Training and development

Nictus remains committed to continuous employee development.

Specific in-house training was conducted on the Protection of Personal Information Act, 4 of 2013 (POPIA), as well as the company's POPIA policy and the Promotion of Access to Information Act, 2 of 2000 manual, which was successfully implemented during the year.

Continuous in-house training is also undertaken on the Financial Intelligence Centre Act, 38 of 2001, and the company's risk management and compliance programme.

Employees frequently attend external training sessions, including compliance seminars by the Financial Intelligence Centre, Prudential Authority and Financial Sector Conduct Authority.

The company ensures that all relevant employees receive the necessary training and updates on IT, cybersecurity and IFRS Accounting Standards compliance.

Employee relations and equal opportunities

All employment documents are regularly reviewed, ensuring compliance with labour laws. Nictus upholds a merit-based approach in hiring, emphasising equal opportunity irrespective of race or gender. A formal transformation plan has been approved by the board.

Health and safety

Nictus prioritises workplace safety, adhering to the Occupational Health and Safety Act, 85 of 1993. Offices and branches maintain emergency protocols, serviced fire extinguishers and risk-free environments. First aid training certificates were obtained by nominated employees at each of our locations.

Community relations and stakeholder engagement

The company actively contributes to community development through sponsorships and charitable donations. Recent initiatives include sponsoring local sports teams, supporting non-profits and participating in community engagement activities. Notable contributions include donations to schools, sponsorship of youth events and educational support initiatives, as well as elderly care. Stakeholder relations across the group remain strong, with positive client retention and ongoing corporate engagements.

Ethics, governance and compliance

Nictus adheres to international governance standards, including IFRS Accounting Standards, King IV®, the Companies Act of South Africa and JSE regulations. The board is proactive in monitoring and learning about new developments and upcoming regulations. The board comprises a majority of independent non-executive directors and has established dedicated committees for remuneration, audit, risk, investment and ethics. A robust code of conduct is in place, reinforcing zero tolerance for discrimination, bribery and conflicts of interest. Employees sign the code upon appointment, ensuring alignment with ethical standards.

Business sustainability and risk management

Aligned with Organisation for Economic Co-operation and Development principles, Nictus focuses on long-term sustainability through prudent growth and operational efficiency. Risk management is conducted at the board level, with oversight from the group audit and risk committee. The company prioritises financial stability over rapid expansion, ensuring sustainable profitability.

Nictus remains dedicated to corporate responsibility, ethical business practices and fostering inclusive growth, while complying with local and international regulatory frameworks and always striving to be a good corporate citizen.

ANNUAL FINANCIAL STATEMENTS

- 40 Directors' responsibilities and approval
- 41 Managing director's and financial director's responsibility statement

- 42 Audit and risk committee report
- 44 Directors' report
- 47 Independent auditor's report
- 52 Statements of financial position
- 53 Statements of profit or loss and other comprehensive income
- 54 Statements of changes in equity
- 56 Statements of cash flows
- 57 Significant accounting policies
- 72 Notes to the annual financial statements

DIRECTORS' RESPONSIBILITIES AND APPROVAL

Directors' responsibility statement

The directors are required by the Companies Act of South Africa, 71 of 2008 (Companies Act of South Africa), to maintain adequate accounting records and are responsible for the content and integrity of the group annual financial statements and company annual financial statements and related financial information included in this report. It is their responsibility to ensure that the financial statements fairly present the financial position, state of affairs of the group and company as at 31 March 2026 and the results of their operations and changes in equity and cash flows for the year then ended, in conformity with IFRS® Accounting Standards (IFRS) and the requirements of the Companies Act of South Africa. The directors are also responsible for the preparation of the directors' report. The external auditor is engaged to express an independent opinion on the group annual financial statements and company annual financial statements.

The group annual financial statements and company annual financial statements are prepared in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the group and company and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the board sets standards for internal control aimed at reducing the risk of error or loss in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting policies and procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the group and all employees are required to maintain the highest ethical standards in ensuring that the group's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the group is on identifying, assessing, managing and monitoring all known forms of risk across the group.

While operating risk cannot be fully eliminated, the group endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. Any system of internal financial control can, however, provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the group's and company's budgets for the year ending 31 March 2027 and, in light of this review and the current financial position, they are satisfied that the group and company have access to adequate resources to continue in operational existence for the foreseeable future. The directors have made an assessment of the group's and company's ability to continue as going concerns and there is no reason to believe that the businesses will not be going concerns in the year ahead.

The auditor is responsible for reporting on whether the group annual financial statements and company annual financial statements are fairly presented in accordance with the applicable financial reporting framework.

Approval of the group annual financial statements and company annual financial statements

The group annual financial statements and company annual financial statements of Nictus Limited, which have been prepared on the going concern basis, were approved by the board on 18 June 2026 and were signed by:

Gerard R de V Tromp
Authorised director
Group managing director

Sarita Martin
Authorised director
Chairperson

MANAGING DIRECTOR'S AND FINANCIAL DIRECTOR'S RESPONSIBILITY STATEMENT

Each of the directors, whose names are stated below, hereby confirm that:

- The annual financial statements set out on pages 52 to 114, fairly present, in all material respects, the financial position, financial performance and cash flows of Nictus in terms of IFRS Accounting Standards;
- To the best of our knowledge and belief, no facts have been omitted or untrue statements made that would make the annual financial statements false or misleading;
- Internal financial controls have been put in place to ensure that material information relating to Nictus and its consolidated subsidiaries has been provided to effectively prepare the financial statements of Nictus;

- The internal financial controls are adequate and effective and can be relied upon in compiling the annual financial statements, and we have fulfilled our role and function as executive directors with primary responsibility for implementation and execution of controls;
- Where we are not satisfied, we have disclosed to the audit and risk committee and the auditors any deficiencies in the design and operational effectiveness of the internal financial controls and have remediated the deficiencies; and
- We are not aware of any fraud involving directors.

Gerard R de V Tromp
Group managing director

Eckhart H Prozesky

CERTIFICATE OF THE COMPANY SECRETARY

In our opinion, as company secretary, we hereby confirm, in terms of the Companies Act of South Africa that, for the year ended 31 March 2026, the company has lodged with the Commissioner of the Companies and Intellectual Property Commission all such returns and notices as are required of a public company and that all such returns and notices are true, correct and up to date.

Willem H Boshoff
Veritas Eksekuteurskamer Proprietary Limited
Company secretary

18 June 2026

AUDIT AND RISK COMMITTEE REPORT

I am pleased to present the group audit and risk committee report for the financial year ended 31 March 2026.

The chairperson and members of the committee were individually re-elected at the 2025 annual general meeting of Nictus Limited, in compliance with the requirements of the Companies Act of South Africa. The committee continues to fulfil the function of the audit and risk committee requirement in terms of the Insurance Act, 18 of 2017 (Insurance Act), in respect of Corporate Guarantee (South Africa) (RF) Limited, a wholly-owned subsidiary of Nictus Limited.

The committee operates in terms of a board-approved charter, and its three elected members, one of whom is the chairperson of the board, are all independent non-executive directors.

The committee's work includes oversight of risk management; all of its members are financially literate and bring business and financial acumen to the committee.

The group managing director, the group financial director and representatives of the external and internal auditors are invited to attend the committee meetings.

The committee met twice during the year and engaged, among other work, in considering the reappointment of PricewaterhouseCoopers Inc. as auditor to the Nictus group of companies. PricewaterhouseCoopers Inc. was recommended for reappointment as the group and company external auditor based on recent performance and regulatory reviews of the firm, with Francois J Kruger acting as the appointed designated audit partner for the current financial year ended 31 March 2026.

We received affirmation from PricewaterhouseCoopers Inc. regarding their independence in compliance with the Independent Regulatory Board for Auditors' (IRBA) Code of Professional Conduct for Registered Auditors. The committee was satisfied with the scope of the external audit and review of Corporate Guarantee (South Africa) (RF) Limited in respect of regulatory returns to the Prudential Authority and the National Credit Regulator. There was one key audit matter relating to the recognition and measurement of insurance contract liabilities reported in terms of the IRBA guidance on Enhanced Audit Reports, prescribing additional disclosures to be included in the audit reports of public interest entities. The external audit plan from PricewaterhouseCoopers Inc. for 2026 covered all the significant matters required by the committee.

The own risk and solvency assessment report expresses confidence that capital is sufficient over the business planning period to meet liabilities with an appropriate margin. Corporate Guarantee (South Africa) (RF) Limited is expected to remain solvent under normal operating circumstances.

The governance register was reviewed during the year for completeness by a third party and was approved by the committee. Internal audit reports are provided to the committee at each meeting. Internal audit's activity is governed by an internal audit charter, which is approved by the group audit and risk committee and reviewed annually. The charter defines the purpose, authority and responsibilities of the function. The committee reviewed the charter and measured its effectiveness during the year under review. The committee was satisfied that it still functions effectively.

The committee's key objectives and responsibilities, which were met during the period, are as follows:

- Determine whether management has created and maintains an effective control environment and that they demonstrate and stimulate the necessary respect for the internal control structure among all parties, and also ensure that the internal control framework on financial reporting is effective to support the group managing director and group financial director annual attestation;
- Ensure that the company has established appropriate financial reporting procedures and that these procedures are operating effectively. This includes consideration of all entities included in the group annual financial statements to ensure that it has access to all the financial information of the company to allow the company to effectively prepare and report on its financial statements;
- Review solvency and liquidity and going concern assessments to support the integrity of the financial results;
- Assessment of the external auditor and designated external audit partner's suitability for appointment in accordance with the JSE Listings Requirements and the information detailed in paragraph 5.7(h)(iii) read with paragraphs 6.36 and 6.37 in making the assessment;
- Manage the relationship with the external auditor (PricewaterhouseCoopers Inc.), including monitoring their independence and effectiveness in relation to their audit quality and expertise;

- Review the scope and outcome of external and internal audits. The review is to include an assessment of the efficiency of the audit function, ensuring that emphasis is placed on areas where the committee, management and the auditor believe special attention is necessary;
- Ensure that the appointment of the external auditor is presented and included as a resolution at the annual general meeting of Nictus;
- Review the JSE's report on the proactive monitoring of financial statements and the significant areas relevant to the group;
- Ensure that the board makes informed decisions and is aware of the implications of such decisions regarding accounting policies, practices and disclosures;
- Provide a safeguard of directors' responsibilities by informing the board on issues of importance to the business and the status of the financial reporting;
- Review and recommend, for approval, to the board, the group's integrated annual and interim reports to present a fair and balanced view of the group;
- Assist the board in its evaluation of the adequacy and effectiveness of the risk management system;
- Assist the board in the identification of the build-up and concentration of the various risks to which the insurer is exposed;
- Assist the board in identifying and regularly monitoring all material risks to ensure that its decision-making capability and accuracy of its reporting are adequately maintained;
- Facilitate and promote communication, through reporting structures, regarding the adequacy and effectiveness of the risk management system or any other related matter, between the board and managing executives;
- Introduce such measures as may serve to enhance the adequacy and effectiveness of the risk management system; and
- Coordinate the monitoring of risk management on an enterprise-wide and individual business unit basis.

The committee does not rely only on the internal control processes but receives and regularly reviews the findings of both the internal and external auditors covering:

- A system of internal control;
- Compliance with relevant laws and regulations; and
- The credibility, independence and objectivity of the external and internal auditors.

The committee also reviews changes in legislation to ensure compliance by companies in the group. The committee reports its findings to the board, which thereafter has the responsibility of ensuring compliance with legislation.

The committee has adopted a policy of limiting the non-audit work undertaken by the external auditor. Prior approval of any consulting work in excess of R250 000 is required. No material non-audit work was undertaken by the external auditor during the reporting period.

The external and internal auditors have unrestricted access to committee members.

The committee is satisfied that:

- It has complied with the responsibilities set out in its charter, as well as the relevant legal and regulatory responsibilities based on the information and explanations given by management and discussions with the external auditor regarding the results of their audit;
- The financial director has the necessary competence, qualifications and experience to discharge his duties and responsibilities;
- The board is aware of the implications and actions required to apply and explain the principles of the King IV Report on Corporate Governance for South Africa, 2016™;
- There was no material breakdown in the internal financial controls that was noted or reported during the financial year under review; and
- The external auditor is considered to be independent of the company and the group and is thereby able to conduct its audit functions without any undue influence from the company and the group.

