment of R16,672.6 million relating to the investment in Newshelf. Refer note 3 for further details.

¹⁰ The "B" Shares entitle the BEE shareholders to a cumulative preferential dividend of R20 million per annum for the first 10 years (expired in December 2020), R13.3 million per annum for the next five years and R6.7 million for the five years thereafter. After 20 years, this preferential dividend will cease. The "B" Shares' rights to participate in the profits of Newshelf over and above the cumulative preferred dividend were initially suspended. The suspension will be lifted over a 20 year period on a phased-in basis as follows: after 10 years, in respect of one-third of the "B" Shares; after 15 years, in respect of another one-third of the "B" Shares; and after 20 years, in respect of the remaining one-third of the "B" Shares. After 20 years, all of the "B" Shares will substantially have the same rights as the "A" Shares. The BEE shareholders must retain ownership of the "B" Shares for 30 years. On 6 December 2025, per the South Deep BEE transaction an economic interest of 6.90% in Newshelf 899 (Proprietary) Limited vested to the BEE non-controlling interest holders.

Authorised¹	2,000,000,000	2,000,000,000

¹ Share capital comprises no par value shares.

Authorised and issued

Holders of shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company.

In terms of the general authority granted by shareholders at the AGM on 28 May 2025, the authorised but unissued ordinary stated capital of the Company representing not more than 5% of the issued stated capital of the Company at that date. This authority expires at the next annual general meeting where shareholders will be asked to place under the control of the directors the authorised but unissued ordinary stated capital of the Company representing not more than 5% of the issued stated capital of the Company from time to time.

In terms of the JSE listing requirements, shareholders may, subject to certain conditions, authorise the directors to issue the shares held under their control for cash, other than by means of a rights offer, to shareholders. In order that the directors of the Company may be placed in a position to take advantage of favourable circumstances which may arise for the issue of such shares for cash, without restriction, for the benefit of the Company, shareholders will be asked to consider a special resolution to this effect at the forthcoming AGM.

Repurchase of shares

During 2025, the Company exercised the general authority granted at the AGM held on 28 May 2025 to buy back shares from its issued ordinary stated capital. Treasury shares totalling 1,089,671 were bought during 2025 and 483,964 were issued to participants upon vesting of the employee share options.

In addition, the Company will implement a share buy-back programme during the 2026 financial year, subject to prevailing market conditions and applicable regulatory requirements. Refer note 40 for further details.

Currently, the number of ordinary shares that may be bought back in any one financial year may not exceed 5% of the issued ordinary share capital as of 28 May 2025. At the next AGM, shareholders will be asked to renew the general authority for the acquisition by the Company, or a subsidiary of the Company, of its own shares.

Beneficial interest

The following beneficial shareholders hold 5% or more of the Company's listed ordinary shares at 31 December 2025:

	Number of shares	% of issued ordinary shares
Public Investment Corporation (Government Employees Pension Fund) ¹	180,381,384	20.15 %

¹ The only transactions between Gold Fields and Public Investment Corporation related to dividends paid.

Translation	(103.0)	(72.6)
Taxation received/(paid)	111.3	(19.1)

¹ The amount receivable, net comprises as follows:

South African Rand		
<i>Figures in millions unless otherwise stated</i>	2025	2024
Non-current taxation receivable*	(1,210.3)	(1,313.3)
Current taxation payable/(receivable) [#]	9.5	(108.1)
Taxation receivable at the end of the year, net	(1,200.8)	(1,421.4)

* The R1,200.8 million (CAD100.3 million) (2024: R1,313.3 million (CAD100.3 million)) at 31 December 2025 relates to the Yamana break fee withholding tax receivable from the Canadian tax authority. Withholding tax was deducted and paid to the Canadian tax authority on the Yamana breakage fee in 2022. Management continues to believe that it will be recovered from the Canadian tax authority. The difference between the withholding tax payable at 31 December 2025 and 31 December 2024 relates to the foreign exchange loss on the translation from CAD (refer note 2).

[#] The R108.1 million at 31 December 2024 related mainly to the Yamana break fee capital gains tax receivable from SARS which was received during 2025.