The committee accepted responsibility for its role relating to the subsidiary company, Corporate Guarantee (South Africa) (RF) Limited.

Cornelius J de Vrye

Chairperson: audit and risk committee

18 June 2026

DIRECTORS' REPORT

to the shareholders of Nictus Limited

The directors have pleasure in reporting on the activities and financial results of the group for the year ended 31 March 2026.

Review of subsidiaries

Details of subsidiaries are dealt with in note 6 to the group annual financial statements.

Figures in R'000	2026	2025
The interest of the company in the aggregate net profit after tax of subsidiaries is:		
Profit/(loss) after taxation	31 888	15 841

The subsidiaries of the company are mainly involved in non-life insurance and furniture retail in South Africa.

Financial results

For the year under review, the group's profit before taxation amounted to R50,3 million compared to a profit of R28,9 million in the previous year. The company's profit before taxation for the year was R4,6 million compared to a profit of R2,6 million in the previous year.

Segmental analysis

A detailed segmental analysis is included in note 36 to the group annual financial statements.

There have been no changes in directors' interests between the financial year end and the date of approval of the annual financial statements.

DIRECTORS' REPORT continued

Analysis of executive directors' share options as at 31 March 2026

There were no outstanding share options at year end held by the directors in the current or prior financial year.

Stated capital

There were no changes in the stated capital during the current and prior financial year, as further detailed in note 14 to the annual financial statements.

16 033 050 (2025: 16 033 050) unissued ordinary shares are under the control of the directors in terms of a resolution of shareholders passed at the last annual general meeting and in terms of the Memorandum of Incorporation (MOI), but subject to compliance with the relevant regulations, i.e. the Companies Act of South Africa and the JSE Listings Requirements.

Dividends

Final dividend

The board, within its discretion, has declared a final dividend of 18,00 cents per Nictus ordinary share (ordinary share) (2025: 12,00 cents per ordinary share) for the year ended 31 March 2026, to all ordinary shareholders recorded in the share register of Nictus at the close of business on Friday, 17 July 2026 which will be paid on Monday, 20 July 2026.

The cash dividend timetable is structured as follows:

- Declaration date is Tuesday, 30 June 2026;
- The last day to trade *cum* dividend in order to participate in the dividend is Tuesday, 14 July 2026;
- The shares commence trading *ex-dividend* from the commencement of business on Wednesday, 15 July 2026;
- The record date is Friday, 17 July 2026; and
- The dividend is to be paid on Monday, 20 July 2026.

Shares will not be rematerialised or dematerialised between Wednesday, 15 July 2026 and Friday, 17 July 2026, both days inclusive.

Events after the reporting date

The directors are not aware of any matter or circumstances since the end of the financial year and up to the date of this report which require adjustments to or disclosure in the financial statements, apart from the appointment of Melanie L de Nysschen as an independent non-executive director of the company. She will serve as chairperson of the remuneration and nomination committee and as a member of the audit and risk, and social and ethics committees.

INDEPENDENT
AUDITOR'S REPORT

to the shareholders of Nictus Limited

Report on the audit of the consolidated and separate financial statements

Our opinion

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of Nictus Limited (the Company) and its subsidiaries (together the Group) as at 31 March 2026, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa.

What we have audited

Nictus Limited's consolidated and separate financial statements set out on pages 52 to 114 comprise:

- the consolidated and separate statements of financial position as at 31 March 2026;
- the consolidated and separate statements of profit or loss and other comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the financial statements, including material accounting policy information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated and separate financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the Independent Regulatory Board for Auditors' *Code of Professional Conduct for Registered Auditors* (IRBA Code), as applicable to audits of financial statements of public interest entities, and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa.

The IRBA Code is consistent with the corresponding sections of the *International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants* (including *International Independence Standards*).

Our audit approach

Overview

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated and separate financial statements. In particular, we considered where the Directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

In terms of the IRBA Rule on Enhanced Auditor Reporting for the Audit of Financial Statements of Public Interest Entities, published in Government Gazette Number 49309 dated 15 September 2023 (EAR Rule), we report final materiality and group audit scope below.

INDEPENDENT AUDITOR’S REPORT continued

Final materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated and separate financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated and separate financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the final materiality for the consolidated and separate financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the consolidated and separate financial statements as a whole.

	Consolidated financial statements	Separate financial statements
Final materiality	2,073,030	1,192,571
How we determined it	1% of a revenue equivalent benchmark which comprises the sum of revenue, effective interest revenue, insurance revenue, finance income earned from secured advances and investment income.	1% of total assets
Rationale for the materiality benchmark applied	We selected a revenue equivalent which comprises the sum of revenue, effective interest revenue, insurance revenue, finance income earned from secured advances and investment income as our materiality benchmark because, in our view, it reflects the operations of the Group, and it is a benchmark against which the performance of the Group can be consistently measured in circumstances of volatile year-on-year earnings. This benchmark has remained a key driver of the Group’s business. We chose 1% based on our professional judgement, after consideration of the range of quantitative materiality thresholds that we would typically apply when using revenue to compute materiality.	We selected total assets as our materiality benchmark because, in our view, it reflects the nature of the Company, which is to hold investments in its subsidiaries. We chose 1% based on our professional judgement, after consideration of the range of quantitative materiality thresholds that we would typically apply when using total assets to compute materiality.

Group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

We considered the Group’s organisational, legal and consolidation structures and its financial reporting processes when identifying components for purposes of planning and performing audit procedures. The Group consists of the Company and its two subsidiaries (each considered to be a ‘component’ for purposes of our group audit scope). In establishing the group audit scope, based on our group risk assessment, we determined the type of work to be undertaken on the financial information of these components. In determining which components will be subject to audit procedures, we considered whether these components are significant (due to risk or size), non-significant or inconsequential to the Group. We have determined all three components to be significant and were scoped in for full scope audits. In establishing the overall approach to the Group audit, we determined the type of work that needed to be performed by us, as the group engagement team for both the group and the components. All testing was performed centrally by the group audit team. By performing the procedure outlined above, we obtained sufficient and appropriate audit evidence regarding the financial information of the Group to provide a basis for our opinion on the consolidated financial statements as a whole.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined that there are no key audit matters to communicate in our report in respect of the separate financial statements.

In terms of ISA 701 *Communicating key audit matters in the independent auditor’s report*/the EAR Rule (as applicable), we are required to report key audit matters and the outcome of audit procedures or key observations with respect to the key audit matters, and these are included below.

Key audit matter	How our audit addressed the key audit matter
Recognition and measurement of insurance contract liabilities <i>Refer to following disclosures in the financial statements as it relates to this key audit matter:</i> - Significant accounting policy note 1.17 (Insurance contracts); and - Note 17 to the annual financial statements (Insurance contract liabilities). We considered the recognition and measurement of insurance contract liabilities to be a key audit matter in our audit of the financial statements due to the following: - The magnitude of the insurance contract liabilities recognised in relation to the consolidated financial statements; and - The judgements applied by the Group in applying IFRS 17: <i>Insurance Contracts</i> (“IFRS 17”) when considering whether the insurance contracts entered into by the Group contain components that should be separated. As of 31 March 2026, the Group held insurance contract liabilities amounting to R889 million. The Group applied IFRS 17 to recognise and measure its insurance contract liabilities. Based on the requirements of IFRS 17 the Group performed an analysis of whether the contract contain components that should be accounted for separately, including distinct investment components. The Group offers insurance contracts that provide both insurance cover and the payment of a specified amount in the form of an experience bonus. These specified amounts meet the definition of an investment component in IFRS 17 as they will be paid to policyholders in all circumstances, regardless of whether an insured event occurs. The Group considers the investment component to be a non-distinct investment component as the insurance and investment components are highly inter-related and is accounted for and measured as part of the insurance liability as a single unit of account in terms of IFRS 17. When a policyholder elects to apply to receive a secured advance from the Group, the benefits of the contingency policy is pledged and ceded to the Group as security. Where a secured advance is provided to a policyholder, the agreements between the Group and the policyholder is considered to be a single insurance contract due to the interdependency between the agreements.	Our audit addressed the key audit matter as follows: - Tested on a sample basis new premiums and renewal premiums received to insurance contracts issued to policyholders and traced cash flows to bank statements. - Tested the cancelation and expired premiums settlements to the insurance contracts and where applicable to the underlying cash flows. Based on the above procedures performed, there were no material exceptions requiring further considerations. On a sample basis, we assessed the classification of experience accounts as non-distinct investment components and considered whether: - The insurance contracts require the Group to repay the experience account balance to the policyholder in all circumstances irrespective of whether the insured event occurs and noted no material exceptions. - The investment component of the contract (i.e. the experience account) and the insurance component are highly interrelated by evaluating whether cashflows such as claims, lapses or maturity varies according to the value of the other. No matters were noted that required further consideration. - Inspected a sample of contingency policy contracts, secured advance agreements and account statements, and assessed whether the benefits are pledged as security for secured advances issued and no material exceptions were noted. - Assessed whether the date of the secured advance coincides with the dates of the policy term to determine whether the secured advance and insurance policy are interrelated. No matters were noted requiring further consideration.

INDEPENDENT AUDITOR'S REPORT continued

Other information

The Directors are responsible for the other information. The other information comprises the information included in the document(s) titled "Nictus Limited Integrated Annual Report for the year ended 31 March 2026", which include(s) the Directors' report, the Audit and risk committee report and the Certificate of the company secretary as required by the Companies Act of South Africa. The other information does not include the consolidated or the separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the consolidated and separate financial statements

The Directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with IFRS Accounting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the Directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group and/or the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and/or Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Audit tenure

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that PricewaterhouseCoopers Inc. has been the auditor of Nictus Limited for 7 year(s).

PricewaterhouseCoopers Inc.

Director: F.J. Kruger
Registered Auditor

Johannesburg, South Africa

Cash flows from financing activities					
Payment of lease liabilities		(2 214)	(2 937)	(386)	(689)
Secured advances received from/(repaid to) subsidiary companies		–	–	4 229	(3 567)
Net cash (utilised by)/generated by financing activities		(2 214)	(2 937)	3 843	(4 256)
Total cash movement for the year		(12 828)	102 706	(4 677)	(4 580)
Cash and cash equivalents at the beginning of the year		161 642	58 936	5 110	9 690
Total cash and cash equivalents at the end of the year		148 814	161 642	433	5 110

* The comparative amounts relating to cash generated from operations and interest received were restated. In the prior year, finance income earned from secured advances, amounting to R45,63 million, was disclosed as part of interest received in the statement of cash flows based on the group's interpretation of IAS 7 at the time, and more specifically as it relates to paragraph 31 that requires: "cash flows from interest and dividends received and paid shall each be disclosed separately". During the current year it was clarified that for the purposes of the statement of cash flows, finance income earned from secured advances forms part of the total insurance contract liabilities due to the interdependency between the agreements and form part of a single unit of account, thus should not have been presented separately. This error in presentation affects the statement of cash flows and note 24. Importantly, this error does not affect the net cash (utilised in)/generated from operating activities total and also does not affect the basic and diluted earnings per share amounts or disclosure in the prior reporting periods.

SIGNIFICANT ACCOUNTING POLICIES

for the year ended 31 March 2026

1. Presentation of the financial statements

Nictus Limited (Nictus or the company) is a company incorporated and domiciled in the Republic of South Africa. The group annual financial statements as at and for the year ended 31 March 2026 comprise the company and its subsidiaries. Where reference is made to group it should be interpreted as group or company as the context requires.

Nictus is a retailer of household furniture, electrical appliances and home electronics sold through the Nictus Meubels Proprietary Limited brand as well as a non-life insurer through the Corporate Guarantee (South Africa) (RF) Limited brand.

The group and company annual financial statements have been prepared in accordance with and in compliance with IFRS Accounting Standards and the interpretations adopted by the International Accounting Standards Board, the JSE Listings Requirements, the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee, and Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council and the requirements of the Companies Act of South Africa. These group and company annual financial statements were authorised for issue by the company's board of directors on 18 June 2026.