Notes to the separate financial statements *continued*

for the year ended 31 December 2025

14. Financial instruments

Accounting classifications and fair values

The following tables show the carrying amounts of financial assets and financial liabilities. Except for the financial guarantees for which the fair value is R48.3 million (2024: R236.0 million), the carrying amounts approximate fair values due to reasons discussed below:

	South African Rand			
	Fair value through OCI	Financial assets measured at amortised cost	Financial liabilities measured at amortised cost	Total
<i>Figures in millions unless otherwise stated</i>				
31 December 2025				
Financial assets measured at fair value				
– Listed investments	2.9	—	—	2.9
Total	2.9	—	—	2.9
Financial assets not measured at fair value				
– Trade and other receivables	—	21.5	—	21.5
– Related entity loans receivable	—	1,903.5	—	1,903.5
Total	—	1,925.0	—	1,925.0
Financial liabilities not measured at fair value				
– Trade and other payables	—	—	17.1	17.1
– Related entity loans payable	—	—	4,136.2	4,136.2
– Financial guarantees	—	—	442.8	442.8
Total	—	—	4,596.1	4,596.1
31 December 2024				
Financial assets measured at fair value				
– Listed investments	0.8	—	—	0.8
Total	0.8	—	—	0.8
Financial assets not measured at fair value				
– Trade and other receivables	—	39.7	—	39.7
– Related entity loans receivable	—	1,338.2	—	1,338.2
Total	—	1,377.9	—	1,377.9
Financial liabilities not measured at fair value				
– Trade and other payables	—	—	13.4	13.4
– Related entity loans payable	—	—	3,664.6	3,664.6
– Financial guarantees	—	—	365.5	365.5
Total	—	—	4,043.5	4,043.5

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Trade and other receivables and trade and other payables

The carrying amounts approximate fair values due to the short maturity of these instruments.

Related entity loan payable and receivable

The fair value of related entity loans payable and receivable approximates their carrying amount due to the fact that the loans are payable on demand and interest free. This is considered a level 3 fair value measurement.

Investments

The fair value of publicly traded instruments (listed investments) is based on quoted market values.

15. Risk management activities

In the normal course of its operations, the Company is exposed to commodity price, currency, interest rate, liquidity, equity price and credit risk. In order to manage these risks, the Group has developed a comprehensive risk management process to facilitate control and monitoring of these risks.

Controlling and managing risk in the Company

The Group has policies in areas such as counterparty exposure, hedging practices and prudential limits which have been ultimately approved by Gold Fields' Board of Directors. Management of financial risk is centralised at Gold Fields' treasury department ("Treasury"), which acts as the interface between the Company and counterparty banks. Treasury manages financial risk in accordance with the policies and procedures established by the Gold Fields Board of Directors and Executive Committee.

Treasury activities are guided by the Treasury Framework as well as domestic and international financial market regulations.

The financial risk management objectives of the Company are defined as follows:

Liquidity risk management: The objective is to ensure that the Group is able to meet its short-term commitments through the effective and efficient usage of credit facilities.

Currency risk management: The objective is to manage the adverse effect of the currency fluctuations on the Group's results.

Funding risk management: The objective is to meet funding requirements timeously and at competitive rates by adopting reliable liquidity management procedures.

Investment risk management: The objective is to achieve optimal returns on surplus funds.

Interest rate risk management: The objective is to identify opportunities to prudently manage interest rate exposures.

Counterparty exposure: The objective is to only deal with approved counterparts that are of a sound financial standing. The Group is limited to a maximum investment of 2.5% of the financial institutions' equity, which is dependent on the institutions credit rating. This credit rating is Fitch Ratings' national short-term credit rating for financial institutions.

Commodity price risk management: The objective is to keep commodity production unhedged except commodities used in the production process such as oil and others.

Operational risk management: The objective is to implement controls to adequately mitigate the risk of error and/or fraud to an acceptable level.

Banking relations management: The objective is to maintain relationships with credible financial institutions and ensure that all contracts and agreements related to risk management activities are co-ordinated and consistent throughout the Group and that they comply where necessary with all relevant regulatory and statutory requirements.