Basis of measurement

The financial statements have been prepared on the historical cost basis, except for the following material items in the statement of financial position:

- Investment property;
- Insurance contract liabilities; and
- Financial instruments classified at fair value through profit or loss are measured at fair value.

These accounting policies are consistent with those applied in the previous year, except as indicated otherwise in the case of new accounting standards implemented effective 1 April 2025.

Adoption of new and revised accounting policies

The group was not materially affected by any new and revised accounting standards, amendments to standards or new interpretations during the year.

1.1 Significant judgements and estimates

In preparing the financial statements in conformity with IFRS Accounting Standards, management is required to make estimates and assumptions that affect the application

of accounting policies and the amounts represented in the financial statements and related disclosures. Use of available information, historical experience and various other factors that are believed to be reasonable in the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the financial statements.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Note 1.17 – Insurance contracts;
- Note 8 – Investments classification as non-current or current assets;
- Note 9 – Utilisation of tax losses; and
- Note 13 – Classification of cash and cash equivalents.

Insurance contracts

Areas of significant judgement that the group considers include:

- Unit of account;
- Significant insurance risk;
- Component of the insurance contract; and
- Portfolios – given that a multi-peril policy is issued by the group.

For more details regarding the above, refer to accounting policy 1.17.

Investments classification as non-current or current assets

Judgement is required in determining the classification of investments as non-current or current assets.

The group shall classify an investment as current when it expects to realise the investment in its normal operating cycle, which predominantly mirrors that of insurance contract liabilities; refer to accounting policy 1.17. When the group's normal operating cycle is not clearly identifiable, it is assumed to be 12 months. The group also invests to avoid an asset and liability mismatch, from a liquidity perspective, which is furthermore indicative of the group's intention when making any investment.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

The group shall classify an investment as non-current if it does not expect to realise the investments within 12 months after the reporting period and the investments are not primarily held for the purposes of trading.

Utilisation of tax losses

Judgement is required in determining the recognition of income taxes due to the complexity of legislation.

The group recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences and tax losses can be utilised. Assessing the recoverability of deferred income tax assets requires the group to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws.

Classification of cash and cash equivalents

Judgement is required in determining the appropriate classification of unit trust investments held by the group based on the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For a unit trust investment to qualify as a cash equivalent it must be readily convertible to a known amount of cash and be subject to an insignificant risk of changes in value. The group considers factors including but not limited to the unit trust fund objective, the liquidity provided by the unit trust, day-to-day unit price fluctuations, the group’s investment purpose, frequency of transactions (investments/withdrawals) and the underlying maturity profile of instruments that constitute the unit trust investment, when determining the appropriate classification.

1.2 Investments in subsidiaries

Subsidiaries are entities controlled by the group. The group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the group annual financial statements from the date on which control commences until the date on which control ceases.

Intra-group balances and transactions, and any unrealised gains and losses or income and expenses arising from intra-group transactions, are eliminated in preparing the group annual financial statements.

Investments in subsidiaries are stated at cost less accumulated impairment losses in the company annual financial statements.

When the group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related non-controlling interest and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

1.3 Property, plant and equipment

Items of property, plant and equipment are measured at cost/revalued amounts less accumulated depreciation and accumulated impairment losses. The cost of an item of property, plant and equipment is recognised as an asset when:

- It is probable that future economic benefits associated with the item will flow to the group; and
- The cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

Costs include costs incurred initially that are directly attributable to the acquisition of an item of property, plant and equipment.

Subsequent costs

The group recognises, in the carrying amount of an item of property, plant and equipment, the cost of replacing part of such item when that cost is incurred and if it is probable that the future economic benefits embodied with the item will flow to the group and the cost of the item can be measured reliably. All other costs are recognised in profit or loss as an expense as incurred.

Depreciation

Depreciation is recognised in profit or loss and is calculated on the depreciable amount on a straight-line basis over the estimated useful life of each major component of an item of property, plant and equipment. Items of property, plant and equipment are depreciated from the date they are installed and are ready for use.

The depreciable amount is the difference between the cost of an item of property, plant and equipment and its residual value.

Residual value is the estimated amount that the group would currently obtain from disposal of the item of property, plant and equipment, after deducting the estimated costs of disposal, if the item of property, plant and equipment was already of age and in the condition expected at the end of its useful life.

The estimated useful lives for current and comparative years are as follows:

Item	Average useful life
Motor vehicles	5 years
Leasehold improvements	Over the lease term
Furniture and fittings	3 to 10 years
Shop fittings	3 years
Office equipment	3 to 5 years

The depreciation method, residual value and the useful life of each item of property, plant and equipment are reviewed at each reporting date and adjusted if appropriate.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in profit or loss when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.4 Earnings and diluted earnings per share

The group presents earnings per share and diluted earnings per share data for its ordinary shares. Earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding during the period.

Diluted earnings per share is calculated by dividing profit or loss attributable to ordinary shareholders of the company, after the adjustment for the effects of all dilutive potential ordinary shares, by the weighted average number of ordinary shares outstanding during the period.

1.5 Intangible assets

An intangible asset is recognised when:

- It is probable that the expected future economic benefits that are attributable to the intangible asset will flow to the entity; and
- The cost of the intangible asset can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Acquired computer software is capitalised as an intangible asset at cost where the recognition criteria are met. External costs that are directly associated with the development and production of identifiable computer software products controlled by the company, and that will probably generate economic benefits exceeding one year, are recognised as intangible assets.

Recognition of costs in the carrying amount of computer software ceases when the computer software is in a condition necessary for it to be capable of operating in the manner intended by management.

Costs associated with maintaining computer software programs are capitalised as intangible assets only if they qualify for recognition. In all other cases, these costs are recognised as an expense as incurred.

Amortisation is provided on a straight-line basis in profit or loss over their estimated useful lives to their residual values from the date they are available for use.

The estimated useful lives for the current and comparative years are as follows:

Item	Useful life
Computer software	3 years

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. The gain or loss arising from the derecognition of an intangible asset is included in profit or loss when the item is derecognised. The gain or loss arising from the derecognition of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.6 Financial instruments

Financial instruments

Financial instruments are recognised when, and only when, the company becomes party to the contractual provisions of the particular instrument.

The company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The company enters into transactions whereby it transfers assets recognised in the statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

The company derecognises a financial liability when its contractual obligations are discharged, cancelled or expire. The company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Non-derivative financial instruments

Recognition and initial measurement

Non-derivative financial assets comprise investments, trade and other receivables and cash and cash equivalents. The company initially recognises trade receivables on the date that these are originated. All other financial assets are recognised on the trade date, which is the date that the company becomes party to the contractual provisions of the instrument.

A trade receivable and loans and receivables without a significant financing component are initially measured at the transaction price. Other financial assets are initially measured at fair value plus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue.

Classification and subsequent measurement

On initial recognition, a financial asset is classified as measured at amortised cost, debt investments at fair value through other comprehensive income, equity instruments at fair value through other comprehensive income, or at fair value through profit or loss.

Financial assets are not reclassified subsequent to their initial recognition unless the company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

The objective of the company's business model in relation to all financial assets is to hold assets to collect contractual cash flows. In assessing whether the contractual cash flows are solely payments of principal and interest, the company considers the contractual terms of the instrument.

Financial assets at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated at fair value through profit or loss:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

In assessing whether the contractual cash flows are solely payments of principal and interest, the company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the company considers:

- Contingent events that would change the amount or timing of cash flows;
- Terms that may adjust the contractual coupon rate, including variable rate features;
- Prepayment and extension features; and
- Terms that limit the company's claim to cash flows from specified assets (e.g. non-recourse features).

For purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by the loss allowances for expected credit losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial assets at amortised cost comprise trade and other receivables, loans to group companies, short-term investments and cash and cash equivalents.

Trade and other receivables

Trade and other receivables are measured at amortised cost less impairment losses.

Short-term investments

Short-term investments consist of short-term deposits with an original maturity date of more than three months. Short-term investments are measured at amortised cost.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances, call deposits and deposits with an original maturity date of less than three months. Unit trusts, where the majority of the underlying instruments have original maturities of less than three months, and the investment is made to meet short-term operational obligations as they fall due, will be classified as cash and cash equivalents. Cash and cash equivalents are measured at amortised cost.

Financial liabilities at amortised cost

Trade and other payables are recognised when the company becomes a party to the contractual provisions, and are

measured, at initial recognition, at fair value plus transaction costs, if any.

Trade and other payables are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and basis points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance expenses.

Trade and other payables expose the company to liquidity risk and possibly to interest rate risk. Refer to note 29 for details of risk exposure and the management thereof.

Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are measured at amortised cost with any difference between cost and redemption value being recognised in profit or loss over the period of the borrowings on an effective interest basis.

Loans from group companies are classified as financial liabilities at amortised cost.

Trade and other payables

Trade and other payables are carried at amortised cost using the effective interest method.

Financial assets at fair value through profit or loss

All financial assets not classified as measured at amortised cost or at fair value through other comprehensive income as described previously are measured at fair value through profit or loss. On initial recognition, the company may irrevocably designate a financial asset at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Listed investments held by the group are classified at fair value through profit or loss. The fair values are calculated by reference to stock exchange market prices and/or the market

value of debt securities, the latter being quoted on the JSE Debt Market, at the close of business on the reporting date.

The underlying instruments of the unit trust investments consist of investments in money market instruments, listed debt securities and listed equities. These investments are fair valued based on the quoted or published closing market price per unit at the close of business on the reporting date.

Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the group has access at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial instruments traded in active markets (such as trading securities) is based on quoted market prices at the reporting date. The quoted market price used for financial assets held by the group is the current closing price as reflected on the recognised exchange.

The group measures fair values using the following fair value hierarchy that reflects the significance of the inputs in making the measurements.

Level 1: Quoted market price in an active market for an identical instrument.

Level 2: Valuation techniques based on observable inputs either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation techniques include inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

1.7 Income tax and deferred tax

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable or receivable in respect of previous years.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

The following temporary differences are not provided for:

- The initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- Temporary differences relating to investments in subsidiaries to the extent that the group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- Taxable temporary differences arising on the initial recognition of goodwill.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset the current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the unused tax losses and deductible temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

The company withholds dividends tax on behalf of its shareholders at a rate of 20% on dividends declared unless shareholders are exempt. Amounts withheld are not recognised as part of the company's tax charge, but rather as part of the dividend paid recognised directly in equity.

Where withholding tax is withheld on dividends received, the dividend is recognised as the gross amount with the related withholding tax recognised as part of the tax expense unless it is otherwise reimbursable, in which case it is recognised as an asset.

1.8 Leases

The company assesses whether a contract is or contains a lease at the inception of the contract.

A contract is or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is or contains a lease, management determines whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the group/company has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

Group as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low-value assets. For these leases, the company recognises the lease payments as an operating expense (note 7) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Details of leasing arrangements where the company is a lessee are presented in note 7 Leases (group as lessee).

Lease liability

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed lease payments, including in-substance fixed payments, less any lease incentives; and
- Lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option.

The lease liability is presented as a separate line item on the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance expenses (note 22).

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Lease payments included in the measurement of the right-of-use assets comprise the following:

- The initial amount of the corresponding lease liability;
- Any lease payments made at or before the commencement date; and
- Any initial direct costs incurred.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and accumulated impairment losses.

The right-of-use asset is presented as a separate line item on the statement of financial position.

Right-of-use assets are depreciated over the shorter period of the lease term and useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

The depreciation charge for each year is recognised in profit or loss.

1.9 Inventories

Inventories are measured at the lower of cost and net realisable value. The technique for the measurement of the cost of inventories is the standard cost method. The cost formula applied is the weighted average cost.

The cost of retail inventory – inventory held by the furniture retail segment – comprises all costs incurred to procure and deliver the inventory to the retail store.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated selling costs.

When inventories are sold, the carrying amounts of those inventories are derecognised as an expense – cost of sales – in profit or loss in the period in which the related revenue is recognised. The amount of any write-down of inventories to their net realisable value and all losses of inventories are recognised as an expense in profit or loss in the period the write-down or loss occurs.

Obsolete, damaged and slow-moving retail inventory is identified on a continuous basis and written down to its net realisable value.

1.10 Impairment of assets

Impairment of assets

Non-derivative financial assets

The company recognises loss allowances for expected credit losses on financial assets measured at amortised cost.

Loss allowances for trade receivables without a significant financing component are measured at an amount equal to lifetime expected credit losses. The company has elected to measure loss allowances for trade receivables which have a significant financing component at an amount equal to lifetime expected credit losses. Loss allowances for other financial assets measured at amortised cost are measured at an amount equal to 12-month expected credit losses, unless there has been a significant increase in credit risk since initial recognition in which case the loss allowance is measured at an amount equal to lifetime expected credit losses.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the company's historical experience and includes forward-looking information. The company assumes that the credit risk on trade and other receivables has increased significantly if it is more than 30 days past due. The company considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the company in full, or the financial asset is more than 90 days past due.

At each reporting date, the company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or being more than 90 days past due;
- The restructuring of a loan or advance by the group on terms that the company would not consider otherwise;
- It is probable that the borrower will enter bankruptcy or other financial reorganisation; and
- The disappearance of an active market for a security because of financial difficulties.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. The 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within 12 months after the reporting date. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the group is exposed to credit risk.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the group expects to receive). Expected credit losses are discounted at the effective interest rate of the financial asset.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

1.11 Stated capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

1.12 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits (those employee benefits other than termination benefits) that are expected to be settled wholly before 12 months after the reporting date are recognised in profit or loss in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement.

The expected cost of profit sharing and incentive payments is recognised as an expense in profit or loss when there is a legal or constructive obligation to make such payments as a result of past performance.

1.13 Revenue

The group's revenue comprises the following:

- Revenue from contracts with customers:
 - Sale of goods;
 - Rendering of services; and
 - Finance income on instalment sales.
- The company's revenue comprises the following:
 - Management fees from wholly-owned subsidiaries; and
 - Dividends received from wholly-owned subsidiaries.

Group

Sale of goods, rendering of services and finance income on instalment sales

A subsidiary is in the business of furniture retail. Revenue from contracts with customers is recognised when control of the goods or services is transferred to the customer at an amount that reflects the consideration to which the subsidiary company expects to be entitled in exchange for those goods or services.

Revenue from sales of furniture is recognised at the point in time when control of the furniture is transferred to the customer, generally upon the conclusion of the sale transaction inside the furniture store. The group allocates a transaction price to each inventory item – the performance obligation – which depicts the amount of consideration to which the entity expects to be entitled in exchange for transferring the promised goods to the customer.

Revenue in respect of services rendered is recognised at a point in time or over time as the services are rendered. The services predominantly include administration fees, service fees and transport recoveries earned.

Variable consideration

The retail contracts for the sale of furniture provide customers with a right of return. The group undertakes at its election, either to enforce at the request of the customer any warranty given by any manufacturer or supplier of the goods, or to cede the benefit of such warranty to the customer on such conditions for rescission of the warranty as the group may reasonably impose.

If it is probable that trade discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue when the sales are recognised.

Significant financing component

Using the practical expedient in IFRS 15, the group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised goods or service to the customer and the payment by the customer for the goods or service will be less than 12 months.

The group enters into payment arrangements with some of its customers who elect to enter into an instalment sale agreement, for a period up to 24 months, and accordingly charges finance costs on the amount outstanding. Finance income comprises interest on instalment debtors arising from credit sales. The earned portion of interest received is recognised as revenue. Interest is earned from the date that the sales contract is concluded, over the period of the contract, based on the terms and conditions of the instalment sale agreement.

Company

Management fees from wholly-owned subsidiaries

The company provides specific management and/or business-related services to its subsidiaries with regard to certain processes and functions. Management fees are recognised as revenue by the company when services are rendered to subsidiaries, predominantly on a month-to-month basis.

Dividend income from wholly-owned subsidiaries

Dividend income from subsidiaries is recognised as revenue in the company annual financial statements. Dividend income is recognised on the date that the company's right to receive payment is established – the dividend declaration date.

Group and company

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Trade receivables

A receivable represents the company's right to an amount of consideration that is unconditional (i.e. only the passage of time is required before payment of the consideration is due).

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the company can transfer goods or services to the customer, a contract liability is recognised when the payment is made. Contract liabilities are recognised as revenue when the company performs under the contract.

1.14 Other income

Transactions not recognised as revenue or finance and investment income are classified as other income and include external insurance claims, profit on disposal of property, plant and equipment, diverse recoveries and *ad hoc* rebates received.

Other income is recognised in profit or loss when the right to receive payment is established at the amount receivable.

1.15 Investment income and finance expenses

Investment income comprises interest income, fair value adjustments on funds invested and dividend income. Interest income is recognised as it accrues in profit or loss, using the effective interest method. Investment income on the assets of the insurance segment and the investments of the company are recognised as investment income from operations as investments are part of their day-to-day operations. Dividend income is recognised in profit or loss on the date that the group's right to receive payment is established, which, in the case of quoted securities, is the *ex-dividend* date. Interest and dividend income are presented separately and not as part of the fair value changes of the financial assets measured at fair value through profit or loss.

Financing expenses comprise interest paid on borrowings calculated using the effective interest method.

1.16 Functional and presentation currency

Functional and presentation currency and foreign currency transactions

The company's functional currency is the South African Rand. The financial statements have been presented in South African Rands, rounded to the nearest thousand unless stated otherwise.

Transactions in foreign currencies are translated to the functional currency of the group entities at exchange rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date.

1.17 Insurance contracts

Classification of insurance policies

Unit of account

Corporate Guarantee (South Africa) (RF) Limited (Corporate Guarantee) is a wholly-owned subsidiary of the company and a registered South African non-life insurer.

A significant judgement area for the group is whether a contingency policy and a loan/cession agreement with a policyholder form a single unit of account. This impacts the assessment on whether significant insurance risk is transferred to the group as well as the accounting standard that is relevant to the arrangement.

Significant insurance risk is present if an insured event could cause the issuer to pay additional amounts that are significant in any single scenario, excluding scenarios that have no commercial substance. Consequently, the insurance risk can be significant even if there is minimal probability of significant losses for a portfolio or group of contracts. Refer to note 29 for more disclosure pertaining to insurance risk.

In return for the payment of an insurance premium, Corporate Guarantee undertakes to indemnify the policyholder for loss suffered by reason of the occurrence of any of the event(s) defined in the multi-peril contingency policy (policy or policies), occurring during the period of insurance, in accordance with the terms and conditions of the policy. The policyholder may be indemnified by virtue of a payment up to the policy indemnity limit or, at the insurer's sole discretion, by replacement, reinstatement or repair.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

Policies under which the group accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder or a nominated beneficiary, if a specified uncertain future event (the insured event) adversely affects the policyholder, are classified as insurance contracts as defined by IFRS 17. Once a contract has been classified as an insurance contract, the classification remains unchanged for the remainder of its lifetime, even if the insurance risk reduces significantly during the coverage period, unless the terms of the contract are modified.

Insurance contract component considerations

Before the group accounts for an insurance contract based on the guidance in IFRS 17, it analyses whether the contract contains components that should be separated. IFRS 17 distinguishes three categories of components that have to be accounted for separately, which include distinct investment components.

The contingency policies that the group sells are insurance contracts as defined and within the scope of IFRS 17. A policyholder may also elect to contractually apply to receive a secured advance from the group. The contingency policy is pledged and ceded to the group as security. Currently, these advances are predominantly secured by policy benefits being ceded to the group. In terms of the guidance in IFRS 17, where a secured advance is provided to a policyholder, the agreements between the group and the policyholder are considered to be a single insurance contract due to the interdependency between the agreements. Various repayment terms, none of which exceed 12 months, and interest rates apply. Cash flows with regard to secured advances are solely payments of principal and interest on the principal amount outstanding. The secured advances form part of the total insurance contract liabilities, disclosed on an aggregate basis. The finance income earned from secured advances is disclosed as part of the net insurance finance expenses in the statement of profit or loss and other comprehensive income.

The group offers insurance contracts that provide both insurance cover and the payment of a specified amount in the form of an experience bonus. The experience bonus is an amount to be determined by the group at its discretion, from time to time, by deducting the allowable deductions from the experience account, in its sole and absolute discretion, together with interest (if any) calculated on such amount from time to time, in the sole and absolute discretion of the group. These specified amounts meet the definition of an investment component as they will be paid to policyholders in all circumstances, regardless of whether an insured event occurs. The group considers the investment component to be a non-distinct investment component as the insurance and investment components are highly inter-related (the lapse or maturity of one component in a contract causes the lapse or maturity of the other and the value of one component varies

according to the value of the other). The entire contingency policy, including the non-distinct investment component, issued by the group is accounted for and measured as part of the insurance liability as a single unit of account in terms of IFRS 17.

Level of aggregation

IFRS 17 requires that the group identifies portfolios of insurance contracts. A portfolio comprises contracts subject to similar risks and managed together. Contracts within a product line would be expected to have similar risks and hence would be expected to be in the same portfolio if they are managed together. The group currently has one product portfolio consisting of multiple multi-peril contingency policies in issue, inclusive of a risk transfer represented within the annual aggregate policy indemnity limit. With the risks being limited to the risk transfer represented within the annual aggregate policy indemnity limit, irrespective of the class of business underwritten, one portfolio of insurance contracts is identifiable and allocated in terms of IFRS 17.

The group shall divide a portfolio of insurance contracts issued into a minimum of:

- A group of contracts that are onerous at initial recognition, if any;
- A group of contracts that at initial recognition have no significant possibility of becoming onerous subsequently, if any; and
- A group of the remaining contracts in the portfolio, if any.

An insurance contract is expected to be onerous if the fulfilment cash flows allocated to the contract at initial recognition in total are a net outflow. For insurance contracts measured under the premium allocation approach (PAA), the group may assume that these contracts are not onerous at initial recognition, unless facts and circumstances indicate otherwise. The group's underwriting strategy seeks diversity to ensure a balanced portfolio and is based on a portfolio of similar risks spread over a large geographical area. The underwriting strategy is continuously monitored and updated and determines the classes of business to be written, the territories in which business is to be written and the industry sectors to which the group is prepared to accept exposure. The strategy is cascaded down by the respective segment board to management that sets the limits for management by client size, class of business, region and industry in order to enforce appropriate risk selection within the portfolio. The group's focus is to grow a sustainable and profitable business and does not anticipate the recognition of onerous contracts.

Contracts issued more than one year apart cannot be included in the same group. As a result, each portfolio is further disaggregated into groups of contracts that are issued within a calendar year (annual cohorts). The groups of contracts are determined on initial recognition and are not subsequently reassessed.

Recognition and derecognition

Groups of insurance contracts issued are initially recognised from the earliest of either the beginning of the coverage period or the date when the first payment from the policyholder is due or actually received, if there is no due date, or when the group determines that a group of contracts becomes onerous.

The group will derecognise an insurance contract when an insurance contract is extinguished, i.e. when the obligation specified in the insurance contract expires or is discharged or cancelled or when the contract is modified to the extent that the additional criteria set out in IFRS 17 are met.

Measurement

Contract boundary

The coverage period is the period during which the entity provides insurance contract services. This period includes the insurance contract services that relate to all premiums within the boundary of the insurance contract. This period also includes the coverage that relates to all premiums within the boundary of the insurance contract. Cash flows are within the boundary of an insurance contract if they arise from substantive rights and obligations that exist during the reporting period in which the policyholder is obliged to pay the premiums or in which the group has a substantive obligation to provide the policyholder with services. A substantive obligation to provide services ends when:

- The entity has the practical ability to reassess the risks of the particular policyholder and, as a result, can set a price or level of benefits that fully reflects those risks; or
- Both of the following criteria are satisfied:
 - The entity has the practical ability to reassess the risks of the portfolio of insurance contracts that contains the contract and, as a result, can set a price or level of benefits that fully reflects the risk of that portfolio; and
 - The pricing of the premiums for coverage up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date. The earned portion of premiums received constitutes and is recognised as insurance revenue. Premiums are earned from the date of attachment of risk.

Cash flows that are not directly attributable to a portfolio of insurance contracts are recognised in other operating expenses as incurred.