Notes to the separate financial statements *continued*

for the year ended 31 December 2025

15. Risk management activities *continued*

Credit risk

Credit risk represents risk that an entity will suffer a financial loss due to the other party of a financial instrument not discharging its obligation, and arises principally from the Company's receivables and as guarantors to certain of the Group's borrowings.

The Company has reduced its exposure to credit risk by dealing with a number of counterparties. The Company approves these counterparties according to its risk management policy and ensures that they are of good credit quality.

The combined maximum credit risk exposure of the Company is as follows:

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Trade and other receivables	21.5	39.7
Related entity loans receivable	1,903.5	1,338.2
Financial guarantees	65,649.8	54,191.8

¹ Trade and other receivables for 2025 exclude VAT amounting to R5.3 million.

Expected credit loss assessment for customers

The Company determines each exposure to credit risk based on data that is determined to be predictive of the risk of loss and past experienced credit judgement.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Company also considers other factors that might impact on the credit risk of its customer base including default risk and the country in which the customer operates.

Impairment of trade receivables, carried at amortised cost, has been determined using the simplified expected credit loss ("ECL") approach and reflects the short-term maturities of the exposures.

Related entity loans receivable

The ECL on the related entity loan receivable from Newshelf 899 (Proprietary) Limited ("Newshelf") has been assessed as immaterial on the basis that Newshelf has sufficient liquid assets and generates sufficient cash flows to repay the loan if called upon.

The Company assesses if there has been a significant increase in credit risk based on Newshelf having sufficient liquid assets and being able to generate sufficient cash flows through its operating asset, South Deep, to repay the loan if called upon. At 31 December 2025 and 2024, the related entity loan receivable from Newshelf is considered to have a low credit risk as Newshelf has capacity to meet its contractual cash flow obligations if the loan was called upon in the short-term. The related entity loan receivable is at a Stage 1 for both 2025 and 2024 as there has not been a significant increase in credit risk.

Gold Fields Limited defines default as an event where the related entity loan receivable is not settled once repayment is demanded.

Financial guarantees

Gold Fields Limited and certain of its subsidiaries have guaranteed all payments and other obligations of Orogen Holdings (BVI) Limited ("Orogen") related to the US\$500 million 10-year notes issue, all payments and other obligations of Gold Fields Windfall Holdings Inc. ("Windfall") related to the US\$750 million 7-year notes issue, all payments and other obligations of Orogen and Windfall related to the US\$1,200 million term loan and revolving credit facility, all payments and other obligations of Gold Fields Operations Limited and GFI Joint Venture Holdings (Proprietary) Limited related to the R500 million Nedbank revolving credit facility, R1,000 million Rand Merchant Bank revolving credit facility, R500 million Absa Bank revolving credit facility, R500 Standard Bank revolving credit facility and the Silicosis settlement costs, all payments and obligation of the South African operations related to the Short-term Rand uncommitted credit facilities and all payments and other obligations of Gruyere Holdings (Proprietary) Limited related to the A\$500 million syndicated revolving credit facility, the US\$2,300 million multi-currency bridge facility and the A\$1,250 million multi-currency term loan facility (2024: US\$500 million 10-year notes issue, US\$1,200 million term loan and revolving credit facilities, US\$750 million multi-currency bridge facilities, R500 million Nedbank revolving credit facility, R1,000 million Rand Merchant Bank revolving credit facility, R500 million Absa revolving credit facility, R500 Standard Bank revolving credit facility, Silicosis settlement costs, Short-term Rand uncommitted credit facilities and the A\$500 million syndicated revolving credit facility). The maximum possible exposure is the total amount the entity would have to pay if the guarantee is called on and if none of the other subsidiaries that provided guarantees were able to pay the amount called on. At 31 December 2025 and 2024, there was no indication that the guarantees will be called upon.

15. Risk management activities *continued*

Liquidity risk

Going concern assessment

The Company's current liabilities exceeded its current assets by R4,644.9 million at 31 December 2025 (2024: R3,902.3 million). Included in current liabilities are related party loans payable to subsidiary companies of R4,136.2 million (2024: R3,664.6 million) (refer note 6). The individual subsidiary companies have entered into agreements that they will not demand repayment of the loans owing to them until such time as the Company can repay its other liabilities in the normal course of business. Gold Fields Limited has access to the Group's undrawn loan facilities (refer note 9). The directors believe that these agreements, in conjunction with the utilisation of the Group's existing undrawn loan facilities, will enable the Company to continue to meet its obligations as they fall due for a period of at least 12 months from 31 December 2025. Accordingly, the financial statements have been prepared on the going concern basis.

The following are the contractually due undiscounted cash flows resulting from maturities of all financial liabilities, including interest payments:

South African Rand				
<i>Figures in millions unless otherwise stated</i>	Within one year	Between one and five years	After five years	Total
2025				
Trade and other payables	17.1	—	—	17.1
Financial guarantees	65,649.8	—	—	65,649.8
Related entity loans payable	4,136.2	—	—	4,136.2
Total	69,803.1	—	—	69,803.1
2024				
Trade and other payables	13.4	—	—	13.4
Financial guarantees	54,191.8	—	—	54,191.8
Related entity loans payable	3,664.6	—	—	3,664.6
Total	57,869.8	—	—	57,869.8

Currency risk

Currency risk only exists on account of financial instruments being denominated in a currency that is not the functional currency. As at 31 December 2025, the most significant currency risk arises due to the guarantee provided by the Company the US\$500 million 10-year notes issue, US\$750 million 7-year notes issue, the US\$1,200 million multi-currency revolving credit facility, the US\$2,300 million multi-currency bridge facility, A\$1,250 million multi-currency term loan facility and the CAD100.3 million withholding tax receivable from the Canadian Tax Authority (2024: the US\$500 million 10-year notes issue, the US\$1,200 million revolving credit facility, the US\$750 million multi-currency bridge facility and the CAD100.3 million withholding tax receivable from the Canadian Tax Authority).

A 10% (5%) weakening in the Rand/United States dollar exchange rate would result in an increase in the foreign exchange loss on financial guarantees recognised in the income statement of R31.3 million (R15.7 million) (2024: R30.4 million (R15.2 million)).

A 10% (5%) strengthening in the Rand/United States dollar exchange rate would result in a decrease in the foreign exchange loss on financial guarantees recognised in the income statement of R31.3 million (R15.7 million) (2024: R30.4 million (R15.2 million)).

A 10% (5%) weakening in the Rand/Australian dollar exchange rate would result in an increase in the foreign exchange loss on financial guarantees recognised in the income statement of R10.6 million (R5.3 million). A 10% (5%) strengthening in the Rand/Australian dollar exchange rate would result in a decrease in the foreign exchange loss on financial guarantees recognised in the income statement of R10.6 million (R5.3 million).

A 10% (5%) weakening in the Rand/Canadian dollar exchange rate would result in an increase or decrease in the foreign exchange gain/(loss) on the Canadian withholding tax receivable recognised in the income statement of R121.0 million (R60.5 million) (2024: R119.4 million (R62.5 million)). A 10% (5%) strengthening in the Rand/Canadian dollar exchange rate would result in an increase or decrease in the foreign exchange gain/(loss) on the Canadian withholding tax receivable recognised in the income statement of R121.0 million (R60.5 million) (2024: R145.9 million (R69.1 million)).

Notes to the separate financial statements *continued*

for the year ended 31 December 2025

16. Related party transactions

16.1 Subsidiaries

The subsidiaries are disclosed in note 6.

Refer to notes 1, 6 and 9 for further details relating to related party transactions and balances.

16.2 Key management remuneration

Key management personnel include executive directors and prescribed officers ("Executive Committee"). The total key management remuneration amounted to R309.4 million (2024: R243.0 million) for 2025.

The details of key management personnel, including remuneration and participation in the Gold Fields Limited share scheme and LTIP are disclosed in note 16.3.