The insurance policies issued by the group have an explicit policy start – and expiry date – thus indicating the period during which the group provides coverage for insured events, and in effect the boundary of the insurance contract. Insurance premiums are for the period of insurance as set out in the policy schedule. At the policy anniversary, either the group or policyholder can review the terms associated with the

insurance contract. The group considers the legal rights and commercial substance of the contracts in the assessment. This supports a specific boundary of the insurance contract as the group has the practical ability to reassess the risks of the particular policyholder and, as a result, can set a price or level of benefits that fully reflects those risks as required.

From an insurer's perspective, all insurance contracts issued have a contract boundary of one year or less. Cash flows outside the boundary of the insurance contract relate to future insurance contracts and are recognised when those contracts meet the recognition criteria.

The policyholder can renew their insurance cover should they choose, resulting in a new insurance contract being entered into on the day following the expiration of the previous insurance contract. This process will be repeated at every policy anniversary. No renewal fee will be levied upon renewal on the expiry of the policy, all circumstances remaining constant. Upon renewal, for practical consideration, no physical cash flow is applicable. The latter will not influence the full recognition of the liability for remaining coverage (LRC) associated with the newly issued insurance policy on day one of the coverage period with initial recognition.

The appropriate measurement model applicable to the insurance contracts is the PAA.

Insurance acquisition costs

Insurance acquisition costs are defined as those costs related to selling, underwriting and starting a group of insurance contracts. The group has made an accounting policy choice to expense any insurance acquisition cash flows as and when they are incurred.

Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation an entity requires for bearing the uncertainty about the amount and timing of the cash flows that arise from non-financial risk as the insurer fulfils its insurance contracts. The risk adjustment for non-financial risk shall reflect the insurer's current estimates of how the actual behaviour of the policyholders may differ from the expected behaviour.

Corporate Guarantee manages its non-financial risk through underwriting limits, approval procedures for new clients, pricing guidelines, centralised management of risk and monitoring of emerging issues. These factors and the past claims experience, combined with the nature of the policies issued, are such that the technical reserves held are more than the 95th percentile of the net ultimate fulfilment cash flows. Corporate Guarantee considers the level of reserves sufficient and deems it unnecessary to increase same to account for specific risks linked to non-financial risks.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

Measurement approach

IFRS 17 introduces three new measurement models:

- Premium allocation approach (PAA): Simplification available to contracts which are of short duration or where certain eligibility criteria are met;
- General measurement model (GMM): Applicable to all insurance contracts issued and reinsurance contracts held; and
- Variable fee approach: Applicable to insurance contracts with a discretionary participation feature.

The LRC portion of insurance liabilities and assets is measured using the PAA, which is the simplified measurement model applicable to contracts with a coverage period of 12 months or less, or where the measurement of the insurance liability is not significantly different between the PAA or GMM. This criterion is satisfied from a Corporate Guarantee perspective as all insurance contracts issued have a contract boundary of one year or less.

The carrying amount of a group of insurance contracts issued at the end of each reporting period is the sum of:

- The LRC; and
- The liability for incurred claims (LIC) comprising the fulfilment cash flows related to past service allocated to the group at the reporting date.

Initial measurement

Using the PAA, on initial measurement, the balance of the LRC for the group will consist, in essence, of the following element:

- Premiums, if any, received at initial recognition.

Subsequent measurement

Using the PAA, on subsequent measurement, the balance of the LRC for the group will consist, in essence, of the following elements:

- The carrying amount following the initial recognition or at the beginning of the reporting period;
- Plus, the premiums received in the subsequent reporting period;
- Minus, the amount recognised as insurance revenue for coverage provided in that period;
- Minus, any investment component paid or transferred to the LIC; and
- Minus, any incurred claims paid or transferred to the LIC.

The group is not required to adjust the carrying amount of the LRC to reflect the time value of money and the effect of financial risk, at initial recognition, as it expects that the time between providing each part of the coverage and the related premium due date is no more than a year. This criterion is satisfied from Corporate Guarantee's perspective as all insurance contracts issued have a coverage period of one year or less.

Monthly notional interest is allocated to the experience account of the policyholder based on the terms and conditions set out within the insurance contract. Notional interest is calculated on the positive balance of the experience account, at a rate determined by the group, according to market conditions. The notional interest will not be forfeited, even if claims were made against the experience account – it is always calculated on the remaining balance in this account. The notional interest accrues and is due to the policyholder on expiry or cancellation of the policy. The existence of the notional interest component would increase the LRC subsequent to initial recognition. The increase of the LRC will not coincide with cash flow receipts. The allocation of notional interest is expensed and disclosed as part of the net insurance finance expenses in the statement of profit or loss and other comprehensive income.

The LIC comprises claim events that have occurred before or at the reporting date, whether reported or not. The group shall measure the LIC for the group of insurance contracts at the probability-weighted fulfilment cash flows relating to incurred claims by applying the principles of the GMM. In terms of the PAA, the group will not be required to adjust future cash flows for the time value of money and the effect of financial risk as those cash flows are expected to be paid or received in one year or less from the date the claims are incurred.

Fulfilment cash flows

The fulfilment cash flows comprise unbiased and probability-weighted estimates of future cash flows within the contract boundary. The fulfilment cash flows consider all reasonable and supportable information available at the reporting date without undue cost or effort.

Fulfilment cash flows are determined separately for insurance contracts issued. Fulfilment cash flows are allocated to groups of insurance contracts for measurement purposes.

Amounts recognised in the statement of profit or loss and other comprehensive income

Insurance revenue, insurance service expenses, showing in aggregate incurred claims (excluding investment components) and other incurred insurance service expenses, and insurance acquisition costs are recognised in the statement of profit or loss and other comprehensive income based on the concept of services provided during the period.

Expected premium receipts are allocated to insurance revenue based on the passage of time as and when the insurance contract services under the group of insurance contracts are provided.

Insurance service expenses comprise incurred claims, incurred directly attributable expenses, changes in the fulfilment cash flows relating to past services or that result in onerous contract losses or reversals of those losses.

1.18 Segment reporting

An operating segment is a component of the group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the group's other components and for which discrete financial information is available. All operating segments' operating results are reviewed regularly by the group's managing director, who is the chief operating decision maker, to make decisions pertaining to resources to be allocated to the segment and to assess its performance.

Segment results

Segment results consist of segment revenue less segment expenses.

Segment revenue

Segment revenue consists of revenue reported in the group's profit or loss that is directly attributable to a segment and the relevant portion of group revenue that can be allocated on a reasonable basis to a segment, whether from sales to external customers or from transactions with other segments of the group, but excluding non-specific revenue interest or dividend income and also excluding gains on sales of investments or gains on extinguishments of debt (unless the segment's operations are primarily of a financial nature).

Segment expense

Segment expense consists of expenses resulting from the operating activities of a segment that are directly attributable to the segment and the relevant portion of expenses that can be allocated on a reasonable basis to the segment, including expenses relating to sales to external customers and expenses relating to transactions with other segments within the group, excluding non-operating interest incurred, losses on sales of investments or losses on extinguishments of debt (unless the segment's operations are primarily of a financial nature) and income tax.

General administrative expenses, such as head office expenses, and other expenses that arise at group level and relate to the group as a whole, are also excluded from segment expense. Costs incurred at group level on behalf of a segment, however, are included in segment expense if they relate to the segment's operating activities and they can be directly attributed or allocated to the segment on a reasonable basis.

Segment assets

Segment assets consist of those assets that are employed by a segment in its operating activities and are either directly attributable to the segment or can be allocated on a reasonable basis.

Segment liabilities

Segment liabilities consist of those operating liabilities that result from the operating activities of a segment that are either directly attributable to the segment or can be allocated on a reasonable basis to the segment.

1.19 Determination of fair values

A number of the group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

Investment property

The fair value of investment property is determined using available information on a case-by-case basis. The group will use alternative valuation methods where deemed more appropriate at the financial position reporting date. Details are disclosed in note 4 regarding the determination of fair value in the current financial year.

Investments in equity, debt securities and unit trusts

The fair value of financial assets at fair value through profit or loss is determined by reference to their quoted closing market price at the reporting date.

The fair values of the financial assets were determined as follows:

- The fair values of listed or quoted investments are based on the quoted closing market prices;
- The fair values of debt securities are based on the quoted closing market prices as reflected on the JSE Debt Market. The securities are regularly traded on the active market; and
- The fair values of the unit trust investments are based on the quoted put (exit) price provided or published by the fund manager.

SIGNIFICANT ACCOUNTING POLICIES continued

for the year ended 31 March 2026

2. New standards and interpretations not yet effective

At the date of authorisation of the group annual financial statements and company annual financial statements for the year ended 31 March 2026, the following standards and interpretations were in issue, but not yet effective:

	Standard/interpretation	Effective date: years beginning on or after
IFRS 9 and IFRS 7	<i>Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures – Classification and Measurement of Financial Instruments</i>	Annual periods beginning on or after 1 April 2026*
Various Standards	<i>Annual improvements to IFRS – Volume 11</i>	Annual periods beginning on or after 1 April 2026*
IFRS 9 and IFRS 7	<i>Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures – Contracts Referencing Nature-dependent Electricity</i>	Annual periods beginning on or after 1 April 2026*
IAS 21	<i>Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates – Translation to a Hyperinflationary Presentation Currency</i>	Annual periods beginning on or after 1 April 2027*
IFRS 7, IFRS 18, IAS 1, IAS 8, IAS 36 and IAS 37	<i>Amendments to Illustrative Examples on IFRS 7 Financial Instruments: Disclosures, IFRS 18, IAS 1 Presentation of Financial Statements, IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, IAS 36 Impairment of Assets and IAS 37 Provisions, Contingent Liabilities and Contingent Assets: Disclosures about Uncertainties in the Financial Statements</i>	Refer below**
IFRS 18	<i>IFRS 18 Presentation and Disclosure in Financial Statements</i>	Annual periods beginning on or after 1 April 2027*
IFRS 19	<i>IFRS 19 Subsidiaries without Public Accountability</i>	Annual periods beginning on or after 1 April 2027*

* All standards and interpretations will be adopted at their effective date despite early application being permitted under IFRS Accounting Standards (except for those standards and interpretations that are not applicable to the entity).

**As accompanying materials to IFRS Accounting Standards, these illustrative examples do not have an effective date. However, companies would be expected to implement any change in their reporting on a timely basis.

The directors are of the opinion that the impact of the application of the remaining standards and interpretations will be as follows:

Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures – Classification and Measurement of Financial Instruments

These amendments:

- Clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system;
- Clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest criterion;
- Add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environmental, social and governance targets); and

- Make updates to the disclosures for equity instruments designated at fair value through other comprehensive income.

The impact on the financial statements of the group is not expected to be significant and the application of this standard will be done on a case-by-case basis.

Annual improvements to IFRS – Volume 11

These amendments include minor changes to:

- IFRS 1 *First-time Adoption of International Financial Reporting Standards*: The amendment deals with hedge accounting applied by a first-time adopter of IFRS Accounting Standards;
- IFRS 7 *Financial Instruments: Disclosures* and its accompanying guidance on implementing IFRS 7: The amendments provide simplified guidance relating to gains or losses on derecognition, determination of fair value on initial recognition determined using unobservable inputs and credit risk;

- IFRS 9 *Financial Instruments*: The amendments clarify the derecognition scope application for lease liabilities and how to measure trade receivables arising under IFRS 15 *Revenue from Contracts with Customers*;
- IFRS 10 *Consolidated Financial Statements*: The amendments clarify the guidance on determining when a party is acting as a *de facto* agent; and
- IAS 7 *Statement of Cash Flows*: The amendment updates the reference from the “cost method” to “cost” when measuring an investment in an associate, joint venture or subsidiary.

The impact on the financial statements of the group is not expected to be significant and the application of this standard will be done on a case-by-case basis.

Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures – Contracts Referencing Nature-dependent Electricity

These amendments change the “own use” and hedge accounting requirements of IFRS 9 and include targeted disclosure requirements to IFRS 7. These amendments apply only to contracts that expose an entity to variability in the underlying amount of electricity because the source of its generation depends on uncontrollable natural conditions (such as the weather). These are described as “contracts referencing nature-dependent electricity”

The impact on the financial statements of the group is not expected to be significant and the application of this standard will be done on a case-by-case basis.