16.3 Directors' and prescribed officers' remuneration

None of the directors and officers of Gold Fields or, to the knowledge of Gold Fields, their families, had any interest, direct or indirect, in any transaction during the last three fiscal periods or in any proposed transaction which has affected or will materially affect Gold Fields or its investment interests or subsidiaries, other than as stated below.

None of the directors or officers of Gold Fields or any associate of such director or officer is currently or has been at any time during the past three fiscal periods indebted to Gold Fields.

At 31 December 2025, the Executive Committee and non-executive directors' beneficial interest in the issued and listed stated capital of the Company was nil% (2024: 0.1%). No one director's interest individually exceeds 1% of the issued stated capital or voting control of the Company.

Compensation to directors (included in other costs)

	South African Rand	
<i>Figures in millions unless otherwise stated</i>	2025	2024
Executive directors	76.7	21.5
Non-executive directors	31.5	28.8
	108.2	50.3

The fees above related to services performed for the Company only. The tables on the following page are the total remuneration paid to executive directors by the Company as well as subsidiaries.

Non-executive directors ("NEDs")

NEDs' fees reflect their services as directors and services on various sub-committees on which they serve.

NEDs do not participate in any of the short- or long-term incentive plans and there are no arrangements in place for compensation to be awarded in the case of loss of office.

The Remuneration Committee seeks to align NEDs fees to the median of an appropriate peer group and reviews fee structures for NEDs on an annual basis. Approval is sought from shareholders after recommendation by the Board at the Annual General Meeting.

Total – 2025	88.2	7.4	105.0	31.0	77.8	309.4

¹ The total US\$ amounts paid for 2025 and included in salary were as follows: M Fraser US\$324,480, C Gratias US\$161,200 and A Dall US\$150,000.

² The annual bonuses for the year ended 31 December 2025 were paid in February/March 2026.

³ Other payments include business related reimbursements, leave encashment, long-service awards, acting allowances, retention bonuses, termination payments where applicable and any legislated payments.

⁴ The share-based payment expense is calculated in terms of IFRS Accounting Standards and is not the cash amounts paid.

⁵ A Dall assumed the interim CFO role on 1 May 2024 and was appointed permanent CFO on 1 March 2025. The amount disclosed under "Other" reflects the acting allowance paid in January and February 2025, calculated at 20% of total fixed remuneration during the acting period.

⁶ In addition to a local inflationary increase of 3.7% in 2025, M Steyn's base salary increased from A\$642,940 to A\$771,528 following her appointment as EVP: People and Sustainability and assumption of a dual executive portfolio, effective 1 April 2025. M Steyn was appointed as EVP Sustainability effective 1 June 2024. Other payments include a second instalment amounting to A\$178,571 relating to the total 2024 sign-on payment of A\$1.2 million payable over three annual instalments.

⁷ G Lotz received an acting allowance of 20% of total fixed remuneration up to 31 March 2025 while serving as Acting EVP: People, which is reflected under "Other".

⁸ In addition to a local inflationary increase of 3.7% in 2025, F Swanepoel's base salary increased from A\$782,653 to A\$900,051 following his appointment as Chief Operating Officer, effective 1 September 2025.

During 2025, F Swanepoel assumed responsibility for the South America asset portfolio in addition to his executive duties, requiring frequent travel between Australia and South America. The Board approved an exertion allowance of A\$60,607, which is reflected under "Other".

⁹ J Sander assumed the role of Acting Chief Technical Officer on 1 September 2025 and received an acting allowance as part of the 2025 reporting year, which is reflected under "Other".

¹⁰ M Preece retired on 31 August 2025. His 2025 STI and LTI vesting were prorated to the retirement date. Payments for accrued annual leave are included under "Other".

¹¹ L Rivera separated from the Company on 31 March 2025 through mutual agreement. Payments included under "Other" comprise accrued annual leave and statutory severance in accordance with Peruvian legislation. No STI was payable under the Group's policy. LTI vesting was prorated to the termination date.

¹ The total US\$ amounts paid for 2024 and included in salary were as follows: M Fraser US\$312,000, C Gratiass US\$46,746 and P Schmidt US\$74,067.

² The annual bonuses for the year ended 31 December 2024 were paid in February/March 2025.

³ Other payments include business related reimbursements, leave encashment, long-service awards, acting allowances, sign-on bonuses, termination payments where applicable and any legislated payments.

⁴ The share-based payment expense is calculated in terms of IFRS Accounting Standards and is not the cash amounts paid.

⁵ M Fraser was appointed as Chief Executive Officer effective 1 January 2024.

⁶ P Schmidt retired at 30 June 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

⁷ A Dall stepped into the interim CFO position on 1 May 2024 and received an acting allowance of 20% of total fixed remuneration for the 2024 reporting period reflected under "Other".

⁸ M Preece was appointed as Chief Operating Officer effective 15 March 2024.

⁹ Other payments for 2024 include advance payment of portion of estimated Peru Utilidades.

¹⁰ N Chohan retired at 31 August 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

¹¹ S Mathews retired at 31 March 2024. His cash incentive and share-based payment expense are pro-rated up to the date of retirement.

¹² R Bardien exited at 31 January 2024 through mutual separation. Other payments include accrued annual leave, payment in lieu of six months notice and pro-rated bonus for the 2023 financial year.

¹³ J Mortoti exited at 30 June 2024 due to redundancy. Other payments include accrued annual leave, payment in lieu of six months notice and a redundancy payment in line with Ghana legislation.

¹⁴ M Steyn was appointed as EVP Sustainability effective 1 June 2024. Other payments include a sign-on payment of A\$1.2 million paid over three annual instalments.

¹⁵ C Gratiass was appointed as EVP Strategy and Corporate Development effective 1 August 2024. Other payments include a relocation and sign-on payment of R7.4 million, as well as reimbursements for personal expenditure associated with relocation and immigration requirements. Upon appointment, he acquired and committed 20,000 Gold Fields American Depositary Receipts and met his required MSR target of 100% of annual salary.

¹⁶ G Lotz stepped into the Acting EVP People and Organisational Effectiveness position on 13 October 2023. He received an acting allowance of 20% of total fixed remuneration for a portion of the 2023 reporting year and the 2024 reporting period which is reflected under "Other".

¹⁷ J Ricciardone stepped into the Acting EVP Strategy, Planning and Corporate Development position on 1 April 2023. He received an acting allowance of 15% of total fixed remuneration for a portion of the 2023 reporting year and the 2024 reporting period which is reflected under "Other".

Refer to the Governance and Remuneration Report for the unvested share awards and cash-flow on settlement thereof for executive directors and prescribed officers for the year ended 31 December 2025 and 2024.

17. Events after the reporting date

Final dividend

On 19 February 2026, Gold Fields declared a final dividend of 1,850 SA cents per share.

Special dividend and share buy-back

In addition to the base dividend, on 19 February 2026, Gold Fields declared an additional return of US\$353.0 million. This will comprise US\$253.0 million in special dividends (450 SA cents per share) and US\$100 million in share buy-backs.