Implementation of IFRS 18 Presentation and Disclosure in Financial Statements

The objective of IFRS 18 is to set out requirements for the presentation and disclosure of information in general-purpose financial statements (financial statements) to help ensure they provide relevant information that faithfully represents an entity’s assets, liabilities, equity, income and expenses. IFRS 18 replaces IAS 1 *Presentation of Financial Statements* and focuses on updates to the statement of profit or loss with a focus on the structure of the statement of profit or loss; required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity’s financial statements (that is, management-defined performance measures); and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

Many of the other existing principles in IAS 1 are retained, with limited changes. IFRS 18 will not impact the recognition or measurement of items in the financial statements, but it might change what an entity reports as its “operating profit or loss”.

The full scope of the impact on the financial statements of the group remains uncertain at this point in time but is being actively addressed, with further analysis and consultations to follow to ensure compliance with IFRS 18 in future financial statements.

IFRS 19 Subsidiaries without Public Accountability

The objective of IFRS 19 is to provide reduced disclosure requirements for subsidiaries, with a parent that applies the accounting standards in its consolidated financial statements. IFRS 19 is a voluntary accounting standard that eligible subsidiaries can apply when preparing their own consolidated, separate or individual financial statements.

The impact on the financial statements of the group is not expected to be significant and the application of this standard will be done on a case-by-case basis.

Investment property details

The property was disposed of during the financial year ended 31 March 2025. Land and buildings consisted of business premises situated on Erf 2134, Ferndale, Johannesburg (property), measuring 8 030m². The fair value prior to the disposal was based on initial terms agreed between the insurance segment and an unrelated third party to sell the property. The key input under this approach is the consideration offered for the purchase of the property.

Measuring investment property

Investment property, principally land and buildings as described previously, is currently held for capital appreciation and is not occupied by the group. On initial recognition, the property at the end of owner occupation, for a transfer from owner-occupied property to investment property, was transferred at the value determined in terms of IAS 16 up to the date of change in use. There was no difference between the IAS 16 valuation and the fair value of the property on 1 April 2021. Subsequent to initial measurement, investment property is measured at fair value. Changes in fair values are presented in profit or loss as part of investment income.

Due to the prevailing circumstances in the prior year, the fair value of the property has not been based on the valuation by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

Pledged as security

There is no restricted title on computer software and no computer software has been pledged as security for liabilities of the group or the company. As at 31 March 2026, there were no contractual commitments relating to intangible assets.

6. Investments in subsidiaries

Name of company	Held by	Voting power		Shares at cost	
		2026 %	2025 %	2026 R'000	2025 R'000
Corporate Guarantee (South Africa) (RF) Limited	Nictus Limited	100,00	100,00	42 900	42 900
Nictus Meubels Proprietary Limited	Nictus Limited	100,00	100,00	33 020	33 020
				75 920	75 920
Impairment of investment in subsidiaries				(16 410)	(14 124)
Carrying value at the end of the year				59 510	61 796
Accumulated impairment allowances					
Opening balance				14 124	10 962
Current year: impairment losses recognised				2 286	3 162
				16 410	14 124

As a result of prior period trading losses, the investment in Nictus Meubels Proprietary Limited has been impaired in prior years. The current and prior year's impairment, based on trading losses incurred by Nictus Meubels Proprietary Limited, has been accounted for in profit or loss as part of administrative and operating expenses (refer to note 20). The aggregate impairment is based on the recoverable amount, constituting the fair value less costs to sell, of the subsidiary as at 31 March 2026. The fair value less costs to sell is deemed to approximate the net asset value of Nictus Meubels Proprietary Limited as at the reporting date, given that the underlying net asset value consists primarily of cash and cash equivalents and inventory.

The company has no sponsored entities.

All subsidiaries' principal place of business and country of incorporation is in South Africa.

7. Leases

The group had three active lease agreements as at the end of the 2025 financial year, for retail space and a storeroom with regard to the furniture retail segment and office space from a Nictus perspective, which constituted multi-year lease agreements at inception. These leases generally do not exceed an initial period of 60 months. Periods covered by an option to extend the lease, if the lessee is reasonably certain to exercise that option, are also taken into account. The latter is unlikely in a furniture retail environment given the amount of external factors to be considered before extending a lease agreement. The leases pertaining to the retail space and storeroom with regard to the furniture retail segment expired on 28 February 2026, and neither was renewed or extended following the closure of the Polokwane branch, as of 28 February 2026. Nictus Limited's lease of office space expired on 30 June 2025 and was not renewed. Nictus Limited entered into a new lease agreement for office space, effective as of 1 August 2025, for a period of five years at a different address.

The lease payments for the above-mentioned lease agreements are discounted using the lessee's incremental borrowing rate as the interest rate implicit in the lease could not be readily determined.

* These financial assets are mandatorily measured at fair value through profit or loss.

Refer to note 1.19 on determining the fair value of financial assets.

Refer to note 29 on financial risk management for the sensitivity analysis.

Fair value hierarchy of financial assets at fair value through profit or loss

For financial assets recognised at fair value, disclosure is required of a fair value hierarchy which reflects the significance of the inputs used to make the measurements. Unit trusts consist of investments in collective investment schemes and the valuation technique is based on a quoted put (exit) price provided by the relevant fund managers. The only observable inputs with regard to unit trusts are the closing units and closing price. There were no transfers between the levels for the reporting period.

	GROUP		COMPANY	
	2026	2025*	2026	2025
Figures in R'000

Unit trusts*	11 838	6 628	–	–
Level 2				
Unit trusts*	756 821	464 072	29 509	26 013

* Specific comparative figures were restated based on the re-evaluation of the available facts and market information; unit trust (exchange traded fund) – Investment 5, amounting to R2,86 million in the prior year as disclosed on page 80, should be classified as Level 1. The prior year disclosure, as part of Level 2, was corrected and amended to ensure comparability with the current year. The correction does not impact and/or change any other disclosure or classification in the financial statements.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS continued

for the year ended 31 March 2026

8. Investments continued

Interests in unconsolidated structured entities

Unit trust – Investment 1

The fund aims primarily to provide a high level of income. The secondary aim is to maximise total return (the combination of income and capital growth). The fund invests primarily in high-income-bearing bonds, cash and other interest-bearing securities. The fund is actively managed. As at year end, the group's interest in the unit trust totalled R473,49 million (2025: R264,01 million), compared to a total unit trust size of R32,40 billion (2025: R25,80 billion).

Unit trust – Investment 2

The fund is a largely domestic, high-yield, fixed-income portfolio, which aims to return the STeFI call deposit rate plus 2% per annum after fees through the interest rate cycle. The fund's objective is to seek opportunities to deliver a high level of income and long-term stability on capital invested. As at year end, the company's interest in the fund totalled R18,07 million (2025: R16,57 million), compared to the total fund size of R19,27 billion (2025: R17,21 billion).

Unit trust – Investment 3

The investment objective of the fund is, with conservative risk qualities, to provide a higher level of income compared to traditional money market funds. Capital preservation is of primary importance. The fund aims to enhance the yield by investing in a blend of interest-yielding instruments in a range of maturities. The maximum weighted average duration is limited to two years. As at year end, the group's interest in the fund totalled R30,79 million (2025: Rnil), compared to the total fund size of R9,90 billion.

Unit trust (Exchange traded fund) – Investment 4

This exchange traded fund is one of the simplest and cost-efficient methods to invest directly in actual gold. It continuously tracks the gold spot price. As at year end, the group's interest in the fund totalled R5,14 million (2025: R3,77 million), compared to the total fund size of R40,34 billion (2025: R33,93 billion).

Unit trust (Exchange traded fund) – Investment 5

This exchange traded fund is one of the simplest and cost-efficient methods to gain efficient access to a basket of companies involved in the mining of copper. As at year end, the group's interest in the fund totalled R5,20 million (2025: R2,86 million), compared to the total fund size of R114,66 billion (2025: R47,44 billion).

Unit trust – Investment 6

The portfolio invests in several strategies over various instruments, asset classes and portfolios. It combines a strategic risk allocation which provides the optimal diversification benefit across the various strategies, with tactical risk allocation to the most attractive opportunity sets as identified on a bottom-up basis. As at year end, the group's and company's interest in the fund totalled R27,17 million (2025: R23,81 million), compared to the total fund size of R3,08 billion (2025: R2,30 billion).

Unit trust – Investment 7

This strategy largely invests in funds within the ASISA South African Multi Asset Income category that display higher volatility than money market and enhanced yield solutions. The fund-of-funds is an income-generating portfolio that aims to achieve a high level of sustainable income and stability of capital invested. As at year end, the group's interest in the fund totalled R204,96 million (2025: R157,48 million), compared to the total underlying fund(s) size of R136,10 billion (2025: R125,19 billion).

Unit trust – Investment 8

The fund aims to maximise income on the investment consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold in normal market conditions. The global fund invests in a broad range of high-credit-quality fixed-income securities (such as bonds) and money market instruments. As at year end, the group's and company's interest in the unit trust totalled R2,34 million (2025: Rnil), compared to the total unit trust size of R2,00 trillion.

Various – Investment 9

These constitute smaller investments in commodity-based funds. The funds seek to track the return of the silver and platinum spot price, respectively. As at year end, the group's interest in the funds totalled R1,50 million (2025: Rnil), compared to the total fund(s) size of approximately R616,73 billion.

9. Deferred tax assets/(liabilities)

	(9 914)	(5 588)	(8 614)	(6 948)

Deferred tax assets in respect of available tax losses and deductible temporary differences have been recognised to the extent that the directors are of the opinion that sufficient future taxable profits will be available in the foreseeable future to enable the group and its subsidiary companies to utilise the available tax losses and deductible temporary differences.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS continued

for the year ended 31 March 2026

9. Deferred tax assets/(liabilities) continued

Tax rates

The deferred tax rate applied to the fair value adjustments of financial assets or revaluations of owner-occupied property is determined by the expected manner of recovery. Where the expected recovery is through a sale, the capital gains tax rate of 21,6% (2025: 21,6%) has been used. If the expected manner of recovery is through indefinite use, the corporate tax rate of 27% (2025: 27%) has been applied.

If the manner of recovery is partly through use and partly through sale, a combination of the capital gains tax rate and corporate tax rate has been used.

The following deferred tax assets have not been recognised by the group and company in respect of available tax losses and deductible temporary differences due to the fact that there is not sufficient certainty at the reporting date whether the subsidiary or company would be able to generate sufficient taxable income in the immediate future to utilise the available tax losses and deductible temporary differences.

	GROUP		COMPANY	
	2026	2025	2026	2025
Figures in R'000				
Estimated available tax losses	8 345	4 791	663	396
Tax losses recognised in determining deferred tax assets	(663)	(396)	(663)	(396)
Unrecognised tax losses	7 682	4 395	–	–
Unrecognised deferred tax assets pertaining to unutilised tax losses	2 074	1 187	–	–

The estimated tax losses will be available to the company and the respective subsidiaries indefinitely per the Income Tax Act as long as the entities are trading. There is currently no intention for the company or the subsidiaries to cease trading activities.

Loans to/(from) subsidiary companies

Loans due from subsidiaries bear interest at the South African prime lending rate, are unsecured and repayable on demand.

Loans due to subsidiaries bear interest at the South African prime lending rate plus 2%, are unsecured and repayable on demand.

The carrying values of loans from group companies approximate their fair value due to the market-related interest rates applicable to the loans.

Secured advances from subsidiary companies

Secured advances due to subsidiaries bear interest at the South African prime lending rate of between minus 2% to 3,55%, are secured and repayable within 12 months. The contingency policy receivable was pledged as security. Refer to note 12.

The carrying values of secured advances from group companies approximate their fair value due to the market-related interest rates applicable to the loans.

	10 740	12 037	26 043	22 928

General

The carrying amounts of short-term trade receivables are deemed to approximate their fair values.

The maximum exposure to credit risk at the reporting date is as disclosed in note 29.

Trade receivables include instalment sale agreements relating to furniture and household appliances that are sold to customers using instalment sale agreements, which are non-cancellable and which are on average for a period of 16 months (2025: 24 months). Goods sold by the furniture retail segment are sold subject to retention of title clauses, so that in the event of non-payment, the group has a secured claim. Instalment sale agreement periods were shortened during the current financial period and all instalment sales were stopped effective 31 March 2026.