Glossary of terms

AISC	All-in sustaining costs. AISC comprises on-site mining costs (on a sales basis); on-site general and administrative costs; royalties and production taxes; realised gains/losses on hedges due to operating costs; community costs related to current operations; permitting costs related to current operations; third-party smelting, refining and transport costs; non-cash remuneration (site-based); stock-piles/product inventory write-down; operational stripping costs; by-product credits; corporate general and administrative costs (including share-based remuneration); reclamation and remediation – accretion and amortisation (operating sites); exploration and study costs (sustaining); and capital exploration (sustaining)
AIC	All-in costs. AIC is AISC plus community costs not related to current operations; community costs not related to current operations; reclamation and remediation costs not related to current operations; exploration and study costs (non-sustaining); capital exploration (non-sustaining); capitalised stripping & underground mine development (non-sustaining); and capital expenditure (non-sustaining)
BEE	Black Economic Empowerment. BEE seeks to ensure that black persons within South Africa gain a significant degree of control in the economy through the possession of equity stakes and the holding of management positions within an institution
Capital expenditure (or capex)	Specific project or ongoing expenditure for replacement or additional equipment, materials or infrastructure
Concentrate	A metal-rich product resulting from a mineral enrichment process such as gravity concentration or flotation, in which most of the desired mineral has been separated from the waste material in the ore
Cut-off grade	The lowest grade of mineralised ore, which determines whether or not it is economic to mine and send to the processing plant
Decline	An excavation from surface or subsurface, in the form of a tunnel, which is developed downwards
Depletion	The decrease in quantity of ore, in a deposit or property resulting from extraction or mining
Development	Is any tunnelling operation that is developed for either exploration, exploitation or both
Dilution	Waste or material below the cut-off grade that contaminates the ore during the course of mining operations and thereby reduces the average grade mined
Fatality rate	Number of deaths normally expressed as a ratio per million man-hours worked
Feasibility study	A comprehensive design and costing study of the selected option for the development of a mineral project in which appropriate assessments have been made of realistically assumed geological, mining, metallurgical, economic, marketing, legal, environmental, social, governmental, engineering, operational and all other modifying factors, which are considered in sufficient detail to demonstrate at the time of reporting that extraction is reasonably justified (economically mineable) and the factors reasonably serve as the basis for a final decision by a proponent or financial institution to proceed with, or finance, the development of the project. The overall confidence of the study should be stated
Gold equivalent	A quantity of metal (such as copper) converted to an amount of gold in ounces, based on accepted gold and other metal prices, i.e. the accepted total value of the metal based on its weight and value thereof divided by the accepted value of one troy ounce of gold
Grade	The quantity of gold or other metal contained within a unit weight of one metric tonne, generally expressed in grams per metric tonne ("g/t") or percent metal per metric tonne (%)
Hedging	Taking a buy or sell position in futures market opposite to a position held in the cash/spot market to minimise the risk of financial loss from an adverse price change
Indicated Mineral Resources	That part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a reasonable level of confidence. It is based on exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. The locations are too widely or inappropriately spaced to confirm geological and/or grade continuity but are spaced closely enough for continuity to be assumed
Inferred Mineral Resource	That part of a Mineral Resource for which tonnage, grade and mineral content can be estimated with a low level of confidence. It is inferred from geological evidence and assumed but not verified geological and/or grade continuity. It is based on information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill-holes which may be limited or of uncertain quality and reliability
Measured Mineral Resource	That part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a high level of confidence. It is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes. The locations are spaced closely enough to confirm geological and grade continuity

Glossary of terms *continued*

Mineral Reserve	A “Mineral Reserve” is the economically mineable material derived from a Measured or Indicated Mineral Resource or both. It includes diluting and contaminating materials and allows for losses that are expected to occur when the material is mined. Appropriate assessments to a minimum of a pre-feasibility study for a project and a life-of-mine plan for an operation must have been completed, including consideration of, and modification by, realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors (the modifying factors). Such modifying factors must be disclosed
Mineral Resource	A ‘Mineral Resource’ is a concentration or occurrence of material of economic interest in or on the earth’s crust in such form, quality and quantity that there are reasonable and realistic prospects for eventual economic extraction. The location, quantity, grade, continuity and other geological characteristics of a Mineral Resource are known, or estimated from specific geological evidence, sampling and knowledge interpreted from an appropriately constrained and portrayed geological model. Mineral Resources are subdivided, and must be so reported, in order of increasing confidence in respect of geoscientific evidence, into Inferred, Indicated or Measured categories
Pre-Feasibility Study	A preliminary design and costing study of the short-listed preferred mining and processing option(s) for the development of a mineral project in which appropriate assessments have been made of realistically assumed geological, mining, metallurgical, economic, marketing, legal, environmental, social, governmental, engineering, operational and all other modifying factors, which are considered in sufficient detail to demonstrate at the time of reporting that extraction is reasonably justified (economically mineable) and the determined assumptions and parameters reasonably serve as the basis for potential declaration of Mineral Reserves
Probable Mineral Reserve	The economically mineable material derived from a Measured and/or Indicated Mineral Resource. It is estimated with a lower level of confidence than a Proved Mineral Reserve. It is inclusive of diluting materials and allows for losses that may occur when the material is mined. Appropriate assessments, to a minimum of a Pre-feasibility Study (PFS) for a project, have typically been carried out, including consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction is reasonably justified
Project capital	Capital expenditure that is associated with specific projects
Proved Mineral Reserve	The economically mineable material derived from a Measured Mineral Resource. It is estimated with a high level of confidence. It is inclusive of diluting materials and allows for losses that may occur when the material is mined. Appropriate assessments, to a minimum of a Pre-Feasibility Study (PFS) for a project, have been typically carried out, including consideration of and modification by realistically assumed mining, metallurgical, economic, marketing, legal, environmental, social and governmental factors. These assessments demonstrate at the time of reporting that extraction is reasonably justified

PFS	Pre-Feasibility Study

Independent Auditor's Assurance Report on the compilation of pro forma financial information for the year ended 31 December 2025 included in the Gold Fields Limited Annual Financial Report 2025

To the Directors of Gold Fields Limited

We have completed our assurance engagement to report on the compilation of the pro forma financial information of Gold Fields Limited (the "Company") (and its subsidiaries (together "the Group")) by the directors. The pro forma financial information, as set out in the "Gold Fields Limited Annual Financial Report 2025" for the year ended 31 December 2025 comprises certain non-IFRS financial measures (the "Pro Forma Financial Information"). The applicable criteria on the basis of which the directors have compiled the Pro Forma Financial Information are specified in the Listings Requirements of the JSE Limited ("the JSE Listings Requirements") and described in the Gold Fields Limited Annual Financial Report 2025 (the "Applicable Criteria").

The Pro Forma Financial Information has been compiled by the directors solely to provide users with relevant information and measures used by the Group to assess performance.

As part of this process, information about the Group's financial position and financial performance has been extracted by the directors from the Group's consolidated financial statements for the year ended 31 December 2025, on which an audit opinion was issued.

Directors' responsibility

The directors are responsible for compiling the Pro Forma Financial Information on the basis of the Applicable Criteria.

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the *Code of Professional Conduct for Registered Auditors*, issued by the Independent Regulatory Board for Auditors' (IRBA Code), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants* (including International Independence Standards).

The firm applies International Standard on Quality Management 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, which requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Auditor's responsibility

Our responsibility is to express an opinion, as required by the JSE Listings Requirements, about whether the Pro Forma Financial Information has been compiled, in all material respects, by the directors, on the basis of the Applicable Criteria, based on our procedures performed.

We conducted our engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3420, *Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus* issued by the International Auditing and Assurance Standards Board. This standard requires that we plan and perform our procedures to obtain reasonable assurance about whether the Pro Forma Financial Information has been compiled, in all material respects, on the basis specified in the Applicable Criteria.

For purposes of this engagement, we are not responsible for updating or reissuing any reports or opinions on any historical financial information used in compiling the Pro Forma Financial Information, nor have we, in the course of this engagement, performed an audit or review of the financial information used in compiling the Pro Forma Financial Information.

The purpose of the Pro Forma Financial Information included in the Gold Fields Limited Annual Financial Report 2025 is solely to provide users with relevant information and measures used by the Group to assess performance.

A reasonable assurance engagement to report on whether the Pro Forma Financial Information has been compiled, in all material respects, on the basis of the Applicable Criteria involves performing procedures to assess whether the Applicable Criteria used by the directors in the compilation of the Pro Forma Financial Information provide a reasonable basis for presenting the significant effects directly attributable to the events, and to obtain sufficient appropriate evidence about whether:

- The related pro forma adjustments give appropriate effect to those criteria; and
- The Pro Forma Financial Information reflects the proper application of those adjustments to the unadjusted financial information.

The procedures selected depend on our judgement, having regard to our understanding of the nature of the Group, the events in respect of which the Pro Forma Financial Information has been compiled, and other relevant engagement circumstances.

Our engagement also involves evaluating the overall presentation of the Pro Forma Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Pro Forma Financial Information has been compiled, in all material respects, on the basis of the Applicable Criteria.