As at 31 March 2026, the future minimum instalment sale agreement payments receivable within one year amounting to R2,1 million (2025: R7,2 million) and Rnil million (2025: R1,1 million), respectively, are receivable between one and two years, and are included in trade receivables.

Other receivable – contingency policy (company)

“Other receivable – contingency policy” relates to the contingency policy (policy) entered into by the company (insured) and Corporate Guarantee (South Africa) (RF) Limited (insurer), a subsidiary of the company (i.e. a related party). The policy provides that the insurer, in return for the payment of a premium, undertakes to indemnify the insured for any loss suffered resulting from the occurrence of certain insured events.

The insurer maintains an “experience account” throughout the period of insurance in respect of the policy. The balance of this experience account will be calculated as the total of all premiums received plus premiums receivable (including premiums receivable for the unexpired portion of the insurance period), less commission and claims paid, less fees as indicated in the policy schedule, plus a notional interest allocation calculated on the positive cash balance at a notional interest rate determined within the discretion of the insurer. The balance of the experience account on expiry date, if positive, will be paid to the insured as an experience bonus by the insurer.

The experience bonus will only be paid on written acknowledgement by the insured that it accepts the payment as full and final settlement of its rights under the policy and that the insured will have no further claim against the insurer. In addition, the experience bonus will only become payable after receipt of payment by the insurer of any outstanding premiums payable for the full period of insurance (including the unexpired portion of the period of insurance), or alternatively written confirmation by the insured that the insurer may set off the amount of such outstanding premiums against the balance on the experience account in order to pay the experience bonus net of outstanding premiums. The existence of the experience account provides the insured with a contractual right to receive cash in the form of either a claim settlement or experience bonus at expiry or cancellation of the policy.

Consequently, the experience bonus meets the definition of a financial asset, being a contractual right to receive cash or another financial asset from another entity, which is measured at amortised cost.

12. Trade and other receivables continued

	(254)	(325)	–	–
Net carrying value	10 740	12 037	26 043	22 928

As at 31 March 2026, group trade and other receivables of Rnil (2025: R0,01 million) were past due but no impairment allowance was raised. From a company perspective, Rnil (2025: Rnil) was past due but no impairment allowance was raised. The directors are of the opinion that the impairment allowance raised is adequate and past experience indicates that trade and other receivables past due but not impaired are recoverable.

13. Cash and cash equivalents

Figures in R'000	GROUP		COMPANY	
	2026	2025	2026	2025
Cash and cash equivalents consist of:				
Cash on hand	40	40	7	7
Bank balances	1 359	2 473	127	158
Short-term deposits*	147 415	159 129	299	4 945
	148 814	161 642	433	5 110

* Short-term deposits included a call deposit amounting to Rnil (2025: R4,5 million). The rights, title and interest in and to the aforementioned deposit are subject to a cession/pledge in favour of an independent third party. The group's exposure has been fully mitigated due to collateral provided in favour of the group by a Corporate Guarantee (South Africa) (RF) Limited policyholder.

Included in cash and cash equivalents are investments made in terms of the various South African insurance regulations to comply with necessary liquidity requirements.

Short-term deposits include a unit trust investment of R86,61 million (2025: R121,55 million). The money market fund invests in call accounts and short-term money market instruments, the majority with original maturities less than three months. The investment has been made to meet short-term operational obligations as they fall due and form an integral part of the group's cash management. The remainder of the balance includes term deposits that have a maturity of three months or less from the date of acquisition and are repayable with immediate to 72 hours' notice, with no loss of interest.

The carrying amount of cash and cash equivalents is deemed to approximate its fair value.

The borrowing capacity, as determined by the MOI, is unrestricted and at the discretion of the directors.

14. Stated capital

Figures in '000	GROUP		COMPANY	
	2026	2025	2026	2025

Closing balance – ordinary shares (53 443 500 (2025: 53 443 500))	25 969	25 969	25 969	25 969

All ordinary shares rank equally with regard to the company's residual assets. No treasury shares were held by the group or company for the financial year ended 31 March 2026 nor for the comparative prior year.

16 033 050 (2025: 16 033 050) unissued ordinary shares are under the control of the directors in terms of a resolution of shareholders passed at the last annual general meeting and in terms of the MOI, but subject to compliance with the relevant regulations, i.e. the Companies Act of South Africa and the JSE Listings Requirements. This authority remains in force until the next annual general meeting.

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of shareholders of the company. All issued share capital is fully paid up.

* Specific comparative figures were restated. The movements in carrying amounts of insurance liabilities and assets reconciliation, disclosed above, have been corrected in the current year to include insurance acquisition costs. In the prior year, insurance acquisition costs were solely disclosed separately as part of note 17.3. This change in disclosure does not change the closing balance of secured advances or legal insurance contract liabilities. The change does not affect any disclosure beyond note 17.2 and was made to align the disclosure in this note with a specific requirement of IFRS 17. Due to the accounting policy choice to expense any insurance acquisition cash flows as and when they are incurred, the net financial effect of the disclosure correction is zero.

Independent non-executive directors	Professor Barend J Willemse Cornelius J de Vrye Sarita Martin Melanie L de Nysschen (appointed on 27 May 2026)

A person or a close member of that person's family is related to a reporting entity if that person has control or joint control of the reporting entity, has significant influence over the reporting entity or is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity. Key management personnel have been identified as the executive directors, non-executive directors and the managing executives of segments within the group.

Close members of the family related to key management would also be defined as related parties. Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the group and include that person's children and spouse or domestic partner, the children of that person's spouse or domestic partner and dependants of that person or that person's spouse or domestic partner.

Commonly, an entity would be related to the reporting entity if a member of key management is also a member of the key management personnel of that entity (other related parties), or the entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

Other related parties are related to the group based on the fact that these entities are either controlled or jointly controlled by some members of key management, or a person who has control or joint control of the group has significant influence over the entity or is a member of the key management personnel of the entity.

27. Related parties continued

Transactions with key management personnel

Directors and prescribed officers of the company and their immediate relatives beneficially control 82,67% (2025: 80,23%) of the voting shares of the company. Details pertaining to directors' and key management's compensation are set out in note 28.

Similar policies are applied to key personnel at subsidiary level who are not defined as key management personnel at group level.

Certain directors of the group are also non-executive directors of other public companies which may transact with the group. The relevant directors do not believe that they have significant influence over the financial and operational policies of those companies. Those companies are therefore not regarded as related parties.

The following transactions were entered into between subsidiaries of the group and key management (as defined) and/or organisations in which key management personnel have significant influence:

NOTES TO THE ANNUAL FINANCIAL STATEMENTS continued

for the year ended 31 March 2026

29. Financial risk management

The group's activities expose it to a variety of financial risks from the use of financial instruments: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

This note presents information about the group's exposure to each of the above risks, the group's objectives, policies and processes for measuring and managing risk and the group's management of capital. Further quantitative disclosures are included throughout these group annual financial statements.

The board of directors has overall responsibility for the establishment and oversight of the group's risk management framework. The board has an audit and risk committee which is responsible for developing and monitoring the group's risk management policies.

The group's risk management policies are established to identify and analyse the risks faced by the group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the group's activities. The group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The group audit and risk committee oversees how management monitors compliance with the group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the group.

Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they fall due. The group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

The group monitors its cash flow requirements on a daily basis against monthly projections and focuses on optimising its cash return on investments. Typically, the group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 30 days, including the servicing of financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted such as natural disasters. With regard to the group, the contractual maturities of secured advances, R890,8 million (2025: R580,1 million), disclosed as part of insurance contract liabilities, could mirror that of the legal insurance contract liabilities due to the interdependent nature that exists. At the end of the reporting period, and for purposes of managing liquidity risk, the group held cash and cash equivalents, together with a portion of investments amounting to R861,4 million (2025: R587,0 million), that are available to meet cash flow obligations within a period of 30 days.

29. Financial risk management continued

Liquidity risk continued

The following are the contractual maturities of non-derivative financial liabilities and insurance liabilities, including interest payments and excluding the impact of secured advances. The amounts disclosed in the table are the contractual and expected undiscounted cash flows.

Figures in R'000	Carrying amount	Total cash flows	Less than 6 months	6 to 12 months	Between 1 and 2 years	Between 2 and 5 years

Other payables	4 168	4 168	4 168	–	–	–
Lease liabilities	196	197	197	–	–	–

* As at 31 March 2026 and 31 March 2025, the expected contractual cash flows associated with insurance contract liabilities exclude the gross provision for notional interest as no current contractual obligation exists relating to same. However, the expected cash flows include the effect of expected premium debtor receipts from the policyholders that are most likely payable as the gross investment component of the insurance policy. The carrying amount reflects the balance associated with the legal insurance contract liabilities as at the reporting date as measured in terms of IFRS 17. Refer to note 17.1.

[#] The disclosure of the prior year has been corrected by adding the expected cash flows associated with the balances of secured advances and the total insurance contract liabilities on an aggregate basis, to align with all the balances disclosed as part of note 17.1 Insurance contracts issued overview. This aligns with the disclosure of the current year.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS continued

for the year ended 31 March 2026

29. Financial risk management continued

Market risk

Market risk is the risk associated with changes in market prices, such as interest rates and equity prices that will affect the group's income or the value of its holdings in financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

The group incurs financial liabilities and acquires assets in order to manage market risks. All such transactions are carried out within the guidelines set by the group executive committee.

Interest rate risk

The group adopts a policy of ensuring that its exposure to changes in interest rates and borrowings is limited by setting the terms and conditions of loans to adjust with changes in market conditions. The group also aims to ensure that the profit margin is sufficient to cover any rate change.

Other market price risk

The group executive committee monitors the mix of listed debt and equity securities and unit trusts in its investment portfolio based on market expectations. Material investments within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the directors of the relevant segment.

The primary goal of the group's investment strategy is to maximise profitability through well-managed investments. Management is assisted by external advisors in this regard.

Interest rate risk

The group is exposed to interest rate risk as the majority of its interest-bearing financial assets are on a variable rate basis.

Exposure to interest rate risks

At the reporting date, the interest rate profile of the group's interest-bearing financial instruments was:

	GROUP		COMPANY	
	2026	2025	2026	2025
Figures in R'000				
Variable rate instruments				
Financial assets at amortised cost	198 396	205 905	299	4 945
Financial assets at fair value through profit or loss	729 651	438 059	–	–
Secured advances	890 771	580 076	–	–
Financial liabilities	–	–	(10 554)	(6 325)
	1 818 818	1 224 040	(10 255)	(1 380)

Sensitivity analysis

An increase of 100 basis points in interest rates at the reporting date would have increased profit/(loss) and increased/ (decreased) equity by the amounts shown below. A decrease of 100 basis points would have an equal but opposite effect on profit. This analysis assumes that all other variables remain constant. This analysis was performed on the same basis for 2025. The 100 basis points change in interest rates represents a scenario that could materialise in extreme circumstances, especially over a 12-month period, and is deemed to be an appropriate stress associated with interest rate risk.

	GROUP		COMPANY	
	2026	2025	2026	2025
Figures in R'000				
Variable rate instruments	13 277	8 935	(75)	(10)

29. Financial risk management continued

Price risk

The group is exposed to equity securities price risk because of investments held by the company and the group's insurance subsidiary and classified on the statement of financial position at fair value through profit or loss. To manage its price risk arising from investments in listed equity securities, debt securities and unit trusts, the company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the company.

At the reporting date, the price risk impact of the group's financial instruments was:

	10% increase in market prices 2026	10% decrease in market prices 2026	10% increase in market prices 2025	10% decrease in market prices 2025
Figures in R'000				
GROUP				
Unit trusts	76 866	(76 866)	47 070	(47 070)
COMPANY				
Unit trusts	2 951	(2 951)	2 601	(2 601)

Foreign exchange risk

The group and company operate locally and are exposed to limited foreign exchange risk, primarily the US Dollar. Foreign exchange risk arises from investments denominated in a currency that is not the functional currency of the group and company. The investments are reviewed regularly in conjunction with external investment professionals. As at year end, the group's and company's interest in investments that are exposed to foreign exchange fluctuations amounted to R12,2 million (2025: R5,1 million) and R2,3 million (2025: R2,2 million), respectively.

As at 31 March 2026, if the underlying currencies in which investments are denominated, being predominantly the US Dollar and Pound Sterling, had strengthened by 10% against the South African Rand with all other variables held constant, profit before taxation would have been R1,2 million (2025: R0,5 million) and R0,2 million (2025: R0,2 million) higher, for the group and company, respectively, mainly as a result of foreign exchange gains on translation of investments in foreign currency-related instruments.

The group reviews its foreign currency exposure, including commitments, on an ongoing basis.

29. Financial risk management continued

Credit risk

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises primarily from the group's receivables from customers and investments in short-term deposits.

Trade and other receivables

The group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the group's customer base, including the default risk of the industry and country in which customers operate, have less of an influence on credit risk.

Geographically, the concentration of credit risk is predominantly in South Africa.

The board has established a credit policy for each segment under which each new customer is analysed individually for creditworthiness before the group's standard payment and delivery terms and conditions are offered. The group's review includes external ratings obtained from an external credit bureau, reviews of claims history for insurance contracts, where available, and in some cases bank references.

Purchase limits are established for each customer, which represent the maximum opening amount without requiring approval from the subsidiary's executive management. These limits are reviewed when required per customer. Customers who fail to meet the group's benchmark creditworthiness may transact with the group only on a cash basis.

The majority of the group's customers have been transacting with the group for a number of years, and losses have occurred infrequently. In monitoring customer credit risk, customers are grouped according to their credit characteristics, including whether they are an individual or legal entity, geographical location, industry, ageing profile, maturity and existence of previous financial difficulties or insurance claims.

Trade and other receivables relate only to the group's end-user customers. Customers that are graded as high risk are restricted by tighter credit limits and their trading activity is monitored monthly by management.

Goods and services are sold subject to retention of title clauses, so that in the event of non-payment, the group has a secured claim.

From a group perspective, the impairment allowance relates to the credit risk associated with the trade receivables of the furniture retail segment, which have been grouped based on location, shared credit risk characteristics and the days past due. The trade receivables are unrated from an independent credit ratings perspective. These trade receivables are collected over a period of six to 24 months, based on the terms of the contract, from numerous customers. There are no significant concentrations of credit risk, considering exposure to individual customers.

Trade receivables overdue are generally recovered in less than 12 months. Therefore, the company measures the loss allowance at an amount equal to lifetime expected credit losses for these trade receivables.

Estimated credit losses are determined based on an analysis of the ageing of trade receivables and past write-off history for a period of 24 months (2025: 24 months). Based on this analysis and the expected credit loss model, the group does not expect current and future economic trends to have a significantly different impact on the recoverability of trade receivables.

Secured advances include advances made to companies, property companies and other entities in the normal course of business of the insurance segment. These advances are secured by assets, rights to claims in the company, mortgage bonds, pledges and suretyships to the amount of R1 369,2 million (2025: R881,1 million). Various repayment terms and interest rates apply. There is therefore no credit risk associated with these advances.

Investments

The group limits its exposure to credit risk by only investing in short-term investments or reputable institutions. These investments in the insurance segment are based on the requirements as set out in the Insurance Act (Short-term Insurance Act of South Africa prior to 1 July 2018).

The investment portfolios are evaluated monthly by the group executive committee with sufficient financial and investment background. This committee reviews the valuation and returns on investments monthly for listed investments and non-listed investments to determine whether the investment portfolio requires change.

Given this, management does not expect any counterparty to fail to meet its obligations other than specifically provided for at year end.

The following tables provide information regarding the aggregated credit risk exposure for financial instruments and other assets of the company with and without an external credit rating as at 31 March (credit ratings assigned are the international-scale credit ratings issued by S&P Global ratings agency):

Insurance risk

Terms and conditions of insurance contracts

Corporate Guarantee (South Africa) (RF) Limited (Corporate Guarantee) is licensed as a non-life insurer, in terms of section 23 of the Insurance Act, to conduct insurance business and operations, subject to the classes and subclasses of insurance business defined as part of the insurer's licensing conditions.

Corporate Guarantee underwrites finite risk policies to a defined target market which concentrates primarily on small and medium enterprises in the commercial market and secondarily on the lower end of the corporate commercial market as well as the higher end of the personal market. In the personal segment, the group does not cater for the insurance needs of the general public. Commercial and personal clients are carefully selected according to a strategy of prudent risk selection.

Corporate Guarantee aims to deliver innovative and tailored insurance risk solutions to its clients allowing them to retain some insurance risk and effectively operate as autonomous insurance entities. The finite risk policies expose Corporate Guarantee to specific risks and include profit participation measures to promote good risk management among the insured. The terms and conditions of insurance contracts that have a material effect on the amount, timing and uncertainty of future cash flows arising from insurance contracts are set out in the notes. Currently, Corporate Guarantee offers one type of insurance contract, being a contingency policy to cover insurance risk.

Insurance risk continued

Insurance risk and policies for mitigating insurance risk

The primary activity of Corporate Guarantee relates to the assumption of the risk of loss from events involving persons or organisations. Such risks relate to the following classes of business: property, agriculture, transportation, motor, accident and health, guarantee, liability and miscellaneous from an insured event within South Africa. As such, the group is exposed to uncertainty surrounding the timing, severity and frequency of claims under insurance contracts.

The theory of probability is applied to the pricing and provisioning for a portfolio of insurance contracts. The principal risk is that the frequency and severity of claims are greater than expected and that Corporate Guarantee does not charge premiums appropriate for the risk accepted. Insurance events are, by nature, random, and the actual number and size of events during any one year may vary from those estimated using established statistical techniques.

Corporate Guarantee manages its insurance risk through underwriting limits, approval procedures for new clients, pricing guidelines, centralised management of risk and monitoring of emerging issues. These actions are described below.

Underwriting strategy

Corporate Guarantee's underwriting strategy seeks diversity to ensure a balanced portfolio and is based on a portfolio of similar risks spread over a large geographical area. The underwriting strategy is continuously monitored, updated and determines the classes of business to be written, the territories in which business is to be written and the industry sectors to which Corporate Guarantee is prepared to accept exposure. The strategy is cascaded down by the respective segment board to management that sets the limits for management by client size, class of business, region and industry in order to enforce appropriate risk selection within the portfolio. In addition, management meets monthly to review underwriting information including premium income and loss ratios by class, region and industry.

Concentrations of insurance risk and policies mitigating the concentrations

Within the insurance process, concentrations of risk may arise where a particular event or series of events could impact heavily upon Corporate Guarantee's resources. The group monitors the concentration risk by geographical area and class of business. Corporate Guarantee is broadly represented across South Africa, with the majority of clients being concentrated in the Free State, Gauteng and the North West. Corporate Guarantee has exposure to specific classes of insurance business, with approximately 97% (2025: 96%) of all exposure being represented by the classes of business: property, agriculture and liability as at the reporting date.

Exposure relating to catastrophic events

Corporate Guarantee sets out the total aggregate exposure that it is prepared to accept in certain regions to a range of events such as natural catastrophes. The aggregate position is reviewed annually.

Corporate Guarantee considers that its most significant exposure would arise in the event of a major environmental disaster. This analysis has been performed through identifying key concentration of risks based on different classes of business exposed in the event of such an incident.

Other risks and policies for mitigating these risks

Insurance companies are exposed to the risk of false, invalid and exaggerated claims. Measures are in place to improve Corporate Guarantee's ability to proactively detect fraudulent claims.

29. Financial risk management continued

Insurance risk continued

Claims development

Corporate Guarantee is liable for all insured events that occur during the term of a contract, even if the loss is discovered after the end of the contract term, subject to predetermined time scales dependent on the nature of the insurance contract. Corporate Guarantee is therefore exposed to the risk that claim reserves will not be adequate to fund historical claims (run-off risk). To manage run-off risk, Corporate Guarantee takes all reasonable steps to ensure that it has appropriate information regarding its claim exposures and adopts sound reserving practices. Consequently, Corporate Guarantee's history has proven the reserves to be sufficient to fund the actual claims paid.

Corporate Guarantee takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. Given the uncertainty in establishing claims provisions, however, it is possible that the final outcome may prove to be different from the original liability established. The uncertainty about the amount and timing of claims payments is, however, typically resolved within a year.

The majority of Corporate Guarantee's insurance contracts are classified as "short tail", meaning that any claim is settled within a year after the loss date.

In terms of IFRS 17, an insurer need only disclose claim run-off information where uncertainty exists about the amount and timing of claim payments not resolved within one year. Corporate Guarantee does not underwrite business that is "long tail" in nature.

Capital management

The board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The board of directors monitors both the demographic spread of shareholders as well as the return on capital, which the group defines as total shareholders' equity and the level of dividends to ordinary shareholders. Capital primarily consists of contributed share capital and retained earnings.

The board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position. The group's target is to achieve a return on shareholders' equity based on an accepted sovereign bond and risk factor. The group does not have external debt. Cash resources within the group are utilised for any capital commitments.

There were no changes in the group's approach to capital management during the year.

The solvency capital requirement specifically covers the following key areas of risk to Corporate Guarantee:

- Interest rate risk;
- Equity, currency and property risk;
- Counterparty spread and default risk;
- Concentration risk;
- Non-life underwriting risk; and
- Operational risk.

Corporate Guarantee has complied with all solvency capital requirements during the current and prior financial years.

Refer to note 1.19 for the determination of fair values for financial liabilities.

The carrying amounts of the financial liabilities at amortised cost approximate their fair values.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS continued
for the year ended 31 March 2026

32. Commitments

Authorised capital expenditure

The group has not entered into any contracts to purchase property, plant and equipment.

33. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business. Management is not aware of any material uncertainties related to events or conditions that may cast significant doubt upon the group's and company's ability to continue as a going concern.

34. Events after the reporting date

There were no material events after the reporting date and up to the date of approval of these financial statements that required adjustment or disclosure in the group and company annual financial statements for the year ended 31 March 2026, other than that a dividend of 18,00 cents per share was declared by the directors subsequent to year end, payable to shareholders registered on 17 July 2026.

Melanie L de Nysschen was appointed as an independent non-executive director of the company, effective 27 May 2026. She will serve as chairperson of the remuneration and nomination committee and as a member of the audit and risk, and social and ethics committees.

35. Earnings per share

Basic earnings per share

The basic earnings per ordinary share from operations for the year is 69,35 cents (2025: 37,89 cents). The calculation of basic earnings per share from operations is based on profit of R37,06 million (2025: profit of R20,25 million) and a weighted average number of shares in issue of 53 443 500 (2025: 53 443 500).

Diluted earnings per share

The diluted earnings per ordinary share from operations for the year is 69,35 cents (2025: 37,89 cents). There are no dilutive instruments outstanding.

Headline earnings per share

The headline earnings per share from operations for the year is 69,40 cents (2025: 37,66 cents). The calculation of headline earnings per share from operations is based on profit of R37,10 million (2025: profit of R20,13 million) and a weighted average number of shares in issue of 53 443 500 (2025: 53 443 500).

Diluted headline earnings per share

The diluted headline earnings per share from operations for the year is 69,40 cents (2025: 37,66 cents). There are no dilutive instruments outstanding.

Figures in R'000	Profit on ordinary activities	Taxation	Non- controlling interest	Net profit

¹ The segment has one furniture retail store in South Africa, situated in Louis Trichardt. Nictus places the customer first by continually striving towards excellence. Helpful personnel provide service with dedication and motivation, while maintaining integrity, focus and sound values. Products are of the highest quality and provide excellent value for money.

² The insurance segment of the group is run through Corporate Guarantee (South Africa) (RF) Limited, which brings a unique approach to non-life insurance through the alternative risk transfer model. The head office is currently situated in Steyn City and utilises group administration staff.

³ The sale of goods consists of revenue from goods transferred to customers at a point in time.

⁴ Rendering of services consists of revenue from services provided to customers over time amounting to R0,18 million (2025: R0,31 million). The remainder is provided at a point in time.

⁵ The segment assets and liabilities include tax assets and liabilities and have been included in the elimination column to agree to the amounts per the financial statements. On the next page, a reconciliation is performed to reflect the amount for segment assets and liabilities as defined in the accounting policies.
